INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Correction

In FR Doc. 83–13573 beginning on page 22813 in the issue of Friday, May 20, 1983, make the following corrections:

On page 22814, center column, MC 160200 (Sub-7), Hoffman Transfer, Inc., line 12, "IA" should have read "LA". Also, in line 14, "NM" should have read "MN".

BILLING CODE 1505-01-M

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notice of approved exemptions.

SUMMARY: The motor carriers shown below have granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: These exemptions will be effective on July 14, 1983. Petitions for reconsideration must be filed by July 5, 1983. Petitions for stay must be filed by June 24, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: For futher information, see the decision(s) served concurrently in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 227, 12th and Constitution Ave., NW, Washington, DC 20423; or call (202) 289–4357 in the DC metropolitan area; (800) 424–5403 Toll-free outside the DC area.

Agatha L. Mergenovich,

Secretary.

[No. MC–15177]

Presto Transportation, Inc.—Purchase Exemption—Shoemaker Trucking Company (Loren Wetzel, Trustee-in-Bankruptcy)

ADDRESSES: Send pleadings to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and

(2) Petitioner's Representative: David E. Sishney, P.O. Box 837, Boise, ID 83701.

Pleadings should refer to No. MC–F–15177.

Decided: June 6, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(e), the purchase by Presto Transportation, Inc. of the authorities issued to Shoemaker Transportation Company in No. MC–138875 Sub-Nos. 266F, and 305 and paragraph 59 of Sub-No. 312X, which involves the transportation of such commodities as are dealt in by drug and discount stores between counties in 7 States and points in the United States, as well as authority to transport plastic and plastic articles, food, and such commodities as are dealt in by retail, gift and curio stores and catalog distribution centers on an equally limited radial basis.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

[No. MC–F–15207]

Motrux Transportation, Ltd.—Purchase Exemption—Melgaard Freight Systems, Ltd.

ADDRESSES: Send pleadings to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washtington, DC 20423; and

(2) Petitioner's representative: Michael D. Duppenthaler, 211 South Washington Street, Seattle, WA 98104.

Pleadings should refer to No. MC–F–15207.

Decided: June 6, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(1), and (3), the purchase by E. M. Brooks Transport Ltd., a wholly owned subsidiary of Motrux Transportation, Ltd. (MC–154912), of certain property and all of the interstate operating authority of Melgaard Freight Systems, Ltd. (MC–154304), which allows transportation of machinery, construction materials and supplies, metal and metal products, between points on the Washington, Idaho, and Montana, on the one hand, and on the other, points in Washtington, Oregon, Idaho, California, Nevada, Arizona, Colorado, Wyoming, Montana, Texas, Oklahoma, New Mexico, Utah, Kansas, Nebraska, North Dakota, and South Dakota, and the subsequent merger of Brooks with Motrux after the purchase has been consummated.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

BILLING CODE 7035-01-M

[No. MC–C–10854]

Motor Carriers; Laidlaw Transport Limited—Canadian Gateways—Petition for Declaratory Order

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of petition for a declaratory order and alternative request for institution of rulemaking proceeding.

SUMMARY: Petitioner seeks a declaratory order determining (1) whether it may lawfully join two separate United States certificated operating authorities, each restricted against tacking and each authorizing operations between a point on the United States-Canada International Boundary line and a point in the United States, by using Canadian Provincial operating authority as a bridge between them in order to perform through United States domestic transportation from a service point in one U.S. authority to a service point in the other; and, (2) if the operations described in (1) are lawful, whether it can perform a direct service over any available U.S. route between a U.S. service point origin in one U.S. authority and a U.S. service point destination in the other U.S. authority, thereby eliminating the U.S.-Canada gateways, under the Commission's gateway elimination regulations at 49 CFR 1042. If the Commission finds such direct operations not permissible under the gateway elimination regulations, petitioner requests initiation of a rulemaking proceeding to modify the regulations to authorize such operations.

DATES: Written comments are due 30 days from the date of publication of this notice in Federal Register.

ADDRESSES: Send an original and eight copies of comments to: MC–C–10854, Room 2203, Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

Send one copy of comments to petitioner's representative: Harold G. Hernly, Jr., P.O. Box 19143, Alexandria, VA 22320.

FOR FURTHER INFORMATION CONTACT: Joseph B. O'Malley, Jr., (202) 275–7928; or

Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: The first issue presented here is whether Canadian operating authority can serve

as a bridge between two United States certificated authorities restricted against tacking in order to allow a through service not otherwise permitted between various points in the United States. That is, may a carrier originate a shipment at one point in the United States under a U.S. operating certificate for transportation to the United States-Canada International Boundary line, join with Canadian authority at that point for movement through Canada to another point [1] on the International Boundary line, and join again with a second U.S. authority for delivery to a point in the United States?

In support of its argument that such operations are lawful, petitioner points out that, notwithstanding the restrictions against joinder, the certificates in question do authorize transportation in foreign commerce, which transportation must necessarily involve joinder of United States and Canadian authorities at a common service point on the International Boundary line. Petitioner acknowledges the Commission's long-standing prohibition against joining two restricted authorities with an unrestricted authority as a bridge in order to negate the effect of the restrictions, but it argues that inasmuch as the Canadian authority is beyond the jurisdiction of the Commission, there is no "recognizable" bridging of the restricted authorities. It contends that the Commission can be concerned only with the two United States authorities. It concludes that there is no restriction against tacking under the circumstances presented and that actual operation by Laidlaw through Canada is a lawful service.

The second issue is, assuming the ability to provide the indirect service described above, whether petitioner can avail itself of the Commission's gateway elimination rules at 49 CFR 1042 to provide a direct service between United States points without the necessity of operating through or to Canada at all. Petitioner points out that three factors must be present for gateway elimination under the language of 49 CFR 1042.12: (1) separate grants of authority, (2) one or more grants of irregular-route authority, and (3) a common service point at which the authorities can lawfully be tacked to perform through service. Petitioner contends that all three factors are in fact present under the circumstances it describes.

The petition seeks a declaratory order as to whether the described indirect operations through Canada are lawful, and, if so, whether, direct service between United States points is permissible under the Commission's gateway elimination rules. Petitioner argues that both types of operations are permissible under existing statutes and regulations, but if the Commission should determine otherwise, it requests modification of Commission regulations through rulemaking specifically to permit such operations.

No oral hearing is contemplated. Any person, including petitioner, desiring to participate in this proceeding shall file with the Commission an original and eight copies of written representations, views, or arguments. A copy of each representation also must be served on petitioner's representative.

Written material submitted will be available for public inspection at the Office of the Interstate Commerce Commission, 12th Street and Constitution Avenue, N.W., Washington, D.C. during regular business hours.

Notice to the general public of this matter will be given by depositing a copy of this notice in the Office of the Secretary of the Commission for public inspection and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-15966 Filed 6-13-83; 8:45 am]

BILLING CODE 7035-01-M

[1] Petitioner indicates that actual movement in Canada may be more theoretical than actual, inasmuch as only one point on the Boundary line may be involved.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the Federal Register on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the Federal Register December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after Novermbet 19, 1982, are governed by Subpart D or 49 CFR Part 1160, published in the Federal Register on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consisitent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days

from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.— All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where services is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

BILLING CODE 7035–01–M

[Ex Parte No. 388 (Sub-28)]

State Intrastate Rail Rate Authority—Pub. L. 96-448—Pennsylvania

AGENCY: Interstate Commerce Commission.

ACTION: Assumption of commission Jurisdiction over Pennsylvania Intrastate Rail Transportation.

SUMMARY: Pursuant to a request from the Pennsylvania Public Utilities Commission (PUC) the Commission will assert jurisdiction over intrastate freight rates in Pennsylvania and decertify the PUC.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: In Ex Parte No. 388, *State Intrastate Rail Rate Authority—Pub. L 96-448*, 47 FR 5786, served February 8, 1982, the Commission extended provisional certification pursuant to 49 U.S.C. 11501 to 36 States, including Pennsylvania, in order to allow each State additional time to submit standards and procedures which confirm the State's intention to exercise its jurisdiction in conformance with Federal law.

In a letter dated March 10, 1983, the PUC states that it will not seek final certification to regulate intrastate freight rates. PUC specifically requests that this Commission exercise jurisdiction over Pennsylvania's intrastate railroad freight rates. Consequently, the Commission shall assume jurisdiction over intrastate rail transportation in Pennsylvania immediately. Rail carriers in Pennsylvania shall comply with Commission regulations including the filing of intrastate tariffs with the Commission.

With this notice, we are assuming jurisdiction over Pennsylvania intrastate rates. At the same time, the PUC's provisional certification to regulate Pennsylvania intrastate rates is terminated. Accordingly, parties that wish to continue litigating cases that were pending before the PUC shall advise Deputy Director Gitomer, Rail Section, Office of Proceedings. In the case of pending § 229 cases parties shall consult immediately with Chief Administrative Law Judge Allard. In this way, we will develop, with the parties, appropriate steps in each case to transfer the records and establish procedural schedules.

This decision does not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 11501)

Decided: June 3, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period May 30, 1983–June 3, 1983.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-14, 175; Teledyne Portland Forge, Portland, IN

In the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA-W-14, 587; Mine #7 of Amherst Coal Co., Logan County, WV

TA-W-14, 386; Campbell Industries, San Diego, CA

TA-W-13, 940; Stauffer Chemical Co., Gallpolis Ferry, WV

Affirmative Determinations

TA-W-14, 165; Misty Manufacturing Corp., Parkersburg, WV

A certification was issued covering all workers separated on or after April 1, 1982 and before April 1, 1983.

TA-W-13, 902; Lone Star Steel Co., Lone Star, TX

A certification was issued covering all workers separated on or after December 31, 1981.

TA-W-14, 160; Doris Ann Fashions, Inc., Union City, NJ

A certification was issued covering all workers separated on or after September 1, 1982 and before February 1, 1983.

TA-W-13, 918; Meyer-World Div., Figgie International, Inc., West Boylston, MA

A certification was issued covering all workers of the firm separated on or after October 22, 1981.

I hereby certify that the aforementioned determinations were issued during the period May 31, 1983–June 3, 1983. Copies of these determinations are available for inspection in Room 9120, U.S. Department of Labor, 601 D Street, N.W. Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Marvin M. Forks,

Director, Office of Trade Adjustment Assistance.

Dated: June 7, 1983.

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or theatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 24, 1983.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 24, 1983.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C. this 6th day of June 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Office of Pension and Welfare Benefit Programs

Plumbers Local Union No. 14, et al.; Grant of Individual Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate), the applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408 (a) of the Act and/or section 4975 (c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Plumbers Local Union No. 14 Pension and Education Funds, Located in Lodi, New Jersey

[Exemption Application No. D-2490 and L-2491, Prohibited Transaction Exemption 83-93]

Exemption

The restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the loan (the Loan) of money by the Plumbers Local Union No. 14 Pension Fund (the Pension Plan) to the Plumbers Local Union No. 14 Education Fund (the Education Plan, collectively, the Plans), a party in interest with respect to the Pension Plan, provided that the terms and conditions of the Loan are at least as favorable to the Plans as the Plans could obtain in a transaction with unrelated parties.

The applicant has represented that it has comlied with the requirements of notice to interested persons as stated in the notice of pendency. No requests for a public hering were received, however, the Department did receive one comment on the proposed exemption. The commentator questioned the

accuracy in the amount of Pension Plan assets as stated in the notice of proposed exemption as published in the Federal Register (47 FR 56081, December 14, 1982) and the growth in the assets of the Pension Plan from $6,961,000 to $11,480,549 during the years 1980 to 1982. The commentator also stated that the Education Plan will be subject to a prepayment penalty for retiring a pre-existing loan between an unrelated bank and the Education Plan with the proceeds of the Loan. The remainder of the commentator's comments appeared to the Department to be outside the scope of the requested exemption.

The applicant was asked to respond to the comments of the commentator. In response to the relevant comments the applicant stated that the amount of the assets of the Pension Plan as stated in the notice of proposed exemption was correct and growth of the assets of the Pension Plan was evidence of its excellent finaicial condition. Also, the applicant stated, the pre-existing loan between the unrelated bank and the Education Plan contined no prepayment penalty clause.

The Department has considered the comments of the commentator, the response by the applicant together with the record as a whole and had made a final determination that the exemption should be granted as proposed.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on December 14, 1982 at 47 FR 56081.

For Further Information Contact: Louis Campagna of the Department, telephone (202) 523-8973. (This is not a toll-free number.)

Beverly Hills Travel Bureau, Inc., Defined Benefit Pension Plan (the Plan), Located in Beverly Hills, California

[Exemption Application No. D-3642; Prohibited Transaction Exemption 83-94]

Exemption

The restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the purchase of certain real estate by the Plan (including the making of payments under an existing mortgage) from Charles C. Tilbury, Sally C. Tilbury, Dennis E. McNulty, and Teresa L. McNulty, parties in interest with respect to the Plan, provided that the terms of the transaction are at least as favorable to the Plan as those the Plan could obtain in an arm's length transaction with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 19, 1983, at 48 FR 16783.

For Further Information Contact: Mrs. Miriam Freund, of the Department, telephone (202) 523-8971. (This is not a toll-free number.)

Cornell-Carr Co., Inc., Profit Sharing Plan (the Plan), Located in Bridgeport, Connecticut

[Exemption Application No. D-3699; Prohibited Transaction Exemption 83-95]

Exemption

The restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the loan of $60,000 by the Plan to Cornell-Carr Co., Inc. over a ten-year period, provided that the terms of the loan are not less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated party on the date of the consummation of the transaction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983, at 48 FR 14076.

For Further Information Contact: Ms. Linda M. Hamilton of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Town and Country Properties, Inc., Profit Sharing Plan (the Plan), Located in Arlington, Virginia

[Exemption Application No. D-3800; Prohibited Transaction Exemption 83-96]

Exemption

The restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the past exercise on September 11, 1981 of the voting rights of certain common stock (the Stock) owned by the Plan by Emanuel A. Baker, Jr. (Baker), a fiduciary with respect to the Plan, through which exercise Baker was elected to the board of directors of the corporation which issued the Stock.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983, at 48 FR 14078.

For Further Information Contact: Louis Campagna of the Department, telephone (202) 523-8973. (This is not a toll-free number.)

The C&S Profit Sharing Plan of Citizens and Southern Georgia Corporation and its Affiliates; The Riverside Manufacturing Company Profit Sharing Plan; The Augusta Iron and Steel Works Profit Sharing Plan; and the Bank of Canton Retirement Plan (collectively, the Plans), Located in Atlanta, Georgia

[Exemption Application No. D-3820, D-3821, D-3822 and D-3823, Prohibited Transaction Exemption 83-97]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply, effective November 4, 1982, to the sale of stock by the Plans to the Citizens and Southern Georgia Corporation for cash and/or other consideration, under the terms of certain mergers as described in the notice of proposed exemption, provided the terms of each transaction are not less favorable to the Plans than those obtainable in an arm's-length transaction with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on February 4, 1983 at 48 FR 5400.

Effective Date: This exemption is effective November 4, 1982.

Written Comments and Hearing Requests: The Department received one letter submitted by the applicants in which the applicants stated that they were unable to comply with the notice to interested persons requirements as set forth in the application.

Pursuant to conversations with the Department, the applicants notified all interested persons that the period to submit comments and hearing requests was to be extended until May 31, 1983. The applicants confirmed to the Department that interested persons were so notified by April 21, 1983.

The Department received no comments or requests for a public hearing from any interested persons.

The Carpenters District Council of Kansas City and Vicinity Vacation Plan (the Vacation Plan) and the Carpenters District Council of Kansas City and Vicinity Health and Welfare Plan (the Welfare Plan), Located in Kansas City, Missouri

[Exemption Application Nos. L–3857 and L–3858, Prohibited Transaction Exemption 83–90]

Exemption

The restrictions of section 406(b)(2) of the Act shall not apply to the transfer by the Vacation Plan to the Welfare Plan of approximately $39,870 in residual assets.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983 at 48 FR 14079.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

Dakota Clinic Money Purchase Plan and Profit Sharing Plan (the Plans), Located in Fargo, North Dakota

[Exemption Application Nos. D–3907 and D–3906; Prohibited Transaction Exemption 83–99]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed loan of funds (the Loan) by each of the Plans to Medical Properties, Inc., a party in interest with respect to the Plans, provided that the terms and conditions of the Loan are not less favorable to the Plans than those obtainable in a similar transaction with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983 at 48 FR 14081.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Scheumann Lumber Employees Pension Plan and Trust (the Plan), Located in New York, New York

[Exemption Application No. D–3924; Prohibited Transaction Exemption 83–100]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to: (1) A loan (the Loan) by the Plan of $350,000, not to exceed 25 percent of the assets of the Plan, to Four B's Realty Company (the Partnership), provided the terms and conditions of the Loan are at least as favorable to the Plan as those obtainable in an arm's length transaction with an unrelated party; and (2) the assignment of rents due under a lease executed between A.B. Scheumann Lumber Corporation and the Partnership in the event of a default on the Loan.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 19, 1983 at 48 FR 16786.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

The Hillerich and Bradsby Retirement Plan (the Plan) Located in Louisville, Kentucky

[Exemption Application No. D–3983; Prohibited Transaction Exemption 83–101]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale for $374,000 in cash of certain real property (the Real Property) by Hillerich and Bradsby to the Plan, provided the amount paid for the Real Property is not more than its fair market value at the time the transaction in consummated.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 19, 1983 at 48 FR 16788.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

J. C. Penney Co., Inc. (Penney), Located in New York, New York

[Exemption Application No. D–4057, Prohibited Transaction Exemption 83–102]

Exemption

The restrictions of section 406(a) and (b) of the Act shall not apply to the reinsurance of risks and the receipt of premiums therefrom by J. C. Penney Life Insurance Company from the life insurance contracts sold by the Prudential Insurance Company of America to provide benefits to various employee benefit plans (the Plans) maintained by Penney, provided the conditions set forth in the notice of proposed exemption are satisfied.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983 at 48 FR 14084.

Written Comments and Hearing Requests

The Department received four comments on the proposed exemption. One comment was submitted by the applicants in order to correct an error that appeared in the application. The application had stated that the Plans which were the subject of the exemption request included: (1) A group term life insurance plan for Penney employees provided at Penney's expense; (2) contributory and non-contributory term life insurance plans for employees of Penney disabled before April 1, 1982; and (3) contributory and non-contributory term life insurance for certain retired management employees of Penney. In the comment letter, the applicants indicated that one Plan had been omitted, non-contributory term life insurance for employees disabled after April 1, 1982. The applicants represent that this addition in no way affects any other facts or representations contained in the application.

The Department also received two comments requesting information concerning the proposed exemption, and the Department provided the requested information via telephone. The fourth comment received did not address any of the substantive issues contained in the proposed exemption. The Department received no requests for a public hearing.

For Further Information Contact: Gary H. Lefkowitz of the Department, Telephone (202) 523–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404

of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 7th day of June, 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-3709]

Withdrawal of the Proposed Exemption Involving the Rome Radiology Group, P.A., Money Purchase Pension Plan, Located in Rome, Georgia

In the Federal Register dated April 1, 1983 (48 FR 14076), the Department of Labor (the Department) published a notice of pendency of a proposed exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 and from certain taxes imposed by the Internal Revenue Code of 1954. The notice of pendency concerned an application filed on behalf of the Rome Radiology Group, P.A.

In a letter of May 10, 1983, the applicant's representative notified the Department that an exemption for the transaction described in the above cited notice was no longer sought.

Accordingly, the representative requested that the application for exemption be withdrawn from consideration by the Department.

Signed at Washington, D.C. this 6th day of June, 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor Management Services Administration, U.S. Department of Labor.

[FR Doc. 83-15692 Filed 6-13-83; 8:45 am]

BILLING CODE 4510-29-M

Cox, Cummins & Lamphere, et al.; Proposed Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Cox, Cummins & Lamphere Profit Sharing Plan (the Profit Sharing Plan) and Cox, Cummins & Lamphere Pension Plan (the Pension Plan) (collectively, the Plans Located in Martinez, California

[Application Nos. D-3637 and D-3638]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale by the Plans of a 10.4 percent limited partnership interest (the Interest) in a real estate limited partnership known as Country Plaza (the Partnership) to Mr. James E. Cox (Mr. Cox), a party in interest with respect to the Plans, for cash in the amount of $197,665, provided that this amount is not less than the fair market value of the Interest at the time the sale is consummated.

Summary of Facts and Representations

1. On June 30, 1981, the Profit Sharing Plan had six participants and net assets of approximately $3,764,453 and the Pension Plan had six participants and net assets of approximately $520,413. The trustees (the Trustees) of the Plans are Mr. Cox, Bernard F. Cummins and

Paul O. Lamphere, who are also principles of Cox, Cummins & Lamphere, P.C., (the Employer), the sponsor of the Plan. Investment decisions for the Plans are made by the Trustees, except that, effective October 31, 1981, the Profit Sharing Plan was amended to allow participants who are 100% vested to elect to individually direct the investment of their own accounts.

2. The Partnership was formed to own and operate a shopping center (the Property) in Fresno, California. In 1978, the Plans purchased the Interest in the Partnership from unrelated parties for cash in the amount of $197,665. Of this amount, $138,365 was paid by the Profit Sharing Plan and $59,300 was paid by the Pension Plan. At the time of the Plans' purchase of the Interest, the Property had a fair market value of approximately $3,900,000 and liabilities of approximately $2,000,000, causing the equity of all the partners to be approximately $1,900,000. Neither the general partner nor any of the other limited partners were parties in interest with respect to the Plans. By the terms of the limited partnership agreement, each limited partner was guaranteed an annual return of 9% on its investment.

3. In September, 1980, the general partner, Walker, Pinkston & Company (the General Partner), filed a petition for reorganization under 11 U.S.C. 1101. At that time, there were lawsuits pending against the General Partner, resulting in serious risk of foreclosure on the Property. In addition, the Partnership had become delinquent in its guaranteed payments to the limited partners. The amount owed to the Plans, as of July 6, 1982, was approximately $19,500.

4. In May, 1982, Mr. Cox, who is a principal of the Employer and also a trustee of the Plans, purchased the 25.6% interest of the General Partner for cash in the amount of $200,000. This purchase was approved by the bankruptcy court on behalf of the General Partner and by a seven-member committee of major creditors of the General Partner. On June 7, 1982, Mr. Cox also purchased a 25% limited partnership interest in the Partnership from one of the limited partners for $313,500 and a 28.6% limited partnership interest from another limited partner for $360,000. The application states that each of the sellers of these limited partnership interests was fully informed, represented by astute counsel and had independent, qualified real estate representation available to them at the time they entered into the sales of their respective interests. Based on the June 7, 1982 sales, the Interest owned by the Plans would have a value of approximately $130,679.

5. If an exemption is granted, Mr. Cox proposes to purchase the 10.4% Interest owned by the Plans for $197,665. This amount is equal to the original price paid by the Plans in 1978. In addition, Mr. Cox will pay the amount of the delinquent guaranteed annual return owed to both Plans, totalling approximately $19,500.00. The total amount will be paid in cash to the Plans. Proceeds from the proposed sale will be allocated to each of the Plans in proportion to each Plan's investment in the Interest.

6. The Trustees state that if the application is denied, the Plans will be forced to continue to hold an illiquid minority interest in the Partnership. In addition, the Plans are not receiving the 9% per annum guaranteed return. If the exemption is granted, the Plans will recover 100% of their initial investment, plus a return of 9% per annum for the period in which the Interest was held. The Trustees represent, after consultations with persons involved in real estate investments, that it is unlikely that another purchaser could be found for the Plans' Interest at as favorable a price as that offered by Mr. Cox. Based on the factors cited above, the Trustees of the Plans and all participants in the Profit Sharing Plan whose accounts are individually directed, have represented in writing their belief that the proposed sale is in the best interest of the Plans and their participants and beneficiaries.

7. In summary, the applicants represent that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because:

(a) This is a one-time transaction for cash;

(b) The Plans will be able to dispose of the Interest without suffering a loss; and

(c) The Trustees of the Plans and all participants whose accounts in the Profit Sharing Plan are individually directed have stated in writing their belief that the proposed sale is in the best interests and protective of the Plans' participants and beneficiaries.

Capital Guardian Trust Company (the Bank) Located in Los Angeles, California

[Application No. D-3697]

Section I. Covered Transactions. The restrictions of section 406(a), 406(b)(1) and (2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (E) thereof shall not apply to the transactions described below if the applicable conditions set forth in Section II are met:

A. The acquisition or disposition, with employee benefit plan (Plan) assets, of shares in an American Funds Group investment company (Investment Company(ies), discussed in detail below), at the direction of the Bank;

B. The transfer of Plan assets to or from an Investment Company, at the direction of the Bank;

C. The Bank's recommendation that Plan assets be allocated to an Investment Company and any investment of Plan assets in an Investment Company that results from such recommendation;

D. The receipt by the Bank and its affiliates of certain fees and compensation related to the provision of asset allocation services (hereinafter referred to as Discretionary Asset Management Services) described in this Section I.

Section II. Conditions. The exemption provided for transactions described in Section I is available only if each of the following conditions is met:

A. The Discretionary Asset Management Services are authorized pursuant to a written agreement between the Plan (or an independent fiduciary on behalf of the Plan) and the Bank, which agreement has been signed by an independent fiduciary on behalf of the Plan.

B. The combined total of all fees and other consideration received by the Bank or its affiliates relating to the provision of Discretionary Asset Management Services is not in excess of reasonable compensation pursuant to section 408(b)(2) and 408(c)(2) of the Act and section 4975(d)(2) and 4975(d)(10) of the Code.

C. Neither the Bank nor any affiliate thereof is an employer of any employee covered by the Plan.

D. In the case of any transaction described in paragraphs A through C of Section I that constitutes, or results in, the investment of Plan assets in any Investment Company any of the assets of which are, or may be, assets other than "publicly traded securities," such transaction is specifically authorized by an independent fiduciary of the Plan whose assets are involved in such transaction. For the purposes of this paragraph D and paragraph M of this section, "publicly traded securities" are securities that are not "restricted securities" within the meaning of Rule 144 of the Securities Act of 1933.

E. The authorization referred to in paragraph A of this Section II continues in effect for more than one year only if such continuance is authorized in writing at least annually by an independent fiduciary of the Plan for which Discretionary Asset Management Services are performed.

F. No such authorization is made or renewed unless the Bank shall have furnished the independent Plan fiduciary with any reasonably available information which the Bank reasonably believes to be necessary to determine whether such authorization should be made or renewed, and any other reasonably available information regarding the matter that the independent fiduciary may reasonably request.

G. In the case of an initial authorization, the information required by paragraph F of this Section II shall include, but is not limited to:

(1) A description of the Discretionary Asset Management Services to be rendered by the Bank;

(2) The schedule of the specific fees charged by the Bank or paid by the Bank to its affiliates relating to the performance of Discretionary Asset Management Services including the investment advisory fee paid by the Bank to its affiliates and fees charged in connection with the acquisition or disposition of shares in an Investment Company or the transfer of Plan assets to or from such Investment Company;

(3) A description of the steps a Plan must take in order to terminate the agreement made for it by its independent fiduciary which authorizes the performance of Discretionary Asset Management Services;

(4) A description of the steps a Plan must take to liquidate its investment in any Investment Company that has been made at the direction or recommendation of the Bank; and

(5) A full description of the consequences to the Plan of terminating any agreement under which the Bank performs Discretionary Asset Management Services and a full description of the consequences to the Plan of the liquidation of any investment of the Plan assets in an Investment Company that may be made at the direction or recommendation of the Bank.

H. In the case of any renewal of an authorization, the information required to be disclosed by paragraph F of this Section II shall include, but is not limited to:

(1) A description of any changes in matters specifically required to be disclosed by paragraph G of this Section II (relating to an initial authorization);

(2) A statement of the value, as of a date within 90 days of the date such information is furnished, of the Plan's investment, if any, in each Investment Company to which its assets have been allocated at the direction or recommendation of the Bank regardless of when such allocation was made;

(3) A general statement of the manner in which the Bank determines the value of the Plan's investment in each Investment Company to which its assets have been allocated.

I. No change in the substance of any matter specifically required to be disclosed by paragraph G of this Section II (relating to an initial authorization) is effective as to a Plan until the earlier of:

(1) The date on which an independent Plan fiduciary specifically consents to such change; or

(2) The first date after disclosure of such change pursuant to paragraph H of this Section II on which an independent Plan fiduciary renews the Bank's authorization to perform Discretionary Asset Management Services.

J. The Bank furnishes the authorizing fiduciary with a report containing at least the following information not less frequently than every three months and not later than 45 days following the end of the period to which the report relates:

(1) The total of all charges that are attributable to the Plan relating to the Bank's provision of Discretionary Asset Management Services during the preceding three months;

(2) The amount of such charges, by category, including:

(a) Fees for the provision of Discretionary Asset Management Services,

(b) The investment advisory fee paid by the Bank to each Investment Company in which the Plan's assets are invested during the period to which the report relates,

(c) Any charge relating to the acquisition or disposition of an interest in an Investment Company or the transfer of Plan assets to or from such an Investment Company, and

(3) A description of each acquisition with Plan assets or disposition of the Plan's interest in an Investment Company, including the date of such transaction and the amount involved.

K. That portion of any agreement pursuant to which the Bank performs Discretionary Asset Management Services is terminable by the Plan, without penalty or charge, on not more than 30 days' notice.

L. The Plan is able to liquidate its investment in any Investment Company to which its assets have been allocated at the direction or recommendation of the Bank on not more than 90 days' notice (unless an independent Plan fiduciary has agreed in writing to an extension of such 90 day period).

M. No penalty or other charge is made with respect to the withdrawal of Plan assets from an Investment Company, except the following:

(1) A reasonable charge for accounting and recordkeeping services actually rendered in connection with such liquidation;

(2) A charge not in excess of the amount reasonably necessary to reimburse the Investment Company for direct expenses properly and actually incurred in connection with the liquidation of the Plan's investment in the Investment Company; and

(3) In a case where a Plan has requested withdrawal of its assets from an Investment Company any of the assets of which are invested in property other than "publicly traded securities" (as defined in paragraph D of this Section II), a charge not in excess of the amount reasonably necessary to reimburse to such Investment Company an amount equal to—

(a) The difference, if any, between the "fair market value," determined as of the date of withdrawal, of any assets of the Investment Company that are disposed of in order to liquidate the Plan's investment and the amount actually received on disposition; less,

(b) That portion of such difference that bears the same relationship to the total amount of the difference as the value of the withdrawing Plan's interest in the Investment Company, determined immediately prior to its withdrawal, bears to the aggregate value of all interests in such Investment Company, determined immediately prior to the Plan's withdrawal.

For the purposes of this paragraph M, the "fair market value" of an asset means the fair market value of such asset as reasonably determined in writing by a person who is reasonably qualified to form an opinion regarding the fair market value of the asset and who is agreed to in writing by an independent fiduciary of the withdrawing Plan. Such person may be designated in the instrument authorizing the Bank to perform Discretionary Asset Management Services.

Section III. Definitions. For the purpose of this exemption—

A. An "affiliate" of a person includes—

(1) Any person, directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person;

(2) Any officer, director, employee or relative of, or partner in, any such person; and

(3) Any corporation or partnership of which such person is an officer, director, partner or employee.

B. The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

C. The term "Discretionary Asset Management Services" has the meaning given it in Section I.

D. The term "party in interest" includes a "disqualified person" described in section 4975(e)(2) of the Code.

E. The term "relative" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(5) of the Code), or a brother, a sister, or a spouse of a brother or sister.

Summary of Facts and Representations

1. The Bank is a wholly-owned subsidiary of the Capital Group, Inc. and offers comprehensive non-discretionary trust services to the Plans. The Bank does not possess or exercise discretionary authority with respect to either Plan administration or management, nor does it provide investment management for a fee.

2. The Bank proposes to offer Discretionary Asset Management Services to the Plans whereby the Bank would allocate Plan assets among eleven registered Investment Companies which are members of the American Funds Group.[1] Each Investment Company in the American Funds Group is an open-end, diversified, management investment company. The securities of each of the Investment Companies are sold with a sales charge or "load," with the exception of The Cash Management Trust of America which is a "no-load" fund sold without commission. The Investment Companies to be offered to the Plans are structurally and functionally similar. They differ only in such characteristics as type of investment advisory contract and investment objective. The investment advisor for each of the Investment Companies is Capital Research and Management Company, a registered investment advisor under the Investment Advisors Act of 1940, which is a wholly-owned subsidiary of the Capital Group, Inc.

3. American Funds Distributors, Inc. (American Funds Distributors) is a wholly-owned subsidiary of Capital Research and Management Company. American Funds Distributors is, with one exception, the principal underwriter of the securities of Investment Companies. American Funds Distributors is registered with the Securities and Exchange Commission as a broker-dealer under the Securities Exchange Act of 1934.

4. American Funds Distributors is involved in the sale of securities issued by Investment Companies to broker-dealers (Broker-Dealers) who are members in good standing of the National Association of Securities Dealers. These broker-dealers are independent of and unrelated to the Bank. Broker-Dealers purchase securities issued by Investment Companies from such Investment Companies (through American Funds Distributors) as principals for their own accounts. The Broker-Dealers then re-sell such securities to, among other persons, Plans subject to the Act and the Code.

5. In connection with the sale of securities issued by the Investment Companies, both American Funds Distributors and the Broker-Dealers receive compensation. If, for example, the Bank acquired securities of the Investment Company of America (ICA) on behalf of a Plan, it would acquire such shares from an independent and unrelated Broker-Dealer at the public offering price. The public offering price per share would be the net asset value per share plus the sales charge specified in ICA's prospectus (offering price = net asset value + sales charge). The sales charge, which varies with the size of the investment, is shared by the Broker-Dealer and American Funds Distributors pursuant to a written agreement. The shareholders of the Investment Companies, other than the no-load Cash Management Trust of America, may purchase shares of any of the other Investment Companies without a sales charge, with the proceeds of the redemption of their shares.

6. In addition to the trust and administrative services currently provided by the Bank, the Bank proposes to offer Discretionary Asset Management Services which will permit the Bank to allocate Plan assets, which it will be holding as trustee, among the Investment Companies; monitor the post-allocation performance of such investments; and change the allocation of such investments.

7. Discretionary Asset Management Services will be the subject of a written agreement between an independent Plan fiduciary and the Bank, which may be terminated by either party on 30 days' notice. The independent Plan fiduciary will receive periodic reports designed to keep such fiduciary current with respect to investment decisions, asset mix and fees and charges paid to and incurred by the Bank. If an independent Plan fiduciary is interested in considering the provision of Discretionary Asset Management Services by the Bank, the independent fiduciary and representatives of the Bank will analyze the current investment of the Plan's assets. Such analysis will be intented to identify the current investment of the plan's assets and to establish a desired ratio of fixed income to equity risk for the Plan, taking into acount Plan liquidity and diversification needs, current and projected benefit payments, the funding status of the Plan, the financial stability of the Plan sponsor, economic conditions and the status of securities and capital markets. Based on this analysis, the independent fiduciary will determine the percentage of the Plan's assets it wants to be subject to the provision of Discretionary Asset Management Services. Once this percentage has been determined, an allocation of such percentage of the Plan's assets to the various Investment Companies will be made. The independent fiduciary will also decide whether certain Investment Companies are inappropriate or undesirable for Plan investment.

8. In connection with the provision of Discretionary Asset Management Services, the Bank will receive from the Plan a fee equal to 1 percent of the first $50,000,000 of assets subject to such services and ¾ of 1 percent of the excess over $50,000,000 with a minimum fee of $50,000. No other fee will be charged by or paid to the Bank by the Plan with regard to Discretionary Asset Management Services. The Bank will pay the sales charges incurred by the Plan in connection with the acquisition of Investment Company shares and will reimburse the Plan for the fee charged by the Investment Company's advisor based upon the advisor's fee for the Investment Company's preceding fiscal quarter. As a result, the applicant states that it will not make any difference to the Plan whether all or any portion of its assets subject to Discretionary asset Management are initially or subsequently invested in shares of Investment Companies with or without a sales charge or whether there are

[1] The investment companies in the American Funds Group are the AMCAP Fund, American Balanced Fund, American Mutual Fund, The Bond Fund of America, The Cash Management Trust of America, Fundamental Investors, The Growth Fund of America, The Income Fund of America, The Investment Company of America, The New Perspective Fund and The Washington Mutual Investors Fund.

differences in the type of investment advisory agreement.

9. Once the independent Plan fiduciary and representatives of the Bank have decided on the initial allocation of the Plan's assets among the various Investment Companies, the Bank will monitor the performance of all Investment Companies. As appropriate, the Bank, in its sole discretion may, from time to time, make changes in the Plan's investment in such Investment Companies. As a result, the Bank may decide to redeem the shares held on behalf of a particular Plan in a particular Investment Company and/or to acquire the shares of another Investment Company (except the Investment Company or Companies designated by the independent Plan fiduciary as not appropriate for the particular Plan). The applicant emphasizes that, as stated previously, decisions to change the investment mix will not result in additional fees to the Plan.

10. The independent Plan fiduciary will be periodically apprised of activities and fees and other charges relating to the provision of Discretionary Asset Management Services. The independent Plan fiduciary will receive three sets of reports. First, each time there is a transaction, including the initial acquisition of shares and subsequent redemptions and exchanges, the independent Plan fiduciary will receive a confirmation statement showing the current transaction along with a summary of the Plan's transactions during the calendar year to date. These transaction-triggered reports will enable the independent Plan fiduciary to know, at any point in time, the precise allocation of the Plan's assets which are subject to Discretionary Asset Management.

11. Second, the independent Plan fiduciary will receive an annual statement which will indicate the aggregate fees paid by the Plan to the Bank in connection with Discretionary Asset Management Services and in connection with other trust and administrative services.The annual statement also will indicate the aggregate fees (for example, sales charge) paid by the Bank in connection with the acquisition and redemption and exchange of Investment Company shares and the aggregate fees paid by each Investment Company to Capital Research and Management Company, an affiliate of the Bank, which serves as the investment advisor. The annual statement, like the transaction confirmations, will enable the independent Plan fiduciary to monitor the allocation of the Plan's assets among Investment Companies and to analyze performance. In addition the annual statement will keep the independent Plan fiduciary informed of the precise amount of fees and charges paid to and by the Bank. The independent Plan fiduciary will always be in a position to determine the costs and benefits associated with Discretionary Asset Management Services.

12. Third, the independent Plan fiduciary will receive current prospectuses annually as well as periodic shareholder reports of the Investment Companies in which their assets have been invested. The applicant represents that such prospectuses and report will enable the independent Plan fiduciary to carefully analyze each Investment Company and its performance.

13. In summary, the applicant represents that the proposed transaction would meet the statutory criteria of 408(a) of the Act due to the following:

(a) An independent Plan fiduciary will decide on the Plan's behalf whether to utilize Discretionary Asset Management Services;

(b) The provision of Discretionary Asset Management Services and all relevant terms and conditions relating thereto, including the compensation of the Bank, will be subject to a written agreement terminable by the Plans on 30 days' notice;

(c) The Bank will pay all sales charges and investment advisory fees relating to the purchase or redemption of shares of Investment Companies; and

(d) The Plans will receive transaction-triggered reports and other periodic reports regarding Discretionary Asset Management Sevices.

For Further Information Contact: Mr. Robert Sandler of the Department of Labor, telephone (202) 523–8195. (This is not a toll-free number.)

The Drs. Alley Overby, Hagedorn P.A. Employees' Profit Sharing Plan (the Profit Sharing Plan) and the Drs. Alley, Overby, Hagedorn P.A. Money Purchase Pension Plan (the Money Purchase Plan; collectively, the Plans) Located in Boca Raton, Florida

[Application Nos. D–3830 and D–3831]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to (1) the proposed purchase by the Plans of certain medical facilities (the Property) from Aloha Realty Corporation (Aloha), a corporation which is a party in interest with respect to the Plans, and (2) the proposed leasing of the Property by the Plans to Drs. Alley, Overby, Hagedorn, P.A. (the Employer), the sponsor of the Plans.

Summary of Facts and Representations

1. The plans are a profit sharing pension plan and a money purchase pension plan which as of March 31, 1982 had commingled assets of $2,769,408 and 38 participants. The Employer is engaged in the practice of internal medicine in Boca Raton, Florida. The Property, which is presently leased by Aloha to the Employer, is used by the Employer as its principal place of business. The stockholders, officers, and directors of Aloha are also the stockholders, officers and directors of the Employer.

2. The applicant represents that until recently it was anticipated that each shareholder/physician of the Employer would also be a shareholder in Aloha and would own equivalent shares of each corporation. As the value of the Property increased, the cost of an interest in Aloha increased, and the applicant represents that it has become difficult to recruit new physicians who are willing to commit the capital required to purchase an interest in Aloha.

3. The applicant is requesting an exemption which will permit the Plans to purchase the Property from Aloha and lease (the Lease) it to the Employer. The applicant represents that the proposed transactions will be in the best interests of the Plans because the Plans will obtain a valuable property at a price below its appraised fair market value and will realize a rate of return of 12 % on the Lease. Ross Realty and Appraisal, Inc. (Ross), which is located in Boca Raton, Florida, appraised the fair market value of the Property on April 14, 1982 to be $742,000. The Plans will pay Aloha $667,800 for the Property. The Plans will pay Aloha $504,400 in cash and will assume the existing mortgage (the Mortgage) on the Property of $163,400. The Mortgage is an 8⅞% first mortgage on the Property with a remaining term of approximately 13 years. The sale will not involve any sales commissions. The price of $667,800 is approximately 90% of the appraised value of the Property. The applicant represents that the Plans are paying

only 90% of the appraised value of the Property to account for commissions and other selling expenses that Aloha would have to pay in a similar transaction with an unrelated party. In the proposed transactions, the Profit Sharing Plan will contribute 28.57% of the cash for the purchase and will assume the same such percentage of the Mortgage while the Money Purchase Plan will contribute 71.43% of the cash and will assume that same such percentage of the Mortgage. Each Plan will share in the income from the Property in the same percentage as its contribution to the purchase of the Property. Such percentages represent each Plan's interest in the commingled trust. The Lease will be a triple net lease with a term of 15 years. The initial rental under the Lease will be $8.50 per square foot for a total initial annual rental of $82,510. On September 22, 1982, Ross appraised the Property's fair market rental value to be between $8.00 and $8.50 per square foot. The rental under the Lease will be subject to readjustment every two years based upon an independent appraisal to provide for possible increases in rent commensurate with any increases in the fair market rental value of the Property. In no event will the annual rental be less than $82,510. The Lease will require the Employer to insure the Property with insurance acceptable to the Plans.

4. Gulfstream Bank, N.A. (the Trustee), which is located in Ft. Lauderdale, Florida, acting as an independent fiduciary of the Plans, has reviewed the proposed transactions. The Trustee certifies that the proposed transactions will be in the best interests of the participants and beneficiaries of the Plans. In addition, the Trustee certifies that the terms and conditions of the proposed transactions will be at least as favorable to the Plans as those which the Plans could receive in similar transactions with an unrelated party. The Trustee will also monitor the Lease and will represent the Plans' interest thereunder.

5. In summary, the applicant represents that the proposed transactions will satisfy the criteria of section 408(a) of the Act because (1) the Trustee has determined that the proposed transactions will be in the best interests of the Plans' participants and beneficiaries; (2) the transactions will be approved and monitored by the Trustee; (3) the Plans will acquire a valuable property at a price below the appraised fair market value; and (4) the rental rate under the Lease will remain at least the fair market rental rate as determined by an independent appraiser.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

For Further Information Contact: Mr. Richard Small of the Department, telephone (202) 523-7222. (This is not a toll-free number.)

La-Z-Boy Chair Company Employees' Profit Sharing Plan (the Plan) Located in Monroe, Michigan

[Application No. D-3980]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed contributions of certain securities by participants in the Plan to their own self-directed voluntary contributions accounts in the Plan.

Summary of Facts and Representations

1. The Employer is a Michigan corporation engaged primarily in the business of manufacturing and selling upholstered furniture. The Plan is a defined contribution profit sharing plan which had approximately 597 participants and net assets of $14,426,984 on April 30, 1982. The trustee of the Plan (the Trustee) is Monroe Bank and Trust Company, a Michigan banking corporation.

2. The terms of the Plan, as amended and restated effective May 1, 1976, provide that the Employer is required to contribute to the Plan for each taxable year of the Employer an amount determined under a formula set forth in the plan, except that the board of directors of the Employer may authorize an alternative contribution or no contribution for any taxable year. Each Employer contribution is allocated among the participants in the Plan in proportion to the basic salaries of the participants. Separate accounts are established for each participant to which the participants' shares of Employer contributions and the participants' shares of realized and unrealized earnings or losses of the assets of the Plan are allocated.

The Trustee holds, invests and reinvests all Employer contributions and all income from such contributions in a single trust fund without segregating or investing separately the accounts of the participants. An investment committee (the Investment Committee) consisting of three or more members appointed by the board of directors of the Employer is required to direct the Trustee to purchase, retain or dispose of any investments held in the trust fund, excluding such investments held in fixed income investments. Another committee, also consisting of three or more members appointed by the board of directors of the Employer, is responsible for the general administration of the Plan (the Administrative Committee). All members of the Administrative Committee are independent of the Trustee.

3. Effective May 1, 1980, the Plan was amended to permit Plan participants to make non-deductible voluntary contributions to the Plan commencing with the Employer's fiscal year ended April 30, 1981. Under the new provisions, participants in the Plan may make non-deductible voluntary contributions to the Plan in cash or in kind. These contributions may not exceed, in the aggregate, 10 percent of the participant's compensation for all years in which he was a participant in the Plan, nor may any such contribution exceed the annual limitations imposed by section 415 of the Code. All voluntary contributions made by a participant will be credited at the participant's option either to a Plan account maintained by the Trustee, the assets of which will be invested primarily in fixed income assets, or to a self-directed Plan account, the assets of which will be invested and reinvested in accordance with instructions of the participant.[1] The latter account is required to be separately administered and no assests of any other such separate account, nor any other assets, earnings or losses of the trust fund established under the Plan, may be credited to or charged against this separate account. When a participant establishes such a separate account, he assumes full responsibility

[1] The Department is not proposing administrative relief for contributions in kind by participants to accounts which are not self-directed voluntary contribution accounts.

and liability for all investment decisions with respect to the account.

4. The Employer and Trustee have entered into an arrangement with Merrill Lynch Pierce Fenner & Smith, Inc. (Merrill Lynch) with respect to the administration of all self-directed voluntary contribution accounts established by participants. Under this arrangement, any participant who desires to make voluntary contributions to the Plan and to have these voluntary contributions credited to a separate self-directed account (instead of to a separate account maintained by the Trustee and invested primarily in fixed income assets) must complete and sign a contribution form, which the Administrative Committee forwards with the participant's voluntary contribution to Merrill Lynch. Pending investment instructions from the participant, Merrill Lynch will invest any cash contribution in short term fixed income investments, namely Merrill Lynch's "Ready Asset" fund. A separate account is established by Merrill Lynch for each such participant. Each participant having such an account may then instruct Merrill Lynch as to how the funds in the account should be invested and reinvested.

5. An exemption is requested to permit participants in the Plan to make voluntary non-deductible contributions of certain securities to the Plan for allocation to their own self-directed voluntary contribution accounts. Such securities may include securities traded on a national or regional securities exchange or with a brokerage firm acting as principal, securities traded on an over-the-counter-market and common or preferred stocks of national or state chartered banks including stocks of the Trustee, where bid and ask prices of the stock are quoted on the NASDAQ System and/or are published in the Wall Street Journal. No securities could be contributed by a participant unless the contribution is approved in advance by the Administrative Committee. In valuing any securities contributed by a participant for purposes of the limitations of section 415 of the Code and the overall 10% of compensation limitation applicable to employee contributions, the fair market value of the securities contributed as of the end of the day of actual transfer will be used. Where listings appear in the Wall Street Journal, these values will be used. Where separate bid and ask quotes are given, the value taken will be the average of the two quotes.

6. Certain securities will be expressly prohibited. These include commodity contracts, tax exempt municipal bonds, securities issued by the Employer or its affiliates and securities purchased or acquired subject to margin restrictions.

7. In summary, it is represented that the proposed transactions will satisfy the statutory criteria of section 408(a) of the Act because: (a) each transaction will be conducted on the instructions of a Plan participant and only the individual account of such participant will be affected; (b) plan participants will be permitted to enjoy greater flexibility in the investments of their own accounts and will be permitted to contribute to their accounts even if they would not have had sufficient cash to make a contribution otherwise; and (c) the Administrative Committee will monitor the contributions, and will not permit any contributions of commodity contracts, tax exempt municipal bonds, securities issued by the Employer or its affiliates and securities purchased on margin or subject to margin restrictions.

For Further Information Contact: Ms. Katherine D. Lewis of the Department, telephone (202) 523–8972. (This is not a toll-free number.)

ISIS Chemicals, Inc. Employee Profit Sharing Plan (the Plan) Located in Stamford, Connecticut

[Application No. D–3868]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply, for a five year period, to the proposed purchases by the Plan of participation interests from Union Trust Company (Union) in a mortgage note (the Mortgage) executed between Union and ISIS Realty Associates, Ltd. (ISIS Ltd.), parties in interest with respect to the Plan; and (2) the extension of credit between ISIS Ltd. and the Plan resulting from the purchase of the participation interests; provided that (1) no more than 25 percent of the Plan's total assets are invested in the participations; and (2) the Plan pays no more for a participation than it would pay in an arm's-length transaction with an unrelated party.

Temporary Nature of the Exemption: If granted, this exemption will be effective for five years from the date a grant of an individual exemption is published in the **Federal Register** on behalf of the transactions. Subsequent to the expiration of the exemption, the Plan may hold the participations provided they were purchased during the five year period.

Summary of Facts and Representations

1. The plan is a profit sharing plan with approximately 26 participants. As of December 31, 1982, the Plan had total assets of $341,451. Messrs. George G. Voss, John L. Morrow, and Bronson Bump, officers and directors of ISIS Chemicals, Inc. (ISIS), the sponsor of the Plan, serve as Plan trustees and are responsible for Plan investments.

2. ISIS is a corporation engaged in the manufacture of industrial coatings and other finished products. As of June 30, 1982, ISIS had a net worth of approximately $1,196,000. ISIS has certain affiliated companies, ISIS Industries, Inc., ISIS Realty, Inc. (ISIS Realty) and ISIS Ltd.

3. On October 1, 1980, ISIS Ltd. through its general partner, Mr. George Voss, entered into the Mortgage with Union. Union, a subsidiary of Northeast Bankcorp, serves as an agent for the trustees pursuant to an agreement with ISIS, and handles the Plan's accounting and payroll functions. The Mortgage is for a total amount of $350,000. The Mortgage bears interest of 15 percent per annum, and is payable in monthly installments of principal and interest over a fifteen year term. The Mortgage is secured by a duly recorded first mortgage in an improved parcel of real property (the Property) located on the north side of Viaduct Road in Stamford, Connecticut. The Property is improved by one building which is used for industrial and office purposes. Mr. Elwyn V. Chesley, Jr., C.S.A., of Pierson & Smith, Inc. located in Stamford, Connecticut, appraised the Property, and determined that, as of July 7, 1981, it has a fair market value of $1,065,000.

4. The applicant proposes the Plan, for a five year period, to invest up to 25 percent of its total assets in participations in the Mortgage. As of January 1, 1983, the Mortgage had a total outstanding principal balance of $334,032. Each participation will be for a term of five years and provide for annual payments of interest at 15 percent with the principal balance payable at the expiration of the term. The purchase by the Plan of a participation interest in the Mortgage will result in a conversion of that part of the Mortgage to a five year balloon note. As further discussed below, the Plan will not pay more than the fair market value for any participation. The Plan will not pay any expenses in connection

with the purchase of any participation, and Union will service each participation at no cost to the Plan.

5. Each participation will be secured by a duly recorded first mortgage in the Property as the Plan, upon purchase, will accede to the same rights as the mortgagee, Union, through as assignment of part of the first mortgage interest held by Union. Union has agreed to these terms and will relinquish its rights in the Mortgage and the Property with respect to the amount of the principal and unpaid accrued interest, if any, of a participation. Accordingly, the Plan will share pro rata with Union in the recovery of any proceeds from the Property upon a default based upon a percentage of the total amount of the outstanding participation held by the Plan in comparison to the total principal amount of the Mortgage outstanding.

6. The Mortgage is further secured by the personal guarantee of Mr. Voss, the Chairman of the Board of ISIS, and by the pledge by two of the general partners of ISIS Ltd., Messrs. Voss and Frank Richart, to agree not to sell, transfer, or hypothecate any of their interest in ISIS Ltd. without the consent of holder(s) of the Mortgage.

7. Mr. Charles Sims, Chairman of the Board of Firing Circuits, Inc., a corporation located in Norwalk, Connecticut has been appointed to serve as the fiduciary of the Plan with respect to the proposed purchases. Mr. Sims has substantial experience in employee benefit administration, and serves as a trustee for his corporation's employee benefit plans. Mr. Sims is also knowledgeable in commercial and industrial real property matters. Mr. Sims understands his duties, liabilities and responsibilities involved in serving as a fiduciary with respect to the Plan. Mr. Sims has no business or commercial relationships with Mr. Voss, ISIS and its affiliates, or any of the principal officers of ISIS or its affiliates.

8. Mr. Sims has determined that the proposed purchases are appropriate, suitable, and in the best interests of the Plan. Mr. Sims reprsents that the fact that no prinicpal will be paid until the end of the participations' terms does not detract from the quality of the investments. Mr. Sims states that the payments of interest only under the participations assures the Plan of a steady stream of income, and due to the high quality of the investments, the underlying principal payment obligation will remain a valuable asset in the Plan's investment portfolio throughout its five year term. Mr. Sims has also examined the Plan's portfolio and has determined that the proposed purchases will have no adverse impact on either the liquidity of the Plan's assets or the diversification of the Plan's assets. Mr. Sims represents that ISIS Ltd. is a solvent entity with excellent prospects for future growth.

9. With respect to each purchase of a participation in the Mortgage Mr. Sims will determine, on the date of purchase, the fair market value of a participation by examining the prevailing commercial mortgage rates in Fairfield County, Connecticut, for similar instruments secured by commercial property, and by examining the credit worthiness and financial condition of ISIS and its affiliates. Mr. Sims will ensure that in no event will the payment for a participation be greater than its fair market value.

10. Mr. Sims has personally inspected the Property and has verified through Mr. John Davies, vice president of Union, that the Property has a value in excess of $1,000,000 a value three times greater than the outstanding principal balance of the Mortgage. Mr. Sims has been assured that the Property is adequately insured against fire or other loss. Mr. Sims will insure that payments due under a participation are made timely and will be empowered to take all necessary steps to enforce the rights of the Plan in the event of a default of principal or interest under a participation.

11. In summary, the applicant represents that the proposed transactions satisfy the statutory criteria of section 408(a) of the Act because (a) each participation will be purchasd by the Plan at a price equal to its fair market value as determined by Mr. Sims: (b) the Plan will not incur any expenses with respect to the purchases, and Union will service the participations at no cost to the Plan; (c) each participation will be adequately secured by the duly recorded first security interest in the Mortgage; (d) Mr. Sims, an independent, qualified party will serve as the fiduciary for the Plan with regard to the transactions, and has determined that the proposed purchases are appropriate, suitable, and in the best interests of the Plan; and (e) Mr. Sims will completely monitor the payments under the participations and be empowered to protect the Plan's interests in the event of default.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523–881. (This is not a toll-free number.)

Richard M. Leslie, P.A. Defined Benefit Plan and Trust (the Plan) Located in Miami, Florida

[Application No. D–3948]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the purchase on December 1, 1982, by the Plan from Mr. Richard M. Leslie (Mr. Leslie), the sole shareholder of the Plan sponsor and the sole participant in the Plan, of shares of common stock traded on the New York Stock Exchange (the NYSE) at the closing prices of such shares on the NYSE on that date and the concurrent extension of credit by Mr. Leslie to the Plan. Since Mr. Leslie is the sole shareholder of the Plan sponsor and the only participant in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3–3(b) and (c)(1). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

Effective Date: If the proposed exemption is granted, the exemption will be effective on December 1, 1982.

Summary of Facts and Representations

1. The Plan is a defined benefit pension plan covering only Mr. Leslie, who is an employee and the sole shareholder of the Plan sponsor. Under the terms of the Plan, Mr. Leslie has authority to make investment decisions for the Plan. In addition to the shares of common stock in question, the Plan's other investments include $15,000 in a 3-year certificate of deposit, $12,000 in a money market certificate, approximately $3,000 in Phoenix Fund, approximately $5,000 in Putnam Health Mutual Fund, approximately $25,000 in real estate mortgages, and over $500,000 face value in life insurance.

2. The shares of common stock in question are shares in well known companies: Coca-Cola, Disney, Eastman-Kodak, International Business Machines, NCR, PPG, and Xerox. Mr. Leslie sold these shares at their closing prices on the NYSE on December 1, 1982, to the Plan. The total purchase price was approximately $23,000, representing approximately 15–20% of the Plan's total assets. Of this amount, the Plan paid $19,000 in cash to Mr. Leslie at the time of the purchase and

will pay him the remaining $4,000 within the next few weeks. No interest was or will be charged to the Plan on any portion of the purchase price. No brokerage commissions were charged to the Plan with respect to the purchase.

3. Mr. Leslie believes the purchase was in his best interests as the sole participant of the Plan because the purchase has diversified the Plan's investments and did not involve brokerage commissions chargeable to the Plan. He states that the subject transaction has saved the Plan approximately $1,000 in brokerage commissions because the Plan was going to purchase these common stocks anyway.

4. In summary, the applicant represents that the purchase satisfies the exemptive criteria provided in section 408(a) of the Act because (a) the purchase price equalled the sum of the closing prices on the NYSE of the subject shares of common stock on the purchase date; (b) no commissions were charged to the Plan in effecting the purchase; (c) no interest has been or will be charged to the Plan with respect to that portion of the purchase price not paid on the date of purchase; and (d) Mr. Leslie is the only Plan participant and he desired that the purchase be effected.

Notice to Interested Persons: Since Mr. Leslie is the only participant affected by the transaction,it has been determined that there is no need to distribute notice to interested persons. Comments and hearing requests are due 30 days after the date of publication in the **Federal Register.**

For Further Information Contact: Mrs. Miriam Freund, of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

Polar Employee Stock Ownership Trust (the Plan) Located in Billings, Montana

[Application No. D–3962]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to: (1) the proposed transfer by the Plan to Polar Industries, Inc. (the Employer), the Plan sponsor, of 70,523 shares of Centura Energy Corporation (Centura), the former parent of the Employer; and (2) the receipt by the Plan from the Employer in consideration of such transfer of 74,857 shares of Employer stock, provided that the fair market value of the Employer stock received by the Plan is at least equal to the fair market value of its Centura stock.

Summary of Facts and Representations

1. The Plan is an employee stock ownership plan with net assets, excluding its Centura stock, of $150,801.64 as of January 14, 1983 and approximately 48 participants and beneficiaries as of November 23, 1982. The Plan's trustee (the Trustee) is Mr. Ronald Walter, who is the secretary/treasurer of the Employer. The Plan was created effective June 30, 1975 for the Employer and its wholly-owned subsidiary, Capital City Gas, Inc. The Employer is engaged in the sale of liquified petroleum and related equipment and products. Centura is primarily engaged in the oil and gas business.

2. Effective June 30, 1982, pursuant to an agreement (the Agreement) which was executed on October 12, 1982, the officers and directors of the Employer purchased the Employer's from Centura, which held 100% of the Employer stock. The applicant represents that the terms of the Agreement were negotiated at arms's length by the principals of each company, none of whom were principals of both companies. The purchase price of $3,155,000 involved cash, notes and an exchange of 170,339 shares of the Employer's stock for 160,477 shares of Centura stock held by certain employees of the Employer. Pursuant to the Agreement, the Employer executed a note payable to Centura in the amount of $352,618 due on or before September 30, 1983 with interest thereon payable at the rate of 12% per annum. The note provides that in lieu of the cash payment of principal and interest, the Employer may assign on or before September 30, 1983, the 70,523 Centura shares (valued pursuant to the Agreement at $5.00 per share) held by the Plan.

3. The Employer has requested an exemption to exchange the Plan's 70,523 shares of Centura stock for 74,857 shares of the Employer's stock having a fair market value of $5.09 per shares as of June 30, 1982, as determined in an appraisal of the Employer's stock performed by Marquette & Company, which is unrelated to Centura, the Employer or the Plan. The stock exchange ratio of 1.06 shares of the Employer for each share of Centura, which was established pursuant to the Agreement, is the same ratio utilized for all stock exchanges between Centura and Employer shareholders, would provide the Plan with Employer stock worth $381,022.13. Centura stock, which is traded over the counter, had a bid and ask of 3⅛ and 3⅜ respectively, on February 1, 1983. Therefore, the Plan would secure Employer stock worth $381,022.13 for Centura stock worth $229,199.75 (averaging the bid and ask) on the open market, representing a gain of $151,822.38. The Employer would satisfy an obligation to Centura of $352,615, by securing the Plan's Centura stock and transferring it to Centura, but would be transferring Employer stock to the Plan worth $381,022.13. The Plan would pay no commission or other charge with regard to the stock exchange. The applicant also emphasizes that the purpose of the Plan which is an employee stock ownership plan, is to hold the securities of the Plan sponsor. This purpose would be defeated if the proposed exemption is not granted.

4. John B. Van Heuvelen, who is the sole proprietor and owner of Marquette & Company, has agreed to act as the Plan's independent fiduciary with regard to the proposed stock exchange and accordingly has reviewed the terms of the proposed exchange of stock between the Employer and the Plan. Mr. Van Heuvelen has stated that the terms of the exchange, particularly the valuation of each company's stock, are fair and equitable to the Plan. He believes that the proposed stock exchange is in the interests of the Plan and recommends that the Plan enter into the exchange. Mr. Van Heuvelen has 14 years of experience in analyzing and valuing companies and has, in the normal course of his business, prepared many in-depth studies regarding the prudency of employee benefit plans investing in the stock of plan sponsors. Mr. Van Heuvelen states that he has consulted with an attorney concerning his duties, responsibilities and liabilities as a fiduciary under Part 4 of Title I of the Act.

5. In summary, the applicant represents that the proposed transaction satisfies the statutory criteria of section 408(a) of the Act due to the following:

a. An independent fiduciary, Mr. Van Heuvelen, has reviewed and approved the terms of the stock exchange;

b. The stock exchange ratio is the same as was utilized for all other stock exchanges under the Agreement; and

c. Based on the recent trading price of Centura stock, the Plan will realize a substantially larger gain by entering in the exchange than it could by selling its Centura stock on the open market.

For Further Information Contact: Mr. Robert Sandler of the Department,

telephone (202) 523–8195. (This is not a toll-free number.)

Coldwell Banker Commercial Group, Inc. (CBCG) Located in New York, New York

[Application No. D–3966]

Proposed Exemption

On the basis of the facts and representations set forth in the application, the Department is considering granting the following exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75–1:

I. Transactions

A. Effective November 30, 1982, the restrictions of sections 406(a) and 407(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) (A) through (D) of the Code shall not apply to the following transactions involving mortgage pools (Mortgage Pools) in which employee benefit plans will invest:

(1) The direct or indirect sale, exchange or transfer of certificates (Certificates) representing interests in Mortgage Pools in the initial issuance of Certificates between CBCG and an investing plan when CBCG, Dean Witter Reynolds, Inc. (Dean Witter), the trustee (Trustee) of a Mortgage Pool or a mortgagor of such Mortgage Pool is a party in interest with respect to such plan, provided that the plan pays no more than fair market value for such Certificates, and provided further that the rights and interests evidenced by such Certificates are not subordinated to the rights and interests evidenced by other Certificates of the same Mortgage Pool; and

(2) The continued holding of Certificates acquired by a plan pursuant to subparagraph (1), above.

B. Effective November 30, 1982, the restrictions of sections 406(a), 406(b) (1) and (2) and 407(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the direct or indirect sale, exchange or transfer of Certificates in the initial issuance of Certificates of a Mortgage Pool between CBCG and an investing plan, and the continued holding of such Certificates, when CBCG, Dean Witter or the Trustee of such Mortgage Pool is a fiduciary with investment discretion with respect to the plan assets invested in such Certificates, provided that:

(1) The plan pays no more for such Certificates than the plan would have paid in an arm's-length transaction;

(2) The rights and interests evidenced by such Certificates are not subordinated to the rights and interests evidenced by other Certificates of the same Mortgage Pool;

(3) Such sale, exchange or transfer is expressly approved by a fiduciary independent of CBCG or the Trustee or any affiliate thereof, who has authority to manage and control those plan assets being invested in the Certificates;

(4) The total value of Certificates purchased by the plan does not exceed 25% of the amount of the issue; and

(5) At least 50% of the aggregate amount of the issue is acquired by persons independent of CBCG or the Trustee.

C. Effective November 30, 1982, the restrictions of sections 406(a), 406(b)(1) and (2) and 407(a) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to transactions in connection with the servicing and operation of the Mortgage Pool provided that:

(1) Such transactions are carried out in accordance with the terms of a binding pooling and servicing agreement (Pooling and Servicing Agreement); and

(2) Such Pooling and Servicing Agreement is made available to investors before they purchase Certificates in a Mortgage Pool.

D. Effective November 30, 1982, the restrictions of sections 406(a) and 407(a) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to any transactions to which such restrictions or taxes would otherwise apply merely because a person is deemed to be a party in interest (including a fiduciary) with respect to a plan by virtue of providing services to the plan (or who has a relationship to such service provider described in section 3(14)(F), (G), (H) or (I) or the Act), solely because of the ownership by such plan of a Certificate.

II. General Conditions

A. The relief provided under Section I above, is available only if the following conditions are met:

(1) The Trustee for each Mortgage Pool must not be an affiliate of CBCG provided, however, the Trustee shall not be considered to be an affiliate of CBCG solely because the Trustee has succeeded to the rights and responsibilities of CBCG pursuant to the terms of the Pooling and Servicing Agreement providing for such succession upon the occurrence of one or more events of default by CBCG; and

(2) the sum of all payments made to and retained by CBCG in connection with a Mortgage Pool, and all funds inuring to the benefit of CBCG as a result of the administration of any Mortgage Pool, must represent not more than adequate consideration for selling the Certificates, plus reasonable compensation for services provided by CBCG and the Trustee of the Mortgage Pool, and by Dean Witter as underwriter.

III. Definitions

A. For the purposes of this exemption, the term "Mortgage Pool" means an investment pool the corpus of which

(1) is held in trust; and

(2) consists solely of

(a) Interest bearing obligations secured by multi-famly residential property;

(b) Property which had secured such obligations and which has been acquired by foreclosure;

(c) Federal Housing Authority (FHA) debentures; and

(d) Undistributed cash.

B. For the purposes of this exemption, the term "Certificate"means a certificate representing a beneficial undivided fractional interest in a Mortgage Pool and entitling the holder of such certificate to pass-through payment of principal and interest from the pooled mortgage loans, less any fees retained by CBCG.

C. For the purposes of this exemption, the term "affiliate" of another person means:

(1) Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such other person;

(2) Any officer, director, partner, employee, or relative (as defined in section 3(15) of the Act) of such other person; and

(3) Any corporation or partnership of which such other person is an officer, director, or partner.

For purposes of this paragraph, the term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

D. For the purposes of this exemption, a person will be "independent of CBCG or the Trustee" only if:

(1) Such person is not an affiliate (as defined in Section III(C) of this exemption) of CBCG or the Trustee; and

(2) Neither CBCG nor the Trustee, nor any affiliate thereof, is a fiduciary who has investment management authority

or renders investment advice with respect to the assets of such person.

Summary of Facts and Representations

1. CBCG is a wholly-owned indirect subsidiary [1] of Sears Roebuck and Co. (Sears), and an affiliate of Dean Witter. CBCG's principal offices are at 533 Freemont Avenue, Los Angeles, California, and it maintains offices in 40 states. CBCG is engaged in the business of real estate brokerage and finance, real estate asset management, mortgage banking, mortgage brokerage, and the provision of a wide variety of other diversified real estate and financial services.

2. Dean Witter is a wholly-owned indirect subsidiary [2] of Sears. Dean Witter's principal offices are located in New York, New York, and it maintains officers in 50 states. Dean Witter is engaged in the brokerage business and is a broker in securities, commodities and futures contracts, a dealer in corporate and municipal securities and is an investment banking firm. The Trustee for each Mortgage Pool will be a substantial financial institution or trust company experienced in trust activities. The Trustee will be independent of CBCG and Dean Witter.

3. The Government National Mortgage Association (GNMA) is a government corporation operating under the direction of the Secretary of Housing and Urban Development. GNMA operates several multi-family direct mortgage purchase programs which are designed to make Project Loans, which are low interest rate FHA-insured mortgage loans, available to multi-family housing projects and certain health care facilities during periods of monetary stringency. GNMA accomplishes this objective by committing in advance, generally prior to commencement of construction, to purchase after completion of construction, such low interest rate loans at prices substantially above prices at which such mortgage loans could otherwise be sold in the private secondary market. The Project Loans generally have an outstanding principal balance of not less than $200,000 nor more than $20,000,000 and normally have a 40 year maturity and an average life of 18 to 20 years. Also, pursuant to FHA regulations, the loan to value ratio on a Project Loan can be no higher than 90 percent. Periodically, as the inventory of these loans builds, GNMA sells them in the private market at prevailing commercial rates, which may reflect a substantial discount from the face principal amount. The resulting loss is borne by the U.S. Treasury and is, in fact, a housing subsidy program.

4. The sale of Project Loans is accomplished through an auction procedure. Approximately one month prior to the date selected by GNMA for an auction, GNMA sends an auction invitation to all FHA-approved mortgagees, such as CBCG. GNMA warrantees to each purchaser of a Project Loan that, as of the settlement date with GNMA, such loan:

(a) Is not delinquent under the original or modified terms thereof to the extent of more than one monthly installment of interest, principal or escrow deposits (subject to certain limited exceptions) and is not otherwise in default; (b) is not subject to any defect which would prevent recovery in full or in part against FHA as insurer; and (c) is not subject to any outstanding advance or advances by the mortgagee to the mortgagor. GNMA's obligation under its warranty is limited to the correction of such exceptions as shall be specified in a written notice furnished to it by the purchaser within 90 days of the settlement date with GNMA, or to the repurchase of the related mortgage loan in the event that such exceptions may not be corrected promptly.

5. When CBCG is the successful bidder for a group of Project Loans at a GNMA auction, CBCG will either transfer and assign all of its right, title and interest in such loans, including all interest and principal payments received after a specified date, to the Trustee without recourse, or cause GNMA to assign them directly to the Trustee. With respect to each Project Loan transferred, CBCG will deliver, or cause to be delivered to the Trustee, a mortgage note containing the full endorsement of the Commissioner of the FHA, the mortgage (with appropriate evidence of the recording thereof indicated thereon), and an assignment of the mortgage to the Trustee, which the Trustee will record or cause to be recorded.

6. Concurrently with the transfer and assignment of the mortgage notes, the Trustee will authenticate and deliver to the order of CBCG the Certificates in authorized denominations, evidencing in the aggregate the entire ownership of the Mortgage Pool. These Certificates will be sold by CBCG to investors, including plans, through one or more underwriters, including Dean Witter, for which Dean Witter would receive a fee from the plans.

7. The price at which the Certificates are sold to plans is determined with reference to the price paid by CBCG for the Project Loans underlying the Certificates, the net return to the plans (the Pass-Through Rate) based on the Project Loan interest rates minus CBCG's compensation (discussed below), and the general market for similar securities. The first Mortgage Pool was sold to a single plan on November 30, 1982 with a Pass-Through Rate of 11.99%.

8. The applicant represents that the total value of Certificates purchased by a plan with assets with regard to which CBCG or the Trustee or an affiliate thereof is a fiduciary with investment discretion over such assets, will not exceed 25 percent of the amount of the Certificates in a Mortgage Pool, and, furthermore, at least 50 percent of the aggregate amount of such Certificates will be acquired by persons independent of CBCG, the Trustee or their affiliates.

9. On the 25th day of each month, CBCG will distribute to each Certificateholder its proportionate share of the net proceeds from the Mortgage Pool for the prior month. CBCG will also furnish to each Certificateholder, promptly after each distribution, a statement setting forth certain information about the Project Loans and including CBCG's servicing compensation for the month. Furthermore, within a reasonable period of time after the end of each calendar year, CBCG will furnish a report to each Certificateholder summarizing for the year, certain of the information set forth in the monthly reports, including CBCG's compensation

10. A Mortgage Pool will terminate upon: (a) the later of the final payment or other liquidation of the last Project Loan in such Pool or the disposition of all property acquired upon foreclosure of any Project Loan; or (b) the repurchase by CBCG of all Project Loans and all property acquired in respect of any Project Loan remaining in the Mortgage Pool. In no event, however, will a Mortgage Pool continue beyond a period which would violate the applicable rule against perpetuities.

11. CBCG or the Trustee or one of their affiliates may have a pre-existing relationship as a service provider or fiduciary to the plans. However, all decisions relating to the sale, exchange or transfer of Certificates will be made on the plans' behalf by fiduciaries independent of CBCG or the Trustee or any affiliate thereof.

12. The applicant states that although the Certificates are not insured or guaranteed by any agency or

[1] The parent of CBCG, Coldwell Banker Company, is a wholly-owned subsidiary of Sears.

[2] The parent of Dean Witter, Dean Witter Reynolds Organization, Inc., is a wholly-owned direct subsidiary of Sears.

instrumentality of the U.S. Government, the Project Loans underlying the Certificates are insured by the FHA. In addition, the FHA will not insure a mortgage unless it contains a covenant, acceptable to the Commissioner of the FHA, binding the mortgagor to keep the property insured by a standard policy or policies against fire and such other hazards as the Commissioner may stipulate.

13. If a mortgagor defaults on a Project Loan payment, the mortgagee may either assign the mortgage to the FHA or acquire title through foreclosure proceedings and convey title to such property to the FHA. If the mortgagee elects to assign the mortgage to the FHA, the insurance benefits payable to the mortgagee (either in cash or FHA Debentures which are discussed below) are equal to the sum of: (a) The amortized principal balance of the defaulted Project Loan; plus (b) certain eligible payments made by the mortgagee with respect to taxes and other prior liens and for the preservation of the property; and (c) interest accrued from the end of the grace period at the interest rate of FHA Debentures, the rate of which is determined by the higher of theprevailing rate at the time: (1) when the commitment for FHA mortgage insurance was issued; or (2) when the Project Loan was initially endorsed for FHA mortgage insurance; less (1) an assignment fee of 1% of the principal balance; and (2) legal costs and other expenses associated with the assignment of the Project Loan. The insurance proceeds may be further reduced, however, according to the terms of the GNMA Insurance Proceeds Participation Certificate (IPPC-discussed more fully below).

14. In the event that the mortgagee elects to acquire title to the mortgaged property and convey title to such property to the FHA, the insurance benefits payable to the mortgagee are computed as above-described except that such benefits are not subject to the 1% assignment fee. The mortgagee is, however, required to pay the costs of foreclosure. Since foreclosure proceedings can be expensive and in some cases, time consuming (during which time, for purposes of insurance proceeds, interest accrues at the applicable FHA Debentures rate rather than at the generally higher Pass-Through Rate), the majority of mortgagees elects to assign the mortgage to the FHA (and incur the 1% assignment fee) rather than foreclose and convey title to the property to the FHA.

15. For defaulted Project Loans, the FHA generally pays 90 percent of the insurance claim within 15 days of the recordation of the assignment or conveyance (which action may take 30 to 90 days) and the balance of the claim, after completion of an audit, within three to six months after such recordation.

16. The Certificateholders, in the event of a default on a Project Loan and its subsequent assignment to the FHA, bear the risk of: (a) The loss of 30 days' interest during the grace period; (b) forgoing principal and interest payments pending recovery from the FHA in the event CBCG does not advance such payments; (c) the accrual of interest at the FHA Debentures rate which is generally lower than the Pass-Through Rate; and (d) the incidence of legal and other expenses associated with the assignment.

17. The winning bidder on a Project Loan for which FHA insurance proceeds are payable in cash, must sign an IPPC providing for the sharing of a portion of the FHA insurance proceeds with GNMA upon default on a Project Loan, during the first 36 months following the date the Project Loan was purchased from GHMA. The reason for the IPPC is to prevent a potential windfall to a mortgagee due to the fact that a Project Loan is purchased at a discounted price from GNMA because of the low interest rate, while FHA insurance is based on 100 percent of the principal of the Project Loan.

18. A number of the Project Loans will be Section 221 Loans, under which a mortgagee has the right, pursuant to 24 CFR Section 221.770, to assign such Section 221 Loan to the FHA at the expiration of 20 years from the date of final endorsement of the related mortgage, if the Section 221 Loan is not in default at such time. Such option to assign a Section 221 Loan to the FHA may be exercised at any time during the one year period following the twentieth anniversary of the final endorsement of the related mortgage.

19. Any mortgagee electing to assign a Section 221 Loan to the FHA will receive in exchange therefor, FHA Debentures having a total fact value equal to the then outstanding principal balance of the Section 221 Loan plus accrued interest to the date of assignment. The FHA Debentures will mature 10 years from the date of assignment of the related section 221 Loan and will bear interest at the "going Federal rate" on such date. The "going Federal rate" is defined to be the annual rate of interest specified by the Secretary of the Treasury for the six month period which includes the issuance date of the Debentures.

20. As compensation for its activities pursuant to the Pooling and Servicing Agreement, CBCG is entitled, pursuant to that Agreement, to retain its servicing fee from interest payments on the Project Loan (including, for this purpose, the portion of FHA insurance proceeds allocable to interest). CBCG will also receive compensation through the retention of any late payment charges. In addition, CBCG may purchase, at a substantial discount, FHA Debentures for use in paying FHA insurance premiums on the Project Loans. If certain procedures are followed, such FHA Debentures may be applied against FHA premiums at the face amount of the FHA Debentures and CBCG may thereby realize additional compensation from such use of FHA Debentures. Moreover, CBCG may receive additional compensation by depositing collections on the Project Loans, and amounts received from the mortgagors to be held in escrow, in accounts maintained with banks it selects (including banks with which it maintains banking relationships) until such time as those amounts must be disbursed to Certificateholders, the FHA as insurance premiums or otherwise.

21. CBCG represents that the sum of all payments made to and retained by CBCG in connection with a Mortgage Pool, and all funds inuring to the benefit of CBCG as a result of the administration of such Mortgage Pool, will represent not more than adequate consideration for the sale of the Certificates, plus reasonable compensation for services provided by CBCG and the Trustee (the Trustee's fee is paid by CBCG out of its servicing fee) to the Mortgage Pool, and for Dean Witter as underwriter.

22. In summary, the applicant represents that the transactions for which exemptive relief is requested satisfy the statutory criteria of section 408(a) of the Act due to the following:

(a) A plan's decision to purchase Certificates will be made by a plan fiduciary independent of CBCG, the Trustee or any of their affiliates;

(b) All of the transactions for which CBCG seeks exemptive relief will be governed by the terms of the Pooling and Servicing Agreement, which is made available to the plans' fiduciaries for their review prior to investment;

(c) Investment in the Certificates will represent a sound method by which the plans may be able to diversify their investments to include investments in real estate mortgages;

(d) The total value of Certificates purchased by a plan with assets with respect to which CBCG or the Trustee is

a fiduciary with investment discretion will not exceed 25% of the amount of the Certificates in a Mortgage Pool, and at least 50% of the aggregate amount of such Certificates will be acquired by persons independent of CBCG or the Trustee; and

(e) The applicant emphasized that the requested exemption is substantially similar to the class exemption granted as PTE 81–7 (46 FR 7520, January 23, 1981, as amended by PTE 83–1, 48 FR 895, January 7, 1983). The principal difference is that the CBCG sponsored Mortgage Pools will consist of first mortgages or deeds of trust on multi-family residential property as opposed to single family residential property in PTE 81–7. The applicant represents that the risk to plans investing in Mortgage Pools is no greater than the risk in investing in single family residential property mortgage pools.

Southern Welding Supply Co., Inc. Profit Sharing Plan (the Plan) Located in Bowling Green, Kentucky

[Application No. D–4190]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to: (1) a loan of $125,000 by the Plan to Southern Welding Supply Co., Inc. (SWSC), under the terms set forth in this notice of proposed exemption, provided such terms are not less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated party; and (2) the personal guarantee of repayment of the loan to the Plan by Mr. Jerry Baker (Baker).

Summary of Facts and Representations

1. The Plan is a profit sharing plan with approximately 19 participants and total assets, as of November 30, 1982, of approximately $614,500. SWSC is a Kentucky corporation engaged in the welding supply business. Baker is the sole shareholder of SWSC.

2. The Plan proposes to lend $125,000 to SWSC. The proceeds of the loan will be used by SWSC to increase its working capital. The loan from the Plan would be made pursuant to a written promissory note and a security agreement between SWSC and American National Bank & Trust Company (the Bank) as trustee of the Plan. The loan will be amortized over a period of five years and will bear interest at the rate of 14% per annum. Principal and interest will be paid quarterly.

3. The Bank, which is independent of the parties to the transaction, has agreed to act as an independent fiduciary of the Plan with respect to the transaction. The Bank and SWSC have no common officers or directors. For the 10 month period ending October 31, 1982, the average deposits of SWSC in the Bank averaged less than .07% of the Bank's total average deposits during that period of $162 million, and as of December 31, 1982, SWSC had one outstanding loan from the Bank of $30,000 which is about .05% of the total loans of approximately $59 million issued by the Bank to its customers.

4. As security for the loan, SWSC will grant to the Plan a first security interest in SWSC's accounts receiviable. The value of SWSC's accounts receivable, adjusted for uncollectibles, has averaged $340,200 during the 11-month period ending November 25, 1982. The receivables represent goods sold. The payment of the accounts receivable is not conditioned on the future performance of services nor the satisfaction of future conditions. Baker represents that over the 11-month period used in determining the average accounts receivable, uncollectible receivables have averaged less than ½ of 1%. The accounts receivable as of May 31, 1982 (the fiscal year end of SWSC) were reviewed by Touche Ross & Company, and the amount of the accounts receivable as of that date was $309,655. A security agreement and financing statement will be filed with the appropriate government office when the loan is executed so that the Plan's security interest in the accounts receivable will be perfected. In addition to the accounts receivable, Baker will also personally guarantee the repayment of the loan to the Plan. As of June 30, 1982, Baker's net worth was approximately $4.2 million.

5. The Bank represents that it has reviewed the terms of the proposed transaction and has determined that it is a suitable and appropriate investment for the Plan and that it is in the interest of and protective of the Plan and its participants and beneficiaries. The interest rate on the loan was determined in arm's-length negotiations between SWSC and the Bank as trustee of the Plan. The terms of the loan including the interest rate are comparable to commercial loans transacted in the community in which SWSC and the Bank are located, considering the type of loan and the credit worthiness of SWSC. The Bank and SWSC confirm that the interest rate on the note shall be no less than the greater of 14% per annum or a commercially reasonable rate at the time the loan is effected. The Bank represents that it finds the security of accounts receivable which average in excess of 200% of the principal amount of the loan, plus Baker's personal guarantee, to be adequate to safeguard repayment of the loan. The Bank represents that it will review and monitor the transaction until its completion and will take all the steps necessary and proper to protect the Plan's interest, including insuring that SWSC will maintain security in an amount of at least 200% of the loan balance.

6. In summary, the applicant represents that the subject transaction meets the criteria of section 408(a) of the Act because: (1) the loan only involves approximately 20.4% of the Plan's assets; (2) the interest rate was negotiated at arm's-length and is a commercially reasonable rate; (3) the Plan's independent fiduciary, the Bank, has determined that the proposed transaction is appropriate for the Plan and in the best interests of and protective of its participants and beneficiaries; and (4) the Bank will monitor the loan until its completion and will take whatever action is necessary to enforce the rights of the Plan.

BR Medical Clinic, Inc. Defined Benefit Pension Plan (the Plan) Located in Los Gatos, California

[Application No. D–4217]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the sale of a parcel of real property (the Property) by the Plan to Steven Green, for $100,000 in

cash, provided such amount is not less than the fair market value of the Property on the date of the sale.

Summary of Facts and Representations

1. The Plan is a defined benefit plan with two participants. The Plan sponsor is BR Medical Clinic, Inc. (the Employer). F.W. Green, Jr., M.D. (Dr. Green) is the sole shareholder of the Employer and is the trustee of, and a participant in, the Plan.

2. The Plan had been holding as an investment a note and second deed of trust which it had acquired in March, 1980, from an unrelated party. The note was for $15,000 at 17% interest. Payments were made until July, 1982, when it became necessary for the Plan to foreclose on the Property to protect its investment.[1] The Property consists of a detached single-family dwelling located at 4864 Rue Calais, San Jose, California. The foreclosure was final on October 14, 1982. The trustee received notice from the holder of the first deed of trust, San Francisco Federal Savings and Loan Association (the Bank), that the Property must be sold within 120 days or the Plan must apply to assume the first deed of trust. The Bank has been notified of the subject proposed sale of the Property, and is willing to delay action until the exemption proposed herein is granted.

3. With its limited assets and income, the applicant represents that it would be difficult if not impossible for the Plan to assume the first deed of trust. In addition, the Property is in a bad state of repair and would be unrentable without significant expenditures. There are taxes owing on the Property in the amount of $3,198.13. The rent from the Property would not cover the cost of maintaining the Property and servicing the debt. Even if the Plan were to pay off the first deed of trust, there would be little current cash flow to the Plan.

4. Mr. Steven Green, who is the son of Dr. Green, has offered to purchase the Property from the Plan. According to the terms of the proposed sale, Steven Green will pay all costs of escrow, back taxes and current taxes, for a total of $4,399.13, in addition to paying $10,000 as a purchase price to the Plan. The sale will be for cash, and no commission will be charged on the sale. Mr. Jack L. Sears, M.A.I., an independent appraiser, has estimated the fair market value of the Property to be $100,000 as of December 6, 1982.

5. The first deed of trust on the Property is approximately $72,000. The Plan will be totally cash out by the sale and will have no liability remaining with respect to the Property. The first deed of trust will either be assumed by the buyer or will be paid off out of the proceeds of the sale. The costs to the Plan of the foreclosure were approximately $11,000, of which $9,600 represented past due payments on the first deed of trust.

6. In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 408(a) of the Act because: (1) The sale is a one-time transaction for cash; (2) no commission will be charged on the sale; (3) the Plan will dispose of an unproductive asset at its fair market value as established by an independent appraisal; and (4) Dr. Green, the Plan's trustee, has determined that the proposed transaction is appropriate for the Plan and in the best interest of its participants and beneficiaries.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

William F. Cardman, D.M.D., P.A., Profit-Sharing Plan (the Plan) Located in Lakeland, Florida

[Application No. D-4221]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale of a vacant residential building lot (the Land) located in Polk County, Florida, by the Plan to William F. Cardman, D.M.D. (the Buyer), a party in interest with respect to the Plan, provided the sales price is at least equal to the fair market value of the Land on the date of such sale.

Summary of Facts and Representations

1. The number of participants in the Plan for the fiscal year of the Plan that began on November 1, 1982, is estimated to be five. The Buyer is the Plan Administrator and the Plan Trustee and is also the sole shareholder, sole director, and President of William F. Cardman, D.M.D., P.A., the employer of the participants in the Plan.

2. The Land is described in the public records of Polk County, Florida (pages 31 and 32 of Plat Book 72) as Lot 352, Christina Woods, Phase 9. The Land is not adjacent to any property already owned by the Buyer. The Plan acquired the Land from Douglas L. Hall and Sharon P. Hall, his wife, by a Warranty Deed dated June 1, 1982. Mr. and Mrs. Hall were completely independent third parties with respect to the Plan. The purchase price was $52,500.00, with $14,726.40 of the net purchase price being paid in cash at the closing and the remainder being paid under the terms of a promissory note secured by a mortgage encumbering the Land. Such note and mortgage provide for repayment of the remaining $37,773.60 of the 6/1/82 purchase price in 20 equal consecutive installments of $702.68 each, including interest at the rate of 13 percent per year on the unpaid balance, with a final payment of $31,620.57 due February 1, 1984, the maturity date of the note and mortgage. The note permits prepayment of the debt without penalty. Other costs incurred by the Plan in acquiring and holding the Land as of April 26, 1983, were: $522.25 in closing costs and expenses, paid by the Plan at closing; $130.14, representing the Plan's prorated share of real estate taxes for 1982; and $4,320.67 in aggregate interest payments under the note and mortgage. Thus, the Plan's total costs in acquiring and holding the Land equalled $19,099.40 as of April 26, 1983. The applicants believe that historically the ownership of real property in the Polk County area, including undeveloped land, has been a very safe and sound investment, with normal average increases in value in the neighborhood of 10 percent. When the Plan purchased the Land, it was anticipated that the recession would soon end and the Plan would be able to realize a sizable profit on the sale of the Land. The Land produces no income. So long as the Plan owns the Land, the Plan may maintain liability insurance with respect to the Land (although it has not yet done so) and will be responsible for the real property taxes payable with respect to the Land.

3. Since the Plan purchased the Land, the recession has deepened, particularly in the Polk County area, where the real estate market remains stagnant primarily due, according to the applicants, to an exceptionally high unemployment rate (between 15 percent and 20 percent). The applicants state further that the outlook for the foreseeable future is not very encouraging. Real estate brokers in the Polk County area have been contacted concerning the sale of the Land and,

[1] In this proposed exemption, the Department expresses no opinion as to whether the Plan's acquisition of the note or the Property violated any provision of Part 4 of Title I of the Act,

although all of them expressed willingness to try to sell the Land, none indicated any real hope that a qualified purchaser could be found anytime soon unless the sales price is discounted substantially. If the Land should be sold through the services of a broker, the Plan would incur a substantial broker's commission of 7 percent to 10 percent of the sales price.

4. The Plan desires to sell the Land to the Buyer, who has agreed to purchase the Land from the Plan for a purchase price equal to the greater of (a) the then current fair market value of the Land as determined by an independent M.A.I. certified appraiser, or (b) the amount of the Plan's total costs in acquiring and holding the Land. The purchase price would be paid by the buyer's assuming and agreeing to pay the then unpaid principal balance of the existing mortgage, with the balance being paid in cash at the closing. The Buyer will agree to indemnify and hold harmless the Plan against any and all claims and causes of action arising under the terms of such mortgage and the promissory note secured thereby. By selling the Land to the Buyer, the Plan will avoid the necessity of employing a broker and paying a broker's commission. At the present time, the Buyer has no intention to do anything with the Land other than to hold it as an investment.

5. In summary, the applicants represent that the proposed sale satisfies the exemptive criteria provided in section 408(a) of the Act because: (a) The purchase price will equal the greater of (i) the current fair market value of the Land as determined by an independent M.A.I. certified appraiser, or (ii) the amount of the Plan's total costs in acquiring and holding the Land; (b) the total purchase price in excess of the existing mortgage will be paid in cash to the Plan at the time the Land is conveyed to the Buyer; (c) the Buyer will assume and agree to be responsible for all future payments under the terms of the existing note and mortgage encumbering the Land and will agree to indemnify and hold harmless the Plan against any and all claims and causes of action arising under the terms of such mortgage and the promissory note secured thereby; (d) the Plan will avoid the necessity of employing a broker and paying a broker's commission; (e) the proposed sale will rid the Plan of a non-income producing asset of questionable marketability; and (f) the proposed sale will relieve the Plan of the expenses of maintaining liability insurance with respect to the Land, paying real property taxes relating thereto, and making the mortgage payments required under the terms of the existing note and mortgage encumbering the Land

For Further Information Contact: Mrs. Miriam Freund, of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which amont other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions an transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be suject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 7th day of June, 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

NUCLEAR REGULATORY COMMISSION

Applications for Licenses to Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following applications for export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the application, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated: this 8th day of June, at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Marvin R. Peterson,

Acting Assistant Director Export/Import and International Safeguards, Office of International Programs.

Cleveland Electric Illuminating Co., et al. (Perry Nuclear Power Plant, Units 1 & 2); Request for Action Under 10 CFR 2.206

By a motion for summary disposition filed before the Atomic Safety and Licensing Board in the Perry operating license proceeding, Ohio Citizens for Responsible Energy (OCRE) alleged that Cleveland Electric Illuminating Co. had made false statements in its application concerning the use of herbicides to control vegetation along transmission lines. The Board denied OCRE's motion because it was not directed at an issue pending before the Board. The Board asked, however, that the issues raised in the motion be forwarded to the Staff for its consideration. OCRE's motion is therefore being handled pursuant to 10 CFR 2.206 of the Commission's regulations. Copies of the motion for summary disposition are available for inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and in the local public document room for the Perry Nuclear Power Plant located at Perry Public Library, 3753 Main Street, Perry, Ohio, 44081.

Dated at Bethesda, Maryland this 6th day of June 1983.

[Docket Nos. 50-10, 50-237, 50-249, 50-295, 50-304]

Commonwealth Edison Co. (Dresden Nuclear Power Station; Zion Nuclear Power Plant); Issuance of Director's Decision Under 10 CFR 2.206 (DD-83-8)

Notice is hereby given that the Director of the Office of Inspection and Enforcement had denied a petition filed by Catherine Quigg on behalf of Pollution and Environmental Problems, Inc., Palatine, Illinois, which requested initiation of show-cause proceedings to suspend the licenses issued to the Commonwealth Edison Company for the Dresden and Zion nuclear power plants. The petitioner had requested such relief on the basis of alleged drug abuse and other malfeasance by plant employees. The petition has been considered in accordance with 10 CFR 2.206 of the Commission's regulations.

On the basis of the results of the NRC's investigation of the allegations, I have determined that initiation of the requested proceedings to suspend operation of the plants is not warranted. The reasons for my decision are more fully described in a "Director's Decision under 10 CFR 2.206," which is available in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., 20555, and in the local public document rooms for the Dresden and Zion plants at the Morris Public Library, 604 Liberty Street, Morris, IL 60451, and the Zion-Benton Public Library, 2600 Emmaus Avenue, Zion, IL

60099. A copy of the decision will be filed with the Secretary to the Commission for the Commission's review in accordance with 10 CFR 2.206(c).

Dated at Bethesda, Maryland, this 8th day of June 1983.

For the Nuclear Regulation Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

BILLING CODE 7590-01-M

[Docket No. 50-289]

GPU Nuclear Corp., et al; Correction

On May 31, 1983, the Federal Register published (48 FR 24231) a "Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing" related to GPU Nuclear Corporation's May 9, 1983, application for amendment of Facility Operating License No. DPR-50 for the Three Mile Island Nuclear Station, Unit No. 1 (the facility), located in Dauphin County, Pennsylvania. The requested amendment involves steam generator tube repair at the facility.

This Notice stated June 27, 1983, as the date by which the licensees may request a hearing and interested parties may file a written petition for leave to intervene. This date was based on an anticipated publication date of May 27, 1983; however, the Notice was not published until May 31, 1983. Accordingly, the date by which the licensees may request a hearing and interested parties may file a written petition for leave to intervene is hereby extended to June 30, 1983.

Dated at Bethesda, Maryland, this 3rd day of June 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch #4, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-245 & 50-336]

Northeast Nuclear Energy Co. et al. Consideration of Issuance of Amendments to Facility Operating Licenses and Proposed no Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Provisional Operating License No. DPR-21 and Facility Operating License No. DPR-65, issued to Northeast Nuclear Energy Company, the Connecticut Light & Power Company, and Western Massachusettes Electric Company (the licensees), for operation of Millstone Nuclear Power Station Units 1 and 2 located in New London County, Connecticut.

The amendments would delete superfluous Appendix B environmental technical specifications relative to meteorological monitoring, terrestrial monitoring, and transmission line right-of-way management, in accordance with the licensee's application for amendment dated February 16, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

Deletion of the environmental technical specifications relative to meteorological monitoring would have no effect since the emergency preparedness requirements of Appendix E to 10 CFR Part 50 and the requirements of the Unit 2 operating license Appendix A technical specification 3/4.3.3.4 ensure that sufficient meteorological data are available for estimating potential doses to the public as a result of radiological releases from either unit at the Millstone Station. The annual surveys required by the environmental technical specifications have indicated no significant adverse effects on flora and fauna from station operation since Units 1 and 2 began operation in 1970 and 1975, respectively; the staff considers these results a sufficient demonstration that continuation of the surveys is not warranted. The environmental technical specification which requires an annual report concerning the use of herbicides to control vegetation on transmission line rights-of-way is also superfluous since the use of such chemicals must comply with control measures established by the U.S. Environmental Protection Agency and the Connecticut Department of Environmental Protection rather than the NRC.

The proposed changes in the environmental technical specifications will have no effect on the safe operation of Millstone Station Units 1 and 2. Therefore, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By July 14, 1983, the licensee or a petitioner may file a request for a hearing with respect to issuance of the amendments to the subject operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature or the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for

leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendments and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendments.

If the final determination is that the amendments involve a significant hazards consideration, any hearing held would take place before the issuance of any amendments.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendments before the expiration of the 30-day notice period, provided that its final determination is that the amendments involve no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Clark: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to William H. Cuddy, Esquire, Day, Berry & Howard, One Constitution Plaza, Hartford, Connecticut 06103, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut

Dated at Bethesda, Maryland, this 3rd day of June, 1983

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[NRC Form 371]

"List of College Courses and Certificate of Scholastic Achievement"; Agency Forms Submitted to OMB for Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the Office of Management and Budget (OMB) review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget, for review, the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission: new, revision or extension: revision

2. The title of the information collection: NRC Form 371, "List of College Courses and Certificate of Scholastic Achievement"

3. The form number if applicable: NRC Form 371

4. How often the collection is required: On occasion. Use is dependent on the number of applications submitted by respondents.

5. Who will be required or asked to report: Students who are interested in seeking employment with the NRC.

6. An estimate of the number of responses: Estimated annual submittal for all respondents is 600.

7. An estimate of the total number of hours needed to complete the requirement or request: Estimated total annual hours for all respondents is 600 hours.

8. Section 3504(h), Pub. L. 96–511 does not apply.

9. Abstract: NRC Form 371 is the means by which the NRC can evaluate the qualifications of student applicants for employment in the NRC student programs. Failure to complete this form would prevent the NRC from making a determination whether an individual has the necessary background to do NRC work.

ADDRESSES: Copies of the submittal will be made available for inspection or copying for a fee at the NRC Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395–7340.

NRC Clearance Officer R. Stephen Scott, (301) 395–6585.

Dated: June 3, 1983.

OFFICE OF PERSONNEL MANAGEMENT

Notice of Information Collection for OMB Review

AGENCY: Office of Personnel Management.

ACTION: Notice of information collection from the public submitted to OMB for clearance.

SUMMARY: In accordance with the "Paperwork Reduction Act of 1980", (44 U.S.C. Chap. 35), this notice announces a collection of information from the public which has been submitted to OMB for clearance. The request is for a clearance covering all categories of information collected from bidders during the solicitation/execution of contracts for procuring goods/services by OPM. For copies of this proposal, call John P. Weld, Agency Clearance Officer, on (202) 632-7720.

DATES: Comments on this proposal should be received within 10 working days from date of this publication.

ADDRESSES: Send or deliver comments to:

John P. Weld, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, N.W., Room 6469, Washington, D.C. 20415; and

Frank Reeder, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503

June 7, 1983.

Notice is hereby given that the investment companies named above (the "Fund Applicants," together with all future investment companies for which any subsidiary of Federated Investors, Inc., serves as investment adviser, principal underwriter, or sponsor, hereinafter referred to as the "Funds"), each of which is registered under the Investment Company Act of 1940 ("Act"), and the investment advisers named above (the "Adviser Applicants," together with all future investment advisory subsidiaries of Federated Investors, Inc., hereinafter referred to as the "Advisers") (the Fund Applicants and Advisory Applicants are hereinafter referred to collectively as "Applicants"), filed an application on November 19, 1982, and an amendment thereto on May 11, 1983, requesting an order of the Commission pursuant to Sections 6(c) and 17(b) of the Act (1) exempting from Sections 17(a)(1), 17(a)(2) and 17(e)(1) of the Act certain purchase and sale transactions between the Funds and certain banks, bank holding companies or affiliates thereof (hereinafter, "banks") which directly or indirectly (1) own, control or hold 5 percent or more of the outstanding voting securities of any of the Funds ("upstream bank affiliates"), or (2) act as investment adviser to any one of the Funds ("advisory bank affiliates," collectively with upstream bank affiliates hereinafter referred to as "Affiliated Banks"). The order would cover transactions between Affiliated Banks and any of the Funds which involve the following specific types of instruments: (a) money market instruments of an Affiliated Bank which is one of the 50 largest United States banks (measured by deposits), their bank holding companies or affiliates thereof, (b) repurchase agreements with no more than 20 Affiliated Banks which participate in the "wholesale" repurchase agreement market and which are among the 50 largest United States banks (measured by deposits), and (c) tax exempt obligations. (Transactions described in (a), (b), and (c) are hereinafter referred to as "Covered Transactions.") All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of those of its provisions from which the Applicants request exemption.

The application states that all of the Fund Applicants are registered under the Act as open-end management investment companies and have currently-effective registration statements under the Securities Act of 1933, except for Federated Income and Private Placement Fund, which is a closed-end investment company, and Gateway Money Market Trust, which was in the registration process as of the date of filing of the application. Several of the Funds are designed principally or exclusively for institutional investors, particularly banks investing funds on behalf of accounts for which the banks act in an agency, trustee or other fiduciary capacity. Applicants represent

that banks acting in such capacities usually purchase shares of the Funds through a "master" account, pursuant to which the shares issued by the Funds are registered in the name of the bank (or its nominee). Applicants further represent that five of the Fund Applicants are utilized extensively by banks. Because those funds are money market funds, the amount of a bank's holdings of their shares can fluctuate significantly, and thus, from time to time, the number of a Fund's shares held of record by a bank in a "master" account for its agency or fiduciary accounts may exceed five percent of a Fund's outstanding voting shares. Applicants state that where a bank holds legal title to more than five percent of the outstanding shares of a Fund, the bank may be deemed an "affiliated person" of that Fund.

Applicants also represent that within the past few years, some banks have become involved in the management of money market funds, commonly known as "private label funds" because those funds' shares are expected to be sold exclusively to the customers of the participating bank or its affiliates. Applicants state that in such situations the bank will often act as an investment adviser of its private label fund. One of the Adviser Applicants participates in the management of a bank private label fund in which the participating bank acts as investment adviser to the fund; Adviser Applicants have several other private label funds in the registration process, and expect to enter into similar arrangements with banks in the future. Applicants note that a bank that acted as an investment adviser to a private label fund would be deemed an affiliated person of that fund.

Applicants state that the provisions of Sections 17(a)(1) and 17(a)(2) of the Act prohibit all Affiliated Banks (whether an upstream bank affiliate or an advisory bank affiliate) from engaging in any Covered Transaction with the Fund with which it is affiliated. Further, Applicants state that the Commission has taken the position that registered investment companies may be deemed to be affiliates of each other where they share common officers, common directors, or common investment advisers. Applicants state that although they disagree with this interpretation, they assume for the purposes of the application that the Funds are affiliates of each other, and that, as a result, a bank that is an affiliate of one of the Funds is an affiliate of all of the Funds, and the provisions of Sections 17(a)(1) and 17(a)(2) of the Act prohibit all Affiliated Banks from engaging in Covered Transactions with any of the Funds.

Applicants assert that because a "bank" is specifically excluded from the definition of "broker" in Section 2(a)(6) of the Act, and probably does not satisfy the definition of "underwriter" in Section 2(a)(40) of the Act, a bank probably could not take advantage of either the exception from the prohibitions of Section 17(e)(1) provided for brokers and underwriters, or the "safe harbor" clause of Section 17(e)(2). Thus, an Affiliated Bank would be prohibited from accepting any consideration whatsoever in connection with a brokerage transaction where it acted as agent for a Fund. Applicants further conclude that, if the Commission's position regarding investment companies that share common officers, common directors, or common investment advisers being deemed affiliated persons of each other is applicable, the prohibition in Section 17(e)(1) would apply to all securities transactions where an Affiliated Bank wished to Act as agent for any of the Funds.

Section 17(b) of the Act, provides, in part, that the Commission shall issue an order exempting a proposed transaction from one or more provisions of subsection (a) if evidence establishes that: (1) the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned; (2) the proposed transaction is consistent with the policy of each registered investment company concerned; and (3) the proposed transaction is consistent with the general purposes of the Act. Section 6(c) of the Act provides, in part, that the Commission may exempt any classes of transactions from any provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The application states that Applicants, in order to comply with the requirements of the Act, have adopted internal control procedures requiring that banks that would otherwise qualify for Applicants' "approved list" of banks whose money market instruments and repurchase agreements may be purchased for the Funds' portfolios be either removed from the list or eliminated from consideration for inclusion on the list when they have been identified as a possible affiliated person of one of the Funds. Applicants state that the approved list is based on strict credit and financial statement criteria established by Applicants, and that the criteria and the list are reviewed periodically by the Funds' management. Applicants state that as a result of "upstream" affiliation, at least four banks have already been either removed from the approved list or eliminated from consideration for inclusion on the list. According to the application, at the present time, there are approximately 60 banks on the Federated "approved list." These 60 banks, which provide in excess of 80% of all bank-issued money market instruments, must provide the Funds with between $10 bilion and $11 billion in money-market instruments and repurchase agreements. If the Funds continued to grow and if additional Funds were created, the demand for money market instruments from this limited number of banks would become even greater.

Applicants assert that these figures demonstrate that each of the banks on the "approved list" contributes substantially to the depth and liquidity of the market for money market instruments, and that if the number of banks utilizing the Funds continues to expand resulting in more Affiliated Banks, the restrictive impact of the statutory prohibitions could increase to the point of adversely affecting portfolio liquidity and increasing portfolio exposure to adverse credit risk.

Applicants state that although there are approximately 60 banks on the approved list, they regularly engage in repurchase agreements with only 12 to 14 of these banks. In the opinion of Applicants' management, there are only about 20 banks in the United States that regularly sell large denomination ("wholesale") repurchase agreements in this market place and that have the size, the expertise, and the willingness to engage in the type of repurchase agreements Applicants' management believes are most cost effective i.e., those backed by a single, large dollar-valued United States government security. In practice, the Funds have found that it is reasonable to enter into repurchase agreements only with those banks whose portfolio of United States Government Securities exceed $500 million. According to the application, there were 17 banks ranked among the 25 largest domestic banks in terms of deposits that show positions of that magnitude. Applicants assert that the Funds' practice of engaging in repurchase agreements with those banks holding in excess of $500 million in United States Government Securities

has been established due to the existence of several market factors which have historically limited the market in repurchase agreements. According to the application, a major factor that limits the use of a bank's portfolio of United States Government Securities as collateral for repurchase agreements is that not all of a bank's United States Government Securities portfolio are made available to serve as collateral for repurchase agreements; a portion of a bank's United States Government Securities portfolio must be used as collateral supporting Treasury Tax and Loan account deposits and for other municipal deposits. Moreover, Applicants assert that it has been the practice of regional banks to favor local customers by giving those customers first preference on the use of their United States Government Securities portfolio before making such securities available to the Funds to use as collateral for repurchase agreements. In addition to these market limitations, Applicants assert that the Fund's policies on repurchase agreements, which emphasize safety and economies of scale (such that the collateral consists of relatively short-term United States Government Securities transmittable through the Federal Reserve Board's book entry system, which require individual transactions to be a minimum of $20 million and a margin premium of 2% including accrued interest) further limit available repurchase agreement collateral, since not all banks are willing or able to adhere to such policies. In addition to the 12 to 14 banks on the "approved list," Applicants enter into repurchase agreements with four large broker/dealers that Applicants believe have the necessary qualifications to participate in this wholesale repurchase agreement market. Applicants state that in this narrow market of suppliers, they purchase, on an average, approximately $6 billion in repurchase agreements every day and at any given time will own approximately 30% of all repurchase agreements owned by all money market funds. They assert that in the event that one or more of the 12 to 14 banks which sell repurchase agreements to the Funds would become an Affiliated Bank, the potential supply of repurchase agreements available to the Funds would be substantially reduced. To the extent that the available supply narrowed, the degree of potential diversification and liquidity of a Fund would be reduced, and a Fund, as a result of statutory prohibitions, would be obliged to refrain from engaging in those repurchase agreements which could be the most suitable and most capable of satisfying the "high-quality" standards set forth in the money market Funds' amortized cost orders.

According to the application, during the period from January 1, 1981, through September 30, 1982, the four municipal bond Funds, which are authorized to purchase or sell municipal bonds or notes from or to banks, transacted 51% of their total dollar volume transactions with banks that acted in a principal or brokerage capacity. Applicants note that two more municipal bond Funds have recently become effective, and that they anticipate that additional municipal bond Funds will be organized in the forseeable future. Applicants assert that just as banks have been excluded from the approved list because they have been identified as possible affiliated persons of the Funds, similarly, banks offering to act as broker or as dealer for the Funds in connection with municipal bond transactions have been disqualified from acting in such capacities because they have been identified as possible Affiliated Banks. Applicants assert that the need for portfolio management flexibility, particularly as it relates to liquidity and credit standards, is as important for municipal bond funds as for money market funds, and that commercial banks are important participants in the municipal bond dealer community.

Applicants express concern that the prohibition in Section 17(e)(1) would significantly limit the Funds' ability to select the best source available for execution of their securities transactions. Applicants state that the Funds frequently purchase or sell securities in transactions executed in the secondary markets, and that some of those transactions are executed by commercial banks acting as broker for a particular Fund. All securities transactions involve costs, and transactions where the intermediary acts as broker traditionally involve payment of a commission intended to cover the intermediary's costs and to provide an appropriate element of profit. If an Affiliated Bank acted on behalf of a Fund in connection with a securities transaction, it could not accept even the customary broker's commission from the Fund, and the Funds might, as a practical matter, be precluded from using that particular bank for securities transactions, even where the bank acting as broker might have provided the Funds with the best available execution.

In further justification of their request for exemptive relief, Applicants have expressed a willingness to adopt certain internal control procedures consistent with the underlying purposes of Sections 17(a)(1), 17(a)(2), and 17(e)(1) of the Act. Applicants contend that the overall purpose of the provisions of Sections 17(a)(1), and 17(a)(2), and 17(e)(1) is to prevent a party with strong potential adverse interests and some influence over the investment decisions of a registered investment company from causing or inducing the investment company to engage in transactions that unfairly inure to the benefit of such party and that are detrimental to the best interests of the investment company and its shareholders. The Fund Applicants state their belief that they can best serve the interests of their shareholders by investing in money market instruments, repurchase agreements, and tax-exempt instruments that best suit the investment objective of the Funds, regardless of whether the bank that issues or deals in those securities is an affiliated person of one of the Funds. Applicants assert that it is extremely unlikely that an Affiliated Bank would be able to exercise any adverse influence over the Funds and their investment advisers with respect to Covered Transactions. First, they assert that it is unlikely that a bank could induce the Funds to pay a premium for these instruments, because transactions in these securities occur in an intensely competitive well-informed market among sophisticated parties. Purchasing securities at a premium price or upon a higher than normal commission would cause the Funds to earn a reduced rate of return that could jeopardize their competitiveness. Second, they assert that because those Funds that operate pursuant to amortized cost orders must purchase securities which are of "high quality," a bank could not induce those Funds to purchase a security of inferior or questionable quality. The Fund Applicants state their belief that they can best safeguard their investors from any possibility of abuse by concentrating their attention directly on the inherent fairness of transactions with banks that are affiliated persons of the Funds. Thus, the Funds propose to create additional internal control procedures for carefully monitoring securities transactions with Affiliated Banks, assigning the responsibility for monitoring the reasonableness and fairness of those transactions to the Funds' trustees, directors, or general partners.

Applicants have also agreed that any order that the Commission may issue in response to the requested exemption may include a condition forbidding any securities transactions between a Fund and a bank that is affiliated with that

Fund because it is that Fund's investment adviser. In addition, Applicants state that solely with respect to repurchase agreements with an Affiliated Bank, no Fund will engage in such repurchase agreements if, as a result, more than 5% of that Fund's total assets would be so invested. Furthermore, these policies will also apply for each additional investment company for which subsidiaries of Federated may act as investment adviser or principal underwriter in the future.

Applicants represent that there is no express or implied understanding between Applicants and any bank which is (or may become) an Affiliated Bank of a Fund that Advisers will cause any of the Funds to enter into purchase or sale transactions with such bank. Moreover, Applicants' represent that they will give no preference to any Affiliated Bank in effecting purchase or sale transactions between the Funds and an Affiliated Bank which involve either the money-market instruments or repurchase agreements issued by such bank or tax-exempt obligations from or through such bank because the bank is (or may become) an Affiliated Bank of a Fund or because the customers of such bank purchase shares of any of the Funds unless the Board of Trustees, Directors or General Partners of the Fund shall have approved such a policy and its pursuit is disclosed in a prospectus of such fund declared effective by the Securities and Exchange Commission. The Advisers further represent that, consistent with their fiduciary duties to the Funds, they will initiate all purchase and sale transactions between the Funds and an Affiliated Bank and that such transactions will be entered into with the purpose of satisfying the investment objectives of the Funds.

Applicants state that in the case of each of the private label Funds that now exist, an advisory bank affiliate and an Adviser Applicant act as coinvestment advisers to the private label Fund. Under these arrangements, the Adviser Applicant is responsible for all purchases, sales and exchanges of securities in the private label Fund, subject to the direction and control of the Board of Trustees of the Fund; the bank adviser consults with the Adviser Applicant, provides money market research and analysis, and renders advice as to interest rate trends and the composition and average maturity of the portfolio. Applicants represent that if any of the Advisers enter into any new private label fund relationships with banks, it is likely that the bank adviser and the Adviser will exercise their respective responsibilities in the manner described. Applicants agree that if an Adviser enters into a private label relationship with a bank that would be materially different from the type of relationship described above, the staff of the Securities and Exchange Commission will be notified of the relationship.

Accordingly, the Funds state that they request an order of the Commission, pursuant to Section 17(b) of the Act, exempting from Sections 17(a)(1) and 17(a)(2) of the Act Covered Transactions with Affiliated Banks. Further, the Funds request an Order of the Commission, pursuant to Section 6(c) of the Act, exempting from Section 17(e)(1) of the Act any compensation, not to exceed the limitations in Section 17(e)(2) of the Act, which may be accepted by Affiliated Banks for acting as broker for the Funds in connection with Covered Transactions. The Funds agree that the following conditions may be imposed in any order of the Commission granting their requested exemptive relief:

(a) The Board of Trustees, Directors of General Partners of each of the Funds (1) will adopt procedures, pursuant to which Covered Transactions may be effected for the Funds, which are reasonably designed to provide that all the conditions in paragraphs (b) through (f) below have been complied with, (2) will review those procedures no less frequently than annually for their continuing appropriateness, and (3) will determine no less frequently than quarterly that Covered Transactions made during the preceding quarter were effected in compliance with those procedures. Those procedures will also be approved by a majority of the disinterested Trustees, Directors or General Partners of the Funds. The investment adviser of each Fund will implement those procedures and make decisions necessary to meet these conditions, subject to the direction and control of the Board of Trustees, Directors or General Partners of each Fund.

(b) No fund will engage in a Covered Transaction with a bank that is an investment adviser to that Fund. No Fund will purchase money market instruments of any Affiliated Bank if, as a result, more than 5 percent of that Fund's total assets would be invested in the money market instruments of that Affiliated Bank. No Fund will enter into repurchase agreements with any Affiliated Bank if, as a result, 5 percent of the Fund's total assets would be invested in repurchase agreements issued by that Affiliated Bank.

(c) The Funds (1) will maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph (a) of this section, and (2) will maintain and preserve for a period of not less than six years from the end of the fiscal year in which any Covered Transactions occurred, the first two years in an easily accessible place, a written record of each Covered Transaction setting forth a description of the security purchased or sold, the identity of the person or the other side of the transaction, the terms of the purchase or sale transaction, and the information or material upon which the determinations described below were made.

(d) The security to be purchased or sold by a Fund will be consistent with the investment objectives and policies of that Fund as recited in the Fund's Registration Statement, and will be consistent with the interests of that Fund and its shareholders. Further, the security to be purchased or sold by that Fund will be comparable in terms of quality, yield, and maturity to older similar securities that are appropriate for that Fund and that are being purchased or sold during a comparable period of time.

(e) The terms of the transaction will be reasonable and fair to the shareholders of that Fund and will not involve overreaching of that Fund or its shareholders on the part of any person concerned. In considering whether the price to be paid or received from the security is reasonable and fair, the price of the security will be analyzed with respect to comparable transactions involving similar securities being purchased or sold during a comparable period of time. In making this analysis, the Board of Trustees, Directors, or General Partners may rely on a matrix pricing system which they believe properly assists them in determining the value of securities pursuant to Section 2(a)(41) of the Act.

(f) The commission, fee, spread or other remuneration to be received by the bank will be reasonable and fair compared to the commission, fee, or spread or other remuneration received by other brokers or dealers in connection with comparable transactions involving similar securities being purchased or sold during a comparable period of time but in no event will such fee, commission, spread or other remuneration exceed that which is stated in Section 17(e)(2) of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later

than July 5, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22968; 70-6872]

New England Power Company et al.; Proposed Equity Investment in Joint Venture, Capital Contributions to Subsidiary, and Conforming Amendments to Related Agreement and Charter

June 8, 1983.

New England Power Company ("NEPCO") and New England Energy, Inc. ("NEEI"), subsidiaries of New England Electric System ("NEES"), 25 Research Drive, Westborough, Massachusetts 01581, a registered holding company, have filed an application-declaration with this Commission pursuant to Sections 9, 10, 12, and 13 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 promulgated thereunder.

By order dated February 13, 1981 (HCAR No. 21919, File No. 70-6518), this Commission authorized NEEI to participate in a joint venture with Keystone Shipping Company ("Keystone"), a subsidiary of Chas. Kurz & Co., Inc., for the construction and operation of a self-unloading, coal-fired collier (the "Vessel") to transport coal to NEPCO's plants. NEEI is a 51% participant in the joint venture and Keystone a 49% participant. The Joint Venture Agreement contemplates that the joint venture will arrange construction of the Vessel and operate it under a 24½ year Time Charter with NEPCO, as authorized by Commission order dated December 9, 1981 (HCAR No. 22809, File No. 70-6518). A construction contract was signed with the General Dynamics Corporation. The contract price for the Vessel is approximately $60 million, with additional equipment and other costs, including interest during construction, bringing the total estimated cost to approximately $73 million.

To provide permanent debt financing for the Vessel, NEEI previously requested authorization from the Commission to issue up to $52 million in bonds and notes, guaranteed by an agency of the United States, of which $36 million has currently been authorized (HCAR Nos. 22526 and 22877, File No. 70-6722). It was originally expected that the permanent equity financing of the Vessel would be provided through a leveraged lease transaction or a so-called Safe Harbor Lease under Section 168(f)(8) of the Internal Revenue Code. Interim financing during the period of construction has been provided through a credit agreement with the Bank of America, as authorized by this Commission (HCAR No. 22146, File 70-6601). It is expected that this loan will be repaid with the proceeds from the equity portion of the Vessel financing.

Applicants-declarants have now indicated their intention to alter the ownership agreement for the Vessel whereby the joint venture will retain full ownership rights in lieu of a leveraged lease arrangement. In connection therewith, authorization is requested:

(1) For NEEI to invest up to $15 million in the joint venture as its 51% share in the equity of the Vessel;

(2) For NEES to invest up to $15 million in NEEI for the purpose set forth in (1) above; and

(3) To make necessary, related amendments to the Joint Venture Agreement between NEEI and Keystone, and to the Time Charter between NEPCO and the joint venture.

Under the prior leasing arrangements, the tax benefits related to the Vessel would have been transferred to a third party. NEEI and Keystone, however, have reviewed their respective federal income tax positions and have determined that each expects to have sufficient taxable income to make economical use of the tax benefits (primarily investment tax credits and accelerated depreciation). Rather than transfer these benefits at a discount to a lessor through a lease arrangement, NEEI and Keystone propose to provide the equity portion of the Vessel financing using their own funds, through either capital contributions or subordinated notes, and thereby retain the tax benefits themselves. These funds will be required on or before delivery date of the Vessel, currently schedule to occur during July 1983.

In order to have the flexibility to make its share of any additional equity contributions to the joint venture which may be necessary from time to time, NEEI requests authority to invest up to $15 million in the joint venture, either in the form of capital contributions or in the form of subordinated loans. The total amount of equity required for the Vessel, including amounts needed for working capital, will be about $25 million. NEEI proposes to provide its 51% share of this equity in the form of capital contributions and/or subordinated loans. As contemplated by the Joint Venture Agreement, at least $450,000 of the total equity will be in the form of capital contributions. Any subordinated loans made by NEEI or Keystone to the joint venture will be payable on demand, will bear no interest, and will be evidenced by subordinated notes.

In order that NEEI have the funds necessary to make its equity contributions to the joint venture, as described above, NEES proposes to provide to NEEI up to $15 million either in the form of capital contributions or loans. If the money is provided in the form of loans, the loans will be evidenced by notes, will bear no interest, and will be payable on demand.

The Joint Venture Agreement was originally drafted contemplating a leveraged lease of the Vessel. Where NEEI and Keystone now propose to provide the equity financing themselves, a number of the provisions must be amended to reflect this change. These amendments principally concern the terms under which the joint venture may be terminated and changes necessary to assure the proper allocation of tax benefits.

The Time Charter was also drafted contemplating a leveraged lease. The terms of the Time Charter currently provide that, in the event of premature termination of the Charter, NEP may be required to purchase the Vessel at an amount sufficient to satisfy the debt financing and the obligations under the leveraged lease. The applicants propose to amend the Time Charter to require that, under such circumstances, NEP will be subject to the same potential obligations to purchase the Vessel at a price sufficient to repay the debt financing and to make NEEI and Keystone whole, including their capital and any adverse tax consequences, on the same basis as if they were leveraged lessors. The Time Charter will also be amended to reduce the amount NEP will

be required to pay while the collier is in dry dock.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by July 5, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8025-01-M

Paperwork Reduction Policies Affecting Small Business; Change in Hearing Date

On May 12, 1983, the Chief Counsel for Advocacy announced a series of six public hearings on small business paperwork burdens.

The date of the Boston hearing has been changed from Thursday, June 30, to Thursday, July 21. Listed below is the schedule for the five remaining hearings:

Wednesday, June 15, 1983, Room 7A2, Earle Cabell Federal Building, 1100 Commerce Street, Dallas, Texas 75242

Wednesday, June 22, 1983, Conference Room, 2nd Floor, Indiana State Chamber of Commerce, One North Capitol, Indianapolis, Indiana 46204

Wednesday, July 13, 1983, Room 543, 211 Main Street, San Francisco, California 94105

Friday, July 15, 1983, Board Room, Dexter Horton Building, 710 Second Avenue, Seattle, Washington 98104

Thursday, July 21, 1983, Room AV1, Federal Reserve Bank Building, 600 Atlantic Avenue, Boston, Massachusetts 02210

All hearings will be from 9:30 a.m. to 4:30 p.m.

Written comments or personal appearances are requested. Statements should respond to some or all of the issues mentioned in the notice of May 12, copies of which are available upon request.

Interested parties who wish to submit written statements should submit their comments, suggestions, or other information about Federal paperwork reduction policies to Mr. Frank S. Swain, Chief Counsel for Advocacy, U.S. Small Business Administration, Room 1012, 1441 "L" Street, NW., Washington, D.C. 20416, Attention: Paperwork Hearings.

To schedule oral testimony at one of the hearings, contact Dr. Philip Nicoll, Senior Advocate for Paperwork Policy, at the Office of Advocacy, U.S. Small Business Administration, Room 1012, 1441 "L" Street NW., Washington, D.C. 20416; phone (202) 634-6160.

The goal of the hearings is to assess the impact of the Paperwork Reduction Act of 1980 on the small business community and to explore ways to provide greater relief from paperwork burdens.

Dated: June 9, 1983.

Frank S. Swain,

Chief Counsel for Advocacy.

BILLING CODE 8025-01-M

[License No. 02/02-0441]

ALPHA Financial Corp.; Filing of Application for Transfer of Ownership and Control

Notice is hereby given that an application has been filed with the Small Business Administration (SBA), pursuant to § 107.701 of the Regulations governing small business investment companies (13 CFR 107.701 (1983)) for transfer of ownership and control of ALPHA Financial Corporation, 485 Morris Avenue, Springfield, New Jersey 07081, a Federal Licensee under the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 *et seq.*). The proposed transfer of ownership and control of ALPHA Financial Corporation (ALPHA), which was licensed October 13, 1982, is subject to the prior written approval of SBA.

ALPHA is owned and controlled by the following:

Name, title, and percent of ownership.

Michael Miller, President, Treasurer, Director, 50.

Carol B. Miller, Secretary.

Howard Shapiro, Director.

Howard Sterling, Director.

Howard Sterling is Trustee for two irrevocable trusts provided by Randolph Pace for the benefit of his minor children: Kimberly N. Pace, 25; and Allison B. Pace, 25.

Pursuant to a request of Howard Sterling that ALPHA redeem the stock issued to him in his capacity as Trustee of the above Trusts and the undertaking of a private offering of common stock, ALPHA's ownership and control would be as follows:

Name and address, title, and percent of ownership.

Michael Miller, 57 Farbrook Drive, Short Hills, N.J. 07078; President, Treasurer and Director, 76.25.

Carol B. Miller, 57 Farbrook Drive, Short Hills, N.J. 07078; Secretary.

Gerald N. Wachs, M.D., 459 Long Hill Drive, Short Hills, N.J. 07078; Director.

Joseph J. Bianco, 924 Edgewater Ave., Ridgefield, N.J. 07657; Director.

Other shareholders will own less than 10 percent of ALPHA's stock.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed new management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed transfer of ownership and control to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Springfield, New Jersey.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: June 8, 1983.

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

June 9, 1983.

[Department Circular Public Debt Series—No. 17-83]

Treasury Notes of June 30, 1985; Series V-1985

1. Invitation for Tenders

1. 1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $8,000,000,000 of United States securities, designated Treasury Notes of June 30, 1985, Series V-1985 (CUSIP No. 912827 PQ 9). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2. 1. The securities will be dated June 30, 1983, and will bear interest from that date, payable on a semiannual basis on December 31, 1983, and each subsequent 6 months on June 30 and December 31, until the principal becomes payable. They will mature June 30, 1985, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2. 2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2. 3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2. 4. Securities registered as to principal and interest will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominaitons and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2. 5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sales Procedures

3. 1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Wednesday, June 15, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, June 14, 1983, and received no later than Thursday, June 30, 1983.

3. 2. The face amount of securities bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3. 3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each

customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Thursday, June 30, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, June 28, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5. 2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5. 3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5. 4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6. 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6. 2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Carole J. Dineen,
Fiscal Assistant Secretary.

CIVIL AERONAUTICS BOARD

[M–382, June 9, 1983]

TIME AND DATE: 10 a.m., June 16, 1983.

PLACE: Room 1027 (open), room 1012 (closed), 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of Items Adopted by Notation.
2. Docket 39550, People Express—Review of the DBC and baggage liability exemptions previously granted to the carrier. (Memo 1866, 1866–A, BDA, OGC, OCCCA)
3. Docket 41361, Application of ERA Helicopters, Inc. for certificate authority to engage in scheduled interstate and overseas air transportation. (BDA)
4. Docket EAS–382, Essential Air Service for Brunswick, Georgia. (Memo 1869, BDA, OCCCA)
5. Docket 40929, Notice of Air U.S. to suspend service at Worland, Wyoming. (BDA, OCCCA)
6. Docket s 40205 and EAS–622, Essential air service for Manitowoc, Wisconsin. (BDA, OC, OCCCA)
7. Dockets EAS–604, EAS–606 and Docket; Essential air service for Moses Lake/Ephrata and Wenatchee. (BDA, OCCCA)
8. Docket 41071, *Akron/Canton Airlines Fitness Investigation;* Order Declining Review. (Memo 1876, OGC)
9. Docket 41007, *In the matter of Air National Aircraft Sales and Service;* Order on Reconsideration. (OCG)
10. Docket 41333, *Lillian H. Reynolds, Geraldine P. Hartzog, and Patricia Benner, et al. v. Republic Airlines, Inc., and Air Line Employees Association, International,* petition to compel arbitration under labor protective provisions. (Memo 1879, OGC)
11. Notice of terms of contracts of carriage for domestic travel sold at ticket locations outside of the United States. (Memo 1863, OGC, BDA, BIA, OCCCA)
12. Docket 41220, Conforming Amendments to Part 250. (Memo 1878, OGC, BDA, BIA, OCCCA)
13. Docket 27891, Realistic scheduling by certificated carriers. (Memo 1877, OGC, OC, BDA, OCCCA)
14. Docket 41303, Proposal for a penalty-free turn-back period, and subsequent reallocation, for unneeded Japan charter authorizations in this allocation year. (Memo 1723–D, BIA, OGC)
15. Revocation of the foreign air carrier permits held by certain foreign air carriers and dismissal of the applications of: (a) Air Manila, Inc. (Docket 37815), (b) Belize Airways Limited (Docket 36280), (c) Iscargo, H. F. (Docket 37745), and (d) Montana Austria Flugbetrieb Gesellshaft m.b.H. d.b.a. Montana Austria Airlines (Docket 37834). (BIA, OGC)
16. Petition of Cargolux Airlines International for review of staff action denying its joint request with Air-India for a statement of authorization to operate three scheduled, all-cargo, India-New York round-trip flights. (BIA, OGC)
17. Dockets 41288, Petition of Continental Air Lines for revocation of certificate of Western Air Lines (Texas/Alberta/Alaska); Application of Continental Air Lines for section 401 certificate, primary or backup (Texas/Alberta/Alaska); Docket 41237, Application of American Airlines for back-up authority (Texas/Alberta/Alaska). (Memo 1875, BIA, OGC, BALJ)
18. Docket 31777, Application of Trans World Airlines, Inc. for amendment of its certificate of public convenience and necessity for Route 147 to authorize foreign air transportation (U.S.-Barcelona, Casablanca, Nice, Austria). (Memo 310–C, BIA, OGC, BALJ)
19. Docket 40751, In the Matter of Intra-Hawaii Service Mail Rates. (Memo 351–E, BIA)
20. Docket 37392, *Transatlantic, Transpacific and Latin American Service Mail Rates Investigation.* (Memo 343–P, BIA)
21. Docket 37294, *Priority and Nonpriority Domestic Service Mail Rates Investigation.* (Memo 343–Q)
22. Docket 38961, In the Matter of Intra-Alaska Class Service Mail Rates; Docket 38019, *Wien Air Alaska Mainline and Bush Mail Rate Investigation. (Memo 1882, BIA)*
23. Docket 38623, Agreement C.A.B. 28987, IATA agreement proposing international construction rules (Resolution 014a) for U.S./Canada/Mexico-Africa passenger fares. (Memo 1873, BIA)
24. Petition of the Flying Tiger Line Inc. for review of staff action granting Caribbean Air Cargo Company a statement of authorization to complete a cargo charter program. (BIA, OGC)
25. Docket 40046, Petition for review of staff actions renewing the authorities held by El Al and Nordair to conduct a wet-lease operation between Montreal, Canada and Miami, Florida. (BIA, OGC)
26. Docket 41158, Application of South Pacific Island Airways, Inc. for a certificate of public convenience and necessity (Pago Pago, American Samoa-Auckland, New Zealand). (Memo 1884, BIA, OGC)
27. Report on negotiations with Italy. (BIA)
28. Report on negotiations with Israel. (BIA)
29. Report on negotiations with Jamaica. (BIA)
30. Report on negotiations with United Kingdom. (BIA)
31. Report on negotiations with Netherlands-Antilles. (BIA)

STATUS: 1–23 open, 24–31 closed.

FOR MORE INFORMATION CONTACT: Phyllis T. Kaylor, the Secretary (202) 673–5068.

Richard B. Dyson,

Associate General Counsel, Rules and Legislation Division.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

(Northwest Power Planning Council)

ACTION: Notice of meeting to be held pursuant to the Government in the Sunshine Act (5 U.S.C. 552b).

STATUS: Open.

DATE AND TIME: June 22, 1983, 11 a.m.; June 23, 1983, 9 a.m.

PLACE: Remington Room, Outlaw Inn, Kalispell, Montana.

MATTERS TO BE CONSIDERED:

June 22:

- •Public comment on Draft Fiscal Year 1985 Budget and Fiscal Year 1984 Revisons
- •Council discussion of Budget
- •Status Report on BPA's Conservation Contracts
- •Public comment

A portion of the meeting scheduled for June 22 may be closed to the public to discuss personnel matters. The Council will consider the matter of closing a portion of this meeting as its first item of business on June 22.

June 23:

- •Status Report on Implementation of Fish and Wildlife Program including Water Budget, Montana Fish, Wildlife and Parks
- •Council Business
- •Public Comment

FOR FURTHER INFORMATION CONTACT: Ms. Bess Wong (503) 222–5161.

Edward Sheets,

Executive Director.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 48 FR 26582, June 8, 1983.

STATUS: Open/closed meeting.

PLACE: 450 5th Street NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Friday, June 3, 1983.

CHANGE IN THE MEETING: Deletion/rescheduling. The Commission has cancelled the open meeting scheduled to consider the following item on Thursday, June 16, 1983, at 2:30 p.m.:

Consideration of whether to allow, or under what conditions to allow, the use of letters of credit: (1) As "cover," in lies of margin, when establishing short options positions in foreign currency or stock index options; (2) as collateral for secured demand notes made by subordinated lenders contributing capital to broker-dealers; and (3) as margin deposits required by the Options Clearing Corporation for certain aggregate short or exercised options positions of participants. For further information, please contact Thomas V. Sjoblom at (202) 272–7379.

A closed meeting scheduled for Thursday, June 16, 1983, following the now cancelled 2:30 p.m. open meeting has been rescheduled for Thursday, June 16, 1983, at 10 a.m.

Chairman Shad and Commissioner Evans, Thomas and Longstreth determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any matters have been added, deleted or postponed, please contact: Jerry Marlatt at (202) 272–2092.

June 9, 1983.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 886

Abandoned Mine Land Program; Grants—Administrative Procedures

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining (OSM) has amended portions of the abandoned mine land reclamation rules relating to the administrative procedures for State Reclamation Grants. This amendment will eliminate form OSM–62 which was developed to release OSM from all obligations under the grant or cooperative agreement funding being closed out. Also, form OSM–63 which was developed to provide OSM with a statement indicating that OSM will be entitled to its share and payment of all refunds, rebates, and credits arising from the performance of the agreement. These forms are being eliminated to reduce the paperwork burden on the recipients as much as possible.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: Donald W. Willen, Chief, Division of Grants Administration, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue N.W., Washington, D.C. 20240, Telephone (202) 343–7951 or 343–4225.

SUPPLEMENTARY INFORMATION:

Background

The Abandoned Mine Land Reclamation (AMLR) Program was established under the Surface Mining Control and Reclamation Act of 1977, Pub. L. 95–87, in response to concern over extensive environmental damage caused by the failure of past coal mining activities to adequately reclaim disturbed lands. Funds are generated by a fee imposed on each ton of coal produced. Congress then appropriates the funds for: 1) grants to States and Indian tribes to plan and carry out reclamation programs and projects, 2) for Federal reclamation projects carried out by the Secretary of the Interior through OSM and other Interior agencies, and 3) for the Rural Abandoned Mine Program (RAMP) administered by the Secretary of Agriculture and carried out by the Soil Conservation Service.

Introduction to Final Rule Revision

Section 886.20 presently reads as follows:

§ 886.20 Administrative procedures.

The agency shall follow administrative procedures governing accounting, payment, property, and related requirements contained in Office of Management and Budget Circular No. A–102 and use the following forms: OSM–60 (Report of Government Property), OSM–62 (Recipients' Release), and OSM–63 (Recipients Assignments of Refunds, Rebates and Credits).

In OSM's effort to reduce the paperwork burden on the recipient as much as possible, it was decided to revise 30 CFR 886.20 to eliminate the forms OSM–62 and OSM–63 which were burdensome and unnecessary. This action would also reduce the number of forms required from the recipient for closing out OSM financial assistance grants.

Therefore, OSM published a proposed rule in the **Federal Register** on Friday March 4, 1983 (Volume 48, No. 44). The comment period closed at 5 p.m. April 4, 1983.

Form OSM–62 was developed to release OSM from all obligations under the grant or cooperative agreement funding being closed out. OSM will require this information be provided in the grantee's transmittal letter at the time the grantee submits the final closeout report.

The transmittal letter will indicate that the recipient discharges the Government from all obligations arising from the agreement, unless any exceptions are noted. Information on audit exceptions will also be included.

The purpose of Form OSM–63 was to provide OSM with a statement indicating that OSM will be entitled to its share and payment of all refunds, rebates, and credits arising from the performance of the agreement.

OSM will ensure that a statement is included in each grant agreement that will indicate that OSM will be entitled to its share and payment of all refunds, rebates and credits arising from the performance of the agreement.

Disposition of Comments

Two comments were received from the States and considered in the rulemaking process. The two comments are available for inspection in the Administrative Record, Room 5315, 1100 L Street, N.W., Washington, D.C.

The two commenters fully support the proposed rule change of 30 CFR 886.20 (Administrative procedures).

Procedural Matters

The following determinations have been made by OSM in reference to the rule change:

This rule is being made effective immediately to avoid unnecessary expense and administrative burdens.

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

The Department of the Interior has determined, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), that this action will not have a significant effect on the quality of the human environment and an environmental impact statement need not be prepared.

The information collection requirements contained in this rule was approved by OMB under 44 U.S.C. 3507 and assigned clearance number 1029–0070.

Form OSM–62 was assigned number 1029–0077 and Form OSM–63 was assigned number 1029–0068.

Author of Rule Change: Carole L. Battle, Division of Grants Administration, Telephone: (202) 343–4714.

List of Subjects in 30 CFR Part 886

Coal mining, Grant program/natural resources, Reporting requirements, Surface mining, Underground mining.

For the reasons set forth in this preamble, 30 CFR Part 886.20 is amended as set forth herein.

Dated: May 13, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 886—STATE RECLAMATION GRANTS

Section 886.20 is revised to read as follows:

§ 886.20 Administrative procedures.

The agency shall follow administrative procedures governing accounting, payment, property, and related requirements contained in Office of Management and Budget Circular No. A–102 and use the following form: OSM–60 (Report of Government Property).

Authority: Pub.L. 95–87, 30 U.S.C. 1201 *et seq.*

Part III

Department of the Interior

Bureau of Land Management

Procedures for Management of Designated Wilderness Areas

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 8560

Designated Wilderness Areas; Procedures for Management

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rulemaking would establish procedures for the administration of wilderness areas on public lands that are designated by Congress as part of the National Wilderness Preservation System. This proposed rulemaking would enable the Bureau of Land Management to carry out the congressional direction to manage wilderness areas to preserve their wilderness character. The proposed rulemaking is based on the Bureau's Wilderness Management Policy as published in the **Federal Register** on September 24, 1981 (46 FR 47180), and is similar to the Forest Service wilderness management regulations.

DATE: Comments should be received by August 15, 1983.

ADDRESS: Comments should be sent to: Director (140), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240.

Comments will be available for public review in Room 5555 at the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: David E. Porter, (202) 343–6064.

SUPPLEMENTARY INFORMATION: Section 603(c) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782(c)) requires that once an area of public lands has been designated for preservation as wilderness, the provisions of the Wilderness Act of 1964 (16 U.S.C. 1131) which apply to national forest wilderness areas shall also apply to areas under the jurisdiction of the Bureau of Land Management. The Wilderness Act directs that wilderness areas be managed to provide for their protection and the preservation of their wilderness character. The Wilderness Act prohibits certain uses and activities in wilderness areas. It is important that the public be aware of the restrictions on use and visitation. There are presently no regulations that directly pertain to management of public land wilderness areas. This proposed rulemaking would put provisions relating to the management of wilderness areas into a single part of the Code of Federal Regulations rather than spread them piecemeal among several parts of existing regulations.

The proposed rulemaking is concerned primarily with the restraints placed on the public. Certain uses such as mining, mineral leasing and grazing are specifically provided for in the Wilderness Act, and activities related to these uses would also be managed by the Bureau of Land Management.

The proposed rulemaking would enable the Bureau to manage these activities to minimize the impact on the wilderness character of the lands, and enable the Director of the Bureau of Land Management or the authorized officer, by directive or order, to impose qualifications or restrictions on such uses as circumstances require and as permitted by law.

This proposed rulemaking would have no effect on the process for designating wilderness areas. Further, this proposed rulemaking would have no effect on the jurisdiction or responsibility of the States to manage fish and wildlife on public lands, and would not constitute an express or implied claim of exemption from State water laws on the part of the Bureau of Land Management or the Department of the Interior.

The proposed rulemaking would require the authorized officer of the Bureau of Land Management to permit reasonable access to inholdings within wilderness areas. The responsibility for determining what is reasonable access would remain with the authorized officer, who would consult closely with inholders to determine and meet their needs. Any decision of the authorized officer would be subject to appeal.

Mining operations authorized by the U.S. Mining Laws in BLM administered wilderness areas may require an approved plan of operations under 43 CFR 3809. Any plan of operations approved on or before December 31, 1983, will be allowed to continue pending a determination that valid rights exist.

Before approving plans of operations submitted after December 31, 1983, or such other date on which the mining laws cease to apply to an affected wilderness area, the authorized officer will request a mineral examiner to make an informal examination of the operation area. If the evidence of mineralization appears sufficient to justify a determination that a valuable mineral deposit has been discovered, the authorized officer may process the plan of operations. If the mineralization does not appear sufficient, the authorized officer will disapprove the plan of operations and initiate a formal validity determination. Any disapproval of a plan of operations by the authorized officer would be subject to appeal by the operator under 43 CFR 3809.4.

The proposed rulemaking would close all wilderness areas on public lands to mineral leasing. Exercising the discretion granted to him by the mineral leasing laws, the Secretary of the Interior has directed that no mineral leases shall be issued before midnight, December 31, 1983, after which the mineral leasing laws cease to apply to wilderness ares. A provision to that effect has been included in this rulemaking.

The principal author of this proposed rulemaking is David E. Porter, Division of Recreation, Cultural, and Wilderness Resources, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility act (5 U.S.C 601 et seq.) The proposal favors no demographic group, and applies equally to all users, regardless of size, pursing a particular activity in any wilderness area administered by the Bureau. Information is required from the public for certain uses and activities in wilderness areas in accordance with existing procedures found in 43 CFR 2800, 2880,, 2920, 3045, 3209, 3809, 4100 and 8372. The information collection requirements of those procedures, which are referred to in this rule, have been approved by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

List of Subjects in 43 CFR Part 8560

Grazing lands, Livestock, National Wilderness Preservation System, Oil and gas exploration, Penalties, Public lands—mineral resources, Public lands—recreation, Recreation.

Under the provisions of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) and the Wilderness Act of 1964 (16 U.S.C. 1131), it is proposed to amend Subchapter H, Chapter II, Title 43 of the Code of Federal Regulations by adding a new Group 8500 as set forth below:

Group 8560—Wilderness Management

PART 8560—WILDERNESS AREAS

Subpart 8560—Management of Designated Wilderness Areas

8560.5 Penalties.

Authority: 43 U.S.C. 1701 et seq., 16 U.S.C. 1131 et seq.

Subpart 8560—Management of Designated Wilderness Areas

§ 8560.0–1 Purpose.

The purpose of this part is to provide procedures for the mangement of public lands designated by Congress as part of the National Wilderness Preservation System and administered under provisions of the Wilderness Act of 1964.

§ 8560.0–2 Objective.

The objective of these regulations is management of the public lands designated as part of the National Wilderness Preservation System to preserve and protect their wilderness character, provide for their use and enjoyment by the American people in a manner that will leave them unimpaired for future use and enjoyment as wilderness, and allow for recreational, scenic, scientific, educational, conservation and historic use.

§ 8560.0–3 Authority.

This part is issued under the authority of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and the Wilderness Act of 1964 (16 U.S.C. 1131 et seq.).

§ 8560.0–5 Definitions.

As used in this part, the term:

(a) "Adequate access" means the combination of routes and modes of travel to non-Federal inholdings that will, as determined by the authorized officer, serve the reasonable purposes for which the non-Federal lands are held or used, and at the same time, cause impacts of least duration and degree on the wilderness resource.

(b) "Authorized officer" means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this part.

(c) "Bureau" means the Bureau of Land Management.

(d) "Mechanical transport" means any device for transporting personnel or material with: wheels, tracks or skids, or by flotation, for traveling over land, water or snow, and is propelled by a nonliving power source contained or carried on or within the device.

(e) "Motorized equipment" means any machine activated by a nonliving power source except small battery-powered, handcarried devices such as flashlights, shavers, Geiger counters and cameras.

(f) "Motor vehicle" means any vehicle which is self-propelled or any vehicle which is propelled by electric power obtained from batteries.

(g) "Mining operations" means all functions, work and activities in connection with prospecting, exploration, development, mining or processing of mineral resources and all uses of the land reasonably incident thereto, including roads and other means of access on lands subject to the regulations in this part, regardless of whether said operations take place on or off mining claims.

(h) "Primitive and unconfined recreation" means nonmotorized types of outdoor recreation activities that do not require developed facilities.

(i) "Public lands" means any lands and interests in lands owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management without regard to how the United States acquired ownership.

(j) "Solitude" means the state of being alone or remote from habitation; isolation; also, a lonely, unfrequented, or secluded place.

(k) "Visitor use" means on-site use of the wilderness area for recreation, inspiration, stimulation, solitude, relaxation, education, scientific research, pleasure or satisfaction.

(l) "Wilderness" is defined in the same way as in section 2(c) of the Wilderness Act of 1964, 16 U.S.C. 1131(c).

(m) "Wilderness character or characteristics" are defined in the same way as in section 2(c) of the Wilderness Act of 1964, 16 U.S.C. 1131(c).

§ 8560.0–6 Policy

Wilderness areas shall be managed to promote, perpetuate and, where necessary, restore the wilderness character of the land and its specific values of solitude, physical and mental challenge, scientific study, inspiration, primitive recreation, watersheds and water yield, wildlife habitat, natural plant communities, and similar natural and recreational values.

(a) Natural ecological succession shall be allowed to operate freely to the extent permitted by the Wilderness Act;

(b) Wilderness shall be made available for human use to the optimum extent consistent with the maintenance of primitive conditions;

(c) In resolving conflicts in resource use, wilderness values shall be primary to the extent provided by the Wilderness Act or subsequent establishing legislation.

§ 8560.1 Uses and prohibited acts.

§ 8560.1–1 Permits for and restrictions on use.

(a) Unless otherwise designated by the authorized officer, all wilderness areas shall be open to uses consistent with the preservation of their wilderness character and their future use and enjoyment by the American people as wilderness, including, but not limited to, primitive recreation and scientific study. The authorized officer may require permits for any use of particular wilderness areas, including, but not limited to, camping, campfires and grazing of recreation livestock, and may isue written orders to close or restrict the use of lands and water surface administered by the Bureau within the boundary of any component of the Natural Wilderness Preservation System when necessary to carry out the intent of the Wilderness Act. Each order shall:

(1) Describe the lands, trail or waterway to which the order applies;

(2) Specify the time during which the closure or restriction applies;

(3) State each prohibition that is applied; and

(4) Specify any person exempted from any of the prohibitions contained in the order.

(b) An order to close or to restrict the use of lands and water surface shall be effective upon posting. Posting shall be by:

(1) Placing a copy of the order in each local office of the Bureau having jurisdiction over lands affected by the order; and

(2) Displaying each order near and/or within the affected wilderness area in such reasonable locations and in such a

manner as to bring the prohibitions contained in the order to the attention of the public.

(c) The authorized officer may publish in the **Federal Register**, and/or in a newspaper of general circulation in the area of the affected lands, a copy of the order to close or restrict the use of lands or water surface.

(d) Permits may be requested from the Bureau office exercising field-level jurisdiction over the wilderness areas for which use permits are required by the authorized officer.

(e) When a permit for use is required by the authorized officer, applications for recreation uses shall be completed in accordance with the provisions of 43 CFR Part 8372.

§ 8560.1–2 Prohibited acts.

Except as provided in the Wilderness Act or subsequent legislation establishing a particular wilderness area, or as specifically provided for elsewhere in this subpart, and subject to valid existing rights, the following are prohibited in wilderness areas managed by the Bureau;

(a) Commercial enterprises;

(b) Temporary or permanent roads;

(c) Aircraft landing strips, heliports, or helispots;

(d) Use of motorized equipment, motor vehicles, motorboats or other forms of mechanical transport;

(e) Landing of aircraft;

(f) Dropping of materials, supplies or persons from aircraft;

(g) Structures or installations, including motels, summer homes, stores, resorts, organization camps, hunting and fishing lodges, electronic installations, and similar structures and uses;

(h) Cutting of trees;

(i) Violating any order or regulation established by the authorized officer;

(j) Entry into or use of wilderness areas without a permit, where such permits are required by the authorized officer.

§ 8560.2 Special provisions applicable to Alaska (Reserved).

§ 8560.3 Administrative and emergency functions.

To the extent authorized by law, the authorized officer may:

(a) Use, construct or install motorized equipment, mechanical transport, aircraft, aircraft landing strips, heliports, helispots, installations or structures in designated wilderness areas, and prescribe conditions under which such items may be used, transported or installed by other Federal, State or county agencies or their agents, to meet the minimum requirements for protection and administration of the wilderness area and its resources.

(b) Authorize occupancy and use of wilderness areas by officers, employees, agencies or agents of the Federal, State and local governments to carry out the purposes of the Wilderness Act.

(c) Prescribe measures to be taken, as necessary, to control fire, insects and diseases where these threaten human life, property or high value resources within the wilderness area or on adjacent nonwilderness lands.

(d) Prescribe measures which may be used in emergencies involving the health and safety of persons or damage to property, including the conditions for use of motorized equipment, mechanical transport, aircraft, installations and structures.

§ 8560.4 Special uses.

All uses specifically permitted in wilderness areas by the Wilderness Act and subsequent laws shall be conducted in a manner that will prevent unnecessary or undue degradation of the wilderness character of the land.

§ 8560.4–1 Livestock grazing.

(a) The grazing of livestock, where such use was established before the date of the establishment of the area as a unit of the National Wilderness Preservation System, shall be permitted to continue under the regulations on the grazing of livestock on public lands in part 4100 of this chapter and in accordance with any special provisions covering grazing use in wilderness areas that the Director may prescribe.

(b) Grazing activities may include the construction, use and maintenance of livestock management improvements and facilities associated with grazing that are in compliance with approved plans for the area.

§ 8560.4–2 Aircraft and motorboats.

The authorized officer may permit the landing of aircraft and use of motorboats at places within any wilderness area where these uses were established before the date the area was designated by Congress as a unit of the National Wilderness Preservation System, and where such uses have continued, subject to such restrictions as he/she finds necessary. The authorized officer may also permit the maintenance of aircraft landing strips, heliports or helispots that existed when the area was designated a unit of the National Wilderness Preservation System.

§ 8560.4–3 Access.

(a) States or persons, and their successors in interest, who own lands completely surrounded by a wilderness area or who hold valid mining claims or other valid occupancies, shall be given adequate access to such lands, as determined necessary by the authorized officer.

(b) Persons with valid mining claims or other valid occupancies wholly within wilderness areas shall be permitted access to such surrounded occupancies by means that are consistent with the preservation of such wilderness and that have been or are being customarily used with respect to other such occupancies surrounded by wilderness. Permits issued under 43 CFR Parts 2800, 2880 or 3809 by the authorized officer shall prescribe the routes of travel to and from the occupancies surrounded by wilderness, the mode of travel, and other conditions reasonably necessary to preserve the wilderness areas.

(c) No roads shall be constructed across wilderness areas unless permitted by the authorized officer. Access by routes or modes of travel not available to the general public may, when fully justified, be permitted by written authorization of the authorized officer. The authorization shall prescribe routes and modes of travel which will result in impacts of least duration and degree on wilderness characteristics and, at the same time, serve the reasonable purposes for which the lands are held or used.

§ 8560.4–4 Commercial services.

The authorized officer may permit temporary structures and commercial services such as those provided by packers, outfitters and guides within wilderness areas to the extent he/she finds necessary for activities appropriate for realizing the recreational or other wilderness purposes of the area.

§ 8560.4–5 Gathering information about resources.

(a) Any person desiring to conduct any activity, for purposes of gathering information about natural resources in wilderness may do so provided it is carried on in a manner compatible with the preservation of the wilderness environment. Where required by other law or regulation, such person shall obtain the necessary permits or authorizations. The authorized officer in granting such permits or authorizations shall allow such activities, subject to such restrictions as he/she may impose to insure that they are carried on in a manner compatible with the preservation of the wilderness environment. This section shall not apply to mineral prospecting under the

mining or mineral leasing laws conducted prior to the date when the mining and mineral leasing laws cease to apply to the respective component of the system. (See § 8560.4–6.)

(b) Any person desiring to use motor vehicles, motorized equipment, mechanized transport, or to land aircraft for mineral prospecting or for gathering information about resources, shall notify the Bureau in writing. No form of overland mechanical transport may be used unless approved in accordance with subparts 2920, 3045 or 3209 of this title. If a permit is required, it shall provide for the protection of public land resources, including wilderness characteristics, protection of the public and restoration of disturbed areas, and may provide for the posting of performance bonds.

§ 8560.4–6 Mining law administration.

The United States mining laws shall apply to each wilderness area under the jurisdiction of the Bureau for the period specified in the Wilderness Act and subsequent establishing legislation to the same extent they were applicable on the date of the designation of the area as part of the National Wilderness Preservation System.

(a) No person shall obtain any right or interest in or to any mineral deposits that may be discovered through prospecting or other information-gathering activity after the date on which the United States mining laws cease to apply to the specific wilderness area.

(b) No mining operating shall be conducted on Bureau-administered wilderness areas without an approved plan of operations where required by subpart 3809 of this chapter.

(c) Holders of valid mining claims established on any Bureau-administered wilderness area before the date such unit was included in the National Wilderness Preservation System shall be accorded the rights provided by the United States mining laws then applicable to the public lands involved.

(d) Any person prospecting or locating a mining claim in a Bureau-administered wilderness area on or after the date the wilderness area was included in the National Wilderness Preservation System, but prior to the date on which the mining laws cease to apply to that area, shall have the rights provided by the United States mining laws, subject to the provisions of the Wilderness Act and subsequent establishing legislation.

(e) All mining claimants shall comply with conditions established by the authorized officer for the protection of resources in accordance with the general purposes of maintaining the National Wilderness Preservation System unimpaired for future use and enjoyment as Wilderness and to preserve its wilderness character, consistent with the use of the lands for mineral location, exploration, development, drilling and production, and for transmission lines, water lines, telephone lines and processing operations. The conditions shall control, where essential, the use of mechanized transport, aircraft and motorized equipment.

(f) As soon as feasible after mining operations cease, but no more than one year thereafter, the operator shall remove all structures, equipment and other facilities and, no more than 6 months thereafter, commence reclamation. Reclamation shall be completed within a reasonable time as determined by the authorized officer. Whenever possible and feasible, reclamation shall restore the surface to a contour which appears to be natural, although this may not be the original contour. Where such measures are impractical or impossible, as determined by the authorized officer, reclamation shall provide the maximum achievable slope stability.

(g) In the development and operation of mining claims, claimants shall, to the extent practicable as determined by the authorized officer, prevent erosion, deterioration of the land, and the obstruction, pollution or siltation of streams, lakes or springs.

(h) The owner of patented mining claims located after the lands were included in the National Wilderness Preservation System may cut and use as much of the mature timber as is needed in the extraction, removal and benefication of the mineral deposits, if needed timber is not otherwise reasonably available. The cutting shall comply with sound principles of forest management as set forth in stipulations issued by the authorized officer.

(i) Prior to approving plans of operations or allowing operations to continue on unpatented claims after the date on which the mining laws cease to apply to the affected wilderness area, the authorized officer shall determine to his/her satisfaction the validity of such claims. Where the authorized officer determines that the claims are not valid, he/she shall institute a contest to establish conclusively the validity or invalidity of the claim. Producing operations shall be permitted to continue until a plan of operations is approved.

(j) Activities, including prospecting under the United States mining laws, for the purpose of gathering information about minerals in wilderness, shall be allowed, except that any such activity for gathering mineral information after the date on which the United States mining laws cease to apply shall be conducted in a manner compatible with the preservation of the wilderness environment. After such date, mining claims shall not be located in wilderness areas.

§ 8560.4–7 Mineral leases and mineral permits.

(a) Although the Wilderness Act permits mineral leasing in wilderness areas until midnight, December 31, 1983, no mineral leases shall be issued under the mineral leasing laws in any wilderness area on public lands.

(b) No person shall obtain any right or interest in or to any mineral deposits that may be discovered in a wilderness area through prospecting or other information-gathering activity after the date on which the laws pretaining to mineral leasing cease to apply to the specific wilderness area, nor shall any person after such date have any preference in applying for a mineral lease, license or permit.

(c) Permits shall not be issued for the removal of mineral materials commonly known as "common varieties" under the Minerals Act of July 31, 1947, as amended and supplemented (30 U.S.C. 601, 604).

§ 8560.5–8 Water and power resources.

Prospecting for water resources and the establishment of new reservoirs, water-conservation works, power projects, transmission lines and other facilities needed in the public interest, and the subsequent maintenance of such facilities, all pursuant to section 4(d)(4)(1) of the Wilderness Act, may be permitted under authorization by the President.

§ 8560.6 Penalties.

Any person who knowingly and willfully violates the regulations § 8560.1–2 is subject to arrest, conviction and punishment by a fine of not more than $1,000 or imprisonment for not more than 12 months, or both.

Dated: May 20, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 908]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: June 8, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease)

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

[Volume 909]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: June 8, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

[Volume 910]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: June 8, 1983.

The following notices of determination were received from the indicated jurisdictional agenices by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

21 CFR Parts 201 and 429

[Docket No. 83N–0023]

Drugs Composed Wholly or Partly of Insulin; Advance Notice of Proposed Rulemaking; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to July 15, 1983, the comment period on its advance notice of proposed rulemaking for drugs composed wholly or partly of insulin. This action is in response to a request to extend the comment period.

DATE: Comments by July 15, 1983.

ADDRESS: Comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert D. Bradley, National Center for Drugs and Biologics (HFN–8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In the Federal Register of April 19, 1983 (48 FR 16704), FDA published an advanced notice of proposed rulemaking announcing the agency's intention to review its existing regulations on insulin. The advance notice gives interested individuals and organizations an opportunity to submit their comments (1) for revising the regulations, and (2) on several specific issues concerning the packaging and labeling of insulin products as set forth in the advance notice of proposed rulemaking. Interested persons were given to June 20, 1983, to submit comments.

In response to the advance notice of proposed rulemaking, counsel for Nordisk-USA has requested that the comment period be extended to July 15, 1983. Reasons for requesting the extension are that in addition to FDA's soliciting general comments, there are 15 separate and distinct subjects on which FDA solicits comments, some of which are complex and therefore require a significant amount of time for review and preparation of useful comments. FDA has considered this request and believes it is in the public interest to grant the extension. Further, the agency has determined that its schedule for preparing a proposed regulation will permit a general extension of the comment period to July 15, 1983, as requested.

Interested persons may, on or before July 15, 1983, submit written comments on the advance notice of proposed rulemaking to the Dockets Management Branch (address above). The comments will be considered in the agency's review and revision of its insulin regulations. Comments should be in two copies (except that individuals may submit single copies), identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: June 10, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5068 of June 13, 1983

Baltic Freedom Day, 1983

By the President of the United States of America

A Proclamation

In 1940, Soviet armies invaded and occupied the independent countries of Lithuania, Latvia, and Estonia. The peaceful, Western-oriented Baltic nations were crushed by the force of arms of their hostile neighbor. Under the cynical arrangements of the infamous Ribbentrop-Molotov agreement, the Soviet Union forcibly incorporated the three Baltic Republics into its empire.

Following the Soviet takeover, tens of thousands of the Baltic peoples were subject to imprisonment, deportation, persecution, and execution. Their religious, cultural, and historical heritage has been denigrated. The foreign political system which now controls their homelands has attempted to force these unwilling people to accept an alien life of totalitarian domination. But it has failed.

Today, the Baltic peoples continue to struggle to attain the freedoms we enjoy. These men and women still suffer harsh imprisonment, banishment, and persecution for their beliefs. Brave Lithuanians, Latvians, and Estonians still seek to exercise their human rights to think, speak, and believe as their conscience directs them.

The people of the United States of America share the just aspirations of the people of the Baltic nations for national independence, and we cannot remain silent in the face of the continued refusal of the government of the U.S.S.R. to allow these people to be free. We uphold their right to determine their own national destiny, free of foreign domination.

The government of the United States has never recognized the forced incorporation of the Baltic States into the Soviet Union and will not do so in the future.

In its defense of the rights of the Baltic people, the United States does not stand alone. On January 13th, the Parliament of Europe passed a resolution by an overwhelming majority on "The situation in Estonia, Latvia and Lithuania," calling for the restoration of self-determination for the Baltic States.

By House Joint Resolution 201, the Congress of the United States has authorized and requested the President to designate June 14, 1983, as "Baltic Freedom Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate June 14, 1983 as Baltic Freedom Day. I call upon the people of the United States to observe this day with appropriate remembrances and ceremonies and to reaffirm their commitment to principles of liberty and freedom for all oppressed people.

IN WITNESS WHEREOF, I have hereunto set my hand this thirteenth day of June, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 116
Wednesday, June 15, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL RESERVE SYSTEM

12 CFR Part 217

[Docket No. R-0471]

Regulation Q; Interest on Deposits; Temporary Suspension of Early Withdrawal Penalty

AGENCY: Federal Reserve System.

ACTION: Temporary suspension of the Regulation Q early withdrawal penalty.

SUMMARY: The Board of Governors, acting through its Secretary, pursuant to delegated authority, has suspended temporarily the Regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks for depositors affected by severe storms, tornadoes and flooding in the Mississippi counties of Hinds, Madison, Rankin, Warren, Leake, Washington and Holmes.

EFFECTIVE DATES: June 1, 1983, for the counties of Hinds, Madison and Rankin; June 6, 1983, for the county of Warren; and June 7, 1983, for the counties of Leake, Washington and Holmes.

FOR FURTHER INFORMATION CONTACT: Daniel L. Rhoads, Attorney (202/452-3711), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: On June 1, 1983, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order 12148 of July 15, 1979, the President, acting through the Director of the Federal Emergency Management Agency, designated the Mississippi counties of Hinds, Madison and Rankin major disaster areas. On June 6, 1983, the Presidential declaration of a major disaster was amended to include the Mississippi county of Warren. The Presidential declaration was further amended on June 7, 1983, to include the Mississippi counties of Leake, Washington and Holmes. The Board regards the President's action as recognition by the Federal government that a disaster of major proportions had occurred. The President's designation enables victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional measure of assistance to victims by temporarily suspending the Regulation Q early withdrawal penalty (12 CFR 217.4(d)). The Board's action permits a member bank, wherever located, to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has suffered property or other financial loss in the disaster areas as a result of the severe storms, tornadoes and flooding beginning on or about May 18, 1983. A member bank should obtain from a depositor seeking to withdraw a time deposit pursuant to this action a signed statement describing fully the disaster-related loss. This statement should be approved and certified by an officer of the bank. This action will be retroactive to June 1, 1983, for the Mississippi counties of Hinds, Madison and Rankin; June 6, 1983, for the Mississippi county of Warren; and June 7, 1983, for the Mississippi counties of Leake, Washington and Holmes, and will remain in effect until 12 midnight, December 2, 1983.

Advertising, Banks, banking, Federal Reserve System, Foreign banking.

In view of the urgent need to provide immediate assistance to relieve the financial hardship being suffered by persons in the designated counties in Mississippi directly affected by the severe storms, tornadoes and flooding, good cause exists for dispensing with the notice and public participation provisions in section 553(b) of Title 5 of the United States Code with respect to this action. Because of the need to provide assistance as soon as possible and because the Boards's action relieves a restriction, there is good cause to make this action effective immediately.

By order of the Board of Governors, acting through its Secretary, pursuant to delegated authority, June 9, 1983.

William W. Wiles,
Secretary of the Board.

BILLING CODE 6210-01-M

12 CFR Part 217

[Docket No. R-0472]

Regulation Q; Interest on Deposits; Temporary Suspension of Early Withdrawal Penalty

AGENCY: Federal Reserve System.

ACTION: Temporary suspension of the Regulation Q early withdrawal penalty.

SUMMARY: The Board of Governors, acting through its Secretary, pursuant to delegated authority, has suspended temporarily the Regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks for depositors affected by severe storms, landslides and flooding in the Utah counties of Carbon, Emery, Utah, Davis, Salt Lake, Sanpete, Juab, Millard, Sevier and Beaver.

EFFECTIVE DATES: April 30, 1983, for the counties of Carbon, Emery and Utah; June 3, 1983, for the counties of Davis, Salt Lake and Sanpete; and June 7, 1983, for the counties of Juab, Millard, Sevier and Beaver.

FOR FURTHER INFORMATION CONTACT: Daniel L. Rhoads, Attorney (202/452-3711), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: On April 30, 1983, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order 12148 of July 15, 1979, the President, acting through the Director of the Federal Emergency Management Agency, designated the Utah counties of Carbon, Emery and Utah major disaster areas. On June 3, 1983, the Presidental declaration of a major disaster was amended to include the Utah counties of Davis, Salt Lake and Sanpete. The Presidential declaration was further amended on June 7, 1983, to include the Utah counties of Juab, Millard, Sevier and Beaver. The Board regards the President's action as recognition by the Federal government that a disaster of major proportions had occurred. The President's designations enable victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional measure of assistance to victims by temporarily suspending the Regulation Q early withdrawal penalty (12 CFR 217.4(d)). The Board's action permits a

member bank, wherever located, to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has suffered property or other financial loss in the disaster areas as a result of the severe storms, landslides and flooding beginning on or about April 12, 1983. A member bank should obtain from a depositor seeking to withdraw a time deposit pursuant to this action a signed statement describing fully the disaster-related loss. This statement should be approved and certified by an officer of the bank. This action will be retroactive to April 30, 1983, for the Utah counties of Carbon, Emery and Utah; June 3, 1983, for the Utah counties of Davis, Salt Lake and Sanpete; and June 7, 1983, for the Utah counties of Juab, Millard, Sevier and Beaver, and will remain in effect until 12 midnight, December 2, 1983.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 572a

[No. 83-333]

Voluntary Assisted-Merger Program; Delegation of Authority

June 9, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation") has determined to delegate to its Principal Supervisory Agents authority to negotiate and approve certain mergers and acquisitions of eligible institutions, as designated by the Board, and to authorize financial assistance from the FSLIC to facilitate such mergers and acquisitions. The authority delegated covers mergers or acquisitions assisted by the FSLIC and voluntarily entered into by the affected institutions. The Board's action is intended to permit earlier solution of relatively simple situations, to reduce the time and cost required to complete those solutions, and to encourage innovative approaches to the financial problems of insured institutions.

EFFECTIVE DATE: June 15, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald Scott Taylor, Attorney, Office of General Counsel (202-377-6442), or Alan Hawkins, Office of the Federal Savings and Loan Insurance Corporation (202-377-6114), Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Savings and Loan Insurance Corporation may provide financial and other assistance to insured institutions in default or at risk of default, using a range of techniques under the authority of section 406(f) of the National Housing Act ("NHA"), as amended by the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97-320 ("1982 Act"). These techniques include direct loans to an insured institution, deposits in an insured institution, contractual assistance to purchase classes of assets or to cover part of an institution's operating losses, purchase of Income Capital Certificates and, since passage of the 1982 Act, purchase of Net Worth Certificates under 12 CFR Part 572.

Another major assistance technique employed by the FSLIC is the assisted merger or acquisition, in which the FSLIC arranges a merger, acquisition or other business combination of the troubled insured institution with a stronger merger partner or acquirer. The assisted-merger technique is usually less costly to the FSLIC than alternative methods of assistance, preserves thrift and lending services to the community, reduces adverse impact on the community and the economy from an outright closing of an institution in default, and takes full advantage of the skills, staff and franchise value of the institutions involved in such a merger.

Recent economic conditions required a significant increase in the number of assisted-merger transactions, from 11 in 1980 to 23 in 1981 and a total of 47 during calendar year 1982. While improvement in the economy, reductions in the prevailing level of interest rates and passage of the 1982 Act have all contributed to a lessening of the severe economic pressures on institutions the accounts of which are insured by the FSLIC, a number of insured institutions will require assistance from the FSLIC during calendar year 1983, including assistance in connection with a merger or acquisition.

Within the group of insured institutions which will predictably qualify for participation in FSLIC-assisted mergers and acquisitions are a number of institutions which find themselves in relatively uncomplicated financial condition. While these institutions are typically operating at a loss, and may have very low net worth, they are capable of revival in the context of a merger or acquisition. However, ongoing losses and low net worth may require assistance from the FSLIC to an acquirer or merger partner in order to make the merger or acquisition a commercially practicable proposition.

The course of negotiating an assisted merger or acquisition through the FSLIC directly can entail a long process including detailed contract drafting and revisions before a transaction is complete. The extended negotiations and contacts now used in the FSLIC's assisted-merger programs are well-suited to insured institutions with larger, more complex, problems requiring time to detail and resolve. During the period of negotiation, troubled institutions often continue to incur operating losses which make them less attractive as merger or acquisition partners. These losses also complicate the process of negotiations and increase the risk to the FSLIC. In some cases this extended process may fail to produce a voluntary merger or acquisition altogether, thus requiring the Board to appoint a conservator or receiver for the insured institution or, in extreme cases, to make payment of insurance of accounts and to liquidate the institution.

The Board, as operating head of the FSLIC, has concluded that certain insured institutions whose financial difficulties are relatively straightforward may be more properly dealt with by the Principal Supervisory Agents and their designees in the several Federal Home Loan Bank districts, rather than through the full process of negotiations. The Board further believes that uncomplicated assisted merger transactions in appropriate cases can be completed in less time, with fewer

resources, and at lower cost by allowing the Principal Supervisory Agents to authorize assistance for a merger or acquisition within a specific cost allocation, rather than by requiring that negotiations for such assistance be conducted solely through the Washington office of the FSLIC.

For institutions whose problems could be resolved at the District Bank level at an earlier time, the Board concludes that a merger or acquisition can be eased by involving the Principal Supervisory Agents and the institution's board of directors and management in a program which combines voluntary participation by the institution with the provision of financial assistance from the FSLIC through a specific maximum allocation to the Principal Supervisory Agent for each such institution.

The voluntary assisted-merger program will minimize the significant time and resources now spent on resolving problem cases, which often involve relatively simple issues and forms of assistance. In addition, the program will provide associations with a voluntary alternative to Net Worth Certificate assistance under the 1982 Act and 12 CFR Part 572 ("Garn-St Germain assistance"), which, in some cases, does not result in a long-term viable solution of an institution's problems and simply makes the ultimate resolution less favorable to the insured institution and potentially more costly to the FSLIC.

Further, the voluntary assisted-merger program is expected to reduce the FSLIC's costs in resolving cases by solving problems earlier, when an association may be more attractive to potential merger partners. The Board has observed that, in addition to the operating losses and reductions in net worth discussed above, an extended period of financial difficulties may result in a loss of an insured institution's key management officials and employees, a withering of longstanding loan and deposit relationships, and a sharp reduction in the institution's viability as a competitor even if it is adequately refinanced through a merger or acquisition. By reducing the time and uncertainty associated with assisted merger and acquisition negotiations in suitable cases, the voluntary assisted-merger program will preserve a participating institution's strengths as an ongoing business enterprise. And by directly engaging the management and board of directors in the assisted-merger process, the program will encourage participating institutions to seek out and develop innovative merger and acquisition opportunities to the benefit of all parties and the communities they serve.

The program is intended to encourage early voluntary mergers in problem cases by making available to designated institutions the services of Principal Supervisory Agents in arranging assisted mergers or acquisitions. In order to facilitate these transactions, the Principal Supervisory Agents will be given an allocation of assistance, and may authorize all or part of that allocation as part of a merger or acquisition approved under the program. In this way, the program will serve four major objectives: (1) To minimize time and resources spent on resolving assisted problem cases involving simple issues; (2) to provide eligible institutions with voluntary alternatives to Garn-St Germain assistance and other forms of FSLIC assistance; (3) to reduce the FSLIC's costs of assistance in resolving cases earlier; and (4) to resolve suitable problem cases in the field at the earliest feasible time.

II. General Policies

A. A Discretionary Alternative Program

The Voluntary Assisted-Merger Program is established as one among a number of alternative assistance methods which the FSLIC may employ depending on the facts and circumstances of an individual case. It does not establish any right or entitlement in any person or insured institution to apply for or to participate in the program.

The Director of the Office of the FSLIC is responsible for recommending to the Board that certain insured institutions be designated as Eligible Institutions. Recommendations and designations are made without application by the subject institutions. The program does not establish any right or procedure to protest recommendation or failure to recommend an institution.

B. A Voluntary Alternative

Designation as an Eligible Institution offers the designated institution a voluntary alternative. No institution will participate in the program unless it has assented to participation, either by assent after designation pursuant to 12 CFR 572a.5(a) or by resolution of its board of directors appointing the Supervisory Agent, a Principal Supervisory Agent or the FSLIC to negotiate and effect a merger or acquisition of that institution and consenting to such a merger or acquisition. *See* section 572a.5(b).

C. A Program for Principal Supervisory Agents

Principal Supervisory Agents or their designees are expected to participate actively in merger and acquisition negotiations. Sections 572a.5(a)(2) and 572a.5(b). A Principal Supervisory Agent may facilitate adoption of a plan of merger for an Eligible Institution by authorizing FSLIC assistance of all or part of the Allocation established by the Board for that institution. Sections 572a.5(a)(2), 572a.5(b), 572a.5(c). In addition, a Principal Supervisory Agent may approve a merger or acquisition meeting the standards of § 572a.5(d) under delegated authority, without referral to the Board, if the merger or acquisition meets the standards set forth in § 572a.5(c).

D. Role of Allocations

At the time the Board designates an Eligible Institution, it will also establish an Allocation for that institution, constituting the maximum amount of cash assistance that may be approved by the Principal Supervisory Agent. No other financial assistance will be afforded or considered in such a merger or acquisition, and the Principal Supervisory Agents will treat Allocation amounts as confidential information throughout the process. Principal Supervisory Agents will not automatically authorize the full amount of the Allocation, and are encouraged to minimize the costs of assistance so authorized.

III. Major Program Features

A. Recommendations and Designations

The Director of the Office of the FSLIC, with the concurrence of the Office of General Counsel and the Office of Examinations and Supervision, may recommend institutions for eligibility to the Board. 12 CFR 572a.2(b) and 572a.3. No other person may recommend an institution for designation.

In order to qualify for recommendation, an institution must meet, in the judgment of the Director, the Standards of Eligibility in § 572a.3: *i.e.* (1) The institution is within 24 months to insolvency; (2) no unassisted in-state merger is available for the institution; (3) the Allocation recommended does not exceed the cost of liquidating the institution; and (4) the institution is in the mutual form of organization.

The Board will make determinations regarding eligibility and allocations giving full consideration to the delicate and confidential nature of the

information and issues presented. If the Board designates an institution as eligible, it will establish an Allocation at the same time.

B. Procedure After Designation

A designation is effective for six months unless extended by the Director for not more than three additional months. § 572a.4(b). The Director will promptly notify the Principal Supervisory Agent concerned, who will contact the institution (if proceeding under § 572a.5(a)) or will proceed to negotiations (if proceeding under § 572a.5(b)).

The Principal Supervisory Agent will develop a list of qualified acquirers meeting the standards of § 572a.2(d). A qualified acquirer must have the requisite capital adequacy, maintain one or more authorized branches in the same State, and be viable and well-managed. Additionally, the Board has determined to limit acquirers to institutions which are in the mutual form of organization and which, accordingly, do not involve the added complexity and time involved in mutual-to-stock-company mergers or conversions that are more suitable for handling in the Washington office. Once a list has been developed, the Principal Supervisory Agent or his designee and the Eligible Institution will proceed to negotiations with one or more Qualified Acquirers. It is expected that the Principal Supervisory Agents will actively encourage the Eligible Institutions to conduct these negotiations directly, where possible, but that the Principal Supervisory Agents or their designees will participate in all phases.

In order to facilitate an acceptable plan of merger (or acquisition), the Principal Supervisory Agent may authorize financial assistance from the FSLIC as a part of that plan, in an amount not to exceed the Allocation for each Eligible Institution involved. 12 CFR 572a.5 (a) and (b). The Principal Supervisory Agent may approve a merger or acquisition directly if it meets the test of 12 CFR 572a.5(c)(5) (pertaining to delegated authority to approve unassisted mergers), and may grant certain supervisory forbearances set forth in 12 CFR 546.2 (i)(3) (i)–(v).

In order for a merger or acquisition to be approved by the Principal Supervisory Agent under Part 572a, certain additional requirements apply. The resulting or acquiring institution must be a Qualified Acquirer; the Principal Supervisory Agent's financial projections must show that the resulting or acquiring association will remain viable after the effective date and will have a ratio of regulatory net worth to total assets not less than three percent throughout the period of projection; and the resulting or acquiring institution must agree to the conditions of sections 572a.5(c) (3) and (4) (pertaining to contracts of employment and compensation.) A merger or acquisition not meeting any one of the requirements must be referred to the Board for approval.

The FSLIC will pay the amount of the financial assistance approved by the Principal Supervisory Agent, not exceeding the Allocation(s) involved, within 10 days of receiving notice from the Principal Supervisory Agent that a merger or acquisition approved under the program has become effective.

Payments from the FSLIC to a resulting or acquiring institution are considered to be contributions to the net worth, rather than income, of the receiving institution. The Principal Supervisory Agent will provide appropriate certifications of the approved transaction to any Federal or State governmental agency upon request of the resulting or acquiring institution.

List of Subjects in 12 CFR Part 572a

Savings and loan association, Voluntary assisted-merger program.

The Board finds that observance of the public notice and comment period pursuant to 5 U.S.C. 553(b) and 12 CFR 508.12, and delay of the effective date pursuant to 5 U.S.C. 553(d) and 12 CFR 508.14, are unnecessary and inappropriate in this case, because the regulation pertains to internal Board procedures and practices whereby currently-exercised Board activities are delegated to its Principal Supervisory Agents.

However, the Board will entertain comments regarding this program in determining whether any changes are appropriate. Comments should be sent to the Director, Information Services, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at the same address.

Accordingly, the Board hereby adds a new Part 572a to Subchapter D, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 572a—VOLUNTARY ASSISTED-MERGER PROGRAM

Sec.

572a.1 Statement of policy.
572a.2 Definitions.
572a.3 Standards of eligibility.
572a.4 Procedure for recommendation and designation.
572a.5 Actions by Principal Supervisory Agent.
572a.6 Sunset.

Authority: Secs. 401, 402, 403, 405, 406, and 407, 48 Stat. 1255, 1256, 1257, 1259, and 1260, as amended (12 U.S.C. 1724, 1725, 1726, 1728, 1729, and 1730); secs. 2 and 5, 48 Stat. 128 and 132, as amended (12 U.S.C. 1462 and 1464); Reorg. Plan No. 3 of 1947, 3 CFR Part 1943–1948 Comp., p. 1071.

§ 572a.1 Statement of policy.

(a) This section describes general policy applicable to the Corporation's provision of assistance to certain insured institutions in the context of voluntary mergers or acquisitions of those institutions under a program to be administered by the Principal Supervisory Agents. The Voluntary Assisted-Merger Program is one of a number of assistance techniques employed by the Corporation in its default-prevention activities depending upon the facts and circumstances of an assistance case.

(b) The Corporation periodically reviews the records of insured institutions which may require financial or other assistance under Section 406(f) of the National Housing Act, as amended. In order to minimize time and resources spent on resolving assisted problem cases involving simple issues, to provide eligible institutions (as defined in § 572a.2(c) of this Part) with voluntary assistance alternatives, to reduce the Corporation's costs of assistance by earlier resolution of cases, and to resolve suitable problem cases at the district level at the earliest feasible time, the Corporation, based on its review and upon the recommendation of its Director, may designate an insured institution as eligible for the Voluntary Assisted-Merger Program. The Corporation may so designate an insured institution, and approve a maximum amount of assistance which may be provided to the insured institution under the program if, in its sole judgment and discretion, that institution meets the qualifications of this Part. An insured institution which has been so designated is an "Eligible Institution" for purposes of this Part. A Principal Supervisory Agent or his designee may then negotiate and approve a merger or acquisition of the Eligible Institution, with cash financial assistance from the Corporation up to the approved amount.

(c) Designation as an Eligible Institution does not create any right or entitlement in the institution so designated, or in any other person, insured institution or other organization,

to receive assistance under, or to be considered for or designated as eligible for, the Voluntary Assisted-Merger Program.

(d) The amount of an Allocation will be kept confidential by the Corporation and the Principal Supervisory Agent, and may not be disclosed to any person other than an officer or employee of the Federal Home Loan Bank Board, the Corporation or a Federal Home Loan Bank in the course of that person's official duties. That amount is the maximum assistance which can be provided to an Eligible Institution under the program; a Principal Supervisory Agent is responsible for compliance with the Corporation's policy of minimizing the costs of assistance under the program below the Allocation to the extent possible.

§ 572a.2 Definitions.

For purposes of this Part 572a, the following terms shall have the meaning given here.

(a) *Allocation.* A dollar amount representing the maximum amount of cash assistance that may be approved by a Principal Supervisory Agent as part of an assisted merger or acquisition of an Eligible Institution with or by a Qualified Acquirer under this Part.

(b) *Director.* The Director, Deputy Director or Acting Director of the Office of the Federal Savings and Loan Insurance Corporation, or the Director of the Problem and Rehabilitation Division of the Office of the Federal Savings and Loan Insurance Corporation.

(c) *Eligible Institution.* An insured institution which has been designated by the Corporation as meeting the qualifications of § 572a.3 of this Part.

(d) *Qualified Acquirer.* A mutually-held insured institution whose ratio of regulatory net worth to total assets will be not less than three percent immediately following its merger with or acquisition of an Eligible Institution, after giving effect to the amount of any assistance which may be provided under this Part in connection with such a merger or acquisition; which maintains one or more authorized branches in the same state as each Eligible Institution proposed to be merged with it or acquired by it; and which is, in the judgment of the Principal Supervisory Agent, viable and well-managed.

(e) *Principal Supervisory Agent.* The Principal Supervisory Agent for the Federal Home Loan Bank district of which an insured institution is a member.

(f) *Unassisted in-state merger.* A merger, consolidation, acquisition, reorganization, or purchase of assets and assumption of liabilities of an insured institution with or into another insured institution or another person or entity headquartered in the same state, not involving financial assistance from the Corporation.

§ 572a.3 Standards of eligibility.

The Director may recommend an insured institution to the Corporation for designation as an Eligible Institution if, in the judgment of the Director, that institution meets all of the following standards:

(a) The institution is within 24 months to insolvency, or is currently insolvent;

(b) The Director is satisfied that no unassisted in-state merger is available for the institution;

(c) The amount of the Allocation recommended by the Director does not exceed the cost of liquidating the institution through a receivership accompanied by payment of insurance of accounts; and

(d) The institution is in mutual form.

§ 572a.4 Procedure for recommendation and designation.

(a) *Director's recommendation.* With the concurrence of the Federal Home Loan Bank Board's Office of General Counsel and Office of Examinations and Supervision, the Director may recommend insured institutions to be considered for participation in the Voluntary Assisted-Merger Program if, in the view of the Director as of the time the recommendation is made, the institution so recommended complies with the standards set forth in § 572a.3 of this Part. Each recommendation shall include the Director's estimates of the cost of assistance, the cost of liquidation, and the cost of any other solutions which have been proposed and are available at the time the recommendation is made, and the Director's recommendation for an Allocation with respect to the institution.

(b) *Designation.* If the Corporation accepts the Director's recommendation, the institution shall be designated an Eligible Institution, with an Allocation based on the amount recommended by the Director or as the Corporation may determine. The Director shall then notify the Principal Supervisory Agent of that designation and Allocation. Each designation shall be effective for a period of six calendar months from the date of the Corporation's action, provided that a designation may be extended by the Director for a further period not to exceed three calendar months.

§ 572a.5 Actions by Principal Supervisory Agent.

(a) *New participants.* Upon being advised by the Director that an insured institution has been designated as an Eligible Institution, the Principal Supervisory Agent or his designee shall meet with the institution's board of directors and discuss the various options, including participation in the Voluntary Assisted-Merger Program. If the institution desires to participate in the program, the Principal Supervisory Agent or his designee shall:

(1) Provide the board of directors with a list of Qualified Acquirers for the institution's review, and determine an order of preference within that list; and

(2) Continue to work with the board of directors and management of the Eligible Institution to arrange and conduct negotiations with one or more qualified Acquirers and to reach a mutually acceptable plan of merger between a Qualified Acquirer and the Eligible Institution. The Principal Supervisory Agent or his designee is authorized to commit financial assistance from the Corporation as a part of such plan of merger or acquisition, in an amount not to exceed the amount of the Allocation for each Eligible Institution involved.

(b) *Other participants.* If, at the time a Principal Supervisory Agent receives notice that an institution has been designated as an Eligible Institution, there is outstanding a resolution of that institution's board of directors which authorizes and appoints either the Supervisory Agent, a Principal Supervisory Agent or the Corporation to negotiate and effect a merger or acquisition of that institution, and which consents to such a merger or acquisition, then the Principal Supervisory Agent or his designee may proceed to negotiate and effect a merger of the Eligible institution with a qualified Acquirer notwithstanding anything in paragraph (a) of this section. In order to effect such a merger, the Principal Supervisory Agent or his designee is authorized to commit financial assistance from the Corporation as a part of the merger or acquisition in an amount not to exceed the amount of the Allocation for each Eligible Institution involved.

(c) *Approvals.* A Principal Supervisory Agent is authorized to approve a merger or acquisition negotiated under paragraph (a) or (b) of this section, if:

(1) The resulting or acquiring institution is a Qualified Acquirer;

(2) Financial projections prepared by the Principal Supervisory Agent or his designee using the Corporation's standard forecasts, models and

procedures show that the resulting or acquiring institution, following the merger or acquisition (after giving effect to the assistance to be provided under this Part), will

(i) Be viable throughout the period of projection, and

(ii) Have a ratio of regulatory net worth to total assets of not less than three percent throughout that period;

(3) The resulting or acquiring institution agrees that for a period of three years following the effective date of the merger or acquisition it will not enter into or extend any contract of employment or other contract of compensation with any officer of former officer of the Eligible Institution which has a term (including any renewals) greater than one year, and further agrees that, with regard to any plan or contract involving compensation tied to increases in the net worth or equity of the Eligible Institution or the book value of its assets, or any plan or contract of severance or other benefits, no present or former officer or employee of the Eligible Institution will be provided or afforded benefits of a kind or amount more favorable to such person than would otherwise be available to an officer or employee of the resulting or acquiring institution;

(4) As a condition to the effectiveness of the merger or acquisition, and to the provision of assistance by the Corporation under this Part, the plan of merger provides that the resulting or acquiring institution does not assume and will promptly terminate any and all existing contracts of employment, severance, compensation tied to increases in the net worth or equity of the Eligible Institution or the book value of its assets, or any other contracts of compensation with any officer or employee of the Eligible Institution which have a term (including any renewals) greater than one year from the effective date of such merger or acquisition, unless such contracts are specifically disclosed to and approved by the Principal Supervisory Agent in advance of the merger; and

(5) The merger or acquisition could be approved under § 546.2(h)(1) of this Chapter without regard to § 546.2(h)(1)(i) and (xiii). In connection with a merger or acquisition so approved, a Principal Supervisory Agent may grant the resulting institution supervisory forbearances as provided in § 546.2(i)(3)(i)–(v) of this Chapter.

(d) *Assistance.* As part of a merger or acquisition approved by a Principal Supervisory Agent under this Part, the Corporation will provide financial assistance to the acquiring or resulting entity in an amount certified by the Principal Supervisory Agent to the Director, not to exceed the amount of the Allocation for each Eligible Institution involved. The Corporation will pay the amount of the financial assistance in a single payment within 10 days of receiving notice from the Principal Supervisory Agent that a merger or acquisition so approved has become effective.

§ 572a.6 Sunset.

(a) The Voluntary Assisted-Merger Program shall terminate on December 31, 1983, unless extended by regulatory amendment by the Corporation.

(b) No institution shall be designated as an Eligible Institution after the termination of the program. No designation which is outstanding at the termination of the program shall be further extended, but any designation outstanding as of that date shall remain valid until expiration of the period of designation, including any extension made on or before that date.

By the Federal Home Loan Bank Board.

John M. Buckley, Jr.,

Acting Secretary.

[FR Doc. 83-16029 Filed 6-14-83; 8:45 am]

BILLING CODE 6720-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 203, 213, and 234

[Docket No. R-83-1103]

Mortgage Insurance and Home Improvement Loans; Changes in Interest Rates

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, Housing and Urban Development Department.

ACTION: Final rule.

SUMMARY: This change in the regulations increases the maximum allowable finance charge on insured home programs. This action by HUD is designed to bring the maximum financing charges on home loans into line with other competitive market rates and help assure an adequate supply of and demand for FHA financing.

EFFECTIVE DATE: June 8, 1983.

FOR FURTHER INFORMATION CONTACT: John N. Dickie, Director, Financial Analysis Division, Office of Financial Management, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410 (202–755–7270).

SUPPLEMENTARY INFORMATION: The following miscellaneous amendments have been made to this chapter to increase the maximum interest rate which may be charged on loans insured by this Department. The maximum interest rate on HUD/FHA home mortgage insurance programs has been raised from 11.50 percent to 12.00 percent for level payment insured home mortgage programs (including operative builder home loan programs), and from 11.75 percent to 12.25 percent for graduated payment home loan programs (GPM).

The Secretary has determined that such changes are immediately necessary to meet the needs of the market and to prevent speculation in anticipation of a change, in accordance with his authority contained in 12 U.S.C. 1709–1, as amended. The Secretary has, therefore, determined that advance notice and public comment procedures are unnecessary and that good cause exists for making this amendment effective immediately.

This is a procedural and administrative determination as set forth in the statutes and as such does not require a determination of environmental applicability.

List of Subjects in 24 CFR Parts 203, 213, and 234

Mortgage insurance.

Accordingly, Chapter II is amended as follows:

PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

Subject A—Eligibility Requirements

1. Section 203.20 paragraph (a) is revised to read as follows:

§ 203.20 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.00 percent per annum with respect to mortgages insured on or after June 8, 1983.

* * * * *

2. Section 203.45 paragraph (b) revised to read as follows:

§ 203.45 Eligibility of graduated payment mortgages.

* * * * *

(b) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.25 percent per annum with

respect to mortgages insured on or after June 8, 1983.

* * * * *

3. Section 203.46 paragraph (c) is revised to read as follows:

§ 203.46 Eligibility of modified graduated payment mortgages.

* * * * *

(c) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.25 percent per annum with respect to mortgages insured on or after June 8, 1983.

* * * * *

Subpart C—Eligibility Requirements—Individual Properties Released From Project Mortgage

4. Section 213.511 paragraph (a) is revised to read as follows:

§ 213.511 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.00 percent per annum with respect to mortgages insured on or after June 8, 1983.

* * * * *

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

Subpart A—Eligibility Requirements—Individually Owned Units

5. Section 234.29 paragraph (a) is revised to read as follows:

§ 234.29 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.00 percent per annum with respect to mortgages insured on or after June 8, 1983.

* * * * *

6. Section 234.75 paragraph (b) is revised to read as follows:

§ 234.75 Eligibility of graduated payment mortgages.

* * * * *

(b) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.25 percent per annum with respect to mortgages insured on or after June 8, 1983.

* * * * *

7. Section 234.76 paragraph (c) is revised to read as follows:

§ 234.76 Eligibility of modified graduated payment mortgages.

* * * * *

(c) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.25 percent per annum with respect to mortgages insured on or after June 8, 1983.

* * * * *

(Sec. 3(a), 82 Stat. 113; 12 U.S.C. 1709–1; Section 7 of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d))

Dated: June 8, 1983.

Philip Abrams,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF DEFENSE

Department of the Army

35 CFR Part 253

Regulations of the Secretary of the Army; Panama Canal Employment System

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: By this document the regulations governing employment in the Panama Canal Commission are amended to add certain positions in the Panama Canal Commission to those which are excluded from various provisions of 35 CFR Part 253. These positions are new positions in the Commission.

EFFECTIVE DATE: June 15, 1983.

FOR FURTHER INFORMATION CONTACT: Colonel Robert D. Banning, Military Assistant, Office of the Assistant Secretary of the Army (Civil Works), Washington, D.C. 20310, (202) 695–1370.

SUPPLEMENTARY INFORMATION: Because this rule pertains to personnel of an agency, it is not necessary to issue a notice ofproposed rulemaking under 5 U.S.C. 553, and review by the Office of Management and Budget under Executive Order 12291 dated February 17, 1981 (47 FR 13193) is also unnecessary. Further, the agency has determined, for the same reason, that the requirements of sections 603 and 604 of Title 5, United States Code, are not applicable to this rule. List of index subjects: Employment, exclusions from coverage of regulations.

PART 253—[AMENDED]

Accordingly, 35 CFR Part 253 is amended as set forth below.

Section 253.8(c)(9) is added to read as follows:

§ 253.8 Exclusions.

* * * * *

(c) * * *

(9) Area coordinators of the Staff Assistant to the Administrator, Panama Canal Commission.

* * * * *

Dated: June 10, 1983.

Michael Rhode, Jr.,

Secretary, Panama Canal Commission.

BILLING CODE 3640-04-M

PANAMA CANAL COMMISSION

35 CFR Parts 101 and 103

Paperwork Reduction Act; OMB Approved Collections of Information

AGENCY: Panama Canal Commission.

ACTION: Final rule.

SUMMARY: In accordance with the requirement of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) that agencies publish Office of Managment and Budget (OMB) control numbers assigned to their collections of information contained in regulations, the Panama Canal Commission is amending Parts 101 and 103 of Title 35, Code of Federal Regulations to reflect current OMB numbers in the format recommended by the Office of the Federal Register. In addition, one section of Part 101 is being amended to reflect current information about one of the forms mentioned therein.

EFFECTIVE DATE: June 30, 1983.

ADDRESS: Secretary, Panama Canal Commission, Suite 312, Pennsylvania Building, 425 13th Street NW., Washington, D.C. 20004; or Chief, Administrative Services Division, Panama Canal Commission, APO Miami 34011.

FOR FURTHER INFORMATION CONTACT: Barbara Fuller, Assistant to the Secretary for Commission Affairs, telephone 202–724–0104.

SUPPLEMENTARY INFORMATION: 44 U.S.C. Chapter 35 requires Federal agencies to obtain approval from the Office of Management and Budget (OMB) before collecting information from ten or more members of the public. As evidence of such approval, agencies are required to display an OMB control number on collection of information requirements.

The Panama Canal Commission has received OMB approval for the collection of information requirements contained in 35 CFR Parts 101 and 103.

The clearance information for Part 101 is presently included therein; it is being

amended, however, in accordance with recent guidance from OMB and the Office of the Federal Register.

The clearance information for Part 103 is being included for the first time.

The Panama Canal Commission has received clearance from OMB for the modification of one of the forms listed in § 101.10. That section is, accordingly, being amended to reflect the new form title.

The Commission has determined that this is not a major rule as defined under Section 1(b) of Executive Order 12291, dated February 17, 1981. Furthermore, the Regulatory Flexibility Act is inapplicable since this rule concerns a Commission service and the rates to be charged for such service [5 U.S.C. 601(2)]. This regulation does not affect any trade-sensitive activity.

BILLING CODE 3640-04-M

VETERANS ADMINISTRATION

38 CFR Part 1

Time Limit To Request Waiver

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans Administration has amended its regulation concerning the time limit in which to request waiver of benefit overpayments. The "Veterans' Compensation, Education, and Employment Amendments of 1982", Pub. L. 97–306, revised the statutory time limit in which to request waiver of benefit overpayments which is found in 38 U.S.C. 3102(a). A payee will now have 180 days, instead of two years, in which to request waiver of a benefit overpayment. This new 180 day time limit affects only those waiver requests based upon a notification of indebtedness issued after March 31, 1983.

EFFECTIVE DATE: April 1, 1983.

FOR FURTHER INFORMATION CONTACT: Peter T. Mulhern (202) 389–3405, Office of Budget and Finance (047C5), 810 Vermont Avenue, NW., Washington, D.C., 20420.

SUPPLEMENTARY INFORMATION: On page 15271 of the **Federal Register** of April 8, 1983 there was published a notice of proposed rulemaking to amend the regulation pertaining to the time limit in which to request waiver of a benefit indebtedness. Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulation. We received no comments during this time period

The Administrator hereby certifies that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–602. Pursuant to 5 U.S.C. 605(b), this rule is therefore exempt from the initial and final regulatory flexibility analysis requirements of section 603 and 604. The reason for this certification is that this rule affects only those individuals indebted to the U. S. Government as a result of participation in Veterans Administration programs. This rule has also been reviewed under E.O. 12291 and has been determined to be nonmajor because it only revises the time limit in which to request waiver and does not have any adverse economic impact on or increase costs to consumers, individual industries, Federal, State and local government agencies or geographic regions.

(There is no Catalog of Federal Domestic Assistance number.)

List of Subjects in 38 CFR Part 1

Claims, Administrative practice and procedure, Veterans.

The proposed regulation is hereby adopted as final and is set forth below.

Approved: May 31, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 1—GENERAL

1. Section 1.963 is amended by revising paragraph (b) to read as follows.

§ 1.963 Waiver—other than loan guaranty.

* * * * * *

(b) *Application.* A request for waiver of an indebtedness under this section shall only be considered:

(1) If made within 2 years following the date of a notice of indebtedness issued on or before March 31, 1983 by the Veterans Administration to the debtor, or

(2) Except as otherwise provided herein, if made within 180 days following the date of a notice of indebtedness issued on or after April 1, 1983 by the Veterans Administration to the debtor. The 180 day period may be extended if the individual requesting waiver demonstrated to the Chairperson of the Committee on Waivers and Compromises that, as a result of an error by either the Veterans Administration or the postal authorities, or due to other circumstances beyond the debtor's control, there was a delay in such individual's receipt of the notification of indebtedness beyond the time customarily required for mailing (including forwarding). If the requester does substantiate that there was such a delay in the receipt of the notice of indebtedness, the Chairperson shall direct that the 180 day period be computed from the date of the requester's actual receipt of the notice of indebtedness. (38 U.S.C. 3102(a))

* * * * * *

§ 1.963a [Amended]

2. Section 1.963a(b)(2)(ii) is amended by changing the word "Cor troller" to

the words "Office of Budget and Finance."

BILLING CODE 8320-01-M

38 CFR Part 36

Loan Guaranty; Closing Refinancing Loans on the Automatic Basis

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is amending its regulations to include a provision allowing the maximum reasonable discount points paid by a veteran-borrower to be established based on a readily ascertainable source. This will allow those lenders who have authority to close acquisition loans automatically (without VA prior approval) to begin closing refinancing loans on the automatic basis.

The governing statute allows a veteran to pay a reasonable discount as required by a lender for such loans. The amendments will eliminate the requirement that lenders obtain the prior approval of the VA as to the amount of discount points charged a veteran and provide for a uniform objective determination of the maximum reasonable discount points chargeable by lenders for these types of loans. The amendments should simplify the processing of refinancing loans.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. George D. Moerman, Assistant Director for Loan Policy (264), Loan Guaranty Service, Veterans Administration, Washington, D.C. 20420, (202) 389-3042.

SUPPLEMENTARY INFORMATION: In the September 23, 1982 **Federal Register** (47 FR 41997), the VA proposed to amend §§ 36.4306, 36.4306a and 36.4312 of the regulations. The proposal was to incorporate into the regulations a provision for objectively calculating the maximum allowable discount points which a lender could collect from a veteran-borrower. The proposal also would allow closing of refinancing loans on the automatic basis. For a complete discussion of the regulatory proposal please refer to the September 23, 1982 **Federal Register.**

A VA guaranteed refinancing loan is a loan for the purpose of paying off existing mortgage loans or other liens secured by a home which is owned and occupied by the veteran. A veteran may refinance up to 100% of the reasonable value of the property and use of cash proceeds as he or she chooses. Hereafter, these types of loans will be referred to as regular refinancing loans.

Another type of refinancing loan may be used to reduce the interest rate on an existing VA guaranteed loan on a home owned and occupied by the veteran. The veteran may not obtain any cash proceeds from the loan for his/her personal use as the loan may only be used to reduce the loan rate. Hereafter, these types of loans will be referred to as interest rate reduction refinancing loans.

VA previously required that all applications for VA guaranteed refinancing loans be submitted to the local VA office for approval of the amount of the loan discount to be paid by the veterans homeowner. Loan discount, sometimes called points, is a charge by the lender. It is based on the fact that investors often do not purchase mortgages for par or 100% of the face amount of the loan notes. An investor will purchase a group of mortgages at a certain simple interest rate and a certain loan term for a price; e.g. 97% of the total dollar value shown on the face amount of the loan notes. This group of mortgage notes is known as a pool of mortgages. Since the lender is lending 100% of the face amount of the note to the consumer and the investor is only purchasing the note at 97%, the lender will charge 3% discount or points to make up the money difference. The investor by paying less than 100% of the face amount of the note increases the return or yield on the mortgage. On VA guaranteed loans to acquire a home the discount may not be paid by the buyer. On a refinancing loan, the veteran homeowner is the party who must bear the expense. Section 1803(c)(3), title 38, United States Code, authorizes the veteran to pay a reasonable discount on a refinancing loan. Previously, the reasonableness of the proposed discount charge had to be approved in advance by the local VA office.

The amended regulations will allow lenders to charge a discount on a refinancing loan without VA prior approval provided the discount charged does not exceed the reasonable maximum based upon a readily available source for determining the maximum. It has been decided that lenders may use two methods for determining the maximum allowable discounts. Both methods will use the GNMA (Government National Mortgage Association) pass through securities 90-day forward closing bid rounded to the lower whole number for pass through securities ½% less than the face note rate of the loan. If the lender and borrower choose to negotiate a firm written commitment for a maximum amount of discount to be paid, the GNMA bid price to be used in the computation must be the closing quote for that business day prior to the negotiation of the discount commitment. The firm written commitment may be negotiated at any time from the date the borrower's loan application is signed to the date of loan closing. Lenders negotiating firm commitments must close the loan at a discount no higher than the firm commitment regardless of changes in the maximum allowable VA interest rate. If a lender's discount commitment expires prior to loan closing, the lender and borrower may negotiate a new firm commitment based on the procedure outlined above or may use the following other optional method for determining the maximum discount.

If the lender and borrower choose not to negotiate a firm written discount commitment, the lender and borrower may agree to establish the discount using the following procedure. The discount may not exceed the difference between the GNMA 90-day forward bid closing quote and par value for any business day one to four days prior to loan closing. The closing quotes must be for securities ½% lower than the face note rate of the loan. The quotes may be rounded down to the lower whole numbers. "Loan closing" is defined for this purpose as the date on which the borrower's three day right of rescission commences pursuant to the Truth in Lending Act.

The foregoing two methods for computing maximum discount will be used for loans closed on the automatic and prior approval basis. If the lender and borrower negotiate a firm written discount commitment, a copy of this agreement must be submitted with the report of a home loan processed on the automatic basis. For prior approval loans, if the discount commitment is negotiated prior to submission of an application for home loan guaranty, a copy of the discount commitment must be submitted with the application for home loan guaranty. If the firm discount commitment is negotiated after submission of the application; for home loan guaranty, the loan application shall reflect an estimated discount, and a copy of the written discount commitment must be submitted with the certification of loan disbursement. If no firm written commitment has been submitted when the lender submits its request for loan guaranty, VA will assume that the lender has chosen the method for establishing the discount using a discount quote from one of the four days prior to closing. As long as the discount charged does not exceed an

amount which would be allowable rounding down the quotes from each of the four days prior to loan closing, the discount charged to the veteran-borrower will be acceptable.

These new procedures give lenders a readily ascertainable index for determining the maximum reasonable discount on a VA guaranteed loan. If the lender and borrower choose to lock in a discount, they may refer to the prior business day closing bid for GNMA securities ½% less than the note rate. If the previous day's closing bid on a proposed 13½% loan for GNMA 13% Issues is 97 and 1⅝₂nds, the lender may round down the price to 97, and the lender and borrower may negotiate a written commitment for a discount of up to 3% of the loan amount. VA will not require that discount commitments have a minimum term. If the lender and borrower choose to base maximum loan discounts on GNMA closing quotes one to four days prior to closing; for example, if the closing bid quotes for the four days prior to closing are 96 and 2⅝₂nds, 97, 97 and ⅜₂nds and 97 and ⅝₂nds, the lender and borrower may negotiate a closing discount of up to 4% of the loan amount since the first day's quote could be rounded down to 96.

GNMA pass through certificates are nationally traded including forward Issues. Price quotes indicate both a Bid and an Asked price. We require the use of the bid price as the basis for determining the maximum VA loan discount because this reflects what investors are willing to pay for a pool of loans at a particular interest rate. The previous day's closing price will also be a readily ascertainable quote.

The amendments authorize the Administrator to allow a lender to charge a veteran a higher discount than determined by the GNMA index in unusual cases. For instance, an investor might determine that a home's size or age would require a higher yield thereby requiring a higher discount than authorized by the use of the GNMA index. In these circumstances, the lender could seek approval from the Administrator to charge the higher discount.

Since we are establishing a method which allows lenders to readily determine the maximum reasonable discount, we are also deleting the requirement that all refinancing loans must be submitted to the local VA office for prior approval of the amount of discount.

Three other types of loans are similar to VA refinancing loans in that the veteran is authorized to pay a loan discount. These are loans on existing, occupied homes for the purposes of repairs, alterations, or improvements when such loans are to be secured by a first lien; loans to construct homes on land already owned or to be acquired by the veteran where the veteran acts as his/her own contractor; and loans to purchase a dwelling from a class of sellers which are legally precluded from paying a loan discount. For consistency, the amendments allow eligible lenders to close these types of loans on either the prior approval or automatic basis using the GNMA index to determine the reasonable loan discount to be paid by the veteran.

Alteration, improvement, or repair loans which are unsecured or secured by less than a first lien must continue to be submitted to the local VA regional office for approval of the credit underwriting and the loan discount to be paid by the veteran, if any. These loans are more akin to second mortgage financing or consumer installment loans than to first mortgage loans for the purpose of acquiring real estate. Thus, the use of the GNMA index would probably not be reflective of the current discount being charged by lenders for home improvement loans secured by less than a first mortgage.

Thirteen comments were received concerning the proposed regulations published on September 23, 1982 (47 FR 41997). Two comments endorsed the proposal, one offered no comments, and ten offered suggestions for improving the regulatory proposal. Eight of the comments suggested adopting a GNMA forward bid price for delivery of mortgages in 30 to 120 days. One comment suggested using the FNMA (Federal National Mortgage Association) 30-day mandatory delivery yield. Two of the comments additionally suggested establishing the maximum allowable discounts at the time of the loan application with renegotiation of the discount if the VA maximum interest rate is changed. These two comments suggested that it was unfair to the veteran to be unaware of his/her discount costs until one or two days prior to closing as suggested in the proposed regulations. Other comments endorsed a system of establishing the maximum discount closer to the closing date but suggested that the index dates be three to five days prior to closing to give the lender a better opportunity to prepare the closing documents and furnish them to the loan closer.

All of the suggestions made in the public comments were carefully considered. We have chosen to adopt a system with these final regulations which is based on three major suggestions received in the public comments. First, the discount will be based on a GNMA forward commitment for delivery of mortgages within 90-days. Second, one method of computing the maximum discount will allow lenders to use the closing bid quote for any day one to four days prior to the date of loan closing in lieu of only up to two days prior to loan closing as suggested in our proposed regulations. This should allow a lender a better opportunity to prepare loan closing documents based on an acceptable level of discount, and allow the lender and borrower more flexibility in negotiating a maximum loan discount. For lenders who wish to offer a written discount commitment and borrowers who wish to be certain of the discount costs they will be paying at loan closing, one of the available methods for establishing the maximum discount will allow the lender and borrower to negotiate a firm written discount commitment.

VA believes that a new system of establishing maximum discount points along with the ability to close refinancing loans on the automatic basis should be implemented. After reviewing the public comments and the available alternatives, we have chosen to adopt these final regulations. Our review of the issue indicates that any system adopted probably will have positive and negative points. Changes or refinements in the system may be necessary after the VA, lenders, and borrowers have an opportunity to use the new system.

An editorial amendment had been proposed to section 36.4312(d)(7)(iii) to correct a regulatory citation. In addition we propose to combine paragraphs (a) and (b) of section 36.4306 to make the regulation more understandable.

The Administrator hereby certifies that these regulation changes, as promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these regulations are exempt from the final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that these regulations will allow refinancing and similar loans to be closed on the automatic basis with a discount charge reflective of the current mortgage money market. We believe that the regulations will have no impact on small private and non-profit organizations, and small governmental jurisdictions. Small businesses should be aided since automatic loan processing of these types of loans is simpler and should be less costly. In addition, allowing the GNMA 90-day forward closing bid price to be used

should aid lenders by allowing them to charge loan discounts reflective of current market conditions. Small businesses should be aided but not in a significant manner by these amendments. There will be no compliance costs or reporting burdens on individuals or organizations.

The regulations have been reviewed pursuant to Executive Order 12291 and have been found to be nonmajor regulation changes. The amendments will ease processing restrictions while allowing loan discounts to be charged to the veteran based upon free market forces. The regulations will not impact on the public or private sectors as major rules. They will not have an annual effect on the economy of $100 million or more, and will not cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; nor will they have other significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Condominiums, Handicapped, Housing, Loan programs—housing and community development, Manufactured homes, Veterans.

These amendments are proposed under authority granted the Administrator by sections 210(c) and 1803(c) (1) and (3) of title 38, United States Code.

Approved: May 31, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 36—LOAN GUARANTY

Part 36, Title 38, Code of Federal Regulations, is amended as follows:

1. In § 36.4306, paragraph (a) is revised and paragraphs (b) and (e) are removed. Paragraph (a) reads as follows:

§ 36.4306 Refinancing of mortgage or other lien indebtedness.

(a) Any loan for the purpose of refinancing (38 U.S.C. 1810(a)(5)) an existing mortgage loan or other indebtedness secured by a lien of record on a dwelling or farm residence owned and occupied by an eligible veteran as the veteran's home shall be eligible for guaranty in an amount not to exceed sixty (60) percent of the loan amount or $27,500, whichever is less, *Provided*, That—(38 U.S.C. 1810(c))

(1) The dollar amount of discount, if any, to be paid by the veteran is reasonable in amount as determined by the Administrator in accordance with § 36.4312(d)(7)(i),

(2) The loan is otherwise eligible for guaranty.

(b) [Removed]

* * * * *

(e) [Removed]

* * * * *

2. In § 36.4306a, paragraph (a) is revised as follows:

§ 36.4306a Interest rate reduction refinancing loan.

(a) Pursuant to 38 U.S.C. 1810(a)(8), a veteran may refinance an existing Veterans Administration guaranteed, insured or direct loan to reduce the interest rate payable on the Veterans Administration loan provided the following requirements are met:

(1) The loan must be secured by the same dwelling or farm residence as the loan being refinanced and such dwelling or farm residence must be owned and occupied by the veteran as such veteran's home;

(2) The amount of the refinancing loan may not exceed an amount equal to the sum of the balance of the loan being refinanced and such closing costs as authorized by § 36.4312(d) and a discount not to exceed a dollar amount determined in accordance with § 36.4312(d)(7)(i);

(3) The dollar amount of the guaranty of the 38 U.S.C. 1810(a)(8) loan may not exceed the original dollar amount of guaranty applicable to the loan being refinanced, less any dollar amount of guaranty previously paid as a claim on the loan being refinanced; and

(4) The term of the refinancing loan (38 U.S.C. 1810(a)(8)) may not exceed the original term of the loan being refinanced.

* * * * *

3. In § 36.4312, paragraph (d)(6)(i) is revised and redesignated (d)(6) and paragraph (d)(6) (ii) through (iv) is revised and redesignated (d)(7). Paragraph (d) (6) and (7) read as follows:

§ 36.4312 Charges and fees.

* * * * *

(d) * * *

(6) Allowable discounts. The veteran borrower subject to the limitations set forth in paragraph (d) (6) and (7) of this section may pay a discount required by a lender when the proceeds of the loan will be used for any of the following purposes:

(i) To refinance existing indebtedness pursuant to 38 U.S.C. 1810(a) (5) or (8);

(ii) To repair, alter or improve a dwelling owned by the veteran pursuant to 38 U.S.C. 1810(a) (4) or (7) if such loan is to be secured by a first lien;

(iii) To construct a dwelling or farm residence on land already owned or to be acquired by the veteran, provided that the veteran did not or will not acquire the land directly or indirectly from a builder or developer who will be constructing such dwelling or farm residence;

(iv) To purchase a dwelling from a class of sellers which the Administrator determines are legally precluded under all circumstances from paying such a discount if the best interest of the veteran would be so served.

(7) Computation of discounts—(i) Computation of discount—loans secured by a first lien. Unless otherwise approved by the Administrator, the discount, if any, to be paid by the borrower may not exceed the difference between the bid price, rounded to the lower whole number, and par value for GNMA (Government National Mortgage Association) 90-day forward bid closing price for pass through securities ½ percent less than the face note rate of the loan. Unless the lender and borrower negotiate a firm written commitment for a maximum amount of discount to be paid, the bid price to be used in the computation must be the GNMA 90-day forward bid closing quote for any day 1 to 4 business days prior to loan closing. "Loan closing" is defined for this purpose as the date on which the borrower's 3-day right of rescission commences pursuant to the Truth in Lending Act. If the lender and borrower choose to negotiate a firm discount commitment for a maximum amount of discount to be paid, the bid price to be used in establishing the maximum discount must be the closing quote for the business day prior to the date of the commitment. Lenders negotiating firm commitments must close that loan at a discount no higher than the firm commitment regardless of changes in the maximum allowable Veterans Administration interest rate. If a lender's commitment expires prior to loan closing, the lender and borrower may negotiate a new firm commitment based on the procedure outlined in this paragraph (d)(7)(i) or may use the procedure for determining the discount based on the GNMA 90-day forward bid closing quote for any day 1 to 4 business days prior to loan closing.

(ii) Computation of discount—unsecured loans or loans secured by

less than a first lien. The borrower, subject to the limitations set forth in paragraph (d) (6) and (7) of this section, may pay a discount required by the lender when the proceeds of the loan will be used to repair, alter, or improve a dwelling owned by the veteran pursuant to 38 U.S.C. 1810(a)(4) or (7) if such loan is unsecured or secured by less than a first lien. No such discount may be charged unless:

(A) The loan is submitted to the Administrator for prior approval;

(B) The dollar amount of the discount is disclosed to the Administrator and the veteran prior to the issuance by the Administrator of the certificate of commitment. Said certificate of commitment shall specify the discount to be paid by the veteran, and this discount may not be increased once the commitment is issued without the approval of the Administrator;

(C) The discount has been determined by the Administrator to be reasonable in amount.

(iii) A veteran may pay the discount on an acquisition and improvement loan (as defined in § 36.4301 provided:

(A) The veteran pays no discount on the acquisition portion of the loan except in accordance with paragraph (d)(6)(iv) of this section; and

(B) The discount paid on the improvements portion of the loan does not exceed the percentage of discount paid on the acquisition portion of the loan.

Acquisition and improvement loans may be closed either on the automatic or prior approval basis.

(iv) Unless the Chief Benefits Director otherwise directs, all powers of the Administrator under paragraph (d) (6) and (7) of this section are hereby delegated to the officials designated by § 36.4342(b). (38 U.S.C. 1803(c) (1) and (3), 1810(a))

BILLING CODE 1505-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Base (100-year) flood elevations are finalized for the communities listed below.

The base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated of the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal the proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The base (100-year) flood elevations are finalized in the communities listed below. Any appeals of the proposed or proposed modified base flood elevations which were received have been resolved by the Agency.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 74

[Gen. Docket No. 81-415; FCC 83-267]

Experimental, Auxiliary and Special Broadcast and Other Program Distributional Services; Allocate the 38.6–40 GHz Band to TV Auxiliary Broadcast Pickup Stations on a Secondary Basis

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Federal Communications Commission has allocated the 38.6–40 GHz band to television pickup stations on a secondary basis to fixed operations in the Report and Order in this Docket. Because a frequency tolerance specification in the Report and Order appeared to be too stringent, it is being relaxed for transmitters which have reduced power and which employ directional antennas.

EFFECTIVE DATE: July 15, 1983.

FOR FURTHER INFORMATION CONTACT: Harding Chism/Thomas S. Tycz, Office of Science and Technology, Spectrum Management Division, Spectrum Utilization Branch, Washington, D.C. 20554. (202) 653–8166 Room 7310.

List of Subjects in 47 CFR Part 74

Television broadcasting.

Memorandum Opinion and Order

In the matter of amendment of Part 2 and 74 of the Commission's rules and regulations to allocate the 38.6–40 GHz band to TV Auxiliary Broadcast Pickup Stations on a secondary basis; General Docket No. 81–415.

Adopted: June 2, 1983.
Released: June 7,1983.

By the Commission; Commissioner Fogarty not participating.

Introduction

1. On April 1, 1982, the Commission adopted a Report and Order which allowed TV Auxiliary Broadcast Pickup Stations (hereinafter referred to as TV Pickup Stations) to operate in the 38.0–40 GHz band on a secondary basis to Domestic Public Fixed and Private Operational Fixed Microwave Stations.[1] These TV Pickup Stations were constrained to have a maximum transmitter output power of 1.5 watts and a frequency tolerance of ±0.005%[2].

The Commission has before it a petition for reconsideration filed by the M/A–COM Corporation on May 13, 1982 ("M/A–COM"). Pursuant to Section 1.429 of the Commission's Rules, M/A–COM is requesting the Commission to relax the frequency tolerance specification of ±0.005 to ±0.05 percent for the operation of TV Pickup Stations under certain conditions, because this lower standard would permit it to meet what it perceives to be the current marketplace demands for "shirt pocket" transmitters[3]. The instant Memorandum Opinion and Order amends section 74.661 of the Commission's Rules to relax the frequency tolerance of ±0.005% to ±0.05% for transmitters with a maximum output power of 50 milliwatts and which employ a directional antenna.

Discussion

2. In its petition for reconsideration M/A–COM explains that a marketing study and development program of a 40 GHz microwave transmitter commenced promptly after the issuing of the NPRM in this proceeding. Therefore M/A–COM maintains it had not advanced far

[1] Report and Order in Docket No. 81–415, FCC 82–148 (April 14, 1982) 47 FR 17994 (April 27, 1982).

[2] *Frequency tolerance* is the maximum permissible departure by the center frequency of the frequency band occupied by an emission from the assigned frequency or, by the characteristic frequency of an emission from the reference frequency. The frequency tolerance is expressed in parts in 10^6, in Hertz or in the percentage of the assigned frequency.

[3] Comments to the petition were filed by National Association of Broadcasters ("NAB"), Standard Communications Incorporated ("Standard Communications"), CBS Incorporated ("CBS"), Hughes Aircraft Company ("Hughes"). Reply comments were filed by M/A–COM. Supplemental comments were filed by Hughes, CBS and M/A–COM.

enough at the time of the commenting stage of the proceeding to discover the existence of a substantial demand for what it terms a "shirt pocket" transmitter. M/A–COM contends that a "shirt pocket" transmitter could meet the demands its study uncovered, provided a frequency tolerance specification of ±0.05% is allowed. It points out the advantages of the "shirt pocket" transmitter. It is small, flexible, mobile, and it has a range of transmission which makes it applicable for use with Electronic News Gathering (ENG) camera equipment. It further indicates that the transmitter is powered by the same battery pack used by the camera equipment. The "shirt pocket" transmitter can operate up to one and one half hours with an output power of approximately 75 milliwatts with a range of about five hundred feet. M/A–COM maintains that the ±0.005% frequency tolerance specification requires a transmitter to occupy a volume three times that of the "shirt pocket" transmitter. The larger unit would also weigh three to four times more and consume three to four times more power than the "shirt pocket" unit. To obtain a ±0.005% frequency tolerance, M/A–COM asserts, requires a crystal reference plus phase lock loop circuitry to accomplish frequency control of a Gunn-diode oscillator. In contrast, M/A–COM's "shirt-pocket" transmitter would use a Gunn-diode oscillator coupled with a tuned cavity. In summary, M/A–COM requests that the Commission recognize the need for flexibility with respect to frequency tolerance in this band and grant its request. It points out that there are relatively few licensees in the reference band and that congestion is unlikely in the foreseeable future. It suggests that a less stringent frequency tolerance requirement would not contribute to increased interference problems.

3. Standard Communications supports M/A–COM's contention that a frequency tolerance of ±0.005% is excessive. Standard Communications believes the request by M/A–COM for a ±0.05% frequency tolerance requirement is reasonable and reiterates arguments mentioned by M/A–COM. It supports, however, the ±0.005% frequency tolerance requirement for applications of high-power or long-haul microwave utilization.

4. The NAB also supports M/A–COM's petition. In its comments NAB requests that the Commission reconsider the technical standards because a miniaturized remote pickup transmitter for operation in the 38.6–40 GHz band has become available since the adoption of the rules in this proceeding. NAB claims that this new technical development clearly warrants reconsideration and modification of the Commission's Rules as adopted for this new service. NAB also maintains that the Commission chose not to designate channel assignments, operating modes or bandwidth, because the intent was to facilitate experimentation. Yet, NAB argues, for all practical purposes the Commission's decision ruled out the use of cavity-stabilized oscillators. The ±0.005 percent frequency tolerance can be achieved only with a crystal referenced oscillator. Furthermore, NAB claims that the likelihood of interference would be small. The signal propagation characteristic of the 40 GHz band would severely limit the range of equipment operation and the band is essentially an unused portion of the spectrum. For these reasons NAB believes the Commission should not require a frequency tolerance more stringent then ±0.05%.

5. In contrast to M/A–COM, CBS believes that the lower frequency broadcast auxiliary bands are currently congested and there is a likelihood that the 38.6–40 GHz band will become readily attractive. As a consequence, it believes the adopted frequency tolerance requirement must be maintained to minimize the potential for interference among users. With respect to spectral efficiency, it indicates that equipment with a frequency tolerance specification as petitioned by M/A–COM would use about twice the bandwidth. Furthermore, CBS states that M/A–COM has not provided any documentation to support its claim that a substantial demand exists for the "shirt pocket" transmitter.

6. Hughes urges the Commission to maintain the frequency tolerrance requirement it adopted. It claims that the 38.6–40 GHz band is primarily allocated for fixed users and that a proliferation of units operating with a relaxed frequency tolerance would contribute to increased interference and an inefficient use of the spectrum. Hughes states that in a marketing study it conducted, the users of ENG equipment mentioned that transmitting equipment larger than "shirt pocket" size would be entirely acceptable. Accordingly, to meet this market demand, Hughes is developing a light mobile transmitter for use in this band, powered by a battery-belt pack which meets the adopted frequency tolerance requirement without the use of a crystal reference. Hughes contends that M/A–COM's market study did not indicate whether users are willing to trade increased risk of interference and decreased spectral efficiency for the convenience M/A–COM states their units would offer. It is Hughes' contention that the rules that have been adopted should not be relaxed to permit production and marketing of a substandard unit.

7. CBS and M/A–COM subsequently developed a compromise standard. Both filed late supplemental comments requesting that the frequency tolerance requirement be relaxed to ±0.05% for the 38.6–40 GHz band provided two conditions are imposed on the operation of such equipment. First, a directional antenna would be required to be used with any transmitter employing a frequency tolerance of ±0.05%. The parties contend the directivity of the signal would significantly reduce the risk of potential interference. Second, CBS and M/A–COM concur that the power output of such a transmitter be limited to not more than 50 milliwatts (0.05 watts) to ensure further the minimum likelihood of interference. Hughes, however, in its supplemental comments reiterated its opposition to a relaxation of the ±0.005% tolerence because it is spectrally inefficient.

8. As was discussed in the Report and Order, we did not adopt a channeling plan for TV Pickups in this band to allow manufacturers the flexibility to design equipment with different modulation techniques and bandwidths. However, a frequency tolerance was adopted to maintain a degree of control over the spectral occupancy of each emission and thereby protect adjacent channel operations from interference. To loosen this tolerance without any restriction would decrease the opportunities for TV Pickup operations to have an adequate amount of spectrum when operating in close proximity to one another. We believe that the restrictions suggested by MA/COM and CBS should provide adequate measures to further limit the likelihood of interference.[4]

9. Accordingly, we are amending § 74.661 of our Rules to allow TV Pickup Stations to maintain a frequency tolerance within ±0.05 percent of the operating frequency provided the transmitter output power does not exceed 50 milliwatts and a directional

[4] To ensure that this relaxation is not causing spectrum congestion problems, the Commission will revise this rule section in three years. Moreover, the issue of technical standards is presently being addressed in a Notice of Inquiry and Proposed Rule Making in Gen. Docket 83–114 (48 FR 14398; April 4, 1983). The public may also wish to express its opinions concerning the issue of frequency tolerance standards by filing comments in Docket 83–114.

antenna is used. Otherwise, the frequency tolerance for these stations shall be maintained within ±0.005 percent. We believe these restrictions are sufficient to make certain that the operation of this equipment complying with the relaxed frequency tolerance standard will not be detrimental to the operation of equipment using the originally adopted standards.

10. Accordingly, it is ordered, under the provisions of Section 1, 4(i) and 303 of the Communications Act 1934, as amended, that the Report and Order adopted in this docket proceeding is modified to the extent set forth herein.

11. It is further ordered that the petition for reconsideration of the Report and Order is granted to the extent set forth herein and otherwise denied.

12. It is further ordered that § 74.661 of the Commission's Rules is amended as set forth in the Appendix, effective July 15, 1983.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Part 74 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 74—EXPERIMENTAL, AUXILIARY, AND SPECIAL BROADCAST, AND OTHER PROGRAM DISTRIBUTION SERVICES

In § 74.661, paragraph (d) is revised to read as follows:

§ 74.661 Frequency tolerance.

* * * * *

(d) Television Pickup stations operating in the 38.6–40 GHz band shall maintain the carrier frequency of each authorized transmitter within plus or minus 0.005 percent of the operating frequency; as an exception, stations shall maintain the carrier frequency of the transmitter within plus or minus 0.05 percent of the operating frequency provided that the transmitter output power is no greater than 50 milliwatts and a directional antenna is used.

Proposed Rules

Federal Register
Vol. 48, No. 116
Wednesday, June 15, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1145

Proposed Rule To Regulate Under the CPSA a Risk of Injury That May Be Presented by Certain Expandable Children's Enclosures

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is investigating the possibility that certain circular, expandable children's enclosures (sometimes called "corrals") made from criss-crossed slats of solid material, may present a potential hazard of strangulation if a child's neck becomes entrapped in an intersection of the slats. The Commission proposes, should regulatory action become necessary regarding the possible risk of strangulation which may be associated with these products, to use the procedures of the Consumer Product Safety Act rather than those of the Federal Hazardous Substances Act. The Commission preliminarily determines that this transfer is in the public interest because, in the event the Commission believes that a risk of strangulation is associated with these products, public notification and remedial action can be accomplished more expeditiously under the CPSA than under the FHSA.

DATE: Comments concerning this proposal must be received in the Office of the Secretary by July 15, 1983.

ADDRESS: Comments should be sent to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207; (301) 492-6800.

FOR FURTHER INFORMATION CONTACT: Earl A. Gershenow, Trial Attorney, Division of Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207; (301) 492-6626.

SUPPLEMENTARY INFORMATION: By this notice, the Commission proposes to regulate under the Consumer Product Safety Act (CPSA, 15 U.S.C. 2051 *et seq.*) a possible risk of strangulation that may be associated with certain expandable children's enclosures, which are described in detail below.

Section 30(d) of the CPSA [15 U.S.C. 2079(d)] governs this proposed rule. That section provides:

> A risk of injury which is associated with a consumer product and which could be eliminated or reduced to a sufficient extent by action under the Federal Hazardous Substances Act . . . may be regulated under this Act [the CPSA] only if the Commission by rule finds that it is in the public interest to regulate such risk of injury under this Act.

A. Background

In 1981, the Commission received two reports of deaths of children associated with expandable children's enclosures, sometimes called "corrals." These products are made from criss-crossed slats of solid material which are riveted at most crossings to form a continuous, circular enclosure. These products are expandable to various diameters, and are intended to serve a purpose similar to that of a playpen: to confine a child within a restricted area, either indoors or outdoors.

When such a product is in use, the slats cross one another and form a series of V-shaped configurations at the top and bottom of the enclosure.

Investigations of the fatalities reported to the Commission in 1981 indicate that the children involved may have slipped while attempting to climb out of the enclosures, catching their necks in one of the V-shaped configurations formed by the crossing of the slats at the top of the enclosure. If a child's feet were not in contact with the ground, and if the angle formed by the crossing of the slats were sufficiently acute, the child's head might not pass through the opening. The weight of the body pressing the neck against the slats of the enclosure may block passage of air, resulting in death or injury by strangulation.

The Commission has also received information about a third death associated with an expandable enclosure which occurred in 1982.

In addition to the three deaths associated with expandable enclosures, the Commission received a report of a non-fatal accident associated with an expandable enclosure in 1980, in which irreversible brain damage may have resulted from oxygen deprivation after a child's neck became entrapped in the V-shaped opening between two of the slats at the top of an expandable enclosure.

The Commission also has information about four other incidents involving entrapment of children in expandable enclosures, one of which resulted in lacerations and abrasions to the child's head; the other three incidents resulted in minor injuries or no injuries to the children involved. These four accidents resulted when children put their heads through a diamond-shaped opening formed by criss-crossed slats in the side of the enclosure.

B. Regulation Under FHSA

At this time, the expandable enclosures described above could be subject to regulation by the Consumer Product Safety Commission under provisions of the Federal Hazardous Substances Act (FHSA, 15 U.S.C. 1261 *et seq.*) as articles intended for use by children.

In accordance with provisions of section 3(e) through (i) of the FHSA (15 U.S.C. 1262(e), (f), (g), (h), (i)), the Commission could begin a proceeding for the issuance of a rule to declare that the expandable enclosures described in this notice present a mechanical hazard. If issued on a final basis, such a rule would have the effect of classifying these children's articles as "banned hazardous substances" as that term is used in section 2(q)(1)(A) of the FHSA (15 U.S.C. 1261(q)(1)(A)), and would prohibit the distribution or sale of these products in the United States, as well as their importation into this country. If a children's article presents an "imminent hazard," provisions of section 3(e)(2) of the FHSA (15 U.S.C. 1262(e)(2)) authorize the Commission to issue an immediate order declaring to the product to be a banned hazardous substance pending completion of a proceeding to issue a banning rule.

A final rule issued under provisions of sections 3(e) through (i) of the FHSA would also make the products in question subject to provisions of section 15 of the FHSA (15 U.S.C. 1274). That section authorizes the Commission to determine, after affording all interested persons opportunity for a hearing, that notification to the public of the hazard presented by a product which is a "banned hazardous substance" is necessary in order to adequately protect the public. That section also authorizes the Commission, after affording all

interested persons opportunity for a hearing (which could be combined with a hearing regarding the need for public notification), to require the manufacturer, distributor or dealer of a product which is a banned hazardous substance to elect to repair or replace the product, or to refund the purchase price of the product.

However, the provisions of section 15 of the FHSA concerning public notification and corrective action would be applicable to the products which are the subject of this notice only if the Commision had first issued a rule under provisions of sections 3(e) through (i) of the FHSA to announce the Commission's determination that the products present a mechanical hazard.

A prodeeding to issue such a rule is initiated by publication of an advance notice of proposed rulemaking in the **Federal Register** to invite comments from all interested persons about the risk of injury associated with the product which is the subject of the proceeding and possible means of addressing that risk of injury, including voluntary standards now in existence or which might be developed. If, after consideration of all information received in response to the advance notice of proposed rulemaking, the Commission decides to continue the proceeding, publication of a second notice in the **Federal Register** is required to propose the rule and invite written comments on the proposal. The Commission must then analyze all comments received in response to the proposal and publish a third notice in the **Federal Register** to issue the rule on a final basis.

C. Regulation Under CPSA

The CPSA has provisions for requiring public notification of substantial hazards which may be presented by these articles and for ordering corrective action to be taken with regard to them without the necessity of first completing a rulemaking proceeding.

Additionally, the CPSA has provisions which authorize the Commission in certain cases to obtain an administrative order for public notification of the hazard presented by a product and for repair, or replacement of the product, or refund of the purchase price of the product without any necessity of first completing a rulemaking proceeding. The FHSA has no corresponding provisions.

Section 15 of the CPSA (15 U.S.C. 2064) confers upon the Commission the authority to order public notification of the hazard presented by a product if the Commission determines, after affording all interested persons opportunity for a hearing, that the product presents a "substantial product hazard," and that notification is required in order to adequately protect the public from that substantial product hazard. Additionally, section 15 of the CPSA authorizes the Commission to order any manufacturer, importer, distributor, or retailer of a product to elect to repair or replace the product, or to refund the purchase price of the product, if the Commission determines, after affording all interested persons opportunity for a hearing, that the product presents a "substantial product hazard," and that issuance of such an order is in the public interest.

If the products described in this notice were subject to regulation under the CPSA, no requirement for rulemaking would exist in order to invoke the provisions of section 15 of that Act.

Additionally, provisions of section 12 of the CPSA (15 U.S.C. 2061) authorize the Commission to file an action in a United States district court against a manufacturer, importer, distributor, or retailer of a consumer product which presents an imminent and unreasonable risk of death or severe personal injury. The court has the authority to order the recall of the product, its repair or replacement, or refund of the purchase price. The court also has authority to order a firm to undertake extensive notification efforts to advise purchasers and the general public of the nature of the risk and of the firm's obligation for remedial action. The Commission may file an action under section 12 of the CPSA without any requirement for having first undertaken a rulemaking proceeding. As noted above, no corresponding provisions exist in the FHSA.

Because notification to the public of any hazard which may be presented by the products described in this notice and remedial action with regard to those products could be accomplished more expeditiously under the CPSA than under the FHSA, the Commission has preliminarily determined that it would be in the public interest to regulate under the CPSA rather than the FHSA any risk of strangulation which may be associated with the expandable children's enclosures described in this notice if a child's neck becomes entrapped between the slate of such an enclosure.

As noted above, the FHSA has provisions for issuance of an immediate order to declare a children's article to be a banned hazardous substance if it presents an "imminent hazard." However, some products may present a "substantial product hazard" warranting issuance of an order for public notification and corrective action, without amounting to an "imminent hazard" as that term is used in section 3(e)(2) of the FHSA.

In making the preliminary determination set forth above, the Commission has decided that, notwithstanding provisions of section 3(e)(2) of the FHSA, use of the procedures of the CPSA may lead to more expeditious notification and corrective action than might be obtained by following the procedures of the FHSA.

If the Commission issues the rule proposed below on a final basis, and thereafter determines that a standard or regulation may be needed to address any risk of which these products may present, the CPSA would also authorize the Commission to issue a standard or banning rule. Procedures for issuance of a standard are set forth in sections 7 and 9 of the CPSA (15 U.S.C. 2056, 2058); procedures for issuance of a banning rule are in sections 8 and 9 of the CPSA (15 U.S.C. 2057, 2058).

D. Discussion of Recent Judicial Decision

In a recent decision that vacated the Commission's ban of urea formaldehyde foam insulation (UFFI), the U.S. Court of Appeals for the Fifth Circuit Discussed section 30(d) of the CPSA as a "tangential" procedural issue. *Gulf South Insulation, et al. v. CPSC, F.2d* (5th Cir. No. 82–4218; April 7, 1983). After rejecting the Commission's finding that the UFFI "risk could not have been regulated sufficiently under the Federal Hazardous Substances Act," the Court focused on the Public interest finding of section 30(d).

The Commission had found that it was in the public interest to regulate UFFI under the CPSA instead of by using the "complex and lengthy" rulemaking proceeding required by the FHSA. The Court rejected that finding and held, narrowly, that the Commission could not discard "the due process procedures mandated by the Federal Hazardous Substances Act" to regulate UFFI under the CPSA. Slip op. at 3646.

The Commission disagrees with this holding and has petitioned the Court for a rehearing of its UFFI decision, based on this 30(d) issue and other issues. In any case, however, the Commission believes preliminarily that the Court's discussion of section 30(d) does not apply to the rule proposed below. As discussed in this notice, the Commission's proposed public interest finding is based on the expeditious notification and corrective action that is more likely to be obtained under the CPSA than under the FHSA. There are

at least two major reasons for this conclusion, and both distinguish the expandable enclosure situation from the UFFI situation:

1. The Court seems to have been particularly concerned about the "due process" procedures that would have been provided, had UFFI been regulated under the FHSA. 15 U.S.C. 1261(q)(2), referring to sections 701(e), (f), and (g) of the Federal Food, Drug, and Cosmetic Act which may involve a formal, trial-type rulemaking proceeding after an informal notice and comment rulemaking proceeding has been completed. However, the expandable enclosures that are the subject of the rule proposed below are children's products, and therefore governed by different regulatory procedures of the FHSA. 15 U.S.C. 1262(e)—(i). Under those procedures, unless the Commission *specifically elects* to use the section 701 procedures, a simple three-stage, informal notice and comment proceeding would apply. This proceeding is virtually identical to the three-stage, informal notice and comment proceeding that would apply to the expandable enclosures if they were the subject of a rulemaking proceeding under the CPSA. 15 U.S.C. 2058(a)—(g).

2. If the Commission addressed the expandable enclosure entrapment risk under section 15 of the CPSA, an adjudicatory hearing must be provided before the Commission could order a recall or other mandatory action. 15 U.S.C. 2064.

That hearing would provide any affected industry party with the "due process" safeguards that the Court apparently believed were being denied to the UFFI industry.

In short, therefore, the UFFI judicial decision does not apply to the expandable enclosure situation. A public interest finding that CPSA procedures should be used instead of FHSA procedures is not "based solely on a desire to avoid" the FHSA procedures. *Gulf South* at 3646. In any case, the Court also limited its discussion to products that are not "extremely dangerous," as it found that UFFI was not. Since the expandable enclosures are potentially extremely dangerous—responsible for two, three, or more deaths of children—they are beyond the scope of the Court's decision on UFFI.

E. Impact on Small Businesses

Section 603 of the Regulatory Flexibility Act (RFA, 5 U.S.C. 603) requires agencies to prepare and make available for public comment an initial regulatory flexibility analysis of the impact of any proposed rule on small entities, including small businesses. Section 605(b) of the RFA provides that an agency is not required to prepare a regulatory flexibility analysis if the agency certifies that the rule, if issued on a final basis, will not have a significant economic impact on a substantial number of small entities.

The regulation proposed below, if issued on a final basis, will not by itself impose any legal or other obligation on any person or firm. The rule would simply express the Commission's determination that any action taken to eliminate or reduce the risk of injury with which it is concerned will be taken following the procedures set forth in the CPSA rather than the FHSA.

If the Commission issues a final rule based on the proposal published below, and then determines that it should act to eliminate or reduce the risk of injury which is the subject of the rule, the Commission will be required to initiate and follow through to completion appropriate judicial or administrative proceedings under one or more sections of the CPSA before it can impose any obligation on any person or firm.

Since a final rule based on the proposal imposes no obligation on any person or firm, the Commission hereby certifies that it will not have a significant economic impact on a substantial number of small businesses.

F. Environmental Considerations

The regulation proposed below falls within the categories of Commission actions described in 16 CFR 1021.5(c) that have little or no potential for affecting the human environment. For this reason, neither an environmental assessment nor an environmental impact statement is required.

G. Conclusion and Proposal

After consideration of the information set forth above, and provisions of the FHSA and the CPSA, the Commission hereby proposes to regulate under the CPSA rather than the FHSA the possible risk of strangulation which may be associated with the children's expandable enclosures described in this notice if a child's neck becomes entrapped between the slats of such an enclosure. Until issuance of any final regulation under section 30(d) of the CPSA, the Commission has authority to regulate under the FHSA any risk of injury described in this notice which these products may present.

List of Subjects in 16 CFR Part 1145

Administrative practice and procedures, Consumer protection, Infants and children.

Therefore, under provisions of the Consumer Product Safety Act (section 30(d), Pub. L. 92–573, 86 Stat. 1207, as amended Pub. L. 94–284, 90 Stat. 503, Pub. L. 97–35, 95 Stat. 703; 15 U.S.C. 2079(d)), the Commission proposes to amend the Code of Federal Regulations, Title 16, Chapter II, Subchapter B, Part 1145, by adding new a § 1145.13 as follows:

PART 1145—REGULATION OF PRODUCTS SUBJECT TO OTHER ACTS UNDER THE CONSUMER PRODUCT SAFETY ACT

§ 1145.13 Certain expandable children's enclosures; risk of strangulation.

(a) The Commission finds that it is in the public interest to regulate under the Consumer Product Safety Act, rather than under the Federal Hazardous Substances Act, the possible risk of strangulation that may be associated with expandable children's enclosures made from criss-crossed slats of solid material.

(b) Therefore, if the Commission finds regulation to be necessary, any such expandable children's enclosures shall be regulated only under one or more provisions of the Consumer Product Safety Act.

Interested persons are invited to submit written comments by July 15, 1983. Comments may be accompanied by written data, views, and arguments, and should be addressed to the Secretary, Consumer Product Safety Commission, Washingon, D.C. 20207.

Received comments may be seen in the Office of the Secretary, eighth floor, 1111 18th Street, NW., Washington, D.C., between 8:30 a.m. and 5:00 p.m., Monday through Friday..

(Sec. 30(d), Pub. L. 92–573, 86 Stat. 1207, as amended Pub. L. 94–284, 90 Stat. 503, Pub. L. 97–35, 95 Stat. 703; 15 U.S.C. 2079(d))

Dated: June 10, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Fees for Contract Market Designations

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed schedule of fees.

SUMMARY: As part of the Futures Trading Act of 1982, Congress amended

Section 26 of the Futures Trading Act of 1978 to allow the Commission to promulgate a schedule of fees "to be charged for services rendered and activities and functions performed by the Commission in conjunction with its administration with its administration and enforcement of the Commodity Exchange Act." In this regard the Commission proposes to establish a standard formula for contract market designation applications. The proposed formula is based upon a moving average of Commission costs expended reviewing contract marketing applications over the previous three fiscal years. Under the proposed formula, using the costs for fiscal years 1981, 1982 and the first half of fiscal year 1983, the Commission proposes an application fee of $10,000 for all pending applications or new applications submitted.

DATE: Comments must be received on or before July 15, 1983.

ADDRESS: Comments should be sent to: Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Attention: Secretariat.

FOR FURTHER INFORMATION CONTACT: Stacy Dean, Counsel to the Executive Director, Commodity Furtures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Telephone (202) 254–7360.

SUPPLEMENTARY INFORMATION:

1. Introduction

The Futures Trading Act of 1982 (Pub. L. No. 97–444, 96 Stat. 2294, Jan. 11, 1983) amended Section 26 of the Futures Trading Act of 1978 (7 U.S.C. 16a) [1] to provide specific authority to the Commission:

> To promulgate, after notice and opportunity for hearing, a schedule of appropriate fees to be charged for services rendered and activities and functions performed by the Commission in conjunction with its administration and enforcement of the Commodity Exchange Act: *Provided*, That the fees for any specific service or activity or function shall not exceed the actual costs thereof to the Commission. (96 Stat. 2326.)

The Conference Report accompanying the legislation (H.R. Rep. No. 964, 97th Cong. 2d Sess. (1982)) states that "the conferees intend that the fee schedule addressed by the Conference substitute be strictly limited to Commission activities directly related to: . . . contract market designation . . . ." as well as other enumerated Commission functions (p. 57).

In this regard, the Commission proposes to add an Appendix A to Part 1 of its regulations to set forth a standard formula which would be used to establish a fee each fiscal year for contract market designation applications. The Commission proposes to establish a standard methodology, as explained in further detail below, which will result in the calculation of a fee for a particular year which will vary depending upon actual costs to the Commission expended for the previous three fiscal years and the number of contracts reviewed in that three year period. Thus, a contract market application would be subject to the fee in effect on the date the application is filed, regardless of the date of designation.

II. Contract Market Designation

The Commodity Exchange Act authorizes the Commission to designate any board of trade as a "contract market" to buy and sell futures or options on specified commodities under certain conditions. Accordingly, contract market applications are reviewed to ensure compliance with all requirements of the Act and all rules and regulations of the Commission. Specific economic and public interest factors are considered in accordance with the Commission's Guidelines No. 1, 17 CFR, Part 5, Appendix A. In this regard, the Commission seeks to ensure, among other things, that the contract is a viable mechanism for commercial hedging and price discovery; deliverable supplies of the underlying commodity are adequate; the contract conforms with commercial practices in the cash market; the contract is in the public interest; and the contract market will maintain adequate rule enforcement programs.

Pursuant to the Commission directive, the staff has reviewed various ways to establish an application fee which reflects actual costs expended by the Commission with respect to the contract market designation process mandated by the Act. While the Commission recognizes there may be varying methods to establish an appropriate application fee, the Commission has taken into consideration potential anticompetitive effects and is proposing a fee based upon actual costs expended over the last three fiscal years.

In essence, the Commission proposes to publish each year an application fee based upon a three year moving average of actual costs expended and the number of contracts reviewed in that period of time. Thus for FY 1984, the Commission would calculate the costs associated with contract market applications for fiscal years 1981, 1982 and 1983. The total three year costs would be divided by the total number of applications reviewed during those three fiscal years. The Commission believes that establishment of this standard methodology is a fair and accurate means of establishing an application fee for each fiscal year.

In addition, the Commission proposes to set a fee for all pending applications and new applications submitted prior to the publication to the FY 1984 fee. Because the Commission believes that the data beginning in fiscal year 1981 is the most reliable and most accurately reflects the annual costs and contracts reviewed, the Commission proposes that the fee applicable to contracts pending or submitted would be based upon the cost expended and number of contracts reviewed in FY 1981, FY 1982 and the first six months of FY 1983.

Since the beginning of fiscal year 1981 through the first half of fiscal year 1983 the staff estimates that the Commission has spent approximately $950,537 in considering applications for contract market designations.[2] During that time period review has been undertaken on 91 contract market designation applications. Thus, the staff estimates that the Commission spent an average of $10,445 on each application for contract market designation on which review has been undertaken.[3]

---

[1] Section 26, formerly entitled "Plan for User Fees," gave the Commission, with certain restrictions, the authority "to charge and collect reasonable fees to cover the estimated cost of regulating transactions under the jurisdiction of the Commission." No fees were promulgated by the Commission under this provision.

[2] In FY 1981 the Commission spent $312,634; FY 1982 $449,345; and in the first half of FY 1983 $188,558. These figures include compensation and benefit costs of the staff time devoted to review and analysis of applications for contract market designation. Costs were derived by using the Commission's Budget Account Codes. The $950,537 figure also includes actual travel costs associated with the review and an overhead cost of 32%, the Commission's actual overhead percentage for space, supplies, utilities, etc. However, the figure does not include the costs of reviews performed by the Division Directors or the Commissioners or the overhead associated with such costs. Nor does it include the costs of staff support provided to the Commission by the Secretariat, Administrative Services, Personnel, and other support units. Consequently, use of this cost figure results in a conservative estimate of the average costs of considering an application for contract market designation.

[3] This is a conservative estimate not only for the reasons stated in footnote 2 above, but also because considerable work and therefore cost to the Commission was expended on some of these 91 applications before fiscal year 1981, and, for those of the 91 applications not yet approved, disapproved or withdrawn, additional work and cost has yet to be incrred. These unaccounted for additional costs would obviously raise the average costs expended on each application. In addition, the average cost would be higher if the FY 1981 and FY 1982 expenditures were expressed in terms of [illegible] dollars.

The Commission proposes to charge a fee of $10,000 for each application for contract market designation, based on the average actual cost to the Commission for work done on each application considered in fiscal years 1981, 1982 and the first half of fiscal year 1983. The figure of $10,445 has been rounded to $10,000. For the reason stated in footnotes 2 and 3 above, this figure is conservative. The use of the $10,000 figure is consistent with the language in the statute which prohibits the Commission from recovering more than its actual costs. The $10,000 figure would be subject to review each year as current data for the costs of considering applications in the previous three fiscal years becomes available.[4]

While the costs of reviewing individual applications will obviously vary, the Commission believes it is appropriate to charge the same "average" fee for each application, rather than attempting to determine the actual costs of considering each separate application. To do otherwise would have the effect of discouraging innovation, since innovative applications for contract market designation are often the most time consuming to analyze. Moreover, it is appropriate to charge the same price for a less innovative application, since these applications are less costly to consider only because of the efforts that the Commission staff previously expended on previous applications.

The Commission proposes to publish early in each fiscal year the fee for contract market applications submitted after that date in a new Appendix A to Part 1 of the Commission's regulations. A check or money order should be made payable to the Commodity Futures Trading Commission with the application for contract market designation and should be submitted to the Office of the Secretariat. No fees or applications would be accepted in the regional offices, in order to centralize bookkeeping procedures for fee collection. Fees would be deposited through the Commission's Budget Office to the U.S. Treasury for disbursement from the general fund in accordance with Congressional appropriations.[5]

Applications received without fees would be returned by the Secretariat to the submitting exchange, and the one-year statutory time period for reviewing applications would not begin to run.

The Commission further recommends that in the event that an application for contract market designation is withdrawn or disapproved the fee would not be refunded. *See New England Power Co.* v. *United States Nuclear Regulatory Commission*, 683 F.2d 12 (1st Cir. 1982). The costs of analyzing an application which is ultimately withdrawn or disapproved should be recovered by the Commission. Further, a non-refundable fee should ensure that the Commission receives serious and well-reasoned applications.

Finally, the Commission proposes that the $10,000 fee apply to all applications for contract market designation which are pending as of the effective date of the proposed regulation, as well as to applications submitted after that date. *See Hannifin* v. *Morton*, 444 F.2d 200 (10th Cir. 1971); *Miller* v. *Udall*, 317 F.2d 573 (D.C. Cir. 1963).[6] Exchanges with pending applications would be instructed to submit the $10,000 fee for each such application within 30 days of the effective date of the proposed regulation. To avoid any unfairness to pending applicants, however, the Commission further proposes that exchanges be allowed to withdraw without prejudice applications which are pending as of the effective date of the proposed regulation without incurring the $10,000 fee. If an exchange with a pending application fails to submit the $10,000 fee within the 30-day period, the application would be considered withdrawn, and the exchange would not be liable for any fee. The exchange could, of course, resubmit its application at another time, along with the appropriate fee.

[4] The Commission projects that, because of the large inventory of contracts on which review is ongoing but has not been completed the costs expended reviewing contract market applications for fiscal year 1983 will increase significantly without a corresponding increase in the number of contracts reviewed. This will result in a significant increase in the three year moving average and the fee to be charged in fiscal year 1984.

[5] 31 U.S.C.A § 3302 (1983). *See also* 31 U.S.C.A. § 9701 (1983).

[6] In *Hannifin*, the Secretary of the Interior promulgated a rule imposing an annual fee of 25 cents per acre on prospecting permits for federally owned sulphur lands. The plaintiffs challenged the validity of the rule insofar as it applied to permit applications which were pending before the proposed rule was announced. The Tenth Circuit rejected that challenge:

> We are of the opinion that the plaintiff and the members of the class had not acquired any vested right which would preclude subjecting them to the operation of the regulation.
>
> To hold otherwise, and to thereby recognize that the mere filing of an application creates a property right which is immune from modification, would seriously handicap the Secretary in the exercise of his proprietary duties.

444 F.2d at 202–03. Similarly, in *Miller*, the D.C. Circuit held that a statutory change in the minimum annual rental fee for oil and gas leases should be applied to pending applications.

III. Regulatory Flexibility Act

The Commission has previously determined that contract markets are not "small entities" for purposes of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) (47 FR 18618; April 30, 1982). The requirements of the Regulatory Flexibility Act do not, therefore, apply to those entities. Accordingly, the Acting Chairman, on behalf of the Commission, hereby certifies pursuant to 5 U.S.C. 605(b) that the rule proposed herein, if promulgated, will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 17 CFR Part 1

Applications for contract market designation, Fees.

Adding Appendix A to Part 1 of Chapter 1 of Title 17 CFR

PART 1—[AMENDED]

In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act, and in particular Sections 2(a)(11), 8a(5) and 26, 7 U.S.C. 4a(j), 12a(5) and 16a (1976 and Supp. V 1981), as amended by the Future Trading Act of 1982, Pub. L. 97–444, Section 237, 96 Stat. 2328 (Jan. 11, 1983), and the Independent Offices Appropriations Act, as amended by Pub. L. 97–258, 96 Stat. 1051 (Sept. 13, 1982) (see 31 U.S.C.A. § 9701), the Commission proposes to amend Part 1 of Chapter 1 of Title 17 of the Code of Federal Regulations by adding Appendix A, to read as follows:

Appendix A—Schedule of Fees

(a) Applications for Contract Market Designation. All applications for designation as a contract market shall be subject to an application fee based upon the average Commission costs expended reviewing contract market applications over a period of the preceding three fiscal years.

(b) Each application for designation as a contract market must be accompanied by a check or money order in the amount of $10,000 made payable to the Commodity Futures Trading Commission.

(c) Checks and applications should be sent to the attention of the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. No checks or money orders may be accepted by personnel other than those in the Office of the Secretariat.

(d) Failure to submit the fee with an application for designation as a contract market (or, if an application is pending, within 30 days of the effective date of this regulation) will result in return of the application. Fees will not be returned after receipt.

Issued in Washington, D.C., on June 10, 1983, by the Commission.

Jane K. Stuckey,

Secretary of the Commission.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Forms Under Review by Office of Management and Budget

June 10, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Officer, USDA, OIRM, Room 108–W, Admin. Bldg., Washington, D.C. 20250, (202) 447–6201.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

AGENCY: International Trade Administration, Commerce.

ACTION: Inititiation of Countervailing Duty Investigation.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers, manufacturers, or exporters in Trinidad and Tobago of carbon steel wire rod, as described in the "Scope of the Investigation" section below, receive benefits which constitute bounties or grants within the meaning of the countervailing duty law. If our investigation proceeds normally, we will make our preliminary determination on or before August 9, 1983.

EFFECTIVE DATE: June 15, 1983.

FOR FURTHER INFORMATION CONTACT: Vincent P. Kane, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230 (202) 377–5414.

SUPPLEMENTARY INFORMATION:

Petition

On May 16, 1983, we received a petition from counsel for Atlantic Steel Company, Continental Steel Corporation, Georgetown Steel Corporation, Georgetown Texas Steel Corporation and Raritan River Steel Company on behalf of the U.S. industry producing carbon steel wire rod. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that producers, manufacturers, or exporters in Trinidad and Tobago of steel wire rod receive, directly or indirectly, bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act).

Trinidad and Tobago are not "countries under the Agreement" within the meaning of section 701(b) of the Act and therefore section 303 of the Act applies to this investigation. Under this section, because the merchandise under investigation is dutiable, the domestic industry is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of this product cause or threaten to cause material injury to a U.S. industry.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the

petitioner supporting the allegations. We have examined the petition on carbon steel wire rod and we have found that the petition meets these requirements.

Therefore, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Trinidad and Tobago of carbon steel wire rod as described in the "Scope of the Investigation" section of this notice, receive bounties or grants. If our investigation proceeds normally, we will make a preliminary determination by August 9, 1983.

Scope of the Investigation

The product covered by this investigation is carbon steel wire rod, a coiled semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, not tempered, not treated, not partly manufactured, and valued over 4 cents per pound. The merchandise is currently classified under item number 607.17 of the Tariff Schedules of the United States.

Allegations of Bounties or Grants

The petition alleges that producers, manufacturers, or exporters in Trinidad and Tobago of carbon steel wire rod receive the following benefits that constitute bounties or grants: government equity contributions onterms inconsistent with commercial considerations, government loan guarantees, import duty exemptions on capital equipment, government cash infusions to cover operating losses, preferential natural gas prices, preferential rental or lease terms for facilities provided by the Point Lisas Development Project, government provision of infrastructure at the Point Lisas Development Project, worker training subsidies, preferential export credit insurance, preferential shipping rates, government sponsored marketing assistance, and tax concessions under the Trinidad and Tobago Corporation Tax Act of 1966.

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

National Bureau of Standards

National Bureau of Standards' Visiting Committee; Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the National Bureau of Standards' Visiting Committee will meet on Wednesday, July 13, 1983, from 8:30 a.m. to 5:15 p.m., and Thursday, July 14, 1983, from 9:00 a.m. to 11:45 a.m. in Lecture Room B, Administration Building, National Bureau of Standards, Gaithersburg, Maryland, and from 2:00 p.m. to 3:00 p.m. in Room 5854, Department of Commerce, Washington, D.C.

The NBS Visiting Committee is composed of five members prominent in the fields of science and technology and appointed by the Secretary of Commerce.

The purpose of the meeting is to review the efficiency of the Bureau's scientific work and the condition of its equipment in order to assist the Committee in reporting to the Secretary of Commerce as required by law.

The public is invited to attend, and the Chairman will entertain comments or questions at an appropriate time during the meeting. Any person wishing to attend the meeting should inform Mrs. Carolyn Goodfellow, Office of Research and Technology Applications, National Bureau of Standards, Washington, D.C. 20234, telephone (301) 921-2226.

Dated: June 10, 1983.

Ernest Ambler

Director.

[FR Doc. 83-16005 Filed 6-14-83; 8:45 am]

BILLING CODE 3510-13-M

CONSUMER PRODUCT SAFETY COMMISSION

Public Meeting Concerning Commission Priorities

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of public meeting.

SUMMARY: The Commission will conduct a public meeting to obtain views from interested parties about priorities for Commission attention during ficsal year 1985. Participation by members of the public is invited.

DATES: The meeting will begin at 9:30 a.m. on June 27, 1983. Requests from members of the public who desire to make presentations should be received by the Office of the Secretary not later than June 20, 1983.

ADDRESS: The meeting will be in the third flood conference room, 1111 18th Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: For information about the meeting or to request opportunity to make a presentation at the meeting, contact Sadye E. Dunn, Secretary, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492-6800.

SUPPLEMENTARY INFORMATION: The Consumer Product Safety Commission will conduct as public meeting to receive views from interested parties concerning establishment of priorities for Commission attention during fiscal year 1985 (October 1, 1984 through September 30, 1985). The meeting will begin at 9:30 a.m. on June 27, 1983, in the Commission's conference room, third floor, 1111 18th Street, NW., Washington, D.C.

The purpose of the meeting is to obtain views concerning projects and activities which should be given priority by the Commission during fiscal year 1985 from a wide range of interested parties including representatives of consumers; manufacturers, importers, distributors, and retailers of consumer products; members of the academic community; and representatives of health and safety agencies of state and local governments.

The Commission is charged by Congress with protection of the public from unreasonable risks of injury associated with consumer products. In accordance with that mandate, the Commission administers and enforces the following laws, and rules issued under those laws:

The Consumer Product Safety Act (15 U.S.C. 2051 *et seq.*);

The Federal Hazardous Substances Act (15 U.S.C. 1261 *et seq.*);

The Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*); and

The Poison Prevention Packaging Act (15 U.S.C. 1471 *et seq.*).

Standards and regulations issued under those statutes are published in the Code of Federal Regulations, Title 16, chapter II.

While the Commission has broad jurisdiction over products used by consumers in or around their homes, in schools, in recreation, and other settings, its staff and budget are limited. For that reason, the Commission must concentrate its resources on the most serious hazards associated with consumer products within its jurisdiction in order to discharge its Congressional mandate effectively.

In it Budget Request for fiscal year 1984 (October 1, 1983 through September 30, 1984), the Commission identified nine priority projects for that fiscal year. Those projects are described in Appendix 1 to this notice. The Commission's priority projects for fiscal year 1983 (October 1, 1982 through September 30, 1983) are also described in Appendix 1. The order in which the projects appear in Appendix 1 does not

reflect the relative priority of one project over another, and that appendix does not contain a complete list of all projects undertaken by the Commission during those fiscal years.

Commission priorities are selected in accordance with Commission's policy governing establishment of priorities, published at 16 CFR 1009.8.

Interested parties who desire to make presentations at this meeting should call or write Sadye E. Dunn, Secretary, Consumer Product Safety commission, Washington, D.C. 20207; telephone (301) 492–6800 not later than June 20, 1983.

Presentations should be limited to approximately ten minutes. Persons desiring to make presentations are encouraged to submit a written text or summary of their presentations to the Office of the Secretary, not later than June 20, 1983.

The Commission reserves the right to impose further time limitations on all presentations and further restrictions to avoid duplication of presentations.

The public meeting will begin at 9:30 a.m. on June 27, 1983, and will conclude on the same day

Dated: June 13, 1983.

Sadye E. Dunn,

Secretary Consumer Product Safety Commission.

Appendix 1—Commission Priorities for Fiscal Year 1984 (October 1, 1983 Through September 30, 1984)

Chain Saws—Each year, an estimated 28,000 medically attended injuries occur from chain saw "kickback" (the sudden rearward and upward travel of a chain saw when it bucks, kicks or unexpectedly jumps toward the operator). In FY 1984, the Commission will continue work toward development of a mandatory product safety standard designed to address the kickback hazard, and will work with industry on a voluntary standard as an alternative. In addition, the agency will work on strategies to address non-kickback injuries (estimated at 95,000 per year, but generally less serious than kickback injuries), and will conduct an information and education program to inform consumers how to use chain saws safely.

Chlorocarbons—Long-term animal testing of two chemicals (perchloroethylene, widely used in dry cleaning, and dichloromethane, used as a paint remover and solvent) will be completed in FY 1983. Preliminary indications are that both compounds may cause cancer. In FY 1984, CPSC will continue work to analyze the potential risk to consumers from exposure to these chemicals, and, if appropriate, will develop remedial strategy options.

Gas Heating Equipment—Gas heating systems account for the majority of carbon monoxide deaths in the home—about 290 deaths each year. In addition, gas-fired heating systems account for a significant number of fire-related deaths and injuries. In FY 1984, the Commission will work with voluntary standards groups (for example, the American National Standards Institute) to improve the safety of these products, and will conduct an outreach program to increase consumer awareness of potential hazards.

Indoor Air Quality—Combustion Products—The Commission is concerned about possible health problems caused by pollutant emissions from fuel-fired appliances. Pollutants include carbon monoxide, nitrogen oxides, and formaldehyde. Studies indicate that living in homes with gas stoves may have increased the incidence of respiratory disease and lung dysfunction in children. In FY 1984, the Commission will continue to conduct tests to measure consumers' exposure to pollutants from these sources, and will seek the aid of appliance and heater manufacturers to develop appropriate remedial strategies.

Juvenile Sports Equipment—Each year, there are over 900,000 medically attended injuries of children from the ages of 5 through 14 associated with baseball, football and soccer activities. Between 1973 and 1980, there were over 60 deaths of children in this same age group which were associated with these sports. In FY 1984, the Commission will conduct a detailed analysis of injuries, test protective equipment, and develop proposals to improve safety in the juvenile sports area. Proposals to improve safety may include information and education efforts, rule changes, and equipment improvements.

Particleboard and Paneling—Formaldehyde emissions from these pressed wood products may constitute a health risk to consumers. Both acute and chronic health hazards are of concern. In FY 1984, the Commission will continue the evaluation of formaldehyde emissions from these products and the assessment of consumer exposure and risk resulting from the use of these products in conventional (as opposed to mobile) homes. This work will provide the basis for determining whether any action is necessary to reduce possible health hazards. Industry is working cooperatively with the Commission in evaluating technical data on methods of measuring formaldehyde emissions as well as sharing information on resin technology and product use.

Poison Prevention Packaging—The Poison Prevention Packaging Act provides authority to issue regulations requiring child-resistant packaging for certain products to protect children from serious injury or illness. In FY 1984, CPSC will investigate and develop proposals, if appropriate, to require child-resistant packaging for certain camphorated products, petroleum distillates and topical drugs to prevent ingestion injuries from these products. In addition, CPSC is concerned that increased usage of dual purpose closures may lead to increased accidental ingestion of dangerous chemicals by children. In FY 1984, the agency will continue to monitor market data and ingestion data, and, if necessary, will develop regulations regarding the use of dual purpose closures.

Safety for Older Consumers—The elderly are the largest growing segment of our society and suffer most severely from product-related accidents. The special circumstances and life styles of persons aged 65 and over which make them particularly vulnerable to injury will be addressed. Attention will center on reducing incidence of falls, fires, scalds and the effects of indoor air pollution.

Smoldering Ignition—Fire is the fourth leading cause of accidental death in the United States, and the second leading cause of accidental death in the home. Upholstered furniture fires cause more deaths than any other product under CPSC jurisdiction. It is estimated that 1,150 deaths, 4,200 injuries and 24,600 fires occur annually as a result of cigarette ignition of upholstered furniture. Mattress and bedding fires, which cause an estimated 1,000 deaths annually, are also a serious safety problem.

In FY 1984, the Commission will continue its cooperative efforts with industry to improve the resistance of upholstered furniture to cigarette ignition. The agency will also conduct an information and education program to warn consumers of the fire hazard. In addition, CPSC will analyze injury data associated with mattress and bedding fires, and will develop remedial strategies for the hazard.

Commission Priorities for Fiscal Year 1983 (October 1, 1982 Through September 30, 1983)

Chain Saws—See discussion in FY '84 priorities.

Smoldering Ignition of Furniture and Bedding—See discussion in FY '84 priorities.

Children's Exposure to Carcinogens—Various rubber and plastic children's products may contain the potentially cancer causing substances, nitrosamines or phthalates. The Commission will evaluate the extent to which children are exposed to these substances and will consider alternatives to reduce any risk to children, including cooperative efforts with industry.

Heating Equipment Fires—An estimated 850 deaths and 8,700 injuries each year result from heating equipment fires. The Commission will work with industry to develop safer gas water heaters, solid fuel appliances and kerosene heaters. Consumers will be informed of the potential hazards of these products and how to safegured against them.

Smoke Detectors—The Commission will work with fire departments, insurance companies and state and local agencies to promote the wider use of smoke detectors in residences.

Formaldehyde Released from Plywood and Particle Board—See discussion in FY '84 priorities.

Pharmacy/Medical Community Awareness—The Commission will attempt to further reduce accidental ingestions of prescription drugs by children under five by working with State Boards of Pharmacy to bolster enforcement of child-resistant closure dispensing regulations and by preparing instructional materials for pharmacy and medical school students to increase their awareness of ingestion hazards.

Indoor Air Quality—Combustion Products—See discussion in FY '84 priorities.

Dual Purpose Closure Analysis—See discussion in FY '84 priorities under the heading *Poison Prevention Packaging.*

School Laboratory Chemicals—The Commission will increase awareness of potential hazards from school laboratory chemicals so that safety precautions can be taken by students and their teachers. The CPSC will also make a strong effort to find substitutes for the chemicals used today.

[FR Doc. 83-16186 Filed 6-14-83; 8:45 am]

BILLING CODE 6355-01-M

DEPARTMENT OF EDUCATION

Office of Educational Research and Improvement

Planning for Future Support of Research and Development Centers and Regional Educational Laboratories; Public Meetings and Request for Public Comment

AGENCY: Department of Education.

ACTION: Notice of public meetings and request for public comment on planning for future support of research and development centers and regional educational laboratories.

SUMMARY: The National Institute of Education (NIE) will hold public meetings, and the Director of NIE is inviting written comments from the public, regarding educational research, issues, problems, needs, and priorities of each region of the country in planning for future support of the research and development (R&D) centers and regional educational laboratories through open competitions.

DATES: Public meetings are scheduled for June 16, June 20, June 22, and June 24, 1983. Written comments must be submitted on or before July 9, 1983.

ADDRESSES: Public meetings will be held in the following cities on the dates shown, starting at 9:00 a.m. and ending at 5:00 p.m. except for the Washington meeting which will start at 8:30 a.m. and end at 4:30 p.m.

Washington—June 16, 1983—GSA Regional Office Building Auditorium, Room 1041, 1st Floor, 7th and D Streets SW., *Contact:* Phillip Whiteman, NIE, 202–254–5740

Atlanta—June 20, 1983—Senator Richard Russell Building, L. D. Strom Auditorium, 75 Spring Street SW., *Contact:* John Lovegrove, ED Region IV Office, 404–221–2063

Chicago—June 20, 1983—300 S. Wacker Drive Building, 35th Floor Conference Room. *Contact:* Vince Birdin, ED Region V Office, 312–353–0966

Philadelphia—June 20, 1983—Drexel University, Main Auditorium, 32nd and Chestnut Streets. *Contact:* Joseph P. Ambrosino, ED Region III Office, 215–596–1001

San Francisco—June 20, 1983—San Francisco Unified School District, Edison Elementary School, School Auditorium, 3531 22nd Street. *Contact:* Eugene Gonzales, ED Region IX Office 415–556–4920

Dallas—June 22, 1983—El Centro College, Performing Arts Theatre, Market and Main Streets. *Contact:* Scott Tuxhorn, ED Region VI Office, 214–767–3626

Kansas City—June 22, 1983—Kansas City Technical Education Center, Auditorium, 1215 Truman Road. *Contact:* Harry Kellman, ED Region VII Office, 816–374–2276

New York—June 22, 1983—Courtroom #238, 26 Federal Plaza. *Contact:* Lorraine Colville, ED Region II Office, 212–264–7005

Seattle—June 22, 1983—New Federal Building, South Auditorium, Room 514, 915 Second Avenue. *Contact:* Hyrum M. Smith, ED Region X Office, 206–442–0460

Boston—June 24, 1983—Administration Building for Boston School Department, Boston School Committee, Meeting Room, 1st Floor, 26 Court Street. *Contact:* Dr. Thomas J. Burns, ED Region I Office, 617–223–5814

Denver—June 24, 1983—Mountain Bell Auditorium, 1005 17th Street. *Contact* Tom Tancredo, ED Region VIII Office, 303–837–3544.

FOR FURTHER INFORMATION CONTACT: Individual coordinators for meetings, whose telephone numbers are listed in the **ADDRESSES** section above.

SUPPLEMENTARY INFORMATION: NIE is planning the competition of a nationwide network of R&D centers and regional educational laboratories to be held during 1984. To prepare for this competition, NIE is holding a series of 11 public meetings across the country from June 16 through June 24, 1983.

The agenda for each meeting will be as follows:

*9:00–9:30 Registration
9:30–10:00 Briefing on Background of Meeting by NIE Staff
10:00–12:00, 1:00–5:00 Presentations/Comments
**Exception:* The Washington meeting will be held from 8:30 to 4:30.

Purposes of the Public Meetings

These public meetings are intended to:

- Provide interested groups and individuals with an opportunity to advise NIE on the educational needs and priorities of their regions and the types of educational research and development services they believe would be most responsive to those needs;
- Inform NIE about the education community's views regarding the most appropriate institutional characteristics for the laboratories and centers; and
- Discuss NIE's plans for the laboratory and center competition.

The Director wishes to hear from as many people as possible regarding the Institute's efforts to improve education through the work of laboratories and centers. Following the meetings, NIE will review all correspondence and contributions of participants, consult with a national advisory panel, and develop final plans for the competition.

Background

NIE currently supports seven regional laboratories and nine R&D centers located throughout the country. They are the remaining organizations of a nationwide network of 20 laboratories and 10 centers established by the U.S. Office of Education in the mid-60's. Over the years, some of the original institutions closed as a result of evaluations of their work, increasing competition for available funds, changes in Federal policy, and other circumstances.

The current funding cycle for the existing labs and centers is scheduled to end during 1984–1985, and the Congress has instructed NIE to conduct an open competition for future laboratory and center support. This will be the first competition of its kind since the regional laboratories and R&D centers were established almost twenty years ago.

This competition will meet statutory requirements that the Director of NIE "make grants to, and enter into contracts with—(A) regional educational laboratories established by public agencies or nonprofit organizations; and (B) research and development centers established by institutions of higher education or by interstate agencies established by compact which operate subsidiary bodies established to conduct postsecondary educational research and development." [Sec. 405(f)(1) of the General Education Provisions Act, 20 U.S. Code 1221e (Pub. L. 96–374)]

The law also requires that such institutions will conduct research and development activities according to a long-range plan, ensure the dissemination of the results of such work, provide technical assistance to appropriate educational agencies and institutions, and to the extent practicable, provide training to women and members of minority groups.

R&D Centers

The purpose of NIE centers has been to provide research leadership in educational problem areas that are of national importance. Each center has been responsible for establishing strategies and programs in pursuit of its mission through consultation with scholars and practitioners in its field and in collaboration with NIE staff. The current centers have been focusing their resources on particular topics or problem areas for extended periods of time. These topics include: evaluation, educational finance and governance, the social organization of schools, educational policy and management, higher education management systems, learning research and development, education and work, teacher education, and individualized schooling.

Center research is typically long-term, multidisciplinary and programmatically integrated. Each center works actively with a national advisory panel of scholars, educators and policymakers to guide and review its direction and performance. Implied in the notion of leadership are key responsibilities that each center strives to carry out: (1) Encouraging excellence in research and related activities, (2) breaking new ground in areas where progress in education is needed, (3) participating in national networks of scholars and practitioners working on similar problems, and (4) making the results of research available in forms that are most useful to partitioners and policymakers.

Current R&D centers are as follows:

- Center for Educational Policy and Management (CEPM), Eugene, OR
- Center for Social Organization of Schools (CSOS), Baltimore, MD
- Center for the Study of Evaluation (CSE), Los Angeles, CA
- Institute for Research on Educational Finance and Governance (IFG), Standford, CA
- Learning Research and Development Center (LRDC), Pittsburgh, PA
- National Center for Higher Education Management Systems (NCHEMS), Boulder, CO
- National Center for Research in Vocational Education (NCRVE), Columbus, OH
- Research and Development Center for Teacher Education (RDCTE), Austin, TX
- Wisconsin Center for Education Research (WCER), Madison, WI

As the Institute plans for center competitions, the Director invites comments and advice, first of all, on those research issues and educational problems that should have the highest priority for the work of centers. In addition, the Director invities opinions on particular options for structuring centers around the issues and problems identified by commenters. The following topics may be used as a guide in organizing comments:

1. The balance of basic, applied, and policy research appropriate for a center for the issues identified;
2. The need for training, development, dissemination, technical assistance, or other related activities for the problems and issues having the highest priority;
3. The most productive relationship between NIE and its centers regarding the initiation of research projects;
4. The primary audiences for work on the problems and issues identified by the commenter, and the method for disseminating results of the work to those audiences; and
5. Options, if any, for the structure and organization of centers (single site, consortium, multi-site network, etc.).

Regional Educational Laboratories

NIE currently sponsors regional laboratories that are intended to complement the work of other educational agencies (including state departments of education, school districts, colleges and universities, private firms, and other organizations) in identifying and helping to meet educational R&D needs in specified geographical areas of the country.

The current laboratories are governed by boards of directors that reflect the many interests of educational groups in the regions. Although the specific activities of individual laboratories may vary considerably, they generally perform the following functions:

- Identify concerns and priorities through regionally repersentative governance and advisory structures,
- Conduct applied research and development in pursuit of those priorities,
- Provide technical assistance to the region,
- Facilitate communication among educational agencies and individuals in the region,
- Promote the regional use of R&D results from all sources, and
- Disseminate nationally the results of their own activities.

Current laboratories are as follows:

- Appalachia Educational Laboratory, Inc. (AEL), Charleston, WV (AL, KY, OH, PA, TN, VA, WV)
- Far West Laboratory for Educational Research and Development (FWL), San Francisco, CA (CA, NV, UT)
- Mid-continent Regional Educational Laboratory (McREL), Kansas City, MO (CO, KS, MO, NE, ND, SD, WY)
- Northwest Regional Educational Laboratory (NWREL), Portland, OR (AK, HI, ID, MT, OR, WA, American Samoa, Guam, Micronesia, Northern Marianas)
- Research for Better Schools, Inc. (RBS), Philadelphia, PA (DE, NJ, PA)
- Southwest Educational Development Laboratory (SEDL), Austin, TX (AR, LA, MS, NM, OK, TX)
- Southwest Regional Laboratory (SWRL), Los Alamitos, CA (AZ, CA, NV)

Note.— As alternatives to full laboratory services, Mc RDL and AEL provide interim services to IL, IN, IA, KY, MI, MN, MO, OH, TN, and WI.

As the Institute plans for the laboratory competitions, the Director invites comments on the needs and priorities of each region of the country, as well as on laboratory purposes, functions, structures, governance and boundaries. The following topics may be used as a guide in organizing comments:

Boundaries

1. The combination of states in the commenter's area of the country that would make for the most sensible, effective grouping for laboratory governance and activities;
2. The general policies on regional boundaries that NIE should establish with respect to minimum/maximum size, overlap of service areas, or eligibility of states to receive services from more than one institution;
3. The key educational issues on which the work of a laboratory in the commenter's region should focus;

Purposes and Functions

4. The activities and client groups on which the laboratory in the commenter's region should concentrate over the next several years;
5. The most effective strategies and activities for improving educational quality, based on the commenter's past experience with laboratories or similar institutions;
6. The manner in which a laboratory should work with other agencies already involved in research, development, dissemination, or technical assistance in the commenter's region;
7. The core functions—such as assessing regional needs, conducting applied research, or disseminating exemplary research and practice—that NIE should require for all laboratories to ensure consistency and coordination across institutions, if any;

Structure and Governance

8. The advantages and problems in using existing organizations, creating new organizations, or using collaborative arrangements among existing groups as the basis for laboratory operations in the commenter's region;

9. The basis on which regional laboratories should select representatives for their governing boards, and the roles the boards should play; and

10. The most productive relationship between NIE and its laboratories with respect to decision-making concerning the goals, structure, and quality of their projects.

Invitation To Comment

The Director invites interested persons to make an oral presentation on the meeting dates scheduled. To make an oral presentation, contact in advance the coordinator for the meeting you wish to attend. Interested persons wishing to make an oral presentation without contacting the appropriate meeting coordinator in advance to reserve a slot may schedule an oral presentation in person on the day of the meeting if slots are available. Speakers will be scheduled on a first-come, first-served basis. Presentations may not exceed ten minutes. Oral testimony should be accompanied by a written statement to be included in the meeting record.

The Director encourages persons unable to participate in a meeting to send their written comments to: Phillip L. Whiteman, Office of the Director, National Institute of Education, 1200 19th Street, N.W., Washington, D.C. 20208. Written comments will become part of the official record of these meetings if they are submitted no later than July 9, 1983.

(Catalog of Federal Domestic Assistance: 84-117, Educational Research and Improvement)

Dated: June 8, 1983.

Fred W. Decker,

Acting Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 83-CDRT-144]

Allentown Hospital; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Allentown Hospital, 17th & Chew Streets, Allentown, Pennsylvania 18102, filed an application on May 26, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at the Allentown, Pennsylvania Hospital facility, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Allentown Hospital indicates that the volume of natural gas for which it requests certification is approximately 70,000 Mcf per year. This volume is estimated to displace the use of approximately 500,000 gallons of No. 2 fuel oil (0.2 percent sulfur) per year.

The eligible seller is Exxon U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314; and by UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Allentown Hospital and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 10, 1983.

The F&M Schaefer Brewing Co.; Application For Certification of the Use of Natural Gas To Displace Fuel Oil

The F&M Schaefer Brewing Co. (Schaefer), Lehigh Valley Brewery, SW Corner Route 22 and Highway 100, P.O. Box 2568, Allentown, Pennsylvania 18001, filed an application on June 7, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its brewery in Allentown, Pennsylvania, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Schaefer indicates that the volume of natural gas for which it requests certification is approximately 590,673 million cubic feet per year. This volume is estimated to displace the use of approximately 3,835,540 gallons of No. 6 fuel oil (2.2 percent sulfur) per year.

The eligible seller is Exxon USA, P.O. Box 2180, Houston, Texas 77001. This gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, SE., Charlestown, West Virginia 25314; and by UGI Corporation, Gas Utility Division, 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation in necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Schaefer and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 9, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

The Faultless Rubber Co.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

The Faultless Rubber Company (Faultless Rubber), 268 East Fourth Street, Ashland, Ohio 44805, filed an application on May 26, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Ashland, Ohio plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Faultless Rubber indicates that the volume of natural gas for which it requests certification is approximately 140,000 Mcf per year. This volume is estimated to displace the use of approximately 933,300 gallons of No. 6 fuel oil (.5 percent sulfur) per year.

The eligible seller is Exxon-U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gulf Transmission Corporation, 3805 West Alabama Avenue, Houston, Texas 77027; Columbia Gas Transmission Company, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314; and by Columbia Gas of Ohio, Inc., 99 North Front Street, Columbus, Ohio 43215, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Faultless Rubber and any person filing comments and will be published in the **Federal Register**

Issued in Washington, D.C., on June 10, 1983.

[ERA Docket No. 83-CERT-105]

The General Tire & Rubber Co.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

The General Tire & Rubber Company (General Tire), One General Street, Akron, Ohio 44239, filed an application on May 19, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Jeannette, Pennsylvania, and at its Toledo, Ohio, plants pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, General Tire indicates that the volume of natural gas for which it requests certification is a total of approximately 370,000 Mcf per year at the two plants (220,000 Mcf at Jeannette and 150,000 Mcf at Toledo). This volume is estimated to displace the use of approximately 2,480,000 gallons of No. 6 fuel oil (less than 1.0 percent sulfur) per year at the two plants (1,480,000 gallons at Jeannette and 1,000,000 gallons at Toledo).

The eligible sellers are Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001, and Victory Development Company, 1460 U.S. Steel Building, Pittsburgh, Pennsylvania 15219. The gas will be transported by the Columbia Gulf Transmission Corporation, 3805 W., Alabama Avenue, Houston, Texas 77027, Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virgina 25325; and by Columbia Gas of Pennsylvania, 99 North Front Street, Columbus, Ohio 43215 (Jeannette plant), and Columbia Gas of Ohio 99 North Front Street, Columbus, Ohiol 43215 (Toledo plant), each a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to General Tire and any person filing comments and will be published in the **Federal Register.**

[ERA Docket No. 83-CERT-124]

Harbison-Walker Refractories U.S.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Harbison-Walker Refractories U.S. (Harbison-Walker), 2 Gateway Center, Pittsburgh, Pennsylvania 15222, filed an application on May 25, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Baltimore, Maryland facility, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Harbison-Walker indicates that the volume of natural gas for which it requests certification is approximately 547,500 Mcf per year. This volume is estimated to displace the use of approximately 93,075 barrels of No. 2 fuel oil (0.2 percent sulfur) per year.

The eligible seller is POI Energy, Inc., Subsidiary, Park-Ohio Industries, Inc., 777 East 79th Street, Cleveland, Ohio 44103. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25325; and by Baltimore Gas & Electric Company, P.O. Box 1475, Baltimore, Maryland 21203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Harbison-Walker and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Heinz U.S.A; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Heinz U.S.A., a division of H.J. Heinz Co. (Heinz), P.O. Box 57, Pittsburgh, Pennsylvania 15230, filed an application on May 25, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Fremont, Ohio plant pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Heinz indicates that the volume of natural gas for which it requests certification is approximately 553,500 Mcf per year. This volume is estimated to displace the use of approximately 3,690,000 gallons of No. 6 fuel oil (1.5 percent sulfur) per year.

The eligible seller is Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001. The gas will be transported by Columbia Gulf Transmission Corporation, 3805 West Alabama Avenue, Houston, Texas 77027; Columbia Gas Transmission Corporation, P.O. box 1273, Charleston, West Virginia 25325; and by Columbia Gas of Ohio, 99 North Front Street, Columbus, Ohio 43215 a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposal oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Heinz and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Hofmann Industries, Inc.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Hofmann Industries, Inc., (Hofmann), 3145 Shillington Road, Sinking Spring, Pennsylvania 19608, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Sinking Spring, Pennsylvania plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Hofmann indicates that the volume of natural gas for which it requests certification is approximately 44,056 Mcf per year. This volume is estimated to displace the use of

approximately 299,293 gallons of No. 6 fuel oil (1.5 percent sulfur) per year.

The eligible seller is Exxon U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, W. Virginia 25314; and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution Company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 100 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Hofmann and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

[ERA Docket No. 83–CERT–148]

Kaiser Aluminum & Chemical Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Kaiser Aluminum & Chemical Corporation (Kaiser), 300 Lakeside Drive, Oakland, California 94643, filed an application on May 26, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Kaiser Agricultural Chemical plant in Hamilton County, Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Kaiser indicates that the volume of natural gas for which it requests certification is approximately 215,000 Mcf per year. This volume is estimated to displace the use of approximately 1,550,215 gallons of No. 2 fuel oil (.3 percent sulfur) per year.

The eligible sellers are Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; Texas Gas Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 45302; and Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Texas Gas Transmission Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 42301; Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; The Union Light, Heat & Power Company, P.O. Box 32, Covington, Kentucky 41012; and by The Concinnati Gas & Electric Company, P.O. Box 960, Cincinnati, Ohio 45202, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Kaiser and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 9, 1983

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–011]

Kerr Glass Manufacturing Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On April 11, 1983, Kerr Glass Manufacturing Corporation (Kerr), 501 South Shatto Place, Los Angeles, California 90020, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 5,000 Mcf per day of natural gas which is expected to displace the use of approximately 794 barrels of No. 6 fuel oil (1.0–2.0 percent sulfur) per day at its glass production facility in Dunkirk, Indiana.

The eligible sellers of the natural gas are SW Pipeline Company, c/o Industrial Gas Services, Inc., 4501 Wadsworth Boulevard, Wheatridge, Colorado 80033; and IGC Energy, Inc., 1630 North Meridian Street, Indianapolis, Indiana 46202. The gas will be transported by Panhandle Eastern Pipeline Company, P.O. Box 1642, Houston, Texas 77001; and by Indiana Gas Company, P.O. Box 1231, Muncie, Indiana 47305, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 23298, May 24, 1981) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed Kerr's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Kerr's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural

Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., on June 9, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83–CERT–118]

National Starch and Chemical Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

National Starch and Chemical Corporation (National), P.O. Box 1084, Indianapolis, Indiana 46206, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Indianapolis, Indiana, facility pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, National indicates that the volume of natural gas for which it requests certification is approximately 660,000 Mcf per year. This volume is estimated to diplace the use of approximately 4,011,960 gallons of No. 6 fuel oil (1.5 percent sulfur) per year.

The eligible seller is Oklahoma Natural Gas Company, P.O. Box 871, Tulsa, Oklahoma 74102. The gas will be transported by Panhandle Eastern Pipeline Company, 3000 Bissonnet Avenue, Houston, Texas 77005; and Citizens Gas & Coke Utility, 2020 North Meridian Street, Indianapolis, Indiana 46202, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to National and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 9, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

National Starch & Chemical Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

National Starch & Chemical Corporation (National Starch), P.O. Box 197, Meredosia, Illinois 62665, filed an application on May 25, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Meredosia, Illinois plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Furls Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, National Starch indicates that the volume of natural gas for which it requests certification is approximately 192,500 Mcf per year. This volume is estimated to displace the use of approximately 1,300,600 gallons of No. 5 fuel oil (0.8 percent sulfur) per year.

The eligible seller, who is also a transporter, is Panhandle Eastern Pipeline Company, 3000 Bissonnet Avenue, P.O. Box 1642, Houston, Texas 77001. The gas will also be transported by Central Illinois Public Service (CIPS), 607 East Adams Street, Springfield, Illinois 62701, a local distributor.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class or persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to National Starch and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83–CERT–78]

O. M. Scott and Sons Co.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

O. M. Scott and Sons Company (O. M. Scott), 14111 Scottslawn Road, Marysville, Ohio 43041, filed an application on May 25, 198? with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Marysville, Ohio, facility, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, O. M. Scott indicates that the volume of natural gas for which it requests certification is approximately 32,170 Mcf per year. This

volume is estimated to displace the use of approximately 231,000 gallons of No. 2 fuel oil (0.3 percent sulfur) per year.

The eligible sellers are Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055, and Ohio Shale Pipeline Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and Columbia Gas of Ohio, Inc., 99 North Front Street, Columbus, Ohio 43215, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to O. M. Scott and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 9, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA No. 83–CERT–122]

Oscar Mayer Foods Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Oscar Mayer Foods Corporation (OSCAR MAYER), P.O. Box 7188, Madison, Wisconsin 53707, filed an application on May 25, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Beardstown, Illinois processing plant, pursuant ot 10 CFR Part 595 (44 FR 47920, August 16 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, OSCAR MAYER indicates that the volume of natural gas for which it requests certification is approximately 182,500 Mcf per year. This volume is estimated to displace the use of approximately 1,377,510 gallons of No. 2 fuel oil (0.1 percent sulfur) per year.

The eligible seller, who is also the interstate transporter, is Panhandle Eastern Pipeline Company, 300 Bissonnet Avenue, P.O. Box 1642, Houston, Texas 77001. The gas will be distributed locally by Central Illinois Public Service Corporation (CIPS), 607 East Adams Street, Springfield, Illinois 62701.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application my be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to OSCAR MAYER and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83–CERT–145]

Phoenix Forging Co.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Phoenix Forging Company (Phoenix), P.O. Box 70, Catasauqua, Pennsylvania 18032, filed an application on May 26, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Catasauqua, Pennsylvania, plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Phoenix indicates that the volume of natural gas for which it requests certification is approximately 102,060 Mcf per year. This volume is estimated to displace the use of approximately 745,038 gallons of No. 2 fuel oil (0.25 percent sulfur) per year.

The eligible seller is Exxon U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314; and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within

the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Phoenix and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 9, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-83-006; OFP Case No. 56372-9228-20-24]

The Procter & Gamble Manufacturing Co.; Order Granting Exemption

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order Granting to The Procter & Gamble Manufacturing Company an Exemption from the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: On March 4, 1983, The Procter & Gamble Manufacturing Company (P&G), filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for an electric powerplant from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) (FUA or the Act). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA were published in the **Federal Register** at 46 FR 59872 (December 7, 1981). Final rules governing the cogeneration exemption were revised on June 25, 1982 (47 FR 29209 (July 6, 1982)), and are contained in 10 CFR 503.37.

P&G requested a permanent cogeneration exemption for a 20 megawatt powerplant consisting of a combustion turbine capable of using natural gas or No. 2 distillate oil to produce electricity and a heat recovery boiler equipped with a duct burner to generate process steam at P&G's Sacramento, California consumer and industrial products manufacturing facility.

Pursuant to section 212(c) of the Act and 10 CFR 503.37, ERA hereby issues this Order granting a permanent cogeneration exemption for the new powerplant. The basis for ERA's Order is provided in the **SUPPLEMENTARY INFORMATION** section, below.

DATES: In accordance with section 702(a) of FUA, this Order and its provisions shall take effect on August 14, 1983.

The public file containing a copy of this Order and other documents and supporting materials on this proceeding is available for inspection upon request at: DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E-190, Washington, D.C. 20585, Monday through Friday, 8:00 a.m.-4:00 p.m.

FOR FURTHER INFORMATION CONTACT:

Anthony Wayne, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue SW., Room GA-073C, Washington, D.C. 20585, Phone (202) 252-1730.

Allan Stein, Esq., Office of the General Counsel, Department of Energy, Forrestal Building, Room 6B-222, 1000 Independence Avenue SW., Washington, D.C. 20585, Phone (202) 252-2967.

SUPPLEMENTARY INFORMATION: P&G proposes to operate a cogeneration system at its Sacramento, California plant which will generate electrical power for sale to Pacific Gas and Electric Company (PG&E), and produce steam to meet the plant's process requirements. The proposed system will consist of a 20 megawatt aircraft derivative gas turbine/generator, together with a heat recovery boiler, which will utilize exhaust heat from the turbine to produce steam for use in the plant. The heat recovery boiler will be supplemented by a natural gas-fired duct burner with a rating of 40 MM Btu/hr., which will be used only when the plant steam demand exceeds the recoverable heat capacity of the turbine exhaust.

P&G expects to sell all the net annual electric power generation of the turbine generator to PG&E.

The petitioner certified that: (1) the gas or oil to be consumed by the congeneration facility will be less than that which would otherwise be consumed in the absence of the cogeneration facility where the calculation of savings is in accordance with 10 CFR 503.37(b); and, (2) the use of a mixture of petroleum and natural gas and an alternate fuel is not feasible, as required under 10 CFR 503.9.

In accordance with 10 CFR 503.37(c), P&G also included as part of its petition: (1) exhibits containing the basis for the foregoing certifications, and (2) an environmental impact analysis, as required under 10 CFR 503.13(a).

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act.

In accordance with the procedural requirements of FUA and 10 CFR 501.3(b), ERA published its Notice of its Acceptance of Petition for Exemption and Availability of Certification relating to the subject powerplant in the **Federal Register** on April 5, 1983 (48 FR 14740), commencing a 45-day public comment period pursuant to section 701(c) of FUA. As required by section 701(f) of the Act, ERA provided a copy of the petition to the Environmental Protection Agency for comments. During the public comment period, interested persons were also afforded an opportunity to request a public hearing. The period for submitting comments and for requesting a public hearing closed on May 20, 1983. No comments were received and no hearing was requested.

Decision and Order:

Based upon the entire record of this proceeding, ERA has determined that the petitioner has satisfied all the eligibility requirements for the requested exemption as set forth in 10 CFR 503.37(a)(1) and, pursuant to section 212(c) of FUA, ERA hereby grants P&G a permanent cogeneration exemption for the subject new powerplant to be located at its Sacramento, California plant.

Pursuant to section 702(c) of the Act and 10 CFR 501.69 any person aggrieved by this Order may petition for judicial review thereof at any time before the 60th day following the publication of this Order in the **Federal Register.**

Issued in Washington, D.C. on June 8, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-097]

Providence Hospital; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Providence Hospital, 2446 Kipling Avenue, Cincinnati, Ohio 45239, filed an application on May 16, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its hospital facility in Cincinnati, Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Providence Hospital indicates that the volume of natural gas for which it requests certification is approximately 90,000 Mcf per year. This volume is estimated to displace the use of approximately 652,140 gallons of No. 2 fuel oil (0.5 percent sulfur) per year.

The eligible sellers are Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; Texas Gas Corporation, 3800 Frederica Street, Owensboro, Kentucky 45302; and Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; Texas Gas Transmission Corporation, 3800 Frederica Street, Owensboro, Kentucky 43201; and by Cincinnati Gas & Electric Company, P.O. Box 960, Cincinnati, Ohio 45202, and the Union Light, Heat & Power Company, P.O. Box 32, Covington, Kentucky 41012, the local distribution companies.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Providence Hospital and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 9, 1983.

Quincy Soybean Co.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Quincy Soybean Company (Quincy Soybean), P.O. Box 329, Quincy, Illinois, 62306, filed an application on May 25, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Quincy, Illinois processing plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m. Monday through Friday, except Federal holidays.

In its application, Quincy Soybean indicates that the volume of natural gas for which it requests certification is approximately 1,116,170 Mcf per year. This volume is estimated to displace the use of approximately 8,088,400 gallons of No. 2 fuel oil (0.3 percent sulfur) per year.

The eligible seller, who is also the interstate transporter, is Panhandle Eastern Pipeline Company, 3000 Bissonnet Avenue, P.O. Box 1642, Houston, Texas 77001. The gas will be distributed locally by Central Illinois Public Service Company (CIPS), 607 East Adams Street, Springfield, Illinois 62701.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Quincy Soybean and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 9, 1983.

Reilly Tar & Chemical Corp.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Reilly Tar & Chemical Corporation (Reilly), 151 North Delaware Street, Suite 1510, Indianapolis, Indiana 46204, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA), for certification of an eligible use of natural gas to displace fuel oil at its Indianapolis, Indiana, chemical facility, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Reilly indicates that the volume of natural gas for which it requests certification is approximately 1,424,000 Mcf per year. This volume is estimated to displace the use of approximately 8,307,000 gallons of No. 6 fuel oil (1.0 percent sulfur) per year.

The eligible seller is Oklahoma Natural Gas Company, P.O. Box 571,

Tulsa, Oklahoma 74102. The gas will be transported by Panhandle Eastern Pipe Line Company, 3000 Bissonnet Avenue, Houston, Texas 77005; and by Citizens Gas & Coke Utility, 2020 North Meridian Street, Indianapolis, Indiana 46202, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Adminstration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necesary.

If ERA determines that an oral presentation is necessary, further notice will be given to Reilly and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 9, 1983.

[ERA Docket No. 83–CERT–146]

St. Joseph Hospital; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

St. Joseph Hospital and Health Care Center (St. Joseph), 250 College Avenue, Lancaster, Pennsylvania 17604, filed an application on May 26, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Lancaster, Pennsylvania facility, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, St. Joseph indicates that the volume of natural gas for which it requests certification is approximately 84,000 Mcf per year. This volume is estimated to displace the use of approximately 630,000 gallons of No. 2 fuel oil (1.2 percent sulfur) per year.

The eligible seller is Exxon U.S.A., P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314; and by UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 100 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to St. Joseph and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 10, 1983.

[ERA Docket No. 83–CERT–112]

Toledo Alfalfa Mills, Inc., Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Toledo Alfalfa Mills, Inc. (Alfalfa Mills), 861 South Stadium Rd., Oregon, Ohio, 43616, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Oregon, Ohio, facility pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Alfalfa Mills indicates that the volume on natural gas for which it requests certification is approximately 30,000,000 Mcf per year. This volume is estimated to displace the use of approximately 4,771,000 barrels of No. 6 fuel oil (0.6 percent sulfur) per year.

The eligible sellers are J & J Enterprises, Inc., P.O. Box 697, Indiana, Pennsylvania 15701; and Castle Gas Inc., P.O. Box 10337, Pittsburgh, Pennsylvania 15324. The gas will be transported by Columbia Transmission Line No. 1711, Charleston, W. Virginia 25325; and Columbus Gas of Ohio, Inc., 99 North Front Street, Columbus, Ohio 43215, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a

summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If the ERA determines that an oral presentation is necessary, further notice will be given to Alfalfa Mills and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 9, 1983.

Verhoff Alfalfa Mills, Inc.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Verhoff Alfalfa Mills, Inc. (Verhoff), 12394 Rd. 9-L, Ottawa, Ohio 45875, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Ottawa, Ohio plant, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Verhoff indicates that the volume of natural gas for which it requests certification is approximately 41,000,000 Mcf per year. This volume is estimated to displace the use of approximately 6,521,500 barrels of No. 6 fuel oil (1.0 percent sulfur) per year.

The eligible seller is Appalachian Petroleum Co., Box 319, Lowell, Ohio 45744. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and West Ohio Gas Company, P.O. Box 149, Lima, Ohio 45802, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposal oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Verhoff and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. G-3894-015, et al.]

ARCO Oil and Gas Company, Division of Atlantic Richfield Company, et al.; Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

June 9, 1983.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 27, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-324-000]

Columbia Gas Transmission Corp.; Application

June 10, 1983.

Take notice that on May 13, 1983, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP83-324-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Allied Corporation, Fibers & Plastics Company (Allied), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 15,000 dt equivalent of natural gas per day on a best-efforts basis for one year from the date delivery of natural gas commences and year to year thereafter. Applicant proposes to receive the gas for the account of Allied at existing points of receipt from Allegheny Land & Mineral Company (Allegheny) located in Randolph County, West Virginia. Applicant proposes to deliver those quantities to Commonwealth Gas Pipeline Corporation (Commonwealth) for the account of Allied at an existing point of delivery located in Greene County, Virginia. It is stated that Commonwealth would make ultimate delivery of the gas to Allied through an existing point of delivery at Allied's plant site in Hopewell, Virginia. It is further stated that the gas would be purchased by Allied from Allegheny, such purchase materially affecting the ability of Allied to continue the operation of its Hopewell, Virginia plant.

Applicant states that no additional facilities would be required to effectuate the receipt and delivery of the gas to be transported. Applicant also states that the transportation charge for the proposed service is presently 40.11 cents per dt equivalent, with retainage for company-use and unaccounted-for gas of 2.85 percent of the total quantity received for the account of Allied. Applicant further states that the transportation charge is subject to adjustment to reflect revised average system-wide unit storage and transmission costs, exclusive of company-use and unaccounted-for gas, contained in future rate filings by Applicant. Further, it is stated that the gas is subject to the General R&D Funding Unit of the Gas Research Institute and further that the treatment of revenues received by Applicant for its proposed service would be subject to Applicant's ongoing rate proceeding pending in Docket No. RP82-120-000.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 7, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing wil be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-16038 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-331-000]

Columbia Gas Transmission Corp. and Columbia Gulf Transmission Corp.; Application

June 10, 1983.

Take notice that on May 20, 1983, Columbia Gas Transmission Corporation (Columbia Transmission), P.O. Box 1273, Charleston, West Virginia 25325, and Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP83-331-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for the account of The Brooklyn Union Gas Company (Brooklyn Union), all as more fully set forth in the application which is on file with the Commisssion and open to public inspection.

Applicants propose to transport up to 10,000 dt equivalent of natural gas per day on a best-efforts basis for Brooklyn Union. It is stated that Columbia Transmission would receive the gas in Barbour, Randolph and Tucker Counties, West Virginia, and would make thermally equivalent quantities of natural gas, less retainage, available to Columbia Gulf by reducing its takes from Columbia Gulf at mutually agreeable existing points of interconnection. It is further stated that Columbia Gulf would redeliver thermally equivalent quantities, less retainage, to Transcontinental Gas Pipe Line Corporation (Transco) at an existing point of interconnection between Columbia Gulf and Transco in Terrebonne Parish, Louisiana, for the account of Brooklyn Union. Applicants indicate that the gas to be transported would be purchased for system supply by Brooklyn Union from its affiliate, Fuel Resources Inc.

It is submittted that Columbia Transmission's transportation charge for this proposed service would be its average systemwide unit srorage and transmission costs, exclusive of company-use and unaccounted-for gas, which charge is currently 40.11 cents per dt. Columbia Transmission states it would retain for company-use and unaccounted-for gas a percentage of the total quantity of natural gas delivered into its system for account of Brooklyn Union, which percentage is currently 2.85 percent. Columbia Gulf proposes to retain for company-use and unaccounted-for gas a percentage of the total quanity of gas delivered into its system by Columbia Transmission for the account of Brooklyn Union, which percentage is currently 3.33 percent. Columbia Gulf states it would not make a transportation charge for this backhaul service.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 285.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commisson or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. ER83-534-000]

CP National Corp.; Filing

June 10, 1983.

The filing Company submits the following:

Take notice that on May 31, 1983, CP National Corporation (CPN) tendered for filing related to a Residential Purchase and Sale Agreement (Agreement) between CPN and the Bonneville Power Administration (BPA):

1. Bonneville Power Administration's written report on Appendix 1 and Average System Cost submitted January 6, 1983.

2. The average System Cost as determined by Bonneville of 23.15 mills per kilowatt-hour.

3. A revised Appendix 1 of CP National wherein the Average System Cost is 23.15 mills per kilowatt-hour.

CPN states that the Agreement provides for the exchange of electric power between CPN and BPA for the benefit of CPN's residential and farm customers.

A copy of the filing was served upon BPA and Industrial Customers of BPA.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 7257-000]

David B. Dubrul; Exemption From Licensing

June 9, 1983.

A notice of exemption from licensing of a small hydroelectric project known as Lane Shops, Project No. 7257, was filed on May 4, 1983, by Mr. David B. Dubrul. The proposed hydroelectric project would have an installed capacity of 190 kW and would be located on the North Branch of the Winooski River in Washington County, Vermont.

Pursuant to §§ 4.109(c) and 375.308(ss) of the Commission's regulations, and subject to the terms and conditions set forth in § 4.111 of the Commission's regulations, the Director, Office of Electric Power Regulation, issues this

notification that the above project is exempted from licensing as of June 3, 1983.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation.

BILLING CODE 6717-01-M

[Docket No. CI74-118-000 et al.]

Devon Energy Corp. (Devon Corporation); Application for Amendment of Certificates of Public Convenience and Necessity, Related FERC Gas Rate Schedules, and Certain Proceedings To Reflect Merger

June 10, 1983.

Take notice that on September 16, 1981, Devon Energy Corporation (Devon Energy), of 1500 Mid-American Tower, Oklahoma City, Oklahoma 73102 filed an application to amend the certificates of public convenience and necessity and the FERC Gas Rate Schedules of Devon Corporation (Devon), and certain proceedings in which Devon is a party, to reflect the merger of Devon into Devon Energy.

Devon Corporation was incorporated on July 25, 1969, under the laws of the State of Oklahoma. Devon Energy Corporation was incorporated on March 25, 1981, under the laws of the State of Nevada. Pursuant to a Plan and Agreement of Merger and Reorganization executed May 14, 1981, Devon agreed to merge with and into Devon Energy, effective June 25, 1981.

The certificate proceedings and FERC Gas Rate Schedules of Devon for which amendment to reflect the change in corporate name is requested, are listed in the attached Appendix A, and the proceedings in which Devon is a party for which amendment to reflect the change in corporate name is requested, are listed in Appendix B attached hereto.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 27, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

*Pursuant to § 154.94 of the Regulations, as a supplier to each of the pipeline companies listed, Devon Energy is automatically a party in protest proceedings involving payment of Natural Gas Policy Act prices under its contract with that pipeline company. Devon was recently officially dismissed from the proceedings in Docket No. GP80-12.

[Docket No. CP83-227-001]

Florida Gas Transmission Co.; Amendment

June 10, 1983.

Take notice that on May 11, 1983, Florida Gas Transmission Company (Applicant), P.O. Box 44, Winter Park, Florida 32790, filed in Docket No. CP83-227-001 an amendment to its application filed in Docket No. CP83-227-000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect a change in the transportation service to be provided Southern Natural Gas Company (Southern), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Pursuant to an agreement dated October 8, 1982, Applicant states that it proposes to transport natural gas for Southern. Applicant would receive the volumes for the account of Southern at an existing point of interconnection between the facilities of Louisiana Resources Company and Applicant in Vermilion Parish, Louisiana. Applicant proposes to transport and deliver these quantities to Southern at existing points of interconnection between its facilities and those of Southern in Washington Parish, Louisiana or between the facilities of Applicant and Trunkline Gas Company in Calcasieu Parish, Louisiana.

Pursuant to an agreement dated November 23, 1982, Applicant proposes to change the term to state that the agreement would be in effect for a term of five years from the effective date and shall extend thereafter until either party given six months written notice to terminate.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before July 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons

who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ST83-356]

Michigan Consolidated Gas Co.; Self-Implementing Transactions

June 10, 1983.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations and Sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA). The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline pursuant to § 284.102 of the Commission's Regulations.

A "C" indicates transportation by an intrastate pipeline pursuant to § 284.122 of the Commission's Regulations. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and expiration date for the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a petition to intervene with the Secretary of the Commission.

A "D" indicates a sale by an intrastate pipeline pursuant to § 284.142 of the Commission's Regulations and Section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline pursuant to § 284.163 of the Commission's Regulations and Section 312 of the NGPA.

An "F" indicates a fuel oil displacement transaction implemented pursuant to § 284.202 of the Commission's Regulations. Any interested persons may file a complaint concerning such transaction pursuant to § 284.205(d) of the Commission's Regulations.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G (HT)" or "G (HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

BILLING CODE 6717-01-M

[Docket No. CP79-19-004]

Mountain Fuel Supply Co.; Petition to Amend

June 10, 1983.

Take notice that on May 13, 1983, Mountain Fuel Supply Company (Petitioner), 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket NO. CP79-19-004 a petition to amend the order issued June 5, 1979, as amended, in Docket No. CP79-19 pursuant to Section 7 of the Natural Gas Act so as to authorize the transportation of natural gas for Panhandle Eastern Pipe Line Company (Panhandle) from two additional receipt points and to add or delete receipt points in the future as required to facilitate transportation by Petitioner on behalf of Panhandle, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it is authorized to transport up to 48,200 Mcf of natural gas per day for Panhandle's account pursuant to a transportation and exchange agreement dated June 28, 1978. Petitioner now seeks authority to establish receipt points for Panhandle's Nitchie Gulch and Steamboat Mountain Prospect area supplies with both points located in Sweetwater County, Wyoming.

Additionally, Petitioner requests blanket authority to add ro delete receipt points as required for Panhandle's gas within the authorized volume limitations.

Petitioner states that no new facilities would be required at this time to effectuate the service requested.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before July 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, ia motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211) and the Regulations under the Natual Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-341-000]

Natural Gas Pipeline Co. of America; Request Under Blanket Authorization

June 10, 1983.

Take notice that on May 26, 1983, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP83-341-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Natural proposes to abandon facilities and gas service to Northern Illinois Gas Company (NI-Gas) at Natural's Lemont delivery point, near Lemont, DuPage County, Illinois, under authorization issued in Docket No. CP82-420-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

NI-Gas, it is said, has informed Natural that, due to construction of additional facilities by NI-Gas in the Lemont area designed to improve service to its customers, Natural's Lemont delivery point would no longer be necessary to serve NI-Gas. Natural states that there would be no adverse effect on any of the customers of NI-Gas, or Natural, by reason of the abandonment and removal of the subject facilities.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 159.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-350-000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Application

June 10, 1983.

Take notice that on May 26, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-350-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Natural Gas Pipeline Company of America (Natural), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has entered into a transportation agreement with Natural. It is stated that Applicant would receive up to 13,000 Mcf of natural gas per day (contract quantity) at Matagorda Island Area Block 686, offshore Texas (MAT 686), transport such gas on a firm basis through its ownership interest in the Matagorda Offshore Pipeline System (MOPS) and redeliver equivalent quantities less fuel and unaccounted for gas to Houston Pipe Line Company (HPL) for Natural's account at the terminus of MOPS near Tivoli in Refugio County, Texas. Applicant also proposes to transport through MOPS on a best-efforts basis volumes in excess of the contract quantity which Natural tenders to Applicant in MAT 686. Applicant notes that it commeced the proposed service on September 27, 1982 pursuant to Part 284 of the Commission's Regulations. It is further stated that the term of the proposed service would be 8 years from the September 13, 1982, date of the transportation agreement and year to year thereafter.

Applicant proposes to change Natural a monthly demand charge of $4.18 per Mcf of contract quantity for the service and 13.75 cents per Mcf for volumes in excess of the contract quantity.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. CP83-344-000]

Northwest Central Pipeline Corp.; Request Under Blanket Authorization

June 10, 1983.

Take notice that on May 26, 1983, Northwest Central Pipeline Corporation (Applicant), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP83-344-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes to add a new delivery point for the Gas Service Company (Gas Service) under the authorization issued in Docket No. CP82-479-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant proposes to construct and operate metering, regulating, and appurtenant facilities in Sedgwick County, Kansas. It is stated that Gas Service, an existing customer of Applicant, has requested this additional delivery point in order to serve better its customers in this general area and to make a sale of gas to a new asphalt plant operated by the Ritchie Corporation. Applicant estimates the cost to these facilities to be $37,940, which would be paid from treasury cash. Applicant states that the projected volume of gas delivered through these facilities would be 55,000 Mcf per year with a maximum peak load of 165 Mcf per hour at 60 psig.

Applicant states that its tariff does not prohibit adding new delivery points

for existing customers. It is further stated that Applicant has sufficient capacity to accomplish the deliveries specified without detriment or disadvantage to its other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-328-000]

Oasis Pipe Line Co.; Application

June 10/1983.

Take notice that on May 16, 1983, Oasis Pipe Line Company (Applicant), P.O. Box 1188, Houston, Texas 77001, filed in Docket No. CP83-328-000 an application pursuant to Section 311 (a)(2) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations for authority to transport certain quantities of natural gas for El Paso Natural Gas Company (El Paso), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is currently engaged in the transportation of natural gas on behalf of El Paso pursuant to a transportation agreement dated August 13, 1979. It is stated that service under this agreement commenced August 14, 1979, for an initial term of two years under the self-implementing provisions of § 284.122(a) of the Commission's Regulations and was extended for a period of two years commencing August 14, 1981, pursuant to § 284.125 of the Commission's Regulations. In order that the transportation service might be continued on an uninterrupted basis, Applicant requests the Commission authorize a continuation of the transportation arrangement for a period of two years commencing August 14, 1983, and ending August 13, 1985.

Applicant proposes to transport up to 50,000 Mcf of gas per day for El Paso. Applicant states that it would transport gas acquired by El Paso from certain wells located in the East Chapa Field Area, Live Oak County, Texas, under the terms and conditions of a gas transportation agreement dated August 13, 1979, as amended May 4, 1983. Applicant states that a thermally equivalent quantity of gas so delivered, less El Paso's *pro rata* share of compressor fuel on Applicant's system, would be redelivered by Applicant to El Paso, or for its account, at a point or points located at the existing interconnection of Applicant's and El Paso's pipeline facilities near the Mobil Waha Plant in Pecos County, Texas, and the existing interconnection of Applicant's and Northern Natural Gas Company's pipeline facilities in the Gomez Field Area, Pecos County, Texas. It is stated that El Paso has agreed to pay Applicant 12.39 cents per million Btu of gas delivered.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Oil Pipeline Tentative Valuation

June 10, 1983.

The Federal Energy Regulatory Commission by order issued February 10, 1978, established on Oil Pipeline Board and delegated to the Board its functions with respect to the issuance of valuation reports pursuant to Section 19a of the Interstate Commerce Act.

Notice is hereby given that a tentative annual valuation is under consideration for the common carrier by pipeline listed below:

1980 Basic Report

Valuation Docket No. PV—1465-000, C & T Pipeline, Inc., P.O. Box 6317, Columbia, South Carolina 29260.

On or after July 18, 1983, persons other than those specifically designated in Section 19a(h) of the Interstate Commerce Act having an interest in this valuation may file, pursuant to rule 214 of the Federal Energy Regulatory Commission's "Rules of Practice and Procedure" (18 CFR 385.214), an original and three copies of a petition for leave to intervene in this proceeding.

If the petition for leave to intervene is granted the party may thus come within the category of "additional parties as the FERC may prescribe" under Section 19a(h) of the Act, thereby enabling it to file a protest. The petition to intervene must be served on the individual company at its address shown above and an appropriate certificate of the service must be attached to the petition. Persons specifically designated in Section 19a(h) of the Act need not file a petition; they are entitled to file a protest as a matter of right under the statute.

Francis J. Connor,

Administrative Officer, Oil Pipeline Board.

BILLING CODE 6717-01-M

[Docket No. ER83-535-000]

Potomac Electric Power Co.; Filing

June 10, 1983.

The filing Company submits the following:

Take notice that the Potomac Electric Power Company and Virginia Electric and Power Company tendered for filing under § 35.12 of the Commission's regulations on June 3, 1983 and Agreement dated May 25, 1983 providing general terms for interchange services between the parties, and establishing rates for limited term power and reserved energy services.

The Companies request an effective date of May 29, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will

not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-530-000]

Public Service Company of Colorado; Filing

June 10, 1983.

The filing Company submits the following:

Take notice that Public Service Company of Colorado (PSCo) on May 31, 1983, tendered for filing a Firm and Non-Firm Letter Agreement between PSCo and the Colorado-Ute Electric Association, Inc. (Ute).

PSCo states that the Agreement provides for the sale of both firm and non-firm electric energy between the electric systems of PACo and Ute. The Agreement provides for establishing terms and conditions of such firm and non-firm electric energy.

PSCo states that copies of the filing were served upon all parties and affected state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 6898-002]

Shenandoah Hydro Co.; Exemption From Licensing

June 9, 1983.

A notice of exemption from licensing of a small hydroelectric project known as Chapman Dam, Project No. 6898, was filed on April 19, 1983, by Shenandoah Hydro Company. The proposed hydroelectric project would have an installed capacity of 500 kW and would be located on the North Fork of the Shenandoah River in Shenandoah County, Virginia.

Pursuant to §§ 4.109(c) and 375.308(ss) of the Commission's regulations, and subject to the terms and conditions set forth in § 4.111 of the Commission's regulations, the Director, Office of Electric Power Regulation, issues this notification that the above project is exempted from licensing as of May 19, 1983.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation.

[FR Doc. 83-16057 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-532-000]

Southern California Edison Co.; Filing

June 10, 1983.

The filing Company submits the following:

Take notice that on May 31, 1983, the Southern California Edison Company (SCE) tendered for filing a notice of change of rates for transmission services as embodied in SCE's agreements with the following entities:

	Rate schedule FERC No.
City of Anaheim	130
City of Azusa	160
City of Banning	159
City of Colton	162
City of Riverside	129
City of Vernon	148

SCE requests an effective date of January 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-16033 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. GP83-32-000]

Texaco Inc.; Petition for Declaratory Order

Issued: June 10, 1983.

On May 27, 1983, Texaco Inc. (Texaco), P.O. Box 53232, Houston, Texas 77052, filed a petition pursuant to Rule 207 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure for a Declaratory Order relative to the question of whether the filing of a blanket affidavit pursuant to § 154.94(h) of the Commission's regulations (18 CFR 154.94(h)) eliminates the requirement to file Format FERC No. 559 (18 CFR 250.14) before a producer is authorized to collect new or adjusted tax reimbursements resulting from changes in a state's severance taxes on natural gas.

Under § 154.94(h), an independent producer may file a blanket affidavit to collect "any maximum lawful price (including periodic escalations) which is applicable under section 104(b)(1)(A), 106(a), 102(d) or 108 of the Natural Gas Policy Act of 1978 (NGPA) * * *" Format FERC No. 559 is used to collect data concerning changes in rates other than the periodic escalations authorized under the blanket affidavit.

NGPA section 110(a)(1) states that a price for the first sale of natural gas is not considered to exceed the maximum lawful price if such a price is necessary to recover state severance taxes borne by the seller. Texaco states that once a producer files a blanket affidavit, the Commission has all the necessary relevant information concerning contractual authority to collect tax reimbursement for severance taxes borne by the seller. "Therefore, Texaco asserts that section 110 of the NGPA does not require that changes in the amount of state severance tax reimbursement collected by a qualifying seller be reported to the Commission as a change to base rates collectible under a producer's rate schedule and blanket affidavit." [1] Accordingly, Texaco states

[1] Texaco Petition for Declaratory Order at 4.

that the Commission should not require it to file Format FERC No. 559 to reflect changes in state-mandated severance taxes.

Texaco requests an order declaring that producers who are contractually authorized to collect NGPA maximum lawful prices, and who have already on file with the Commission a rate schedule and blanket affidavit indicating the contractual authority to collect tax reimbursements for state severance taxes borne by the producer, may collect such tax reimbursements without first filing Format FERC No. 559.

Any person desiring to be heard or to protest this petition for a declaratory order should file, within 30 days after publication of this notice in the Federal Register, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, a protest or petition to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered but will not make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No.7254-000]

West Dudley Power Co.; Exemption From Licensing

June 10, 1983.

A notice of exemption from licensing of a small hydroelectric project known as West Dudley, Project No. 7254, was filed on May 2, 1983, by the West Dudley Power Company. The proposed hydroelectric project would have an installed capacity of 350 kW and would be located on the Quinebaug River in Worcester County, Massachusetts.

Pursuant to §§ 4.109(c) and 375.308(ss) of the Commissions's regulations, and subject to the terms and conditions set forth in § 4.111 of the Commission's regulations, the Director, Office of Electric Power Regulation, issues this notification that the above project is exempted from licensing as of June 1, 1983.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation.

[FR Doc. 83-16035 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-536-000]

Wisconsin Electric Power Co.; Filing

June 10, 1983.

The filing Company submits the following:

Take notice that Wisconsin Electric Power Company (WEP) on June 3, 1983 tendered for filing executed service agreements between the Company and Alger Delta Cooperative Electric Association and Ontonagon County Rural Electrification Association. The service agreements set forth the terms and conditions upon which WEP will provide electric service to the Customers. The service agreements replace unexecuted service agreements, which have been in effect with the Commission since July 30, 1982. The rates under the filed service agreements are the same as those under the unexecuted service agreements to be superseded.

WEP requests that the service agreements be allowed to become effective sixty days after the filing date as replacements to the unexecuted service agreements now in effect.

Copies of the filing have been served on the Customers and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-16036 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-529-000]

Wisconsin Public Service Corp.; Filing

June 10, 1983.

The filing Company submits the following:

Take notice that Wisconsin Electric Power Company (WPS) on May 31, 1983, tendered for filing annual contract demand quantities to the "Partial Requirements Service Agreement" with the City of Marshfield, Wisconsin, City of Manitowoc, Wisconsin, and the Consolidated Water Power Company. This agreement will revise the contract demand quantities for peak load, intermediate load, and base load in accordance with Exhibit 1 of the agreement, Paragraph 6, *Requirements*, and also amends Appendix A, Exhibit 1, Section 3, Paragraph 3.01, to properly describe the current metering installations.

WPS requests an effective date of June 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon the City of Marshfield, Wisconsin, City of Manitowoc, Wisconsin, and the Consolidated Water Power Company.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are avialable for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 7268-000]

Mr. & Mrs. Robert M. Woodside; Exemption From Licensing

June 10, 1983.

A notice of exemption from licensing of a small hydroelectric project known as Woodside Hydro, Project No. 7268, was filed on May 9, 1983, by Mr. & Mrs. Robert M. Woodside. The proposed hydroelectric project would have an installed capacity of 300 kW and would be located on the Gihon River in Lamoille County, Vermont.

Pursuant to §§ 4.109(c) and 375.308(ss) of the Commission's regulations, and subject to the terms and conditions set forth in § 4.111 of the Commission's regulations, the Director, Office of Electric Power Regulation, issues this notification that the above project is

exempted from licensing as of June 8, 1983.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation.

[FR Doc. 83-16052 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[PP 6G1838/T410; PH-FRL-2378-8]

Butachlor; Renewal of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has renewed temporary tolerances for residues of the herbicide butachlor in or on the raw agricultural commodities rice and rice straw.

DATE: These temporary tolerances expire April 23, 1984.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM), 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of May 19, 1982 (47 FR 21617) stating that temporary tolerances had been extended for residues of the herbicide butachlor [N-butoxymethyl)-2-chloro-2',6'-diethylacetanilide] in or on raw agricultural commodities rice at 0.5 part per million (ppm), and rice straw at 3 ppm. A feed additive regulation permitting the residues of butachlor in rice hulls at 1 part per million (ppm), and in rice bran at 0.5 ppm has been published.

These tolerances were renewed in response to pesticide petition (PP 6G1838), submitted by Monsanto Company, 1101 17th St., NW., Washington, DC 20036.

The company has requested a one-year renewal of the temporary tolerances to permit the continued marketing of the above raw agricultural commodities when treated in accordance with the provisions of experimental use permit 524-EUP-30 which is being rtenewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136). The scientific data reported and other relevant material were evaluated, and it was determined that a renewal of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been renewed on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Monsanto Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire April 23, 1984. Residues not in excess of the temporary tolerances in or on the above raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516 (21 U.S.C. 346a(j)))

Dated: June 1, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[PF-326; PH-FRL 2379-8]

Certain Companies, Pesticide Petitions; Diamond Shamrock Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to: Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF-326] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, 703-557-1900.

SUPPLEMENTARY INFORMATION: EPA gives notice that the agency has received the following pesticide petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues where required, is given in each petition.

Initial Filing

PP 3F2875. Diamond Shamrock Corp., 1100 Superior Ave., Cleveland, OH 44114. Proposes amending 40 CFR 180.275 by establishing tolerances for the combined residues of the fungicide chlorothalonil (2,4,5,6-tetrachloroisophthalonitrile and its metabolite (4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the commodities almonds and meat at 0.05 part per million (ppm); almond hulls, eggs, milk, poultry, and wheat at 0.1 ppm; and rice at 4.0 ppm. The proposed analytical method for determining residues is by gas chromatography.

Amended Petition

PP 2F2607. Upjohn Co., 7171 Portage Rd., Kalamazoo, MI 49001. EPA issued a notice published in the **Federal Register** of January 27, 1982 (47 FR 3875) which announced that Upjohn Co., had submitted pesticide petition 2F2607 to the Agency proposing to amend 40 CFR 180.200 by establishing tolerances for the residues of the fungicide 2,6-dichloro-4-nitroaniline in or on the commodities peanuts at 0.5 ppm; peanut hulls at 5.0 ppm; peanut hay (vines) at 50.0 ppm; fat, meat, and meat

byproducts of cattle, goats, hogs, horses, and sheep at 0.06 ppm; and milk at 0.01 ppm. Upjohn Co., has amended the petition by:

a. Deleting the proposed tolerances on peanuts at 0.5, and peanut hay (vines) at 50.0 ppm.

b. Adding peanut nutmeats at 1.0 ppm; peanut vines (forage) at 25.0 ppm and peanut hay at 10.0 ppm; eggs, meat, and meat byproducts of poultry at 0.01 ppm.

c. Decreasing the tolerance levels on fat, meat, and meat byproducts of cattle, goats, hogs, horses, and sheep from 0.06 to 0.01 pm.

(Sec. 408(d)(1), 68 Stat. 512 (7 U.S.C. 136))

Dated: June 3, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-50595; PH-FRL 2380-1]

Issuance of Experimental Use Permits; Ciba-Geigy Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each experimental use permit at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

100-EUP-64. Renewal. Ciba-Geigy Corporation, P.O. Box 18300, Greensboro, NC 27407. This experimental use permit allows the use of 150 pounds of the fungicide 1-[[2-(2,4-dichlorophenyl)-4-ethyl-1,3-dioxolan-2-yl] methyl]-1*H*-1,2,4,-triazole on almonds, apples, cherries, peaches, plums, and fresh prunes to evaluate the control of apple scab, apple powdery mildew, brown rot blossom blight, cedar apple rust, cherry leaf spot, cherry powdery mildew, fruit brown rot, and quince rust. A total of 265 acres are involved; the program is authorized in the States of Arkansas, California, Georgia, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Utah, Virginia, Washington, and West Virginia. The permit was previously effective from October 7, 1980 to December 31, 1982. The permit is now effective from April 22, 1983 to December 31, 1983. This permit is issued with the limitation that all crops are destroyed or used for research purposes only. (Henry Jacoby, PM 21, Rm. 229, CM#2 (703-557-1900)).

464-EUP-80. Issuance. Dow Chemical, U.S.A., P.O. Box 1706, Midland, MI 48640. This experimental use permit allows the use of 65 pounds of the herbicide methyl 2-[4-[(3-chloro-5-(trifluoromethyl)-2-pyridinyl)oxy]phenoxy) propanoate in industrial sites to evaluate the control of weeds. A total of 260 acres are involved; the program is authorized only in the States of Alabama, California, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, North Dakota, Ohio, Oregon, South Carolina, Tennessee, Texas, Vermont, Virginia, and Washington. The experimental use permit is effective from April 20, 1983 to April 20, 1984. (Robert Taylor, PM 25, Rm. 245, CM#2 (703-557-1800))

352-EUP-107. Issuance. E.I. du Pont de Nemours and Company, Wilmington, DE 19898. This experimental use permit allows the use of 3,741 pounds of the herbicide methyl 2[[[[(4,6 dimethyl-2-pyrimidinyl)amino]carbonyl]amino] sulfonyl]benzoate on noncropland areas to evaluate the control of weeds. A total of 4,988 acres are involved; the program is authorized in all 50 States except Alaska, Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, South Dakota, Vermont, and Wyoming. The experimental use permit is effective from April 20, 1983 to April 20, 1984. (Robert Taylor, PM 25, Rm. 245, CM#2 (703-557-1800)).

1471-EUP-75. Amendment. Elanco Products Company, 740 S. Alabama St., Indianapolis, IN 46285. A notice was published in the **Federal Register** of January 5, 1983 (48 FR 504) pertaining to the extension of an experimental use permit, 1471-EUP-75, to Elanco Products Company. At the request of the company, the permit has been amended to reduce the acreage and quantity of the active ingredient for grapes. This experimental use permit now allows the use of 4,875 pounds each year of the fungicide fenarimol on apples and grapes to evaluate the control of foliage and fruit diseases. A total of 6,188 acres are involved; 5,188 acres of apples to be treated and 1,000 acres of grapes to be treated. The program is authorized only in the States of California, Indiana, Michigan, New York, North Carolina, Ohio, Oregon, Pennsylvania, Virginia, and Washington for apples and in California, Michigan, New York, Ohio, Oregon, and Washington for grapes. The experimental use permit is effective from March 19, 1983 to March 19, 1985. Temporary tolerances for residues of the active ingredient in or on apples and grapes have been established. (Henry Jacoby, PM 21, Rm. 229, CM#2 (703-557-1900)).

21137-EUP-3. Extension. EM Industries, Inc., 5 Skyline Drive, Hawthorne, NY 10532. This experimental use permit allows the use of 41.1 pounds of the herbicide 2-chloro-9-hydroxyfluorene-9-carboxylic acid on cucumbers to evaluate its ability to induce seedless fruit in all-female cultivars of pickling cucumbers. A total of 750 acres are involved; the program is authorized only in the States of Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Maryland, Massachusetts, Michigan, Minnesota, New York, North Carolina, Ohio, South Carolina, Texas, and Wisconsin. The experimental use permit is effective from March 22, 1983 to March 22, 1984. A temporary tolerance for residues of the active ingredient in or on cucumbers has been established. (Robert Taylor, PM 25, Rm. 245, CM#2 (703-557-1800)).

279-EUP-96. Issuance. FMC Corporation, 2000 Markets St., Philadelphia, PA 19103. This experimental use permit allows the use of 480 pounds of the fungicide triforine on almonds to evaluate the control of brown rot blossom blight. A total of 400 acres are involved; the program is authorized only in the State of California. The experimental use permit is effective from April 18, 1983 to March 1, 1985. A temporary tolerance for residues of the active ingredient in or on almonds has been established. This permit is issued with the limitation that all almond hulls are destroyed or used for research purposes only. Hulls from treated almond trees may not be fed to animals. (Henry Jacoby, PM 21, Rm. 229, CM#2 (703-557-1900)).

8730-EUP-12. Renewal. Health-Chem Corporation, 1107 Broadway, NewYork, NY 10010, this experimental use permit allows the use of 8,14 pounds of the pheromone (Z,Z)-3,13-octadecadien-1-o1 acetate on peachtrees to evaluate the control of the peachtree borer and lesser peachtree borer. A total of 500 acres are involved: the program is authorized only

in the State of Georgia. The permit was previously effective from January 18, 1982 to January 18, 1983. The permit is now effective from April 11, 1983 to April 11, 1984. A temporary exemption from the requirement of a tolerance for residues of the active ingredient in or on peaches has been established. (Timothy Gardner, PM 17, Rm. 207, CM#2 (703–557–2690)).

11273–EUP–34. Issuance. Sandoz, Inc., 480 Camino Del Rio South, San Diego, CA 92108. This experimental use permit allows the use of 54 pounds of the biological insecticide *Bacillus thuringiensis* var. *Kurstaki* on forests to evaluate the control of various forest insects. A total of 600 acres are involved; the program is authorized only in the State of Pennsylvania. The experimental use permit is effective from May 15, 1983 to May 15, 1984. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703–557–2690)).

748–EUP–18. Issuance. PPG Industries, Inc., P.O. Box 31, Barberton, OH 44203. This experimental use permit allows the use of 844 pounds of the herbicide 1-(carboethoxy) ethyl 5-[2-chloro-4-(trifluoromethyl) Phenoxy]-2-nitrobenzoate on soybeans to evaluate the control of weeds. A total of 5,000 acres are involved; the program is authorized only in the States of Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Nebraska, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from April 22, 1983 to April 22, 1984. This permit is issued with the limitation that treated plants are not used for feed or forage. A temporary tolerance for residues of the active ingredient in or on soybeans has been established. (Richard Mountfort, PM 23, Rm. 237, CM#2 (703–557–1830)).

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 92 Stat. 819, as amended (7 U.S.C. 136)).

Dated: June 3, 1983.

Douglas D. Campt.

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 83–15582 Filed 6–14–83; 8:45 am]

BILLING CODE 6560–50–M

[PP 2G2622/T419 PH–FRL 2381–6]

Pesticides; American Cyanamid Co.; Renewal of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has renewed temporary tolerances for residues of the pesticide (+)cyano(3-phenoxyphenyl)methyl(+)-4-(difluoromethoxy)-alpha-(1-methylethyl) benzeneacetate in or on the raw agricultural commodity apples.

DATE: This temporary tolerance expires April 11, 1984.

FOR FURTHER INFORMATION CONTACT: Timothy Gardner, Product Manager (PM) 17, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703–557–2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the Federal Register of May 5, 1982 (47 FR 19445) stating that a temporary tolerances had been extended for residues of the pesticide (+)cyano(3-phenoxyphenyl)methyl(+)-4-(difluoromethoxy)-alpha-(1-methylethyl) benzeneacetate in or on the raw agricultural commodity apples at 1.0 part per million (ppm). This tolerance had been established in response to pesticide petition (PP 2G2622), submitted by American Cyanamid Company, Agricultural Research Division, P.O. Box 400, Princeton, NJ 08540.

The company has requested a one-year renewal of the temporary tolerances to permit the continued marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 241–EUP–99 which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended. (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that a renewal of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been renewed on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authority by the experimental use permit.

2. American Cyanamid Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance, and on request make the records available to any authorized office or employee of the EPA or the Food and Drug Administration.

This tolerance expires Aprill 11, 1984. Residues not in excess of this amount remaining in or on the above raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(j)))

Dated: June 6, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

Technical Subgroup of Radio Advisory Committee; Resumed Meeting

The Technical Subgroup of the Advisory Committee on Radio Broadcasting resumes its continuing meeting Thursday July 28, 1983 at 10 a.m. in the Vincent Wasilewski Room of

the National Association of Broadcasters, 1771 N Street NW., Washington, D.C.

The Subgroup will continue its consideration of recommendations to the Federal Communications Commission concerning matters pertinent to the ongoing U.S.-Canadian discussions on the drafting of a new bilateral AM agreement which, it is expected, will replace the North American Regional Broadcasting Agreement (NARBA).

The Subgroup will also discuss preparations for bilateral discussions which have started with Mexico, looking toward post-Rio revision of the U.S-Mexican AM Agreement.

The meeting, a continuing one, will be resumed after the July 28, 1983 session at such time and place as is decided at that session. It is open for participation by all interested persons.

For further information, please call the Subgroup Chairman, Mr. Wallace E. Johnson, at (703) 841-0500.

William J. Tricarico,

Secretary, Federal Communications Commission.

FEDERAL MARITIME COMMISSION

[Docket No. 83-27]

Pascoe Building Systems v. Pacific Westbound Conference and American President Lines, Ltd.; Filing of Complaint and Assignment

Notice is given that a compliant filed by Pascoe Building Systems against Pacific Westbound Conference and American President Lines, Ltd. was served June 8, 1983. Complainant alleges that respondents have subjected it to an overcharge of rates for ocean transportation in violation of section 18(b)(3) of the Shipping Act, 1916.

This proceeding has been assigned to Administrative Law Judge Joseph N. Ingolia. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Alaska Pacific Bancorporation; Proposed Acquisition of Pentek Leasing, Inc.

Alaska Pacific Bancorporation, Anchorage, Alaska, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Pentek Leasing, Inc., San Jose, California.

Applicant states that the proposed subsidiary would engage in the activities of leasing (and brokering leases of) personal property; and commercial finance activities such as factoring of receivables and making commercial loans. These activities would be performed from offices of Applicant's subsidiary in San Jose and Sacramento, California, and Seattle, Washington, and the geographic areas to be served are Washington, Oregon, California and the western United States. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than July 7, 1983.

Board of Governors of the Federal Reserve System, June 9, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-15981 Filed 6-14-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities; Skandinaviska Enskilda Banken, et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consumation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increase competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Skandinaviska Enskilda Banken,* Stockholm, Sweden (finance and leasing; New York): To engage *de novo* through its subsidiary, FinansSkandic Corporation and, from time to time,

through subsidiaries of FinansSkandic Corporation or its New York Article XII Investment Company, Skandinaviska Enskilda Banken Corporation, in providing financing primarily in connection with imports of capital goods into the United States by Swedish, Nordic and U.S. companies, and their affiliates, including receivables and inventory financing, lease financing and making or acquiring for its own or for the account of others, loans and other extensions of credit such as would be made by a finance or factoring company. These activities will be conducted from an office in New York which would serve the United States. Comments on this application must be received not later than July 6, 1983.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Barnett Banks of Florida, Inc.*, Jacksonville, Florida (check verification services; Florida and Tennessee): To engage through its subsidiary, Verifications, Inc., in offering from additional offices, check verification services, including authorizing subscribing merchants to accept certain personal purchase money checks and obligating Verifications, Inc. to purchase properly verified checks which are subsequently dishonored. These activities would be conducted from additional offices in Fort Lauderdale, Florida and Chattanooga, Tennessee, as well as from existing office of Verifications, Inc. in Florida and Tennessee, serving the States of Florida and Tennessee. Comments on this application must be received not later than July 6, 1983.

C. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *First City Financial Corporation*, Albuquerque, New Mexico (underwriting of credit life insurance and credit accident and health insurance; New Mexico): To engage, through its subsidiary, First City Life Company, in operating as an underwriter of credit life insurance and credit accident and health insurance which is directly related to extensions of credit made by subsidiaries of First City Financial Corporation. These activities would be conducted from an office in Albuquerque, New Mexico, serving the State of New Mexico. Comments on this application must be received not later than July 5, 1983.

Board of Governors of the Federal Reserve System, June 9, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Central Pacific Corp.; Proposed Acquisition of Executive Appraisers, Inc.

Central Pacific Corporation, Bakersfield, California, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Executive Appraisers, Inc., Phoenix, Arizona.

Applicant states that the proposed subsidiary would engage in the activities of real estate appraisals. These activities would be performed from offices of Applicant's subsidiary in Phoenix, Arizona, and the geographic areas to be served are the State of Arizona and principally in and around the city of Phoenix, Arizona. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in effeciency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than July 7, 1983.

Board of Governors of the Federal Reserve System, June 9, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Dauphin Deposit Corp.; Formation of Bank Holding Company

Dauphin Deposit Corporation, Harrisburg, Pennsylvania, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent or more of the voting shares of Bancorp of Pennsylvania, Reading, Pennsylvania and thereby indirectly acquire Bank of Pennsylvania, Reading, Pennsylvania. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Dauphin Deposit Corporation, Harrisburg, Pennsylvania, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Collowhill Life Insurance Company, Reading, Pennsylvania.

Applicant states that the proposed subsidiary would engage in the activities of reinsuring credit life health and accident insurance related to extensions of credit by Bank of Pennsylvania. These activities would be performed from offices of Applicant's subsidiary in Reading, Pennsylvania. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party

commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Philadelphia.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than July 7, 1983.

Board of Governors of the Federal Reserve System, June 9, 1983.

BILLING CODE 6210-01-M

Ranier Bancorporation; Proposed Arranging of Equity Financing

Ranier Bancorporation, Seattle, Washington, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(a) of the Board's Regulation Y (12 CFR 225.4(a)), for permission to engage in the activity of arranging equity financing for income producing real properties with institutional and sophisticated individual investors through its wholly-owned subsidiary, Ranier Mortgage Company, Seattle, Washinton.

These activities would be performed from offices of Applicant's subsidiary in Santa Ana, California and Seattle, Washington, and the geographic area to be served is the entire United States. Although arranging equity financing has not been added to the list of permissable activities specified by the Board in § 225.4(a) of Regulation Y, the Board has determined by order that this activity is closely related to banking. *E.g. Trust Company of Georgia*, 69 Federal Reserve Bulletin 225 (1983).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than July 7, 1983.

Board of Governors of the Federal Reserve System, June 9, 1983

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Advisory Council on Social Security; Meeting

AGENCY: Department of Health and Human Services.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Section 10(a)(2) of Pub. L. 92-463, the Federal Advisory Committee Act, notice is hereby given of a meeting of the Advisory Council on Social Security, as established by the Secretary of Health and Human Services, in accordance with Section 706 of the Social Security Act, 42 U.S.C. Sec. 9007.

DATE/ADDRESS: The meeting will be held July 18-19, 1983, from 9:00 a.m. to 4:00 p.m. on July 18, and from 9:00 a.m. to 5:00 p.m. on July 19. It will be held in the first floor Auditorium of the Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT: Thomas R. Burke, Executive Director, 200 Independence Avenue, SW., Washington, D.C. 20201; telephone 202/755-8670 or 755-8671.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. Attendance will be limited to the space available. The meeting will be structured as follows: July 18 will be constituted as a meeting of the Advisory Council; on July 19, the period from 9:00 a.m. to 12:00 noon will continue as a Council meeting; the period from 1:00 to 5:00 p.m. will be constituted as a public hearing.

The subject of the hearing will be alternatives for increasing trust fund revenues through taxation. The Hospital Insurance (HI) Trust Fund (Part A) is financed primarily by payroll taxes. (The Supplementary Medical Insurance (SMI) Trust Fund (Part B) is financed by beneficiary premiums and general revenues). Under current law, projections of income and outlays indicate a cumulative HI Trust Fund deficit in excess of $200 billion in 1995. The Council is seeking advice on whether to recommend in its report additional taxes, and if so, from what sources. Possibilities include, but are not limited to increasing payroll contributions, annual budget appropriations, percentage of income taxes, or earmarked user taxes on such items as alcoholic beverages and tobacco products. Interested parties are invited to present testimony limited to this subject only; however, only those requesting in advance, preferably in writing, to appear will be permitted to present oral statements. Presenters representing organizations and associations should submit two days in advance 20 copies of their presentation, and should bring an additional 50 copies to the hearing to be made available to the public. Presenters speaking as private citizens should submit two

copies two days in advance. Oral presentation should summarize the written statement, and will be limited to a maximum of five minutes. Other written material can be submitted for the record. Submit written requests to the Advisory Council on Social Security, Attn: Public Hearing, 200 Independence Avenue, SW., Washington, D.C. 20201, or telephone 202/755–8670 or 755–8671. The Chairperson or Executive Director reserves the right to determined order of presentation, but will make every effort, within the time constraints, to hear all who wish to be heard.

The proposed meeting agenda includes further discussions on the Medicare program and such other business as the Chairperson, the Executive Director, or the membership may put before the Council.

A previous meeting of the Advisory Council on Social Security was announced in 48 **Federal Register** 25278, June 6, 1983.

Sign language interpreting services will be provided if requested in advance.

Records are kept of all Council proceedings and are available for public inspection at the Office of the Administrative Officer, Advisory Council on Social Security, Room 317–H, HHH Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

Thomas R. Burke,

Executive Director.

BILLING CODE 4210–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Choctaw Nation of Oklahoma; Plan for the Use and Distribution of Choctaw Nation of Oklahoma Judgment Funds Docket 249 Before the United States Court of Claims

June 2, 1983.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs by 209 DM 8.

The Act of October 19, 1973 (Pub. L. 93–134, 87 Stat. 466), as amended, requires that a plan be prepared and submitted to Congress for the use or distribution of funds appropriated to pay a judgment of the Indian Claims Commission or Court of Claims to any Indian tribe. Funds were appropriated on September 30, 1976, in satisfaction of the award granted to the Choctaw Nation of Oklahoma in United States Court of Claims Docket 249. The plan for the use and distribution of the funds was submitted to the Congress with a letter dated January 28, 1983, and was received (as recorded in the Congressional Record) by the House of Representatives on February 10, 1983, and by the Senate on February 28, 1983. The plan became effective on May 10, 1983, as provided by Section 5 of the 1973 Act since Congress did not adopt a resolution disapproving it.

The plans reads as follows:

"The entirety of the funds appropriated by the Act of September 30, 1976, 90 Stat. 1415, in satisfaction of a judgment awarded to the Choctaw Nation of Oklahoma before the Indian Claims Commission, including all interest and investment income accrued, less attorney fees and litigation expensed, shall be invested by the Secretary of the Interior and the principal and interest and investment income accrued shall be expended in a Choctaw Nation health program designed to benefit tribal members who have attained the age of at least fifty (50) years. Such program shall be implemented according to a Plan of Operations adopted by the tribal governing body subject to the approval of the Secretary of the Interior. Eighty-seven (87) percent of the funds shall be used for obtaining dentures, eyeglasses and hearing aids; and thirteen (13) percent shall be used for the administration of the program. None of the funds utilized for such programing purposes shall be considered as income or resources in determining either eligibility for or the amount of assistance under the Social Security Act of any Federal or federally assisted programs."

Kenneth Smith,

Assistant Secretary—Indian Affairs.

Bureau of Land Management

Casper District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Casper District Grazing Advisory Board will be held July 27, 1983.

The meeting will consist of a tour of range management projects in the Bates Hole area southwest of Casper. The tour will leave the Bureau of Land Management Office, 951 Rancho Road, Casper, Wyoming at 8 a.m.

The tour will include discussion of pasture systems, sagebrush burning, range trend plots and watershed sedimentation studies.

The tour is open to the public. Those attending must furnish their own transportation and lunch. Those attending should notify the District Manager, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601 by July 22.

A summary of the tour presentation will be maintained at the District Office and be available for public inspection within 30 days following the meeting.

Leslie A. Olver,

Acting District Manager.

BILLING CODE 4310-55-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-115 (Final)]

Canned Mushrooms From the People's Republic of China

AGENCY: International Trade Commission.

ACTION: Institution of final antidumping investigation and scheduling of a hearing to be held in connection with the investigation.

EFFECTIVE DATE: June 10, 1983.

SUMMARY: As a result of an affirmative preliminary determination by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that imports from the People's Republic of China of canned mushrooms, prepared or preserved, other than frozen, provided for in item 144.20 of the Tariff Schedules of the United States, are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673), the United States International Trade Commission hereby gives notice of the institution of investigation No. 731–TA–115 (Final) under section 735(b) of the act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. On June 6, 1983, Commerce notified the Commission that it had postponed the date for its final determination to September 28, 1983. The Commission, therefore, will make its final determination by November 14, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Mr. Timothy McCarty (202–724–1753), Office of Industries, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background.—On December 2, 1982, the Commission determined, on the basis of the information developed during the course of its preliminary investigation, that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of imports of canned mushrooms from the People's Republic of China which were alleged to be sold at LTFV. The preliminary investigation was instituted in response to a petition filed on October 18, 1982, by counsel for the Four "H" Corp.

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to this investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Staff report.—A public version of the staff report containing preliminary findings of fact in this investigation will be placed in the public record on September 16, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 10:00 a.m., on October 4, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on September 14, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m., on September 16, 1983, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is September 27, 1983.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33682, Aug. 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 (19 CFR 207.22, as amended by 47 FR 33682, Aug. 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on October 11, 1983.

Written submissions.—As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before October 11, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in

accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR part 207, as amended by 47 FR 33682, Aug. 4, 1982), and part 201, subparts A through E (19 CFR part 201, as amended by 47 FR 33682, Aug. 4, 1982).

This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: June 10, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-130]

Certain Braiding Machines; Commission Decision Not To Review Initial Determination

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination finding no violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the above-captioned investigation. Accordingly, as of June 9, 1983, the initial determination became the Commission's determination.

AUTHORITY: This investigation is instituted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), 19 U.S.C. 1337a, and paragraph 3 of the Commission Order issued on June 29, 1979, in connection with investigation No. 337-TA-54, Certain Multicellular Plastic Film (USITC Pub. 987, June 1979).

SUPPLEMENTARY INFORMATION: This investigation was instituted on September 24, 1982. *See* 47 FR 42845 (Sept. 29, 1982).

On May 6, 1983, the Commission's presiding officer issued an initial determination finding no violation of section 337. Complainant New England Butt Co. filed a petition for review, which was opposed by the respondents and by the Commission's investigative attorney (except regarding the presiding officer's treatment of the issue of secondary meaning).

Having examined the record in this investigation, including the initial determination of the presiding officer, the petition for review, and the responses thereto, the Commission determined not to review the initial determination.

Copies of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

FOR FURTHER INFORMATION CONTACT: Jack Simmons, III, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0350.

Issued: June 9, 1983.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-139]

Certain Caulking Guns; Initial Determination Terminating Respondent on the Basis of Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a settlement agreement: Great American Marketing, Inc. (GAM).

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on June 9, 1983.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

Written Comments

Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, no later than 10 days after publication of this notice in the Federal Register. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-54B]

Certain Multicellular Plastic Film; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation to determine whether the process used by Unipak (H.K.) Ltd. to manufacture multicellular plastic film abroad would, if practiced in the United States, infringe claims 1 or 2 of U.S. Letters Patent 3,416,984.

AUTHORITY: The authority for the Commission's disposition of this matter is contained in section 337 and in §§ 210.53(a) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982, and 48 FR 20225, May 5, 1983); to be codified at 19 CFR 210.53(a) and (h)).

SUPPLEMENTARY INFORMATION: At the conclusion of investigation No. 337-TA-54, the Commission, on June 29, 1979, ordered exclusion of multicellular film manufactured abroad in accordance with the process disclosed by claims 1 and 2 of U.S. Letters Patent 3,416,984 owned by Sealed Air Corporation of Saddle Brook, New Jersey. Paragraph 3 of the Commission's order provided that persons desiring to import multicellular plastic film into the United States could petition the Commission to institute such further proceedings as would be appropriate in order to determine whether the multicellular plastic film sought to be imported should be allowed entry into the United States.

On May 5, 1983, a petition was filed with the Commission on behalf of Unipak (H.K.) Ltd., of Hong Kong, requesting the Commission to institute further proceedings for the purpose of determining whether the process used by that firm to manufacture multicellular plastic film abroad would, if practiced in the United States, infringe claims 1 or 2 of Sealed Air Corporation's '984 patent.

Having considered the petition before it, the Commission on June 7, 1983, instituted an investigation to determine whether the process used to manufacture multicellular plastic film abroad by Unipak (H.K.) Ltd. would, if practiced in the United States, infringe claims 1 or 2 of U.S. Letters Patent 3,416,984.

Parties

For the purpose of the Commission's investigation, the following are named parties upon which this notice of investigation shall be served:

(1) The petitioner is Unipak (H.K.) Ltd., 59-61 Wong Chuk Hang Rd., 1st and 2d Fl., Aberdeen, Hong Kong.

(2) Sealed Air Corporation, Park 80 Plaza East, Saddle Brook, New Jersey 07662, owner of U.S. Letters Patent 3,416,984 and complainant in the Commission's earlier investigation, is named an interested party upon which the petition and the affidavits attached thereto are to be served.

(3) A Commission investigativen attorney shall be appointed by Mr. David I. Wilson, Chief, Unfair Import Investigations Division, U.S. International Trade Commission.

Presiding Officer and Recommended Determination

Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate a presiding officer who is directed to issue an initial determination as soon as feasible. The initial determination shall be limited to the question of whether the process employed by Unipak (H.K.) Ltd. to manufacture multicellular plastic film abroad would, if practiced in the United States, infringe claims 1 or 2 of Sealed Air Corporation's '984 patent. The burden of proof shall be upon petitioner to show that its process would not, if practiced in the United States, infringe the patent in question.

Petition Available for Public Inspection

The petition and the accompanying affidavit filed on behalf of Unipak (H.K.) Ltd. are available for inspection by interested persons during official business hours (8:45 a.m to 5:15 p.m.) at the Office of the Secretary, U. S. International Trade Commission, 701 E. Street, NW., Washington, D.C. 20436, telephone 202-523-0161.

FOR FURTHER INFORMATION CONTACT: Jeffrey S. Neeley, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0189.

By order of the Commission.

Issued: June 9, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-133]

Certain Vertical Milling Machines and Parts, Attachments and Accessories Thereto; Receipt of Initial Determination Terminating Respondents on the Basis of Consent Order Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a consent order agreement: Intermark-Hartford Corporation

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on June 10, 1983.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

Written Comments:

Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202-523-0176.

By order of the Commission.

Issued: June 10, 1983.

BILLING CODE 7020-02-M

[Investigations Nos. 731-TA-131 and 132 (Preliminary)]

Certain Welded Carbon Steel Pipes and Tubes From the Republic of Korea and Taiwan

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonble indication that an industry in the United States is materially injured by reason of imports from the Republic of Korea (Korea) and Taiwan of certain small diameter circular welded carbon steel pipes and tubes,[2] which are alleged to be sold in the United States at less than fair value (LTFV).

The Commission further determines that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry is materially retarded, by reason of imports from Korea [3] and Taiwan of welded carbon steel pipes and tubes, of heavy-walled rectangular (including square) cross section, provided for in item 610.3955 of the TSUSA, which are alleged to be sold at LTFV.

The Commission further determines that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry is materially retarded, by reason of imports from Korea [4] and Taiwan of welded carbon steel pipes and tubes, of light-walled rectangular (including square) cross section, provided for in item 610.4975 of the TSUSA, which are alleged to be sold at LTFV.

Background

On April 21, 1983, counsel for the Commitee on Pipe and Tube Imports (CPTI) filed a petition with the U.S. International Trade Commission and the U.S. Department of Commerce alleging that an industry in the United States is materially injured or is threatened with material injury, by reason of imports from Korea and Taiwan of certain welded carbon steel pipes and tubes which are alleged to be sold at LTFV. Accordingly, effective April 21, 1983, the Commisson instituted preliminary antidumping investigations under section 733(a) of the Act (19 U.S.C. 1673b(a)).

Notice of the institution of the Commission's investigations and of a conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on May 4, 1983 (48 FR 20164). The conference was held in Washington, D.C. on May 16, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigations to the Secretary of Commerce on June 6, 1983. A public version of the Commission's report, *Certain Welded Carbon Steel Pipes and Tubes from the Republic of Korea and*

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] For purposes of these investigatons, the term "certain small diameter circular welded carbon steel pipes and tubes" covers welded carbon steel pipes and tubes, of circular cross section, with walls not thinner than 0.065 inch 0.375 inch or more but not over 4.5 inches in outside diameter, provided for in items 610.3231, 610.3232, 610.3241, and 610.3244 of the Tariff Schedules of the United States Annotated (1983) (TSUSA).

[3] Commissioner Haggart determines that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Korea of welded carbon steel pipes and tubes, of heavy-walled rectangular (including square) cross section, which are alleged to be sold at LTFV.

[4] Commissioner Haggart determines that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Korea of welded carbon steel pipes and tubes, of light-walled rectangular (including square) cross section, which are alleged to be sold at LTFV

Taiwan (investigations Nos. 731-TA-131 and 132 (Preliminary), USITC Publication 1380, 1983), contains the views of the Commission and information developed during the investigations.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-136 (Preliminary)]

Cyanuric Acid and Its Chlorinated Derivatives From Japan

AGENCY: International Trade Commission.

ACTION: Institution of a preliminary antidumping investigation and scheduling of a conference to be held in connection with the investigation.

EFFECTIVE DATE: June 3, 1983.

SUMMARY: The United States International Trade Commission hereby gives notice of the institution of a preliminary antidumping investigation under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of cyanuric acid and its chlorinated derivatives, provided for in item 425.10 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value.

FOR FURTHER INFORMATION CONTACT: Mr. George Deyman, Investigator (202-523-0481), or Mr. John MacHatton, Supervisory Investigator (202-523-0438), Office of Investigations, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

SUPPLEMENTARY INFORMATION:

Background.—This investigation is being instituted in response to a petition filed on June 3, 1983, on behalf of the Monsanto Industrial Chemicals Co., a U.S. producer of cyanuric acid and its chlorinated derivatives. The Commission must make its determination in the investigation within 45 days after the date of the filing of the petition, or by July 18, 1983 (19 CFR 207.17).

Participation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided for in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than seven (7) days after the publication of this notice in the Federal Register. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the notice.

Service of documents.—The Secretary will compile a service list from the entries of appearance filed in the investigation. Any party submitting a document in connection with the investigation shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8), serve a copy of the nonconfidential version of each such document on all other parties to the investigation. Such service shall conform with the requirements set forth in § 201.16(b) of the rules (19 CFR 201.16(b)), as amended by 47 FR 33682, Aug. 4, 1982.

In addition to the foregoing, each document filed with the Commission in the course of this investigation must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certificate of service will not be accepted by the Secretary.

Written submissions.—Any person may submit to the Commission on or before July 1, 1983, a written statement of information pertinent to the subject matter of this investigation (19 CFR 207.15). A signed original and fourteen (14) copies of such statements must be submitted (19 CFR 201.8).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately, and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submissions must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6). All written submissions, except for confidential business data, will be available for public inspection.

Conference.—The Director of Operations of the Commission has scheduled a conference in connection with this investigation for 9:30 a.m., on June 28, 1983, at the U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Mr. George Deyman (202-523-0481), not later than June 24, 1983, to arrange for their appearance. Parties in support of the imposition of antidumping duties in the investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Public inspection.—A copy of the petition and all written submissions, except for confidential business data, will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and B (19 CFR 207, as amended by 47 FR 33682, Aug. 4, 1982), and part 201, subparts A through E (19 CFR part 201, as amended by 47 FR 33682, Aug. 4, 1982). Further information concerning the conduct of the conference will be provided by Mr. Deyman.

This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

Issued: June 8, 1983.

Kenneth R. Mason,
Secretary.

BILLING CODE 7020-02-M

[Investigation No. 701-TA-180 (Final)]

Nitrocellulose From France

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 705(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)), that an industry in the United States is materially injured by reason of imports of nitrocellulose [3] which have been found by the Department of Commerce to be subsidized by the Government of France.

Background

The Commission instituted this investigation effective March 22, 1983, following a final determination by the Department of Commerce that subsidies were being provided to Societe Nationale des Poudres et Explosifs, a producer and exporter of nitrocellulose in France.

---

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i), 47 FR 6180, Feb. 10, 1982).

[2] Commissioner Stern dissenting.

[3] For purposes of this investigation, nitrocellulose is provided for in item 445.25 of the Tariff Schedules of the United States.

Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on April 6, 1983 (48 FR 15018). The hearing was held in Washington, D.C. on May 9, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigation to the Secretary of Commerce on June 6, 1983. A public version of the Commission's report, Nitrocellulose from France (investigation No. 701–TA–190 (Final), USITC Publication 1390, 1983) contains the views of the Commission and information developed during the investigation.

By order of the Commission.

Issued: June 6, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigations Nos. 731–TA–92, 731–TA–95, 701–TA–195, and 701–TA–196 (Final)]

Stainless Steel Sheet and Strip From the Federal Republic of Germany and France and Stainless Steel Sheet and Strip and Plate From the United Kingdom

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission determines, pursuant to sections 735(b)(1) and 705(b)(1) of the Tariff Act of 1930 (19 U.S.C. Sections 1673d(b)(1) and 1671d(b)(1)), that—

An industry in the United States is materially injured by reason of imports of stainless steel sheet and strip [2] from the Federal Republic of Germany (investigation No. 731–TA–92 (Final)) and France (investigation No. 731–TA–95 (Final)) which have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV);

An industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports of stainless steel sheet and strip from the United Kingdom (investigation No. 701–TA–195 (Final)) which have been found by the Department of Commerce to be subsidized by that Government; and

An industry in the United States is materially injured by reason of imports of stainless steel plate [3] from the United Kingdom (investigation No. 701–TA–196 (Final)) which have been found by the Department of Commerce to be subsidized by that Government.

Background

The Commission instituted investigation No. 731–TA–92 (Final) effective December 17, 1982, following a preliminary determination by the Department of Commerce that imports of stainless steel sheet and strip from the Federal Republic of Germany were being, or were likely to be, sold in the United States at LTFV. Investigation No. 731–TA–95 (Final) was instituted effective December 9, 1982, following a similar determination by the Department of Commerce concerning imports of stainless steel sheet and strip from France. Investigations Nos. 701–TA–195 and 701–TA–196 (Final) were instituted effective February 10, 1983, following preliminary determinations by the Department of Commerce that imports from the United Kingdom of stainless steel sheet and strip and stainless steel plate were being subsidized by the Government of that country.

Notice of the institution of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notices in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing them in the **Federal Register** as shown below:

Investigation No.	Federal Register
731–TA–92 (Final):	
Instituted	Jan. 5, 1983 (48 FR 538)
Hearing rescheduled	Feb. 24, 1983 (48 FR 7825)
731–TA–95 (Final):	
Instituted	Jan. 5, 1983 (48 FR 539)
Hearing rescheduled	Feb. 24, 1983 (48 FR 7824).
701–TA–195 and 196 (Final): Instituted	Mar. 2, 1983 (48 FR 8876)

The hearing in connection with these investigations was held in Washington, D.C. on May 4, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on these investigations to the Secretary of Commerce on June 9, 1983. A public version of the Commission's report, Stainless Steel Sheet and Strip from the Federal Republic of Germany and Stainless Steel Sheet and Strip and Plate from the United Kingdom (investigations Nos. 731–TA–92, 731–TA–95, 701–TA–195, and 701–TA–196 (Final), USITC Publication 1391, 1983) contains the views of the Commission and information developed during the investigations.

By Order of the Commission.

Issued: June 9, 1983.

[2] For purposes of these investigations, stainless steel sheet is provided for in items 607.7610, 607.9010, and 607.9020 of the Tariff Schedules of the United States Annotated (1983) (TSUSA) and stainless steel strip is provided for in items 608.4300 and 608.5700 of the TSUSA.

[3] For purposes of these investigations, stainless steel plate is provided for in items 607.7605 and 607.9005 of the TSUSA.

INTERSTATE COMMERCE COMMISSION

[OP–5FC–268]

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor the major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notice within 20 days after publication, or within any approved extension period. Otherwise, the

decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Members Carleton, Williams and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 5, (202) 275-7289.

MC-FC-81483. By decision of June 2, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, the Review Board approved the transfer to BRUNK TRUCK LINE, INC., Inman, KS, of Certificates Nos. MC-112869 Subs 6, 9, 10, 13, and 14, issued August 17, 1966, March 11, 1968, September 16, 1977, March 15, 1977, and May 12, 1978, respectively, to FRIESEN TRUCK LINE, INC., Hutchinson, KS, authorizing the transportation of dairy products from Hutchinson, Wichita, and Hillsboro, KS, to points in named counties in CO, and points in NM; (1) ice cream, ice cream products, and frozen bakery products, and (2) meats, meat products and meat byproducts, and packinghouse products, with exceptions, when moving at the time and in the same vehicle with the commodities in (1) above, from Hutchinson, KS, to points in AR and MO; ice cream products and ice products, from the facilities of Jackson Ice Cream Co., Inc. at or near Denver, CO, to the facilities of Jackson Ice Cream Co, Inc., at or near Hutchinson, KS; ice cream products and ice products, from Hutchinson, KS, to points in Denver County, CO; and dairy products and ice products, from the facilities of Jackson Ice Cream Company, at Hutchinson, KS, to points in IA, NE, and OK. Representative: William L. Mitchell, 119 West Sherman, P.O. Box 604, Hutchinson, KS 67501.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement

in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team Three at (202) 275–5223.

Motor Carriers; Permanent Authority; Republications of Grants of Operating Rights Authority Prior to Certification

The following grant(s) of operating right authority is republished by order of the Commission to indicate a broadened grant of authority over that previous notice in the Federal Register.

An original and one copy of an appropriate petition for leave to intervene, setting forth in detail the precise manner in which petitioner has been prejudiced, must be filed with the Commission within 30 days after the date of this Federal Register notice.

By the Commission.

Agatha L. Mergenovich,
Secretary.

MC 159632 (Sub-1) (republication), filed December 6, 1982, published in the Federal Register issue of December 20, 1982, and republished this issue. Applicant: JACK D. BAILEY TRUCKING, P.O. Box 245, Dade City, FL 33525. Representive: Jack D. Bailey (same address as applicant). A Decision of the Commission, *Review Board 1*, decided April 29, 1983 and served May 12, 1983, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *common carrier*, by motor vehicle, transporting (1) *food and related products*, between points in Arizona, California, Oregon, Washington, Idaho, and Florida, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), and (2) *printed matter*, between points in Arizona, California, Oregon, Washington, Idaho, and Florida, on the one hand, and, on the other, points in Illinois, Indiana, Iowa, Kentucky, Massachusetts, New York, and Tennessee; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to broaden the scope of authority.

Motor Carriers, Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: June 7, 1983.

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, the Review Board Members Carleton, Dowell, and Williams.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3, at (202) 275–5223.

MC 145595 (Sub-9)X, filed May 20, 1983. APPLICANT: WARREN G. GORMLEY, d.b.a. GORMLEY TRUCKING, 842 S. Glenn, Springfield, MO 65802. Representative: Larry D. Knox, 600 Hubbell Bldg., Des Moines, IA 50309. Lead and Subs 2, 4, and 6F, certificates: Broaden (1) sand, gravel, rock, and coal (lead) "to coal, nonmetallic minerals, and clay, concrete, glass and stone products"; (2) foodstuffs (Sub 2) "to food and related products,"; (3) charcoal, fireplace logs, wood chips, and lighter fluid and accessories (Sub 4); and charcoal, charcoal briquets, fireplace logs, wood chips, and lighter fluid and materials, equipment, and supplies (Sub 6F) "to petroleum and coal products, lumber and wood products, and chemicals and related products"; (4) eliminate the "facilities of" restriction in Sub 2; (5) eliminate the "except commodities in bulk" (Sub 2 and 6F) and "except liquid commodities in bulk" (Sub 4); (6) replace authority to serve named points to county-wide authority, Osage County, MO for Meta, MO in (Sub 4); Taney County, MO for Branson, MO in (Sub 6F); and Jackson County, MO, for Independence, MO in (Sub 2); and authorize radial authority to replace existing one-way authority in (Lead and Subs 2, 4, and 6F).

Motor Carriers; Security Van Lines, Inc.; Petition for Exemption from Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemptions.

SUMMARY: Four motor contract carriers have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762.

The petitions for exemption from the tariff filing requirements may be inspected at the Public Docket Room (Room 1227) of the Commission in Washington, D.C.

Any interested party may file a comment in this proceeding.

DATES: Comments are due on June 30, 1983. If no timely filed adverse comments are received, the sought relief

*This proceeding embraces Nos. 39243, C & L Transport, Inc., 39244 Ro-Mar Terminal & Warehouse Co., Inc., and 39245, M. H. Hillery, Inc.

will automatically become effective at the close of the comment period. If opposition comments are filed, the comments will be considered and, within 20 days of the close of the comment period, the Commission will issue a final decision granting or denying the relief sought.

ADDRESS: Send an original and 15 copies of comments to: Docket No. 39241, Room 2203, Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Jane Morris, (202) 275–6434

or

Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW., Washington, D.C. 20423 or call 289–4357 in the DC metropolitan area or toll free (800) 424–5403.

Decided: May 31, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carrier; Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–268

The following applications were filed in Region 2. Send protests to: ICC, Fed. Res. Bank Bldg., 101 N. 7th St., Rm. 620, Philadelphia, PA 19106.

Rude, Suite 611, 1730 Rhode Island Ave., N.W., Washington, D.C. 20036. *General Commodities, except classes A&B explosives, commodities in bulk, and household goods,* between points in AR, CA, CO, CT, IL, IN, IA, KS, KY, MA, MI, MN, MO, NE, NJ, NY, OH, OK, PA, SD, TN, TX, and WI. Supporting shipper: Interstate Freight Brokers, Inc., Sioux City, IA.

MC 146730 (Sub-5–5TA), filed June 2, 1983. Applicant: L & W TRANSPORTATION, INC., Route 3, Box 214A, Sedalia, MO 65301. Representative: Robert B. Reeser, Jr., PO Box 388, Sedalia, MO 65301. Contract; Irregular. *General commodities, except Class A and B explosives and household goods* between points in the U.S. except AK and HI under continuing contract with Broderick and Bascom Rope Co., Inc., Sedalia, MO.

MC 151915 (Sub-5–4TA), filed June 1, 1983. Applicant: KELWORTH TRUCKING COMPANY, INC., Hwy 59 South, Hodgen, OK 74939. Representative: Don A. Smith, P.O. Box 43, Fort Smith, AR 72902. (1) *Dry chemicals, fertilizers and feed supplements,* between points in AR, CO, IA, KS, LA, MS, MO, NE, NM, OK, TN and TX, and (2) *Clay, Concrete, glass and stone products* between points in IL, IN, KY and OH. Applicant intends to tack this authority to existing irregular route authority to permit movements between this authority and existing authority. Supporting shippers: The Bassichis Company, Cleveland, OH; and Chem-Quip, Inc., Tulsa, OK.

MC 168411 (Sub-5–1TA), filed June 2, 1983. Applicant: SHARED SERVICE SYSTEMS, A DIVISION OF NEBRASKA METHODIST HOSPITAL, 1725 South 20th Street, Omaha, NE 68105. Representative: Robert D. Gisvold, 1600 TCF Tower, 121 South 8th Street, Minneapolis, MN 55402. Contract, Irregular; *hospital and medical supplies* between points in IA, NE, and KS under continuing contract(s) with American McGaw, Division of American Hospital Supply Corporation of Santa Ana, CA.

MC 168419 (Sub-5–1TA), filed June 2, 1983. Applicant: MITCHELL TRUCKING COMPANY, P.O. Box 82, Stamps, AR 71860. Representative: David L. Beatty, Drawer 640, Lewisville, AR 71845. *Lumber, plywood and other wood products* between points in AR, TX, LA and OK. Supporting shipper: Marlar & Whistle Lumber Co. Inc., Lewisville, AR.

MC 168429 (Sub-5–1TA), filed June 3, 1983. Applicant: KENNETH E. MANN d.b.a. K.E.M. TRUCKING, P.O. Box 213, Blair, NE 68008. Representative: James F. Crosby, 7363 Pacific Street, Suite 210B, Omaha, NE 68114. *Such commodities as are used or dealt in by manufacturers and distributors of concrete mixing machinery,* between Blair and Omaha, NE on the one hand, and, on the other, points in the U.S. (except AK and HI), and points in their respective commerical zones. Supporting shipper: Concrete Equipment Company, Inc., Blair, NE 68008.

The following applications where filed in region 6. Send protests to: Interstate Commerce Commission, Region 6 Motor Carrier Board (RMBC), 211 Main St., Suite 500, San Francisco, CA 94105.

MC 133589 (Sub-6–4TA), filed June 6, 1983. Applicant: BCT, INC., P.O.B. 7219, Boise, ID 83707. Representative: James R. Daly (same address as applicant). *Commodities as are sold by wholesale, retail, and discount automotive parts stores* between points in the U.S. (except AK and HI), for 270 days. Supporting shipper: Pacific Wholesalers Inc., 17972 S.W. McEwan Road, Portland, OR 97223.

MC 42487 (Sub-6–81TA), filed June 6, 1983. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Dr., Menlo Park, CA 94025. Representative: V. R. Oldenburg, P.O.B. 3062, Portland, OR 97208. *Contract Carrier,* irregular routes: *General commodities,* (except Classes A and B explosives, household goods and commodities in bulk), between points in the U.S., (except AK and HI), for 270 days. Supporting shipper(s): Caterpillar Tractor Co., 100 N.E. Adams St., Peoria, IL 61629.

MC 168128 (Sub-6–1TA) filed June 3, 1983. Applicant: HUMBOLDT LOADERS INC., P.O. Drawer RR, Arcata, CA, 95521. Representative: Gary Blanks (same as applicant). *Contract carrier;* irregular route: *Timber by-products,* from Arcata, CA to Keswick (Hwy 299) to So. Redding and Anderson (Old I5) and/or Arcata to Calpella, Willits and Ukiah, CA for 270 days. Supporting shipper: Simpson Timber Co., P.O. Drawer V., Arcata, CA 95521.

MC 149386 (Sub-6–1TA), dated: June 6, 1983. Applicant: LIQUID SUGARS INC., P.O. Box 96, Oakland, CA 94604. Representative: Ronald C. Chauvel, 100 Pine St., #2550, San Francisco, CA 94111. *Food and food products, including those in bulk,* between Emeryville and Stockton, CA; Salt Lake City, UT; Seattle, Tukwila, Toppenish and Spokane, WA; Salem, OR; Worland, WY; Denver, CO; Dallas, TX and New Orleans, LA, on the one hand, and, on the other, points in the U.S., for 270 days. Supporting shippers: Cargill Inc., Box 9300, Minneapolis, MN 55440; Hubinger Co., 1417 Exchange St., Keokuk, IA.

MC 160195 (Sub-6–2TA) filed June 6, 1983. Applicant: SAN RAFAEL TRUCK LINE, 1625 N. 26th Ave., Phoenix, AZ 85009. Representative: Kinley T. Gleave, P.O. Box 3916, Phoenix, AZ 85030. *Contract;* irregular; *General commodities* (except class A and B explosives, commodities in bulk and household goods) between points in the U.S. (except AK and HI), for 270 days. Supporting shipper: K Mart Corp., 3100 West Big Beaver Rd., Troy MI 48084.

MC 168480 (Sub-6–1TA), filed June 6, 1983. Applicant: ROBERT & BARBARA SWASH, 24959—8 Ave., RR No. 10, Aldergrove, B.C. VOX 1AO. Representative: (same as applicant). (1)

Horses, from ports of entry on the International Boundary between the U.S. and Canada located in WA and OR. Supporting shippers: Galloway Farms, 25152 40 Ave., Aldergrove, B.C. VOX 1AO; Napaley Lane Farm, 24905 25 Ave., Aldergrove, B.C. VOX 1AO.

MC 141871 (Sub-6-4TA), filed June 6, 1983. Applicant: WNI, INC., 8560 S.W. Salish Lane, Wilsonville, OR 97070. Representative: Thomas E. Vandenburg, P.O.B. 2298, Green Bay, WI 54306. *Contract*: irregular, *General Commodities, with usual exceptions*, between points in the U.S. (except AK and HI) for 270 days. Supporting shipper: Montgomery Ward and Co., One Montgomery Ward Plaza, Chicago, IL 60671.

WC 1373 (Sub-6TA), filed June 2, 1983. Applicant: IMPERIAL NAVIGATION, LTD., d.b.a. INLAND RAIL & BARGE SERVICE, 4533 N. Channel Ave., Portland, OR 97217. Representative: James H. Sanders (same as applicant). *Contract carrier*, irregular routes, *general commodities* (except class A & B explosives) between points in the U.S. for the account of Marine Intermodal Cooperative Association for 180 days. Supporting shipper: Marine Intermodal Cooperative Association, 4533 N. Channel Ave., Portland, OR 97217.

WC 1374 (Sub-6-1TA), filed June 6, 1983. Applicant: NORMAN F. RICHARDS, d.b.a. MARINE RAIL LINES, 44 Golf Club Rd., #148, Pleasant Hill, CA 94523-1582. Representatives: N. F. Richards (same as applicant). *General commodities* between San Francisco Bay and Humboldt Bay, CA, for 180 days. Supporting shippers: Louisiana-Pacific Corporation, 111 S.W. Fifth Ave., Portland, OR 97204; Pacific Lumber Co., P.O.B. 37, Scotia, CA 95565; Arcata Redwood Co., P.O.B. 218, Arcata, CA 95521; and Sierra Pacific Industries, P.O.B. 4728, Redding, CA 96099.

Agatha L. Mergenovich,

Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 83-7]

Ralph E. Lambert, M.D., Westwego, Louisiana; Hearing

Notice is hereby given that on March 7, 1983, the Drug Enforcement Administration, Department of Justice, issued to Ralph E. Lambert, M.D., an Order to Show Cause as to why the Drug Enforcement Administration should not revoke his DEA Certificate of Registration AL3378824.

Thirty days having elapsed since the said Order To Show Cause was received by Respondent and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held on Thursday, June 23, 1983, commencing at 9:30 a.m. in the U.S. Tax Court, Courtroom 211, U.S. Custom House, 423 Canal Street, New Orleans, Louisiana.

Date: June 7, 1983.

Francis M. Mullen, Jr.,

Acting Administrator, Drug Enforcement Administration.

Office of Juvenile Justice and Delinquency Prevention

National Advisory Committee for Juvenile Justice and Delinquency Prevention; Meeting

The twenty-seventh quarterly meeting of the National Advisory Committee for Juvenile Justice and Delinquency Prevention will be held in St. Louis, Missouri on June 13 and 14, 1983. The meeting will take place at the Sheraton Hotel and will run from 9:00 a.m. to 5:00 p.m. on Monday, June 13 and 9:00 a.m. to 12:00 noon on Tuesday, June 14.

The main topic of this meeting is reauthorization of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended. Members of the public are welcome to attend.

Further information regarding this meeting may be obtained by contacting Sharon A. Wagner, Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue, N.W., Washington, D.C. 20531, (202) 724-7751.

This notice is being published less than 15 days before the meeting pursuant to 41 CFR 101-6.1015(b)(2) due to staff changes and consequent oversight. Wire service announcements have also been made for this meeting. Copies of minutes will be made available to any person, upon request.

Dated: June 9, 1983.

Approved:

Alfred S. Regnery,

Acting Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410-18-M

Bureau of Prisons

Advisory Corrections Council; Meeting

Notice is hereby given that the Advisory Corrections Council in accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 86 Stat. 770) will meet on June

20, 1983, at the Federal Institution, Ray Brook, New York.

The purpose of the meeting is to discuss: Comprehensive Crime Control Act of 1983: Impact on Corrections, S. 1182 Sentencing Reform Act of 1983, Implementation of Pretrial Service Act of 1983, Role of the Parole Commission in Reducing Overcrowding, Strategies to Reducing Overcrowding, and the Proposed Phase-out of U.S. Public Health Service Staff from Federal Bureau of Prisons.

Signed at Washington, D.C., this 8th day of June 1983.

Norman A. Carlson,

Director, Bureau of Prisons.

BILLING CODE 4410-05-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83-58]

National Environmental Policy Act; Finding of No Significant Impact

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of finding of no significant impact.

SUMMARY: The seventh flight of the Space Shuttle (STS-7) with a crew of five is currently planned for June 1983 from Kennedy Space Center (KSC), Florida. This is the first flight which will return directly to KSC. The previous landing site, Edwards Air Force Base, California, will be an alternative landing site.

The primary purposes of the STS-7 mission are: (1) To launch two communications satellites to geosynchronous orbit with their associated Propulsion Assist Modules (PAM's) and (2) to conduct a variety of research experiments before returning the experimental equipment to Earth. A significant secondary objective is to acquire technical information about STS equipment for use in the Shuttle Program.

The two communications satellites are manufactured by Hughes Aircraft Company of El Segundo, California, for Telesat of Canada and Perumtel of Indonesia, the countries' telecommunications organizations. The technical characteristics and operations of these almost identical satellites have been approved by the associated telecommunications authority in each country. The frequency and orbital position allocations of each satellite have been negotiated by the Canadian and Indonesian authorities through world and regional administrative radio conferences. The gross mass (including the PAM) and volume of each communication satellite are 4106 kg and 35 m^3, respectively. Each mission uses two solid propellant motors with a total of 2251 kg of propellants as well as approximately 148 kg of hydrazine for use in the station-keeping propulsion systems. While the probability of a catastrophic Space Shuttle accident is very low, these propellents represent a major hazard source.

There are two major research payloads in the Space Shuttle's Cargo Bay, the SPAS-01 and OSTA-2. The SPAS-01 will be deployed from the Cargo Bay as a free-flyer to perform experiments and test the spacecraft's performance, before retrieval to the Cargo Bay. The OSTA-2 payload will remain in the Cargo Bay for the entire flight. The SPAS-01 is 4.2 m wide and 1.4 m long as mounted in the Cargo Bay and has a mass of about 1800 kg. Its propellant is nitrogen gas. The OSTA-2 pallet is similar to SPAS-01 in size and weight. There also will be seven self-contained research payloads mounted on the side of the Cargo Bay in cannisters with a diameter of 52 cm and a length of 83 cm. The seven experiments will be initiated by the crew's remote commands; neither the crew's services nor Shuttle's utilities (e.g., electrical power) will be required after this initiating event.

Within the crew's compartment there are two major MidDeck-mounted research payloads: the Continuous Flow Electrophoresis System (CFES) and the Monodisperse Latex Reactor (MLR). Both of these systems have been flown successfully on previous Shuttle flights. The CFES uses electrophoretic techniques to separate pharmaceutically active compounds. The MLR reacts a water-latex solution to produce uniformly spherical latex particles for later use as a laboratory standard to determine pore size in membranes. In addition to the CFES and MLR, there will be a small number of student research experiments selected from among those ready at flight time. These are typically stored in cabin lockers.

The research payloads contain materials which are not normally considered hazardous. The major source of risk to the STS-7 mission from the research payloads is considered to come from their batteries. Any battery-related accident is unlikely to be catstrophic to the Space Shuttle.

Possible alternatives to the use of the Shuttle to transport the payloads (the proposed action) are: (1) No Action and (2) Use of Expendable Launch Vehicles.

The No Action alternative is defined as using terrestrial methods to achieve the goals of the STS-7 mission. For the two communications satellites, the terrestrial methods of providing the communications relay capacity include the use of microwave relay towers and submarine cables. The technology competes with and complements satellite relay technology. For relatively short distances and over high-traffic-density routes, ground microwave relay can provide lower service costs. For long distances and in remote areas, satellite relay usually provides lower service costs. Ground microwave relay service is also used to provide local service near satellite relay stations. The goals of the research payloads, however, could not be accomplished under the No Action alternative. There is no known way to conduct experiments in the terrestrial environment requiring more than very short periods (2-5 minutes) of weightlessness. Some of the payloads require views of the Earth or other aspects of the space environment (such as a view of the sun or stars unimpeded by the Earth's atmosphere) which can only be obtained from orbit. Selection of the No Action alternative thus implies foregoing the benefits from the proposed research experiments.

For the Expendable Launch Vehicle (ELV) alternative, one communications satellite would be flown on one Delta Launch Vehicle. The Hughes HS-376 spacecraft were designed to be launched by either the Delta or Shuttle, and several prior units have been launched by both vehicles. The research payloads, however, have been designed specifically for use with the Shuttle. Substantial redesign would be needed to reconfigure these payloads to fly on ELV's. In addition, a reentry system would be required. The SPAS-01 and OSTA-2 pallets, reconfigured, would each require a Delta launch. The remaining Shuttle Cargo Bay experiments and the crew-cabin experiments together would require at least one more Delta launch. Thus, the ELV equivalent to the STS-7 mission would require at least five Delta launches.

For the proposed action, the only measurable long-term adverse enviromental impact from the normal activities with these payloads is the addition of two expendable PAM solid rocket motors, and two ultimately abandoned communications satellites to an already large population of manufactured space debris. The major concern associated with this debris is an increasing probability of collision with spacecraft. While the current debris

accumulation poses little threat to the terrestrial environment, there is a low probability of a collision with an active spacecraft. This collision would likely destroy the spacecraft with its fragments adding to the long-term debris population. If the spacecraft were manned, it is possible that a direct hit by debris would result in the loss of life.

If the communications satellites were launched by a Delta ELV, the Delta's second stage would also become part of the space debris population in addition to the spent PAM stage. For either alternative, the potential collision risk from their addition to the space debris population is currently considered by NASA to be acceptable in view of the benefits achievable through improved communications capabilities.

For both space launch alternatives, there is a low probability of a catastrophic accident caused either by the payload or by the launch vehicle. NASA safety procedures for payload design and operation significantly reduce the risk of payload-caused accidents. In the case of the Shuttle, such an accident could result in loss of the crew's lives. The Delta is unmanned. Accident consequences have been examined and have been determined to result in only local and temporary effects to the environment. Launch system accidents and detailed descriptions of their potential consequences are provided in the final Environmental Impact Statements for the Space Shuttle Program and for the Expendable Launch Vehicle Program. The STS-7 payload contribution to potential consequences is estimated to be very small when compared to the launch vehicle itself.

The research experiments are intended to be returned to the Earth and will have no interaction with the environment. These experiments have undergone safety reviews to assure that both the experiments and their ancillary equipment (such as batteries) cannot fail in a manner which would result in a hazard to the Shuttle mission. No synergistic hazards have been found for these payloads.

For the proposed action and alternatives, ground-based installations are needed. The construction, operation, and maintenance of these installations represent most of the direct impact on the human environment. For launch of communications satellites by either Shuttle or Deltas, the ground stations will be the same. For the No Action alternative, many microwave relay towers would be needed to provide coverage equivalent to the communications satellites. Resaunce use would be the lowest for launch of the payloads on ELV's, and the all ground-based system would be the highest.

The short-term, temporary environmental impact of the ELV launches would be less than a Space Shuttle launch in terms of noise and rocket exhaust effluents. Under the No Action alternative, communications systems using relay towers and submarine cables would have a longer impact on the terrestrial environment than a space-based system. This increased impact, however, would be dispersed geographically.

The Shuttle launch of the payloads is the currently proposed approach to the achievement of improved communication capabilities and for the research objectives in the space environment. The conclusion of all analyses is that the environmental effects of the proposed action are not significant.

EFFECTIVE DATE: June 15, 1983.

ADDRESS: National Aeronautics and Space Administration, Code MC, Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Ott, 755-7472.

SUPPLEMENTARY INFORMATION: The environmental assessment for this proposed project was completed by the National Aeronautics and Space Administration in May 1983.

Conclusion: The launch of STS-7 payloads will not result in any significant adverse environmental impacts. No environmental impact statement is required for this launch

Dated: June 10, 1983.

Ann P. Bradley,

Acting Associate Administrator for Management.

BILLING CODE 7510-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22-12527]

Standard Oil Co; Application and Opportunity for Hearing

June 8, 1983.

Notice is hereby given that the Standard Oil Company, an Ohio Corporation (the "Applicant") has filed an application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Securities and Exchange Commission that the trusteeships of Chemical Bank under an existing indenture that has been qualified under the Act and a Trust Indenture with Guadalupe-Blanco River Authority (the "Issuer") dated as of May 1, 1983, which has not been qualifed under the Act, are not so likely to involve a material conflict of interst as to make it necessay in the public interest or for the protection of investors to disqualify Chemical Bank from acting as Trustee under either of such Indentures.

The Applicant alleges that:

(1) Applicant is an obligor under an indenture dated as of May 1, 1971 and entered into between Kennecott Corporation and Chemical Bank, Trustee (the "original Indenture"), which indenture involved the issuance of $200,000 principal amount of 7 ⅞% Debentures Due 2001 (the "Debentures"). The Original Indenture has been qualified under the Act. Pursuant to a First Supplemnetal Indenture to the Original Indenture dated as of July 1, 1982 (the first Supplemental Indenture and the Original Indenture being hereinafter called the "1971 Indenture"), Applicant expressly guaranteed the payment of the principal of and premium, if any, and interest on the Debentures (the "July 1982 Guarantee").

(2) The Applicant is not in default in any respect under the 1971 Indenture, the July 1982 Guarantee or under any other existing indenture.

(3) On May 11, 1983 Chemical Bank entered into a Trust Indenture dated as of May 1, 1983 with the Issuer (the "1983 Indenture"), pursuant to which there were issued $4,700,000 principal amount of Floating Rate Monthly Demand Water Supply Refunding Revenue Bonds, Series 1983 (Sohio Chemical Company Project) (the "Bonds").

(4) The Applicant is obligated to pay the principal of, premium, if any, and interest on the Bonds pursuant to a direct guarantee contained in a Guarantee Agreement dated as of May 1, 1983 between the Issuer and Applicant, which has been assigned to Chemical Bank, as Trustee (the "May 1983 guarantee").

(5) The Bonds have not been registered under the Securities Act of 1933 on the basis of the exemption provided by Section 3(a)(2) thereof, and the 1983 Indenture has not been qualified under the Act in reliance upon Section 304 thereof.

(6) The May 1983 Guarantee, if enforced against Applicant, would rank on a parity with the obligations evidenced by the July 1982 Guarantee, and the obligations of Applicant under the May 1983 Guarantee and the July 1982 Guaranty are wholly unsecured.

(7) Aside from differences among the 1971 Indenture and the 1983 Indenture as to amounts, interet rates, maturity

dates, redemption dates and redemption powers, and differences in form between the 1971 Indenture and the 1983 Indentures, the terms of said Indentures are substantially similar. In the opinion of Applicant, the differences between the 1971 Indenture and the 1983 Indenture are not so likely to involve a material conflict of interst as to make it necessary in the public interest or for the protection of investors to disqualify Chemical Bank from acting as Trustee under either of said Indentures.

(8) Applicant has waived notice of hearing, any right to a hearing, and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said applications, which is a public document on file in the office of the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than July 5, 1983, submit to the Commission his views or any substantial facts bearing on this application or request that a hearing be held on such matter. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reasons for such request, and the issues to fact and law reasons for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission. Persons who request a hearing or advice as to whether the hearing is ordered will receive all notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporation Finance, pursuant to delegated aurthority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

Preferred Lenders Pilot Programs; Expansion

AGENCY: Small Business Administration.

ACTION: Notice.

SUMMARY: The Small Business Administration has decided to expand the Pilot Preferred Lenders Program into Region IX (AZ, CA, HI, NV). This program allows certain lenders to approve and issue Small Business Administration loan guaranties without prior approval of SBA. The program is more fully explained on page 7667 in the **Federal Register**, Vol. 48, No. 37, February 23, 1983. The lenders participating in the Region IX pilot from the State of California will be Bank of America, Crocker National Bank, First Interstate Bank of California, Security Pacific National Bank, West Coast Bank, and Wells Fargo Bank; from the State of Arizona will be Thunderbird Bank and Valley National Bank; from the State of Hawaii will be the Bank of Hawaii; and from the State of Nevada will be the First Interstate Bank of Nevada.

At this time, it is planned that the pilot program will terminate on or before May 31, 1983. By that time, SBA plans to have completed an evaluation of the program and made a decision regarding nationwide implementation.

FOR FURTHER INFORMATION CONTACT: Dan Gibb, Chief, Financial Institutions Branch, (202) 653-6076 or Jim Hammersley, Financial Analyst, (202) 653-6266, Small Business Administration, Room 720, 1441 L Street NW., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Program No. 59.012, Small Business Loans)

Dated: June 9, 1983.

James C. Sanders,

Administrator.

Office of the Secretary

Advisory Committee On International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting of the Working Group on Multilateral Investment Standards for MNE's and UN Activities of the Advisory Committee on International Investment, Technology, and Development on Wednesday, July 6, 1983, from 9:30 a.m. to noon, Room 6320, Department of State, 2201 C Street, NW., Washington, D.C. 20520.

The purpose of the meeting is to: discuss future steps on negotiations on a UN Code of Conduct on TNC's; discuss the outcome of the June OECD meetings on Guidelines for MNE's, national treatment and performance requirements; and review developments relating to the draft UN code on transfer of technology.

Members of the public wishing to attend the meeting must contact Mr. Lincoln's office (202-632-2728) in order to arrange admittance to the State Department. Please use the "C" Street entrance.

The Chairman of the Working Group will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: June 1, 1983.

Philip T. Lincoln, Jr.,

Executive Secretary.

[Public Notice CM-8/638]

Shipping Coordinating Committee; Subcommittee on Safety of Life at Sea, Working Group on Fire Protection; Meeting

The U.S. Safety of Life at Sea (SOLAS) Subcommittee Working Group on Fire Protection will conduct an open meeting on June 28, 1983, at 9:30 A.M., in Room 1303 of the Coast Guard Headquarters Building, 2100 Second Street, SW., Washington, D.C 20593.

The purpose of the meeting will be to discuss the results of the 28th session of the International Maritime Organization (IMO) Subcommittee on Fire Protection, 17-21 January, 1983.

Members of the public may attend up to the seating capacity of the room.

For further information contact Mr. Donald J. Kerlin, U.S. Coast Guard (G-MTH-4/13), Washington, D.C. 20593. Telephone: (202) 426-2197.

Dated: June 1, 1983.

Samuel V. Smith,

Executive Secretary, Shipping Coordinating Committee.

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980; Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms Under Review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposals for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attention: Desk Officer for Tennessee Valley Authority, 395-7313.

Agency Clearance Officer: John O. Catron, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2523, FTS 858-2523.

Type of Request: Revision of a currently approved collection
Title of Information Collection: Electric Load Research Questionnaire
Frequency of Use: On occasion
Type of Affected Public: Individuals or households, farms, and businesses or other for-profit
Standard Industrial Classification: All
Small Businesses or Organizations Affected: Yes
Federal Budget Functional Category Code: 271
Estimated Number of Annual Responses: 1500
Estimated Total Annual Burden Hours: 750
Estimated Annual Cost to TVA: $100,000

Need for and Uses of Information: Information is needed to evaluate the effects of demographic and other characteristics on the use patterns of electricity. This information is vital as input into ratemaking, cost-of-service, and forecasting procedures of the agency.

Dated: June 7, 1983.

John W. Thompson,

Assistant General Manager, Senior Agency Official.

DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circular 570, 1982 Rev., Supplement No. 25]

American Fidelity Fire Insurance Company; Surety Companies Acceptable on Federal Bonds; Termination of Authority

Notice is hereby given that the Certificate of Authority issued by the Treasury to American Fidelity Fire Insurance Company, Woodbury, New York under Section 9304 to 9308 of Title 31 of the United States Code, to qualify as an acceptable surety on Federal bonds is hereby terminated effective this date. The company was last listed as an acceptable surety on Federal bonds at 47 FR 28871, July 1, 1982.

With respect to any bonds currently in force with American Fidelity Fire Insurance Company, bond-approving officers of the Government should secure new bonds with acceptable sureties in those instances where a significant amount of liability remains outstanding.

Questions concerning this termination notice may be directed to the Operations Staff (Surety), Banking and Cash Management, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226. Telephone (202) 634-5745.

Dated: June 9, 1983.

W. E. Douglas,

Commissioner, Bureau of Government Financial Operations

BILLING CODE 4810-35-M

Internal Revenue Service

Commissioner's Advisory Group; Open Meeting

There will be a meeting of the Commissioner's Advisory Group on June 29 and 30, 1983. The meeting will be held in Room 3313 of the Internal Revenue Service Building. The building is located at 1111 Constitution Ave., NW., Washington, D.C. The meeting will begin at 9:00 A.M. on Wednesday, June 29, and 9:00 A.M. on Thursday, June 30. The agenda will include the following topics:

Wednesday, June 29, 1983

Organizational Structure and Functional Responsibilities
Tax Shelters and Partnerships
Tax Havens
Revenue Agent Training Program

Thursday, June 30, 1983

Automated Collection System
Tax Forms Development
Overview of Research Initiatives Within IRS
Automation Developments

The meeting, which will be open to the public, will be in a room that accommodates approximately 50 people. If you would like to have the Committee consider a written statement, please call or write to John E. Burke, Assistant to the Deputy Commissioner, 1111 Constitution Ave., NW., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: John E. Burke, Assistant to the Deputy Commissioner, (202) 566-4143 (Not toll free).

James I. Owens,

Acting Commissioner.

BILLING CODE 4830-01-M

VETERANS ADMINISTRATION

Geriatrics and Gerontology Advisory Committee; Meeting

The Veterans Admistration, in accordance with Pub. L. 92-463, gives notice that a meeting of the Geriatrics and Gerontology Advisory Committee will be held in Room 119 on June 28 and 29, 1983, at the Veterans Administration Central Office, 810 Vermont Avenue, N.W., Washington, DC. The purpose of the Geriatrics and Gerontology Advisory Committee is to advise the Administrator and the Chief Medical Director relative to the care and treatment of the aging veterans, and to evaluate the Geriatric Research, Educational and Clinical Centers establsihed by the Department of Medicine an Surgery.

The sessions on June 28 will be closed to the public. The sessions on June 29 will be open to the public from 9 a.m. to conclusion at noon. Because seating capacity of the meeting room is limited, it will be necessary for those wishing to attend the open session to contact Mrs. Von Hudson, Program Assistant, Veterans Administration Central Office (phone 202-389-2298) prior to June 17, 1983.

The sessions will be closed since they involve discussion, examination, reference and and review of staff and consultant critiques of research and medical care protocols and programs, and other similar documents in connection with the committee's evaluation of the Veterans Administration health care system, such as the President's Private Sector Survey.

The discussion and recommendations will deal with both qualifications of personnel conductiong these studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, nad with agency plans to respond to the various critiques, the premature disclosure of which would frustrate the agency's responsibile planning efforts. In addition, the premature public disclosure of the Committee's (GGAC) report would signficantly frustrate the agency's implementation of the requirements of 38 U.S.C. 4101(f)(2)(C). Closure of the

meeting is in accordance with subsection 10(d) of Pub. L. 92–463, as amended by Pub. L. 94–409, and as cited in 5 U.S.C. 552b(c) (6) and (9)(B).

Dated: June 8, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

[FR Doc. 83–15984 Filed 6–14–83; 8:45 am]

BILLING CODE 8320–01–M

Veterans Administration Wage Committee; Meetings

The Veterans Administration, in accordance with Pub. L. 92–463, gives notice that meetings of the Veterans Administration Wage Committee will be held on:

Wednesday, July 6, 1983
Thursday, July 21, 1983
Thursday, August 4, 1983
Thursday, September 1, 1983
Thursday, September 29, 1983.

The meetings will begin at 2:30 p.m. and will be held in Room 304, Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC 20420.

The Committee's purpose is to advise the Chief Medical Director on the development and authorization of wage schedules for Federal Wage System (blue-collar) employees.

At these meetings the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules.

All portions of the meetings will be closed to the public because the matters considered are related solely to the internal personnel rules and practices of the Veterans Administration and because the wage survey data considered by the Committee have been obtained from officials of private business establishments with a guarantee that the data will be held in confidence. Closure of the meetings is in accordance with subsection 10(d) of Pub. L. 92–463, as amended by Pub. L. 94–409, and as cited in 5 U.S.C. 552b(c) (2) and (4).

However, members of the public are invited to submit material in writing to the Chairman for the Committee's attention.

Additional information concerning these meetings may be obtained from the Chariman, Veterans Administration Wage Committee, Room 1175, 810 Vermont Avenue, NW., Washington, DC 20420.

Dated: June 8, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, June 20, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Request for reconsideration of a previous denial of an application for consent to purchase assets and assume liabilities, establish eight branches and redesignate the main office:

Valley Bank and Trust Company, Mishawaka, Indiana, and insured State nonmember bank, for consent to purchase the assets of and to assume the liability to pay deposits made in American National Bank and Trust Company of South Bend, South Bend, Indiana, to establish the eight offices of American National Bank and Trust Company of South Bend as branches of Valley Bank and Trust Company, and to redesignate the present main office of American National Bank and Trust Company of South Bend as the main office of the resultant bank.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: June 13, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2 p.m. on Monday, June 20, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for consent to merge and establish three branches:

People's Savings Bank—Bridgeport, Bridgeport, Connecticut an insured mutual savings bank, for consent to merge, under its charter and with the title "People's Bank," with People's Bank, Vernon, Connecticut, an insured mutual savings bank, and to establish the three existing offices of People's Bank as branches of the resultant bank.

Report of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or Associate Director (Administration and Corporate Applications) of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: June 13, 1983.

Federal Deposit Insurance Corporation.

5

RAILROAD RETIREMENT BOARD

TIME AND DATE: 9 a.m., June 23, 1983.

PLACE: Board's meeting room, eight floor, headquarters building, 844 Rush Street, Chicago, Illinois, 60611.

STATUS: The entire meeting will be open to the public.

MATTERS TO BE CONSIDERED:

(1) Canadian service.

(2) Appeal of Southern Pacific Transportation Company.

(3) Bureau of Audit and Investigation—independence of the internal auditor.

(4) Audit priorities.

(5) Proposed revisions to Board Orders 75–1 and 75–6.

(6) Field office hours.

(7) Proposed disability regulations (Part 220).

(8) Supplemental budget request.

(9) Report on benefit accuracy recommendations.

(10) Part 395 of Board 's regulations under Title VII of the Regional Rail Reorganization Act of 1973.

CONTACT PERSON FOR MORE INFORMATION: Beatrice Bzerski, COM No. 312–751–4920, FTS No. 387–4920.

Part II

Department of Energy

Sale of Strategic Petroleum Reserve Petroleum; Standard Sales Provisions

DEPARTMENT OF ENERGY

10 CFR Part 625

Sale of Strategic Petroleum Reserve Petroleum; Standard Sales Provisions

AGENCY: Procurement and Assistance Management Directorate, Assistant Secretary for Management and Administration, Department of Energy.

ACTION: Request for comments on appendix to proposed rule.

SUMMARY: On March 16, 1983, the Department of Energy (DOE) proposed to adopt a rule governing price competitive sales of petroleum from the Strategic Petroleum Reserve (SPR) in the event that the SPR is drawn down to respond to a severe energy supply interruption or to meet obligations of the United States under the International Energy Program. The rule would establish a framework for conducting the price competitive sale of SPR petroleum and for entering into contracts with successful offerors. The proposed rule provides for the publication in the **Federal Register**, as an appendix to the rule, of Standard Sales Provisions (SSPs) containing or describing contract clauses, terms and conditions of sale, and performance and financial responsibility measures, which may be applicable to a particular sale of SPR petroleum. DOE now solicits written comments with respect to the proposed SSPs.

DATES: Comments on the SSPs by August 1, 1983.

ADDRESSES: Send comments to: Lynn Warner, MA–963.1, Department of Energy, Room 1J–027, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:

Marcia L. Morris, MA–441, Procurement and Assistance Management Directorate, Department of Energy, Room 1I–030, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–9073;

Fred A. Hutchinson, EP–532, Strategic Petroleum Reserve, Environmental Protection, Safety and Emergency Preparedness, Department of Energy, Room 3E–042, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–4734;

E. Grant Garrison, GC–11, Office of Assistant General Counsel, International Trade and Emergency Preparedness, Department of Energy, Room 6A–141, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–2900

- B. General Sales Procedures
- C. Purchaser Performance and Financial Responsibility
  - 1. Offer Guarantee
  - 2. Performance and Payment Guarantee
  - 3. Liquidated Damages
  - 4. Termination for Default
  - 5. Other Performance and Financial Responsibility Measures
- D. Additional Comments Sought

IV. Comment Procedures

Appendix: Proposed Standard Sales Provisions

I. Background

A. Establishment of the SPR

The Energy Policy and Conservation Act (EPCA), Pub. L. 94–163, 42 U.S.C. section 6201 *et seq.*, signed into law on December 22, 1975, authorized the creation of the SPR. The objective of the SPR is to provide for the storage of substantial quantities of petroleum in order to dimish U.S. vulnerability to the effects of a severe energy supply interruption, and to facilitate carrying out U.S. obligations under the Agreement on an International Energy Program.

B. Drawdown and Distribution of the SPR

Section 161(b) of the EPCA provides that "no drawdown and distribution of the Reserve may be made except in accordance with the provisions of the Distribution Plan contained in the Strategic Petroleum Reserve Plan which has taken effect pursuant to section 159(a)."

An SPR Plan, which included detailed proposals for development of the SPR, was transmitted to the Congress as Energy Action No. 10 on February 16, 1977, and became effective on April 18, 1977. Subsequently, four amendments have been made to this Plan; Amendment No. 3, setting forth the planned method of withdrawal and distribution of the SPR oil, was transmitted to the Congress as Energy Action DOE No. 5 on October 21, 1979, and became effective on November 15, 1979.

In the Energy Emergency Preparedness Act of 1982 (EEPA), Pub. L. 97–229, Congress required that a new "Drawdown" (Distribution) Plan replacing SPR Plan Amendment No. 3 be transmitted to the Congress; it provided that this Amendment No. 4 to the SPR Plan would take effect on the date transmitted, without Congressional review. The new Distribution Plan was transmitted to Congress on December 1, 1982, and took effect on that date. The new Plan provides that the principal method of distributing SPR oil will be price competitive sale. These Standard Sales Provisions (SSPs) are being developed in order to provide the contractual framework for implementing the sales policies described in Amendment No. 4.

Section 161(d) of the EPCA stipulates that drawdown and distribution of the SPR may not be undertaken unless the President finds that such actions are "required by a severe energy supply interruption or by obligations of the United States under the international energy program." A severe energy supply interruption is defined in section 3(8) of the EPCA as a national energy supply shortage which the President determines:

> (A) is, or is likely to be, of significant scope and duration, and of an emergency nature;
>
> (B) may cause major adverse impact on national safety or the national economy; and
>
> (C) results, or is likely to result, from an interruption in the supply of imported petroleum products, or from sabotage or an act of God.

The International Energy Program referred to in section 161(d) is the Agreement on an International Energy Program (IEP) signed by the United States on November 18, 1974. This Agreement authorizes, under specific conditions, an emergency program among participating countries for sharing the world-wide crude oil supplies available to them. The existence of IEP obligations can serve as a basis for authorizing an SPR drawdown. However, there is no requirement that the SPR be used to satisfy these obligations.

C. SPR Storage and Distribution Facilities

As of May 1, 1983, about 318 million barrels of crude oil were in storage in the SPR; virtually its entire permanent storage capacity currently available is filled with oil. That oil is stored in five Gulf Coast sites, each in proximity to and connected with one of three major interstate crude oil distribution pipelines, and with Gulf Coast docks from which the oil can be moved by water. Those current sites, pipelines and docks are:

Site	Pipeline	Docks
Bryan Mound, Tex.	Seaway	Seaway Docks, Freeport, Tex.
West Hackberry, La.	Texoma	Sunoco Docks, Nederland, Tex.
Sulphur Mines, La.	Texoma	Sunoco Docks, Nederland, Tex.
Bayou Choctaw, La.	Capline	St. James, La. (U.S.-owned).
Weeks Island, La.	Capline	St. James, La. (U.S.-owned).

These sites are filled with a number of different crude oils from a variety of sources. With one exception, crudes have been commingled in the storage caverns with other crudes of similar quality. There are four basic categories of crude oils stored in the SPR: (1) sour crude oil, consisting of a commingled blend of Arabian Light and similar high sulfur crudes; (2) sweet crude oil, consisting of a commingled blend of United Kingdom Forties and similar low sulfur crudes; (3) the SPR's Weeks Island mix, consisting of a commingled blend of Alaskan North Slope and similar crude oils; and (4) Mexican Maya, the only generic crude oil that is segregated in storage from other crudes. These crudes will be made available at terminals at the following locations for sale and delivery by pipeline or ship:

Location	Crudes
Freeport, Tex.	Sweet; sour; Maya
Nederland, Tex.	Sweet; sour.
St. James, La.	Sweet; sour; Weeks Island mix.

With the exception of Maya crude oil, no petroleum currently stored in the SPR will be offered for sale by generic type. For detailed specifications of the various blends, see Exhibit D to the SSPs.

The SPR now has the capability to withdraw petroleum from its sites for distribution at a sustainable rate of 1.7 million barrels per day. At an oil storage level of 500 million barrels, the SPR's distribution capability will increase to 3.5 million barrels per day. At a level of 750 million barrels SPR withdrawal capacity would be 4.5 million barrels per day.

II. The Pending Rulemaking

A. Regulatory Background

The previous SPR Distribution Plan, SPR Plan Amendment No. 3, set out a number of alternative distribution methods. To establish the regulatory basis for such distribution methods, DOE in 1980 adopted 10 CFR Part 220 pursuant to section 161(e) of the EPCA, as well as conforming amendments to its Standby Mandatory Crude Oil Allocation Program and Buy/Sell Program (45 FR 55379, Aug. 19, 1980). Part 220 provided for the distribution of SPR oil only to refiners, and established three regulatory mechanisms for allocating SPR oil.

Under these regulations, prices were to be set for allocated high sulfur and low sulfur crude oils, with adjustments for gravity and sulfur content. The prices were not to be significantly higher or lower than the highest and lowest prices respectively, in comparable sales of allocated crude oil occurring in the month of sale.

On January 28, 1981, President Reagan issued Executive Order No. 12287, revoking allocation and price controls on crude oil and refined petroleum products. Part 220 was amended on April 3, 1981, to eliminate use of the Buy/Sell Program as means for distributing SPR oil (46 FR 20508). No further changes have been adopted to Part 220; however, those regulations are to be reviewed and revised as necessary to conform them with the new Distribution Plan, which relies primarily on price competitive sales for distributing SPR petroleum. Part 220 will continue to cover only the allocation of SPR petroleum in accordance with the new Distribution Plan, which provides that in any calendar month the Secretary may direct the distribution of up to 10 percent of the volume of the SPR oil sold in that calendar month, in such manner as he determines at his discretion; the price of such oil shall be the average price of SPR oil sold at the most recent competitive sale.

B. The Proposed SPR Competitive Sales Rule

On March 16, 1983, DOE published in the **Federal Register** (48 FR 11125) its notice of proposed rulemaking to establish the framework for the price competitive sales of SPR petroleum in accordance with Amendment No. 4 to the SPR Plan. The proposed rule would adopt procedures governing the process by which DOE will conduct the price competitive sale of SPR oil during drawdown.

Price competitive sale of SPR petroleum involves four basic steps: the promulgation of SSPs; the issuance of a Notice of Sale; the selection of the highest offers; and the award of sales contracts. The purpose of the proposed rule is to facilitate the sales process, primarily by requiring the development of SSPs containing contract clauses which the Notice of Sale may make applicable to particular price competitive sales of SPR petroleum. These provisions will include any contract clauses that are required by law, regulation, SPR programmatic considerations, or sound business practice. They also will include purchaser performance and financial responsibility measures or descriptions thereof. The SSPs differ in four main ways from the Basic Sales Agreement which DOE had issued in connection with the previous Distribution Plan: first, the SSPs place greater emphasis on purchaser performance and financial guarantees; second, they allow for significantly less subjective judgment in the evaluation of offers; third, they contain model contract terms and conditions, while providing a method of altering them at the time of drawdown through the Notice of Sale, if that proves necessary; and fourth, whereas the Basic Sales Agreements were to be signed in advance, there will be no presigning of the SSPs.

The proposed competitive sales rule would require the publication of the SSPs in the **Federal Register** and in the Code of Federal Regulations as an appendix to the final rule. It also provides for the periodic review and republication of the SSPs in the **Federal Register**, including any revisions thereto.

It is anticipated that the Notice of Sale will specify, by referencing the **Federal Register** and the Code of Federal Regulations in which the latest version of the SSPs was published, the contractual provisions contained or described therein that apply to that particular sale. The Notice of Sale may revise such terms and conditions, or add new ones which would apply to that particular sale, consistent with the SPR Distribution Plan. Offerors, as part of their offers for SPR petroleum, must agree to all contractual provisions and performance and financial responsibility measures made applicable by the Notice of Sale. The proposed rule provides that no contract may be awarded to an offeror which has not unconditionally agreed to all of the SSPs made applicable by the Notice of Sale. The proposed rule also provides that the terms and conditions set out in the Notice of Sale and the SSPs may be referenced in the contract documents rather than physically incorporated.

In order to assure that the drawdown objectives of the SPR are achieved and that only responsible offerors are awarded contracts, the proposed rule itself contains a measure to ensure purchaser performance, consisting of procedures for excluding a firm from participating in any future sale of SPR petroleum when that firm had previously been awarded a contract, yet failed to take delivery of the petroleum in accordance with the terms of the contract. This exclusion would be in addition to the other purchaser performance and financial guarantees

provided for in the SSPs. In addition to the remedies available to the Government under the contract and under the rule, a purchaser which defaults on a contract also may be subject to debarment procedures pursuant to other applicable DOE regulations.

III. Proposed Standard Sales Provisions (SSPs)

A. Purposes

The "Drawdown" (Distribution) Plan, SPR Plan Amendment No. 4, requires that sale of at least ninety percent of the SPR petroleum sold in any one month, be exclusively by price competitive sale, to those eligible offerors making the highest offers. With respect to such sales, it provides:

> At or before the time of offer, all buyers must sign the DOE's standard sales agreement which will set forth all of the provisions regarding the sale. The sales agreement is designed to expedite the process of selling and distributing SPR oil, and assuring performance under resulting awards. Provisions covered in a sales agreement may include such subjects as liability of the parties, payment procedure, crude oil quality differential pricing, and inspection and acceptance procedures, irrevocable letters of credit, performance bonds and/or other requirements or provisions which the Secretary may determine to be necessary or appropriate to assure performance and payment. Provisions in the sales agreement may be modified or deleted, as the Secretary may deem appropriate for a particular sale, through changes noted in the NS for that sale. Prior to award, successful bidders must provide financial and performance assurances which will guarantee their capability to carry out the contract.

The SSPs are the "standard sales agreement" provided for in Amendment No. 4. The pending DOE rule on competitive sales of SPR petroleum provides that no contract can be awarded to any offeror which fails to accept unconditionally those provisions made applicable to a particular sale by the Notice of Sale.

Plan Amendment No. 4 provides that price competitive sales of SPR petroleum will be open to all interested buyers; the universe of eligible offerors is to be as large as possible in order to facilitate the efficient distribution of SPR petroleum. Amendment No. 4 also provides for performance and financial responsibility measures in the SPR oil sales process, to reduce the risk that a buyer of SPR oil might fail to meet its contractual obligations to lift this oil on schedule or to pay the Government all amounts due.

The procedures and provisions contained in the proposed SSPs published as an Appendix to this Notice have been designed to balance and achieve both of these objectives, permitting any offeror to compete in SPR oil sales, but assuring that each buyer will perform its contract in a responsible manner, thereby contributing to the success of SPR drawdown and distribution.

In order to maximize competition, DOE has made the SPR oil sales process as unrestricted and nonjudgmental as possible. Anyone may make an offer to purchase SPR oil, and prerequisites to doing so have been minimized. Wherever possible, the need for subjective judgements has been eliminated. As provided in Amendment No. 4, price is to be the determining factor in the award of SPR petroleum sale contracts.

In order to reduce the risk of purchases by persons who lack the capability or intent to take timely delivery of SPR petroleum, or the financial wherewithal to pay for it, the SSPs require that (1) a firm transportation plan showing an ability to move the oil must be submitted by a high offeror before it is awarded a contract, and (2) binding guarantees of the offeror's full performance and payment under the contract must be agreed to by each offeror as a precondition to contract award. The measures included in the SSPs to ensure the offeror's fulfillment of its repsonsibilities include:

1. Requirement for offer guarantee;
2. Requirement for letter of credit or cash deposit to guarantee performance and payment;
3. Assessment of liquidated damages for failure to lift oil in accordance with the contract; and
4. Possible termination for default.

In addition, the pending rulemaking contemplates the possible denial of future contracts for failure to perform in accordance with an SPR oil sale contract. Thus, an offer or agreement to acquire SPR oil will involve a substantial commitment to the implementation of SPR drawdown and distribution in a manner consistent with the purposes of the SPR.

It should be noted that the export of crude oil distributed from the SPR is limited by U.S. export control laws, the provisions of which differ depending on the source of the oil proposed to be exported. The most stringent statutory tests that must be met prior to export apply to domestically produced crude oil from the U.S., including Alaskan North Slope oil (section 7(d) of the Export Administration Act of 1979, 50 U.S.C. App. section 2406(d)) and Naval Petroleum Reserves oil (10 U.S.C. section 7430(e)), both of which are contained in the SPR. The SPR also holds domestic oils which may be subject to other export limitations if the oil has been transported across a right-of-way granted under section 28(u) of the Mineral Lands Leasing Act (30 U.S.C. section 185(u)). The export of foreign oil is governed by the less stringent export controls in the Department of Commerce's "Short Supply Controls," 15 CFR Part 377. Because oil from various sources has been commingled in SPR storage, the applicability of these export control laws and regulations to any given lot of SPR oil is difficult to predict. The SSPs contain a warning concerning these restrictions and forbid the export of SPR petroleum in violation of applicable laws and regulations (see provision No. B.4 and Provision No. B.22).

B. General Sales Procedures

The SPR sales process starts with the issuance of a Notice of Sale, followed by the submission of offers by prospective buyers. The Government will evaluate the offers and award SPR sales contracts to those offerors making the highest priced responsive offers, which have provided the necessary assurances of performance and financial responsibility. The Notice of Sale is the document announcing the sale of SPR petroleum, the amount, characteristics and location of the petroleum being sold, the delivery period (presently expected to cover 30–60 days) and the procedures for submitting offers, as well as providing other information pertinent to a particular sale. In additon, the Notice of Sale will specify what contractual provisions and performance and financial responsibility measures are applicable to a particular sale. A sample Notice of Sale is at Exhbit B to the SSPs.

Over the course of an SPR drawdown, a number of Notices of Sale may be issued. Initially, Notices of Sale issued during SPR drawdown may allow an extremely short leadtime for bids and deliveries. While the amount of available leadtime of course will vary with the circumstances, it is possible that offerors might be given as little as seven days from the issuance of the Notice of Sale until offers are due, and as little as fifteen days from the time of issuance until oil delivery starts; a less compressed schedule may become more feasible after the initial stages of drawdown. Because of the possible short leadtime, the SSPs provide for the establishment of a list of prospective offerors. The Government will provide offerors on that list with copies of all

Notices of Sale. Prospective offerors are urged to submit their names for inclusion on the mailing list so that they will be assured of receiving the Notice of Sale in a timely fashion. No assurance can be given that requests for copies of a Notice of Sale that are received after the Notice has been issued will be processed in time for the requestor to submit an offer.

The next step in the sale process is the preparation by prospective purchasers of offers which must be submitted before a time specified in the Notice of Sale. The offer must unconditionally accept all terms and conditions made applicable to that sale by the Notice of Sale; must include an offer guarantee (Provision No. B.24); and must offer at least the minimum price, if any, specified in the Notice of Sale.

Following the receipt of offers the Government will evaluate the offers to select the "apparently successful" offerors. Offers will be for a specified amount of petroleum announced by DOE as available from the SPR at a given delivery point on a designated delivery date (termed a "delivery line item," see Exhibit A to the SSPs). Offers for a particular delivery line item will be ranked from highest to lowest with the offeror making the highest offer being selected as the apparently successful offeror. In the event that no offers are received for a particular item the SSPs establish a procedure for selecting an apparently successful offeror for that item without soliciting further offers (see Provision B.20). This procedure is designed to obtain the highest offer for the unsold petroleum without the delays inherent in negotiating with offerors or in issuing a new Notice of Sale.

All apparently successful offerors will be required, within as little as 72 hours, to provide firm transportation arrangements for the crude oil as well as either a letter of credit or a cash deposit as a guarantee of performance and payment of amounts due under the contract. Upon timely receipt of those items, and upon a final determination by the contracting officer that the offer is responsive and the offeror responsible, the Government will issue the Notice of Award.

As in any contracting program, it is possible that protests will be received regarding the Notice of Sale and the award process. However, given the importance to the Nation of the expeditious distribution of SPR petroleum and the achievement of the SPR's desired drawdown rate, DOE may elect notwithstanding such protests to proceed with contract awards and the delivery of SPR petroleum. This underscores the need for public comment on the SSPs at this time.

C. Purchaser Performance and Financial Responsibility

As explained above, the SSPs provide four major measures to assure purchaser performance and financial responsibility: (1) the offer guarantee, (2) the performance and payment guarantee, (3) liquidated damages, and (4) termination for default remedies.

1. Offer Guarantee. With its offer, the offeror must submit a guarantee that the offer will remain valid for ten days after the date set for receipt of offers. This guarantee may take the form of an offer bond on the Government's Standard Form 24, a certified or cashier's check, or a cash deposit to a special DOE account (see Provision No. B.24). The maximum amount of the required guarantee is ten million dollars or 30 percent of the total of all of the bidder's offers for SPR petroleum line items, whichever is less. The offer guarantee is to be available for offset against any damages incurred by the Government, including lost revenue on resale of the petroleum, in the event that an offeror makes the highest offer for an amount of petroleum but then does not provide the required performance and payment guarantee, or fails to execute the contract.

2. Performance and Payment Guarantee. In order to assure that the Government receives payment for oil delivered or for other amounts due under the contract in connection with the buyer's performance, such as liquidated damages or other damages for breach of contract, apparently successful offerors must provide a performance and payment guarantee prior to contract award. This may be in the form of either a letter of credit or an advance cash payment (see Provision No. C.15).

A letter of credit must be for 115 percent of the contract; this is because the quantity of crude oil specified in the contract is an estimated amount, with the Government reserving the right to over-deliver by as much as 15 percent in light of operational and logistical considerations. The letter of credit must be issued by a bank that participates in the Federal Reserve Bank FEDWIRE system (see Provision No. C.17). All letters of credit must be in the form of Exhibit F to the SSPs. The letter of credit will be an irrevocable clean letter of credit, with payment upon draft accompanied by a statement of an authorized Government official either that payment is due for oil delivered, or that payment is due for liquidated or other damages. The letter of credit contains two statements which will oblige the issuer to make payment, so that a single letter of credit will suffice rather than requiring one letter as a performance guarantee and another as a payment guarantee. Prospective offerors are cautioned that the short time period between selection of the apparently successful offeror and contract award will not permit review of non-conforming letters of credit. Therefore, letters of credit containing language not in exact conformity with the SSPs will be unacceptable.

The letter of credit form at Exhibit F provides that (a) the Government may draw against it by partial drafts, (b) drafts will be received by the bank by wire message, and (c) the bank will honor the draft by directing a wire transfer of funds to the U.S. Treasury Account at the Federal Reserve Bank of New York.

After delivering the SPR petroleum to the purchaser, DOE will prepare a Department of Defense Standard Form DD250, and a message containing the wire draft and the prescribed statement of an authorized Government official. The message containing the wire draft and prescribed statement will be sent by the SPR's New Orleans office to the New Orleans Branch of the Atlanta Federal Reserve Bank for wire transmittal to the Bank which issued the letter of credit. Copies of the invoice and the DD250 will be mailed to the contractor and to the bank. The bank must wire the funds thus drawn upon to the U.S. Department of the Treasury Account at the New York Federal Reserve Bank by the next business day after receipt of the draft.

As an alternative to submitting a letter of credit, the apparently successful offeror may submit an advance cash payment by wire transfer to a special DOE Account, in an amount of 45 days' delivery revenue under the contract plus 15 percent of the total contract amount, or 115 percent of the entire contract amount, whichever is less. DOE would invoice the purchaser after each delivery, and the purchaser would make payment by wire transfer to the U.S. Department of the Treasury account. The cash guarantee will be applied as a credit against the final invoice.

Purchasers which are late in accepting delivery may be asked, before delivery is commenced, to provide additional payment guarantees in the form of either a wire transfer or an increase in the letter of credit, in order to assure the Government of full payment of amounts due under the contract (see Provision No. C.16). Purchasers failing to provide

such additional guarantees may have their deliveries reduced accordingly.

3. *Liquidated Damages.* A failure by purchasers to honor SPR petroleum sales contracts could hinder the attainment of the desired rate of SPR drawdown and distribution, with possible adverse effects on the Nation. To provide compensation for the damages incurred by the country from any such behavior, the SSPs impose liquidated damages on a buyer's unexcused failure to comply with the contractually agreed delivery schedule. These damages would be in an amount equal to one percent of the contract price per barrel of undelivered petroleum, for each day or fraction thereof that a purchaser is late in accepting the petroleum, up to a maximum of 30 days. For tanker deliveries, if the vessel arrives late, liquidated damages shall continue to run until delivery is completed. Liquidated damages will not be assessed when the contractor is late for reasons excused by Provision No. C.26, which provides in pertinent part:

> (b) Except with respect to defaults of subcontractors, the purchaser shall not be charged with any liability to the Government under circumstances which prevent the purchaser's acceptance of delivery hereunder due to causes beyond the control and without the fault or negligence of the purchaser as determined by the Contracting Officer. Such causes shall include but are not limited to:
>
> (1) Acts of God or the public enemy;
>
> (2) Acts of the Government of the United States, acting in its sovereign or contractual capacity;
>
> (3) Fires, explosions or other catastrophes; or
>
> (4) Strikes.

In addition to being liable for liquidated damages, a purchaser which, without valid excuse, fails to take delivery of SPR petroleum it has contracted to buy, also may be liable to the Government for lost receipts in the event that its contract is terminated for default, and the petroleum is sold to another buyer at a lower price.

4. *Termination for Default.* The SSPs indicate, in Provision No. C.26, that in the event that:

(a) The Government does not receive payment in accordance with any payment provision of the contract;

(b) the purchaser fails to accept delivery under the terms of the contract; or

(c) The purchaser fails to comply with any other term or condition of the contract within five working days after written notice of such failure;

and if such conduct is not excused (for the same reasons discussed above with respect to liquidated damages), the Contracting Officer may terminate the contract in whole or in part. Should the Government exercise its right of termination, the Government may sell any contracted-for and undelivered petroleum and the original purchaser will be liable for the difference between the contract price and any lesser price obtained for the sale of the crude, as well as for any liquidated damages attributable to delivery delays occurring before another purchaser has lifted the petroleum. In no event shall the liquidated damages be assessed for more than thirty days.

If there is insufficient time to decide whether a failure or refusal to lift SPR oil on the contractually agreed schedule is due to a reason for which the contractor is culpable, DOE may elect initially to terminate the contract before determining whether there is a basis to declare a default. In this way, the Government can proceed to resell SPR petroleum that otherwise would not be distributed in a timely manner, and thereby maintain the desired drawdown rate. The Contracting Officer would proceed promptly to examine the facts, and would be allowed ten days within which he might convert the termination to one for default.

5. *Other Performance and Financial Responsibility Measures.* In addition to the performance and financial responsibility measures contained in the SSPs, the pending DOE rule on competitive SPR sales provides an additional remedy in the event of purchaser non-performance. The proposed rule would permit the DOE Headquarters Senior Procurement Official to exclude a firm from participating in any future sale of SPR petroleum when that firm had previously bid, was awarded a contract, and failed to take delivery of SPR petroleum in accordance with the terms of the contract. The ineligibility would not come into effect until after the firm had been given an opportunity to submit information or argument in opposition to the ineligibility. The Senior Procurement Official must consider the firm's response, if any, before making the purchaser ineligible for future award of SPR sales contracts. The ineligibility would continue for the length of time determined by the Senior Procurement Official as appropriate under the circumstances. The purchaser is to be notified of the result of the ineligibility proceedings. The proposed rule provides that at his discretion, the Senior Procurement Official may permit any such firm that petitions for reinstatement to participate in future SPR sales.

DOE believes that the five measures described above will adequately assure purchaser performance and payment responsibility, so as to eliminate the need for subjective determinations of offeror responsibility by the Contracting Officer. Thus, the only other bases upon which the Contracting Officer will make a finding of nonresponsibility are a failure of an apparently successful offeror to submit a transportation plan showing its ability to take timely delivery of the SPR petroleum and move it to its destination, or if evidence comes to the Contracting Office's attention, with respect to an offeror, of conduct or activity which (a) represents a violation of law or regulation, or Executive Order having the force and effect of law, or (b) shows a lack of integrity or willingness to perform, and which would substantially diminish the Contracting Officer's confidence in the offeror's required performance under the proposed contract.

D. Additional Comments Sought

DOE solicits comments on the Standard Sales Provisions, and on the following related questions:

1. Do prospective offerors need any additional information on specifications for SPR petroleum, beyond that contained in Exhibit D of the SSPs?

2. Do the proposed gravity and sulfur adjustments (see Provision No. C.7) accurately reflect the possible quality differentials between SPR specifications and any non-conforming petroleum which may be delivered?

3. Absent events outside of the tanker master's control, can purchasers provide, five days prior to a tanker's estimated arrival time, a one day window for the tanker's arrival?

4. What should be the smallest and the largest quantity of SPR barrels sold as a single delivery line item? While administrative convenience would be served by selling large lot sizes, DOE seeks comments on the extent to which small sized lots may be needed by prospective offerors.

5. A transportation plan (see Exhibit C) is proposed to be required prior to contract award in order to assure the timely movement of SPR petroleum. Are there likely to be any circumstances where it is unreasonable to require such a plan before award?

6. It is intended that the transportation plan be accepted by the Contracting Officer so long as it shows credible arrangements consistent with the terms of the Notice of Sale for timely movement of the SPR petroleum to be awarded. Are there additional specific questions which could be asked on Exhibit C to further mechanize the

Contracting Officer's review of transportation plans?

7. For tanker and pipeline shipments, what minimum leadtime is required from the date of SPR contract award until the time of delivery to the buyer of SPR oil? Please specify what assumptions about tanker or pipeline capacity availability your answer is based on.

8. Will Forms DD250 and DD250-1 at Exhibit I provide adequate documentation of delivery? If not, suggestions of alternative forms would be welcome.

9. DOE has under consideration the question of need for additional SSPs concerning ship and dock demurrage. What other SSPs, if any, may be needed?

IV. Comment Procedures

You are invited to participate in this proceeding by submitting information, views or arguments with respect to the proposed adoption of the Standard Sales Provisions. Comments should be submitted no later than [insert date 45 days from date of publication] to the address indicated in the "ADDRESSES" section of this preamble and should be identified on the outside envelope and on the document with the designation: "Sales Provisions for Strategic Petroleum Reserve Petroleum". Ten copies should be submitted. All comments received will be available for public inspection in the DOE Reading Room, Room 1E-190, James Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, between the hours of 8 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and to treat it according to our determination.

DOE does not intend to hold a hearing in connection with its inquiry on these matters.

Issued in Washington, D.C., June 2, 1983.

Hillary J. Rauch,

Director, Procurement and Assistance Management Directorate.

(Federal Energy Administration Act of 1974, Pub. L. 93-275; Department of Energy Organization Act, Pub. L. 95-91; Energy Policy and Conservation Act, Pub. L. 94-163)

List of Subjects in 10 CFR Part 625

Strategic petroleum reserve, Drawdown sales.

Accordingly, it is proposed to add the following Appendix A to proposed Part 625:

Appendix A to Part 625

Standard Sales Provisions

Index

Section A—General Pre-Sale Information
A.1 List of abbreviations.
A.2 Definitions.
A.3 Standard Sales Provisions.
A.4 Application of the Standard Sales Provisions.
A.5 Periodic revisions of the Standard Sales Provisions.
A.6 Offerors list for sales of petroleum.
A.7 Publicizing the Notice of Sale.
A.8 Issuing office for the Standard Sales Provisions and Notice of Sale.
A.9 Penalty for false statements in offers to buy SPR petroleum.

Section B—Sales Solicitation Provisions
B.1 Requirements for a valid offer—caution to offerors.
B.2 Requirements of the Jones Act for U.S. flag vessels—caution to offerors.
B.3 "Superfund" tax on SPR petroleum—caution to offerors.
B.4 Export limitations and licensing—caution to offerors.
B.5 Preparation of offers.
B.6 Submission of offers and modification of previously submitted offers.
B.7 Acknowledgment of amendments to a Notice of Sale.
B.8 Documents required in offer and award.
B.9 Late offers, modifications of offers, and withdrawal of offers.
B.10 Explanation requests from offerors.
B.11 Currency for offers.
B.12 Financial statement.
B.13 Proprietary data.
B.14 Notice of Sale line item schedule—petroleum quantity, quality, etc.
B.15 Reserved.
B.16 Information to be provided to DOE by the offeror on each delivery line item of its offer to buy petroleum.
B.17 Information to be provided by DOE to purchaser on each delivery line item awarded in the Notice of Sale.
B.18 Delivery points for crude oil sold from storage.
B.19 Evaluation of offers.
B.20 Procedures for evaluation of offers.
B.21 Procedures for resolicitation of offers on unsold delivery line items.
B.22 Transportation arrangements.
B.23 Offeror's certification of acceptance period.
B.24 Offer guarantee.
B.25 Procedures for selling to other U.S. Government Agencies.

Section C—Sales Contract Provisions
C.1 Information gathered for statistical purposes.
C.2 Certification of independent price determination.
C.3 Reserved.
C.4 Certification of compliance with the Jones Act and the U.S. export control laws.
C.5 Schedule line items.
C.6 Acceptance of quality.
C.7 Quality differential for crude oil.
C.8 Delivery and acceptance of crude oil.
C.9 Title and risk of loss.
C.10 Environmental requirements—marine transportation.
C.11 Purchaser liability for excessive berth time.
C.12 Determination of quantity of petroleum.
C.13 Determination of quality of petroleum.
C.14 Delivery documentation.
C.15 Performance and payment guarantee.
C.16 Replacement of funds in the performance guarantee.
C.17 Letters of credit, general requirements.
C.18 Contract amount estimated for crude oil.
C.19 Purchaser payment options.
C.20 Billing and payment—with purchaser's advance payment.
C.21 Billing and payment—with purchaser's letter of credit.
C.22 Method of payment—general.
C.23 Currency for payment of contract.
C.24 Interest.
C.25 Government options if payment is not received.
C.26 Termination.
C.27 Other Government remedies.
C.28 Liquidated damages.
C.29 Failure to perform SPR contracts.
C.30 Reserved.
C.31 Limitation of Government liability.
C.32 Government options in case of impossibility of performance.
C.33 Purchaser's responsibility.
C.34 Notices.
C.35 SPR/Project Management Office representative for contract administration.
C.36 Disputes.
C.37 Assignment.
C.38 Order of precedence.

Section A—General Pre-Sale Information

A.1 List of abbreviations.

(a) *DOE:* Department of Energy
(b) *EPCA:* Energy Policy and Conservation Act, Pub. L. 94-163 (42 U.S.C. Section 6201 *et seq.*)
(c) *NA:* Notice of Acceptance
(d) *NS:* Notice of Sale
(e) *SSP:* Standard Sales Provisions
(f) *SPR:* Strategic Petroleum Reserve
(g) *SPR/PMO:* Strategic Petroleum Reserve/Project Management Office

A.2 Definitions.

(a) *Contract.* The term "Contract" means the sales contract under which the purchaser buys SPR petroleum from the Government. It

is composed of the NS, the NA, the successful offer, and the SSPs which are incorporated by reference.

(b) *Contracting Officer.* The term "Contracting Officer" means the person executing sales contracts on behalf of the Government, and any other Government employee properly designated as Contracting Officer. The term includes the authorized representative of a Contracting Officer acting within the limits of his authority, except as may be otherwise provided in the contract.

(c) *Department of Energy.* The term "Department of Energy" means the agency established by Pub. L. 95–91, 42 U.S.C. Section 7101 *et seq.* and any component thereof including the SPR Office.

(d) *Government.* The term "Government", unless otherwise indicated in the text, means the United States Government.

(e) *Line Item.* The term "line item" means a numbered listing of petroleum available for purchase by an offeror. A master line item is a listing of delivery line items consisting of quantities of crude available for sale, each with the same specifications, delivery point, and transportation restrictions. A delivery line item is a numbered item listed on a master line item specifying the amount of crude available for sale on a particular date. (See Exhibit A, Schedule of Line Items, and Provision No. C.5.)

(f) *Notice of Acceptance (NA).* The term "Notice of Acceptance" means the document which is signed by the Government to accept the purchaser's offer to create a contract.

(g) *Notice of Sale (NS).* The term "Notice of Sale" means the document announcing the sale of SPR petroleum, the amount, characteristics and location of the petroleum being sold, the delivery period and the procedures for submitting offers, as well as providing other information pertinent to a particular sale. In addition, the NS will specify what contractual provisions and financial and performance responsibility measures are applicable to a particular sale of petroleum. (See Exhibit B, Sample Notice of Sale).

(h) *Offeror.* The term "offeror" means any person or entity (including a Government agency) which submits an offer in response to a NS. An apparently successful offeror is one which will be awarded a sales contract, after it is determined that the offer is responsive and the offeror is responsible.

(i) *Petroleum.* The term "petroleum" means crude oil owned or contracted for by DOE and in storage in any permanent SPR facility, or temporarily stored in other storage facilities, or in transit to such facilities (including petroleum under contract but not yet delivered to a loading terminal).

(j) *Price Competitive Sale.* The term "price competitive sale" used in connection with a sale of SPR petroleum means one in which contract awards are made to those responsive, responsible offerors offering the highest prices.

(k) *Project Manager.* The term "Project Manager" means the chief operating officer of the SPR/PMO. He is the duly authorized representative of the Secretary of Energy for the sale of petroleum from the Reserve. He is also the Head of Procuring Activity for the SPR/PMO.

(l) *Project Management Office.* The term "Project Management Office" means the collective staff of the SPR Office in Louisiana and Texas.

(m) *Purchaser.* The term "purchaser" means any person or entity (including a Government agency) which enters into a contract with DOE to purchase SPR petroleum.

(n) *Secretary.* The term "Secretary" means the Secretary of Energy or his duly authorized representatives.

(o) *Standard Sales Provisions.* The term "Standard Sales Provisions" means a set of terms and conditions of sale, which may contain or describe financial and performance responsibility measures, for petroleum sold from the Strategic Petroleum Reserve. These SSPs constitute the "standard sales agreement" referenced in the Strategic Petroleum Reserve "Drawdown" (Distribution) Plan, Amendment No. 4 to the SPR Plan.

(p) *Strategic Petroleum Reserve.* The term "Strategic Petroleum Reserve" means that program of the Department of Energy established by Title I, Part B of EPCA.

(q) *Strategic Petroleum Reserve Office.* The term "Strategic Petroleum Reserve Office" means the Deputy Assistant Secretary for the SPR and the collective staff reporting to him.

(r) *Work day.* The term "work day" means any day except Saturday, Sunday, or a U.S. Federal Government holiday.

(s) *Headquarters Senior Procurement Official.* The term "Headquarters Senior Procurement Official" means the Director, Headquarters Procurement and Assistance Management Directorate, DOE, or his duly authorized representative.

A.3 Standard Sales Provision.

(a) These Standard Sales Provisions (SSPs) contain general pre-sale information, sales solicitation provisions, and sales contract provisions setting forth terms and conditions of sale including purchaser financial and performance responsibility measures, or descriptions thereof. The NS may specify which of such terms and conditions shall apply to a particular sale of such petroleum, and it may specify any revisions therein and any additional provisions which shall be applicable to that sale. (See Exhibit B, Sample Notice of Sale.)

(b) All offerors must, as part of their offers for SPR petroleum in response to a NS, agree without exception to all provisions of the SSPs which the NS makes applicable to the particular sale. The Government will not award a contract to an offeror which has failed to so agree.

(c) The applicable provisions of the SSPs will be incorporated into the sales contracts by referring in the NS to the SSPs.

A.4 Application of the Standard Sales Provisions.

These SSPs apply to all price-competitive sales of petroleum from the SPR.

A.5 Periodic revisions of the Standard Sales Provisions.

DOE will review the SSPs periodically and republish them in the **Federal Register**, with any revisions. When a NS is issued, it will cite the **Federal Register** and the Code of Federal Regulations in which the latest version of the SSPs was published. Since the **Federal Register** is published on a daily basis, and the Code of Federal Regulations is only revised on an annual basis (and a further time lapse occurs between the end of the period covered by the revision and the availability of the Code of Federal Regulations volume in published form), some applicable SSPs may be available at a given time in published form only in the **Federal Register**. Interested persons may obtain a copy of the SSPs by writing to the address set forth in Provision No. A.8.

A.6 Offerors list for sales of petroleum.

(a) The SPR/PMO will maintain a list of those potential offerors which wish to receive a NS whenever such a document is issued. Signatories to the Basic Sales Agreement (BSA) which was intended to be utilized in SPR sales, but which no longer applies to such sales, will automatically be included unless they ask, in writing, to be excluded. They should update the information required by (c) below. In order to assure that potential offerors will receive the NS in timely fashion, they are encouraged to submit the information in (c) as soon as possible. *A NS may be issued by telegram, with as little as a week or less allowed for the receipt of offers.* While the Government will use its best efforts to supply copies of the NS to persons not on the list who request the NS at the time an SPR petroleum sale is announced this may not always be feasible in light of the short amount of time available before offers must be received.

(b) Any firm or individual may send a written request to be on the list to the following address:

U.S. Department of Energy, Strategic Petroleum Reserve, Project Management Office, Procurement Division, Mail Stop EP 5501, 900 Commerce Road East, New Orleans, Louisiana 70123, Telephone Number (504) 734–4220

(c) The request should be in writing and should include the following information:

Name of firm
Mailing address
City, State, Zip Code
Name of authorized agent
Telephone number for agent including area code
TWX number/code
Telecopier brand name and model number
Is telecopier automatic or operator controlled?
Telephone number for telecopier transmission including area code
Telephone number for verification of message receipt including area code
Dunn's Number

A.7 Publicizing the Notice of Sale.

(a) The NS will be sent to persons whose names are on the offerors list referenced in Provision No. A.6. Potential offerors are encouraged to send a representative to the SPR/PMO to obtain a copy of the NS.

(b) The NS will be sent to firms requesting it when a sale is announced. Firms may request the NS by telephone or in writing to

the telephone number or address in Provision A.6 above.

(c) A DOE press release, which will include the salient features of the NS, will be available to any news agency.

(d) At the option of the SPR Project Manager, advertisements may be placed in publications likely to reach interested parties, such as *Oil Daily, The Wall Street Journal* or *Commerce Business Daily.* The advertisements will contain the salient features of the NS and a name and telephone number at the SPR/PMO to call for further information.

A.8 Issuing office for the Standard Sales Provisions and Notice of Sale.

Copies of the SSPs, after publication in the **Federal Register**, and copies of the NS, when one is issued, may be obtained from the following address:

U.S. Department of Energy, Strategic Petroleum Reserve Office, Project Management Office, Procurement Division, Mail Stop EO 5501, 900 Commerce Road East, New Orleans, Louisiana 79123.

A.9 Penalty for false statements in offers to buy SPR petroleum.

A penalty for making false statements is imposed in the False Statements Act, 18 U.S.C. Section 1001, which provides:

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

Section B—Sales Solicitation Provisions

B.1 Requirements for a valid offer—caution to offerors.

A valid offer to purchase SPR petroleum must meet the following conditions:

(a) The offer guarantee in an amount adequate to guarantee the offer must be received prior to the time set for the receipt of offers;

(b) The offer must be received prior to the time set for receipt of offers;

(c) All required representations and certifications must have been made;

(d) Any amendments to the NS which explicitly require acknowledgment of receipt must be properly acknowledged; and

(e) The offeror must agree without exception to all provisions of the SSPs which the NS makes applicable to a particular sale, as well as to all provisions in the NS.

B.2 Requirements of the Jones Act for U.S. flag vessels—caution to offerors.

The Jones Act, 46 U.S.C. Section 883, prohibits the transportation of any merchandise, including SPR petroleum, by water or land and water, on penalty of forfeiture thereof, between points within the United States (excluding the Virgin Islands) in vessels other than vessels built in and documented under laws of the United States, and owned by United States citizens, unless the prohibition has been waived by the Secretary of the Treasury. Transportation plans required by Provision No. B.22 shall reflect compliance with the Jones Act.

B.3 "Superfund" tax on SPR petroleum—caution to offerors.

The Hazardous Substance Response Revenue Act of 1980 Pub. L. 96-510, 26 U.S.C. Section 4611 *et seq.* imposes a tax of .079 cent a barrel on (1) crude oil received at a United States refinery and (2) petroleum products (including crude oil) entered into the United States for consumption, use, or warehousing. The Government already has paid the tax on some of the oil imported and stored in the SPR. No tax has been paid either on imported oil stored in the SPR prior to the effective date of this Act, or on the domestic oil stored in the SPR. Because various crude oils have been commingled in the SPR, on drawdown of the SPR it will not be possible to indicate to a purchaser of SPR crude oil which oil already has been taxed and which oil has not. Therefore, offerors may be liable to the Internal Revenue Service for the tax on SPR oil either received at a U.S. refinery, used, or exported. DOE has requested that the Internal Revenue Service develop a method to designate the oil on which the taxes have been paid; until such time as procedures are developed, or the tax expires, offerors are advised that they are responsible for payment of any "Superfund" taxes if they are assessed.

B.4 Export limitations and licensing—caution to offerors.

(a) Export of SPR crude oil is subject to U.S. export control laws, the provisions of which differ depending on the source of the crude oil proposed to be exported. For example, imported crude oil stored in the SPR may be exported pursuant to applicable Department of Commerce "Short Supply Controls", 15 CFR Part 377, if: the export is part of a transaction resulting in the importation of refined products of a quantity and quality not less than would be derived from domestic refining; the products are to be sold at prices no higher than the lowest prices at which they could have been sold by the nearest capable U.S. refinery; and for compelling economic or technological reasons beyond the exporter's control, the crude oil cannot reasonably be processed in the U.S (10 CFR Section 377.6(d)(1)(vii)). However, there are somewhat more stringent, independent statutory tests to be met as preconditions to the export of certain other crude oils stored in the SPR, including Alaskan North Slope (ANS) and Naval Petroleum Reserves (NPR) oil. *See* section 7(d) of the Export Administration Act of 1979, 50 U.S.C. App. Section 2406(d) (ANS oil) and 10 U.S.C. Section 7430(e) (NPR oil); *see also* 30 U.S.C. Section 185(u) (oil shipped across a Mineral Lands Leasing Act Section 28(u) right-of-way) and 43 U.S.C. Section 1354(a) (OCS oil).

(b) The transportation plan required in Provision No. B.22 shall reflect compliance with the U.S. export control laws. However, offerors for SPR petroleum are put on notice that the various SPR crude oils, subject to different export control laws, have been commingled in storage.

B.5 Preparation of offers.

In the event petroleum is sold from the SPR, the Government will issue a NS containing all of the pertinent information necessary for the offeror to prepare a priced offer. *A NS may be issued by telegram, with as little as a week or less for the receipt of offers.* Offerors are expected to examine the complete NS document, and to become familiar with the SSPs cited therein. Failure to do so will be at the offeror's risk.

B.6 Submission of offers and modification of previously submitted offers.

(a) Unless otherwise provided in the NS, offers may be submitted to the Government by mail, telegram, or mailgram. Offerors using offer bonds (SF-24), cashier's checks or certified checks may not submit them by telegram but must submit them in hard copy by mail or hand delivery.

(b) Unless otherwise provided in the NS, offers may be modified or withdrawn by mail, telegram, or mailgram, provided that the mail, telegram, or mailgram is received at the designated office prior to the hour and date specified for receipt of offers.

(c) Envelopes containing offers shall be plainly marked on the outside; "RE: SALE OF PETROLEUM FROM STRATEGIC PETROLEUM RESERVE. OFFERS ARE DUE (insert time of opening), LOCAL NEW ORLEANS, LA TIME on (insert date of opening). MAIL ROOM MUST MARK DATE AND TIME OF RECEIPT ON FACE OF THE ENVELOPE."

(d) The envelop shall be marked with the full name and return address of the offeror.

(e) Offers and modifications being sent by mail, telegram, or mailgram must be received at the address specified in the NS.

(f) Handcarried offers brought to the SPR/PMO in New Orleans, Louisiana on the day set for receipt of offers, or any day prior to that day, shall be taken by the offeror to the place specified in the NS. This includes mail being delivered by a delivery service. Handcarried offers shall be placed in the bid box on Saturdays, Sundays, and U.S. Government holidays or after business hours on workdays.

B.7 Acknowledgement of amendments to a Notice of Sale.

When an amendment to a NS requires acknowledgement of receipt, receipt by an offeror must be acknowledged (a) by signing and returning the amendment, or (b) by letter, mailgram, or telegram in either case to be sent to the address specified in the NS. Such acknowledgement must be received prior to the hour and date specified for receipt of offers.

B.8 Documents required in offer and award.

If an offeror is successful, the Government will make award using a Notice of Acceptance (NA) signed by the Contracting Officer. The NA will identify the items, quantities and prices, and method of delivery which the Government is accepting. Attached to the NA will be the NS and the successful offer. Provisions form Section C of the SSPs

will be made applicable through incorporation by reference in the NS. The Contracting Officer also shall provide the purchaser with an information copy of the then-current SSPs as published in the **Federal Register.** If time constraints require it, the Government may accept the offeror's offer by an electronic notice, such as telegram or telegraph, and the contract award shall be effective upon issuance of such notice. The electronic notice will be followed by a mailing of full documentation as described above.

B.9 Late offers, modifications of offers, and withdrawal of offers.

(a) Any offer received at the office designated in the NS after the exact time specified for receipt will be considered only if it is received before award is made and only under the following conditions:

(1) It was sent by registered or certified mail not later than the fifth calendar day prior to the date specified for the receipt of offers (e.g., an offer submitted in response to a NS requiring receipt of offers by the 20th of the month must have been mailed by the 15th or earlier); or,

(2) It was sent by mail, telegram or mailgram if authorized, and it is determined by the Government that the late receipt was due solely to mishandling by the Government after receipt at the Government installation.

(b) Any modification or withdrawal of an offer is subject to the same conditions as in (a) above. An offer may also be withdrawn in person by an offeror or its authorized representative, provided the representative's identity is made known and the representative signs a receipt for the offer, but only if the withdrawal is made prior to the exact time set for receipt of offers.

(c) The only acceptable evidence to establish:

(1) The date of mailing of a late offer, modification, or withdrawal sent either by registered or certified mail is the U.S. Postal Service postmark on both the envelope or wrapper and the original receipt from the U.S. Postal Service. If neither postmark shows a legible date, the offer, modification or withdrawal shall be deemed to have been mailed late. (The term "postmark" means a printed, stamped, or otherwise placed impression, exclusive of a postage meter machine impression, that is readily identifiable without further action as having been supplied and affixed on the date of mailing by employees of the U.S. Postal Service. Therefore, offerors should request the postal clerk to place a hand cancellation bull's-eye "postmark" on both the receipt and the envelope or wrapper.)

(2) The time of receipt at the Government installation is the time/date stamp of such installation on the offer's wrapper or other documentary evidence of receipt maintained by the installation.'

(d) Notwithstanding (a) and (b) of this provision, a late modification of an otherwise successful offer which makes its terms more favorable to the Government will be considered at any time it is received, and may be accepted.

B.10 Explanation requests from offerors.

Offerors may request explanations regarding meaning or interpretation of the NS on other than SSPs from the individual and telephone number indicated in the NS. On complex and/or significant questions, the Government reserves the right to have the offeror put the question in writing by mail, telegram of mailgram. Explanation or instructions regarding complex or significant issues will be given to prospective offerors only as an amendment to the NS.

B.11 Currency for offers.

Prices shall be stated and amounts shall be paid in U.S. dollars.

B.12 Financial statement.

After receipt of offers but prior to making award, the Government reserves the right to ask for the offeror's latest annual financial statement containing its balance sheet and profit and loss statement for the period covered thereby. A certification by a principal accounting officer that there have been no material changes in financial condition since the date of the statement, and that it presents the true financial condition as of the date of the offer, shall accompany the statement. If there has been a change, the amount and nature of the change must be specified and explained. The Contracting Officer must receive the data within three work days of a telephone request to the offeror.

B.13 Proprietary data.

If any data submitted in connection with a sale is considered proprietary, that information should be so marked. An explanation shall also be submitted as to the reason such data should be considered proprietary. Any final decision as to whether the material so marked is proprietary will be made by the Government. All DOE Freedom of Information regulations governing the release of proprietary data shall apply.

B.14 Notice of Sale line item schedule—petroleum quantity, quality, etc.

(a) Unless the NS provides otherwise, the master line items and delivery line items for sales contracts are as provided in Exhibit A, Schedule Line Items, to these SSPs. Each master line item is a listing of delivery line items consisting of quantities of crude oil available for sale, each with the same specifications, delivery point and transportation restrictions. Currently, in a drawdown the SPR may offer for sale up to seven mixtures of crude oil and/or a single generic type. Each master line item also will impose either one of two possible delivery restrictions on the sale of SPR crude: (1) either the oil must be moved from the delivery point by a major common carrier pipeline connected to the SPR sites (over the Seaway, Texoma or Capline pipeline), or (2) it must be moved by other means, including tanker or non-common carrier pipeline. Thus there currently are sixteen master line items in Exhibit A (eight SPR crudes, each with two possible delivery restrictions). These will be further divided into lots of various sizes, and each lot will have a specified delivery line item. Each delivery line item will contain only one lot of a specified amount of petroleum with a specific delivery date. Each offeror, if determined to be the highest bidder on a delivery line item, agrees to enter into a contract and take delivery from the Government of the petroleum specified in that delivery line item on the date specified, in accordance with the terms of the contact. Both the master line items and the delivery line items may be supplemented or changed by the NS. For example, the NS may provide for two different lots on the same day, which would be reflected as two subitems on a delivery line item.

(b) Exhibit D, SPR Crude Oil Characteristics and Delivery Point Data, contains current specifications of each SPR crude oil and the delivery point for each. These specifications may change as more crude oils are stored in the SPR. Prospective purchasers are cautioned that the NS will provide the actual specification as to petroleum to be sold, should SPR petroleum specifications change as the SPR acquires additional crude oil. To the extent practicable, the NS will provide more specific data on each SPR crude offered.

DOE will use its best efforts to determine the availability of excess common carrier pipeline capacity before deciding how much of each SPR crude oil to make available for major common carrier pipeline delivery. However, DOE cannot guarantee that such capacity is available, and each apparently successful offeror is responsible for complying with the applicable pipeline tariffs.

(c) Offerors may make offers on more than one delivery line item. Offerors may not propose a different delivery point, delivery method or date from the delivery point, method and date set out by master line item and delivery line item. Unless otherwise specified in the NS, offerors may not make alternate offers; e.g., the offer may *not* state: either delivery line item number 0001A or delivery line item number 0001B, but not both.

(d) On some delivery line items the Government may receive no acceptable offers. Such delivery line items will behandled by the Phase II procedure set out in Provision No. B.20, Procedure for evaluation of offers. OFFERORS SHOULD INDICATE WHETHER OR NOT THEY WANT TO BE CONSIDERED FOR AWARDS UNDER PHASE II PROCEDURE.

B.15 Reserved.

B.16 Information to be provided to DOE by the offeror on each delivery line item of its offer to buy petroleum.

The following information will be provided to the Government by the offeror in its offer on each delivery line item (see also Exhibit E, Sample Offeror Response Sheet).

(a) Price offered in U.S. dollars per specified unit of measure, i.e., barrels;

(b) Maximum quantity from this delivery line item wanted by the offeror, if the NS permits the offeror to so specify;

(c) Minimum quantity from this delivery line item wanted by the offeror, if the NS permits the offeror to so specify;

(d) Elected method of taking delivery, if a choice is given;

(e) Acknowledgement and acceptance of the time period provided for in the NS; and
(f) Any other data required by the NS.

B.17 Information to be provided by DOE to purchaser on each deilivery line item awarded in the Notice of Award.

The following information will be provided to the purchaser by the Government on the NA for each master line item and/or delivery line item if the offeror is awarded a contract:
(a) Line item number;
(b) Characteristics of petroleum awarded;
(c) Total quantity awarded on the master line item and on each delivery line item;
(d) Price in U.S. dollars per specified unit, i.e., barrels;
(e) Extended total price offer for that line item;
(f) Delivery point;
(g) Delivery period;
(h) Method of delivery; and
(i) Any other data necessary for the sales contract.

B.18 Delivery points for crude oil sold from storage.

(a) The NS may specify delivery at one or more delivery points. The following list of delivery points and their geographical locations represent the terminal and dock facilities currently interconnected with permanent SPR storage facilities (see also Exhibit D. SPR Crude Oil Characteristics and Delivery Point Data):

Delivery point	Geographical location
Seaway Terminal	Freeport, Tex.
Seaway Docks	Freeport, Tex.
Sonoco Terminal	Nederland, Tex.
Sunoco Docks	Nederland, Tex.
Locap Terminal	St. James, La.
DOE St. James Docks	St. James La.

(b) Delivery points are subject to change by the NS and may include additional or alternate facilities utilitized in connection with Government contracts for the purchase of petroleum to fill the SPR. These may include loading terminals or transshipment terminals. Alternatively, the Government or its contractor may provide the transportation to the purchaser's facility, for example, when the oil is in transit to the SPR at time of sale.
(c) The NS may specify facility operator, contact information for scheduling delivery of cargoes purchased, and modes of transportation applicable for each delivery point (i.e., pipeline, barge, tanker, etc.), as well as applicable port data/restrictions (see Exhibit D, SPR Crude Oil Characteristics and Delivery Point Data, for additional information).

B.19 Evaluation of offers

The Contracting Officer will be the sole judge as to whether an offer conforms to the SSPs and the NS. The Contracting Officer will award to the highest responsible offeror whose offer is responsive to the SSPs and NS. The Government reserves the right to reject any or all offers and to waive minor informalities or irregularities in offers received.

B.20 Procedures for evaluation of offers.

(a) Evaluation of offers will take place in two phases. In Phase I, only offers on each delivery line item will be evaluated against each other. In Phase II, all offers for a particular master line item will be evaluated for the purpose of awarding contracts on delivery line items which had no acceptable offers. Offerors' attention is directed to the definition of "line item" in Provision No. A.2(e).
(b) Phase I—delivery line item evaluation—
(1) Any offers below a minimum acceptable price, specified in the NS, will be rejected as being non-responsive.
(2) All other offers on each delivery line item will be arrayed from highest price to lowest price for award consideration.
(3) Tied offers are two or more offers on the same delivery line item at the same price. Tied offers will be arrayed by drawing lots.
(4) The highest offers will be reviewed for responsiveness to the terms of the NS.
(5) Determinations of responsibility of potential purchasers before each award will be made by the Contracting Officer. Compliance with required performance and payment guarantees will effectively assure a finding of responsibility of offerors, except where: (i) a transportation plan on its face, or documents furnished in response to the Contracting Officer's request, raise substantial doubt as to the offeror's ability to take timely delivery of SPR petroleum and transport it to its destination point; (ii) evidence comes to the attention of the Contracting Officer, with respect to an offeror, of conduct or activity which represents a violation of law or regulation (including an Executive Order having the force and effect of law); or (iii) evidence is brought to the attention of the Contracting Officer of past activity or conduct of the offeror which shows a lack of integrity or willingness to perform, so as to substantially diminish the Contracting Officer's confidence in the offeror's performance under a proposed contract. Apparently successful offerors will be contacted by telephone and advised to provide the Contracting Officer, within three business days or such other time as the Contracting Officer shall determine, a letter of credit (see Exhibit F, Letter of Credit—Required Form) for cash guarantee as specified in the NS or SSPs, and details on transportation arrangements (see Exhibit C, Offeror Transportation Plan).
(6) Award on each delivery line item will be made to the responsive, responsible offeror which has offered the highest acceptable offer and which has provided the required letter of credit or cash guarantee.
(c) Phase II—master line item evaluation—
(1) If after Phase I, there are any delivery line items for which no acceptable offers were received, then Phase II will occur. During Phase II all offers above the minimum acceptable price (from offerors who have indicated that they wish to participate in Phase II) in each master line item with unawarded lots, will be arrayed in a single list from highest price to lowest price without regard to the delivery line item on which prices were originally offered.
(2) In Phase II, tied offers are two or more offers for the same master line item of petroleum at the same price. In tie breaking under Phase II, offerors which were unsuccessful as a result of the tie breaking procedures in (b)(3) above shall be arrayed above successful offerors at the same price. Any ties in Phase II not broken by that procedure will be arrayed by a new drawing of lots.
(3) Subject to paragraph (2), each offer of an offeror which made offers on more than one delivery line item on a master line item will be ranked according to price.
(4) Because of the extremely short time contraints which will have to be placed on Phase II, offerors participating in Phase II are encouraged to consider in advance which other delivery line items the offeror would contract for.
(5) The Contracting Officer will offer by telephone or other appropriate means the remaining delivery line items (for which no acceptable offers had been received) to the offeror with the highest arrayed offer for that master line item. The offeror will have the option of taking delivery of any or all of the remaining delivery line items in that master line item. The price for each of these delivery line items will be the price that the offeror had offered for delivery line items in the Phase I evaluation.
(6) The offeror shall have one hour after specific offer by the Contracting Officer to accept the Government's offer for the additional delivery line items. Such acceptance may be by telephone. The Contracting Officer may make a recording of such conversation. The Contracting Officer may require immediate confirmation of the offeror's acceptance in writing.
(7) If the first offeror does not accept delivery of all of the delivery line items on the master line item offered by the Contracting Officer, the offeror with the next highest arrayed offer will be given the option of taking delivery of any or all of the remaining delivery line items, within the same length of time specified in (c)(6). The Contracting Officer shall continue down the list of offers in this manner until there is an acceptable offer for all of the delivery line items on the master line item, or until the remaining delivery line items are offered to the offeror with the lowest arrayed offer above the minimum price.
(8) The price that an offeror which offered different prices on different delivery line items for the Phase I evaluation shall pay for a delivery line item offered in Phase II shall depend upon when the offeror agrees to accept the Government's offer of the delivery line item. Offers are arrayed rather than offerors; therefore, in Phase II an offeror with multiple offers may refuse to accept a delivery line item under the Phase II offer at the higher offered price, but may accept it later if the Contracting Officer again offers the delivery line item after contacting all other offerors with offers arrayed between the first offeror's highest and next lowest offer. The Contracting Officer will not accept the lower price from an offeror with multiple offers without first making the delivery line items in that master line item available to all other offerors with higher prices. Offerors with multiple offers are cautioned that in

refusing delivery at a higher offered price, they may risk not being given a later opportunity to acquire the oil at a lower offered price.

(9) At the Contracting Officer's option, an apparently successful offeror in the Phase I evaluation, which is offered delivery line items under a master line item in Phase II, may be allowed to accept the Phase II delivery line item as a substitute for the first, provided the Phase II delivery line item is for a larger quantity of oil than was to be delivered under the apparent Phase I award. In the event that the Contracting Officer allows this substitution, the original delivery line item will go to the next highest arrayed offer for that delivery line item in Phase I. In the event that there is no other Phase I offer, the original delivery line item shall be included in the Phase II evaluation.

(10) Award of contracts for delivery line items accepted by offerors in Phase II will be made after the Contracting Officer has determined that the offer is responsive and that the offeror is responsible in accordance with (b)(4), (b)(5) and (b)(6) above.

B.21 Procedures for resolicitation of offers on unsold delivery line items.

(a) In the event that delivery line items remain unsold after completion of the Phase I and Phase II evaluation process, the Contracting Officer may issue an amendment to the NS, resoliciting offers on these delivery line items from all interested parties, not just those making offers in response to the original NS. Evaluation procedures for these delivery line items shall follow the procedures set forth in B.20. The Government reserves the right to change the master line items and delivery line items to propose different SPR crudes, delivery methods, lot sizes and delivery dates for the purpose of such resolicitation.

(b) In the event that for any reason a delivery line item which has been awared becomes available to the Government for resale, the Contracting Officer may use the following procedures:

(1) If priced offers remain valid in accordance with Provision No. B.23, the delivery line item will go to the next highest arrayed offer for that delivery line item in Phase I; otherwise, it shall be offered in accordance with the master line item evaluation procedures in Provision No. B.20(c).

(2) If offers have expired in accordance with Provision No. B.23, the delivery line item may be offered to the next highest arrayed offer for that delivery line item in Phase I. The pertinent offeror may, at its option, accept or reject that delivery line item at the price originally offered, and if that offeror rejects the delivery line item, it will be offered to the next highest offeror, etc.

(3) If the delivery line item is not then resold, the Contracting Officer may at his option proceed with the Phase II master line item evaluation procedures of Provision No. B.20(c), amend the NS to resolicit offers for that delivery line item, or add the delivery line item to the next sales cycle.

B.22 Transportation arrangements.

(a) By submission of an offer, the offeror represents that it or another party with which it has a resale or exchange agreement, can take timely delivery of all petroleum for which a priced offer has been submitted.

(b) After the time set for receipt of offers, but prior to the award of a contract, each apparently successful offeror will be required to give the Government information showing its capability, or that of another party with which it has a resale or exchange agreement, to transport the petroleum from the delivery point. Such transportation plans must be submitted in the form provided in Exhibit C, Offeror Transportation Plan. If the apparently successful offeror does not provide such arangements within a time limit to be set by the Contracting Officer, the Government will not award a contract to that offeror. Such time limit in the case of a Phase I apparently successful offer shall not be less than three business days (or such other time the Contracting Officer shall determine) from the time the offeror is first notified of the apparently successful offer.

(c) The offeror's attention is directed to Provision No. B.4, Export limitations and licensing and Provision No. B.2, Requirement of the Jones Act for U.S. flag vessels.

B.23 Offeror's certification of acceptance period.

(a) By submission of an offer, the offeror certifies that its priced offer will remain valid for 10 calendar days after the date set for the receipt of offers.

(b) By written mutual agreement of DOE and the offeror, an individual offeror's acceptance period may be extended for a longer period.

B.24 Offer guarantee.

(a) Each offeror must submit an acceptable offer guarantee. The offer guarantee must be received at the place specified for receipt of offers prior to the time and date set for receipt of offers.

(b) An offeror's failure to submit a timely, acceptable guarantee will result in rejection of its offer.

(c) The amount of the offer guarantee is ten million dollars or 30 percent of the total offer, whichever is less.

(d) Each offeror must submit one of the following types of offer guarantees with its offer:

(1) An offer bond executed on U.S. Government Standard Form 24;

(2) A certified or cashier's check payable to the Treasurer of the United States, drawn on a U.S. Bank that is a member of the Federal Reserve System; or

(3) A wire cash deposit to a special SPR/PMO account.

(e) If the offeror, a surety company or bank forwards the offer guarantee separately from the offer, the envelope shall clearly say "OFFER GUARANTEE OF (Name of company)" and shall be clearly marked in accordance with Provisions No. B.6(c).

(f) In the event that the offeror withdraws its offer within 10 days following the date set for receipt of offers, or in the event that the offeror fails to furnish a satisfactory transportation plan or performance and payment guarantee within the time limit specified by the Contracting Officer, it shall be liable for any amount lost by the Government due to the difference between its offer and the resale price, and the offer guarantee shall be used toward offsetting such difference. Use of the offer guarantee for such recovery will not preclude recovery by the United States of damages in excess of the amount of the offer guarantee caused by the offeror's failure to keep its offer open for 10 calendar days after receipt of offers, or to provide the required transportation arrangements or performance and payment guarantee with the time limit set by the Contracting Officer.

(g) Guarantees (except bonds) will be returned to unsuccessful offerors within 25 calendar days after the date set for receipt of offers, and to successful offerors upon receipt of a satisfactory performance and payment guarantee. Offer bonds (Standard Form 24) will be returned only upon written request. Where the offer guarantee was a wire cash deposit, a cashier's check or a certified check, it may be applied toward either advance payment or cash guarantee amounts.

B.25 Procedures for selling to other U.S. Government Agencies.

(a) If a U.S. Government Agency submits an offer for crude oil in a price competitive sale, that offer will be arrayed for award consideration in Phase I and Phase II evaluation in accordance with Provision No. B.20, Procedures for Evaluation of Offers. If a U.S. Government Agency is an apparently successful offeror, award and payment will be made exclusively in accordance with statutory and regulatory requirements pertaining to interagency agreements, and the U.S. Government Agency will be responsible for complying with these within the time limits set by the Contracting Officer.

(b) U.S. Government Agencies are exempt from all guarantee requirements, but must complete all data on transportation arrangements (modified as appropriate to reflect differences in the applicability of laws referred to in Exhibit C, Offeror Transportation Plan) and representations and certifications. No failure by a U.S. Government Agency to comply with any of the requirements of thes SSPs shall provide a basis for challenging a contract award to the U.S. Government Agency.

Section C—Sales Contract Provisons

C.1 Information gathered for statistical purposes.

The Contracting Officer, at his discretion, may require the purchaser to submit information called for in Exhibit G, Information for Statistical Purposes. That information may be used for analytical purposes, but will have no effect on contract evaluation and award.

C.2 Certification of independent price determination.

(a) By submission of an offer, the offeror certifies that in connection with the offer:

(1) The prices in the offer have been arrived at independently, without consultation, communication, or agreement, for the purpose of restricting competition, as to any matter relating to such prices, with any other offeror or with any competitor;

(2) Unless otherwise required by law, the prices which have been quoted in the offer have not been knowingly disclosed by the offeror and will not knowingly be disclosed directly or indirectly by the offeror prior to award, to any other offeror or to any competitor; and

(3) No attempt has been made or will be made by the offeror to induce any other person or firm to submit or not to submit an offer for the purpose of restricting competition.

(b) Each person signing the offer certifies that:

(1) He is the person within the offeror's organization responsible for the decision as to the prices being offered, and that he has not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above; or

(2)(i) He is not the person in the offeror's organization responsible within that organization for the decision as to the prices being offered but that he has been authorized in writing to act as agent for the persons responsible for such decision in certifying that such persons have not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above, and as their agent does hereby so certify; and (ii) he has not participated, and will not participate, in any action contrary to (a)(1) through (a)(3) above.

(c) An offeror will not be considered for award where (a)(1), (a)(3), or (b) above has been deleted or modified. Where (a)(2) above has been deleted or modified the offer will not be considered for award unless the offeror furnishes with the offer a signed statement which sets forth in detail the circumstances of the disclosure and unless it is determined that such disclosure was not made for the purpose of restricting competition.

C.3 Reserved.

C.4 Certification of compliance with the Jones Act and the U.S. export control laws.

By submission of this offer, the offeror certifies that it will comply with the Jones Act, 46 U.S.C. Section 883, regarding use of United States flag vessels in the transportation of oil between points within the United States, and with any applicable U.S. export control laws affecting the export of SPR petroleum. Purchasers who have failed to comply with the Jones Act or the export control laws in the SPR sales may be found to be nonresponsible in the evaluation of offers under Provision No. B.20 of the SSPs. Those purchasers may also be subject to proceedings to make them ineligible for future awards in accordance with 10 CFR Part 625.

C.5 Schedule line items.

Exhibit A, Schedule Line Items, gives a schedule of master line items and their associated delivery line items which may be used in a sale. There will be no minimum price on either kind of line item unless the NS specifically gives one. The quality differentials will be as specified in Provision No. C.7 unless the NS specifically changes them. The quantity for each delivery line item which will be given in the NS is not subject to increase or decrease at the choice of the offeror. The DOE may vary actual delivery plus or minus 15% in accordance with Provision No. C.18.

C.6 Acceptance of quality.

Except as provided hereafter, the Government does not guarantee that the crude oil delivered will meet the characteristics cited in the NS, and assumes no responsibility for deviations in quality. The NS will specify the range of specifications for each SPR crude oil offered on a master line item as well as the average characteristics as shown in Exhibit D, SPR Crude Oil Characteristics and Delivery Point Data. In the event that the specifications of the crude oil delivered do not fall within the range of specifications in the NS, the purchaser has the option of either accepting the crude oil with the price adjusted in accordance with Provision No. C.7, or not accepting the crude oil. In the event that the specifications of the crude oil delivered fall within the range of specifications in the NS but do not meet the specific range of API gravity and/or total sulfur content cited in the NS as the average specifications for that crude oil, the price shall be adjusted in accordance with Provision No. C.7.

C.7 Quality differential for crude oil.

Unless otherwise specified in the NS, the following price adjustments will be made:

(a) A price adjustment (increase price as API gravity increases; decrease price as API gravity decreases) shall be made for any API gravity differential by adding or subtracting seven cents ($.07) per barrel for each whole degree API that the crude oil delivered varies either from the offered crude oil's API gravity, or the outer edge of the range of API gravity, whichever is specified in the NS.

(b) Another price adjustment (decrease price as total sulfur content increases; increase price as total sulfur content decreases) shall be made for any sulfur differential by adding or subtracting seven cents ($.07) per barrel for each one-tenth of one percent that the sulfur content of the crude oil delivered varies either from the offered crude oil's total sulfur content, or the outer edge of the range of sulfur content, whichever, is specified in the NS.

C.8 Delivery and acceptance of crude oil.

(a) The purchaser, at his expense, shall make all necessary arrangements to accept delivery of the SPR petroleum. The Government will deliver and the purchaser will accept said petroleum at delivery points listed in the NS. Title and risk of loss shall pass to the purchaser at such delivery points in accordance with Provision No. C.9. The purchaser shall be responsible for meeting any delivery requirements imposed at those delivery points including complying with the rules, regulations, and procedures contained in applicable port/terminal manuals or other applicable documents such as pipeline tariffs on file with the Federal Energy Regulatory Commission.

(b) The following tanker loading conditions shall apply:

(1) Upon receipt of the NA, the purchaser shall furnish the SPR/PMO with an estimated schedule of planned lifting vessel arrivals.

(2) The arrival window shall be as established in the NS.

(3) The tanker shall have a minimum average load rate of 20,000 barrels per hour.

(4) At least ten (10) days in advance of each scheduled arrival date, unless the NA specifies another time, the purchaser shall furnish the SPR/PMO with vessel nominations specifying: (i) name and size of vessel, (ii) date of arrival, (iii) quantity to be loaded and contract number, and (iv) other relevant information requested in writing by the Contracting Officer. Once established, such nomination details can only be changed with the Government's prior written consent. The purchaser shall be entitled to substitute another vessel of similar size for any vessel so nominated, subject to the Government's approval. The Government should be given at least four (4) days notice prior to the actual firm date of arrival loading specified in the contract. The Government shall make a reasonable effort to accept any nomination for which notice has not been given in strict accordance with the above provisions.

(5) The purchaser shall arrange to have its vessel notify the SPR/PMO of the expected hour of arrival 72, 48 and 24 hours in advance, and after the first notice, to advise of any variation of more than four (4) hours. When the vessel is not more than six (6) hours from the load port and is ready to load, a Notice of Readiness shall be tendered by the tanker's Master and promptly confirmed in writing to the SPR/PMO and the terminal responsible for coordination of crude oil loading operations. Such notice shall be effective only if given during customary business hours of the port of loading.

(6) The Government shall use its best efforts to berth the purchaser's vessel as soon as possible after receipt of the Notice of Readiness.

(7) Hose and fittings for loading shall be provided by the Government.

(c) The following pipeline delivery conditions shall apply:

(1) Prior to the 26th day of the month preceding the month of delivery, the purchaser shall furnish the SPR/PMO with the following information: (i) confirmation of the pipeline's acceptance of the full amount of the petroleum proposed to be delivered; (ii) an estimated schedule (consistent with the terms of the contract) for delivery of the petroleum to the pipeline; and (iii) the name and telephone number of the pipeline point of contact with whom the SPR/PMO should coordinate the petroleum delivery.

(2) Once established, the pipeline delivery schedule can only be changed with the Government's prior written consent.

C.9. Title and risk of loss.

Unless otherwise provided in the NS, title to and rise of loss for petroleum purchased from the Government will pass to the purchaser at the delivery point as follows:

(a) For marine shipment—when the petroleum passes the permanent loading equipment connections of the dock facility to the tankship/barge flange.

(b) For pipeline shipment—when the petroleum passes the permanent flange connecting the commercially owned pipeline

to the terminal central manifold at the delivery point.

(c) For in transit shipments—when the petroleum passes the permanent flange of the tankship manifold upon discharge into a marine terminal facility or another vessel.

(d) Terms for other SPR petroleum outside the U.S. will be given in the NS if they are applicable to the sale.

C.10 Environmental requirements—marine transportation.

(a) Vessels to be used for the transportation of oil purchased from the SPR will comply with all applicable rules and regulations, including The Ports and Waterways Safety Act, the Federal Water Pollution Control Act of 1972, the Oil Pollution Control Act of 1961, and other applicable statutes, rules and regulations, including the following: Parts 151, 153, 157, and 159, of Title 33 and Parts 30–36 and 542 of Title 46 of the Code of Federal Regulations.

(b) The purchaser will employ in the performance of this contract only vessels whose owners are parties to the Tanker Owners Voluntary Agreement Concerning Liability for Oil Pollution (TOVALOP) or who carry equivalent liability coverage.

(c) All crude oil transfer operations in performance of the purchase will be in accordance with the guidelines detailed in the International Oil Tanker Safety Guide, and U.S. Coast Guard Regulations, and the "Ship to Ship Transfer Guide" of the International Chamber of Shipping Oil Companies International Marine Forum.

(d) Failure to comply with all environmental requirements will be considered a failure to comply with the terms of any contract containing these SSPs, and may result in termination for default in accordance with Provision No. C.26.

C.11 Purchaser liability for excessive berth time.

The Government reserves the right to direct a marine vessel loading SPR oil at a delivery point specified in the NS, to vacate its SPR berth, should such vessel, through its operational inability to receive oil, cause the berth to be unavailable for an already scheduled follow-on vessel. Furthermore, should a breakdown of the vessel's propulsion system prevent its getting under way on its own power, the Government may cause the vessel to be removed from the berth with all costs to the account of the purchaser.

C.12 Determination of quantity of petroleum.

(a) Quantities will be determined from certified opening and closing tank gauge reports or delivery meter reports. All volumetric measurements will be converted to net barrels at 60°F using ASTM–ID Tables 5A and 6A, Petroleum Measurement Tables (American Edition), and by deducting basic sediment and water (BS&W) as determined from the composite all levels samples taken from the delivery tanks, and free water.

(b) The quantity determination shall be made and certified by the Government's authorized contractor responsible for loading operations, and witnessed by a Government Quality Assurance Representative at the delivery point. Should the purchaser arrange for additional inspection services to witness quantity determination, such services will be for the account of the purchaser. Any disputes shall be settled in accordance with Provision No. C.36, Disputes.

C.13 Determination of quality of petroleum.

(a) The quality determination of the crude oil delivered to purchaser shall be made from a composite of all levels of samples taken from delivery tanks or line samples. Tests to be performed by the Government or its authorized contractor are:

(1) ASTM D96 Water and Sediment in Crude Oils or ASTM D95 Water in Petroleum Products by Distillation and ASTM D473 Sediment in Crude Oils by Extraction.

(2) ASTM D1552 Sulfur in Petroleum Products (high temperature method) or ASTM D2622 Sulfur in Petroleum Products (X-Ray Spectographic Method).

(3) ASTM D1298–72 API Gravity of Crude Petroleum by Hydrometer Method.

(4) ASTM D445 Kinematic Viscosity of Transparent and Opaque Liquids.

(b) If a purchaser requires additional tests to be performed upon delivery, their cost shall be for the account of the purchaser. Any disputes shall be settled in accordance with Provision No. C.36, Disputes.

C.14 Delivery Documentation.

The quantity and quality determination shall be documented on the appropriate Department of Defense Petroleum Shipping and Inspection Report, DD250 (Pipeline) or DD250–1 (Tanker/Barge) (see Exhibit I for copies of the forms). Copies of the complete DD Form 250 or DD250–1 will be furnished to the purchaser and/or the purchaser's authorized representative upon completion of delivery. They will serve as the basis for invoicing and/or reconciliation invoicing for the sale of petroleum as well as for invoicing such associated services as may be provided for in the contract.

C.15 Performance and payment guarantee.

(a) The purchaser shall maintain in full force and effect a performance and payment guarantee satisfactory to the Contracting Officer for a period of one year from the date of the NA, unless otherwise released from this requirement by the Contracting Officer. The performance and payment guarantee must be in place before the Government will execute a NA. Failure to provide an acceptable performance and payment guarantee within a time limit to be specified by the Contracting Officer will be cause for rejection of the offeror's offer and grounds for liability by the offeror under the offer guarantee.

(1) The Contracting Officer or his designee may draw against this performance and payment guarantee at any time after the first delivery date specified in the contract for any monies due under the contract; and

(2) The Contracting Officer or his designee may draw against this performance and payment guarantee for any monies owing to the Government under the contract, no matter how the debt to the Government arose.

(b) The purchaser must furnish an acceptable performance and payment guarantee before the government will execute the contract. The Government may specify a time deadline for furnishing the guarantee which may be as short as three (3) business days. The Government will give the purchaser a provisional contract number to use on the performance and payment guarantee.

(c) The performance and payment guarantee must be either (1) a cash wire deposit or (2) a letter of credit as shown in Exhibit F, Letter of Credit—Required Form. If a letter of credit is chosen, all costs will be borne by the purchaser.

(d) The amount of the letter of credit shall be 115 percent (115%) of the contract amount. The cash guarantee, on a contract for one month or less, is 115% of the contract price; on a contract for more than one month, it is 100% times 45 days delivery under the contract plus 15% of the entire contract amount.

C.16 Replacement of funds in the performance and payment guarantee.

(a) If the SPR/PMO (which may act through its Finance Division), with the approval of the Contracting Officer draws against the letter of credit, or cash deposit, for monies owed the Government for liquidated damages or other funds due the Government, the SPR/PMO or its Finance Division shall notify the purchaser within twenty-four hours of the fact of the withdrawal and the amount thereof. The Government shall dispatch such notification by U.S. Express Mail, U.S. Mail or telegraphic means. Purchaser is deemed to have received a mailed notice on the second day after its dispatch and to have received telegraphic notice the day after its dispatch.

(b) In the event that such a draw against the performance and payment guarantee exceeds 15 percent of the total contract amount the purchaser shall, within five working days after it is deemed to have received such notification, replenish an amount equal to that withdrawn or a lesser amount if specified by the contracting Officer, either by the wire transfer of funds in accordance with Provision No. C.22, or by the provision of a new letter of credit or amendment of the old letter of credit. If such replenishment is not made within five working days, the Contracting Officer may withhold deliveries under the contract on the sixth working day with no prior notice to the purchaser, and/or the Contracting Officer may terminate the contract in whole or in part on the sixth day without prior notice to the purchaser. Such termination would be for default in accordance with Provision No. C.26, Termination for purchaser default.

C.17 Letters of credit, general requirements.

Letters of credit must meet the following criteria:

(a) They must be from a bank which is a participant in the Federal Reserve Bank FEDWIRE funds transfer system.

(b) Each letter of credit must conform without exception to the standard letter of credit provided as Exhibit F, Letter of Credit—Required Form. The Government does not require information concerning the bank's agreement with its customer. Therefore *any* language in the letter of credit in addition to that specified in Exhibit F shall

cause the letter of credit to be unacceptable and shall be cause for rejection of the offeror's offer.

(c) The corporate minutes authorizing the bank official signing the letter of credit to do so, must be attached to it.

(d) The purchaser should request each issuing bank to send a copy of each letter of credit that it has issued in accordance herewith for an amount of $100 million or more of its credit, as follows:

(1) If an issuer is a national banking association, to the Office of the Regional Administrator of National Banks in the Region in which the issuer's head U.S. office is located, and also to the Federal Reserve Bank of the District in which the issuer's head office is located; and

(2) If an issuer is a state member bank, a branch or agency of a foreign bank or an Edge Act Corporation, to the Federal Reserve Bank of the District in which the issuer's head U.S. office is located.

(e) As set forth in Exhibit F, the letters of credit must provide for drafts against the letters of credit by wire and for payment to the Government by wire transfer.

(f) As set forth in Exhibit F, the letters of credit shall be valid for a period of one year and may be drawn against by one or more partial drafts.

C. 18 Contract amount estimated for crude oil.

The contract amount stated in the award documents for crude oil is an estimate. The per barrel unit price is subject to adjustments based on the sulfur and API gravity characteristics of the crude oil actually delivered. In addition, the Government reserves the right to deliver up to fifteen percent (15%) less or more than the scheduled delivery quantity. This can result in a delivery uder the contract of as much as fifteen percent (15%) less or more for one line item. In the event that the Government delivers more than the contract amount, the purchaser shall not be required to engage additional vessels to take delivery of the additional quantity at its own expense unless notified by the Contracting Officer of the Government's intent to increase delivery prior to issuance of the NA.

C. 19 Purchaser payment options.

(a) If the contract delivery period is one month or less, the purchaser may pay one hundred and fifteen percent (115%) of the contract amount in advance. A purchaser electing this option must inform the Government in its offer. Payment is required before award of the contract, and will be made by wire transfer in accordance with Provision No. C.22

(b) If the contract delivery period is longer than one month, the purchaser may pay in advance a cash deposit equal to forty-five days delivery in addition to fifteen percent (15%) of the entire contract amount. A purchaser electing this option must so inform the Government in its offer. Payment is required before award of the contract and will be made by wire transfer in accordance with Provision No. C.22. See Provision No. C.20 for details of other billings under this method of payment.

(c) Unless the offeror indicates that it will use the payment options in (a) or (b) above, payment for SPR petroleum will be by letter of credit in accordance with Provision No. C. 15(d) and Provision No. C.21.

C.20 Billing and payment—with purchaser's advance payment

(a) If the offeror has notified the Government in its offer that it elects to pay in advance, the following procedure will be applicable. After evaluation of offers is completed the Contracting Officer shall telephone the tentatively selected offeror and inform it that its offer is apparently successful. The Contracting Officer will inform the offeror that the advance payment specified in Provision No. C.19(a) or the cash deposit in Provision No. C.19(b) must be made within the time limit set by the Contracting Officer. This time limit shall be three business days, or such other time as the Contracting Officer may decide. The Contracting Officer may, at his discretion, send a confirming telegram, but the timeliness of the cash deposit is determined by the date of the telephone call. After the last delivery under the contract, a reconciliation billing will be made in accordance with paragraph (c) below.

(b) If the contract delivery period is more than one month, and the offeror has notified the Government in its offer that it elects to give a cash deposit, the purchaser will then be billed monthly for crude oil delivered. Payments on all but the last month will be in accordance with paragraph (e) below. The cash deposit will be credited against the last month's deliveries, and a reconciliation billing will be made by the Government to the purchaser in accordance with paragraph (c) below.

(c) On every contract with an advance payment or cash deposit there will be a reconciliation billing by the Government after final delivery under the contract. If money is due from the purchaser to the Government, an invoice will be issued to the purchaser (see paragraph (e) below). If money is due the purchaser, a Treasury check will be issued in accordance with the Treasury Fiscal Requirements Manual.

(d) Invoices may be issued at any time to the purchaser for other monies due and payable under the contract. These would include, but are not limited to, interest due the Government, liquidated damages, amounts owing for any services provided for under the contract, and the difference between the sale price and resale price as defined in the clauses entitled Termination and Other Government remedies, Provision Nos. 28 and 27 respectively.

(e) The Contracting Officer shall determine the amount of any invoice issued and shall provide invoices to the purchaser by U.S. Express Mail, U.S. Mail or telegraphic invoice. A purchaser is deemed to have received a mailed invoice on the second day after its dispatch. Telegraphic invoices are deemed to have been received on the day after dispatch. All invoices payable by the purchaser must be paid in accordance with Provision No. C.22 no later than close of business, local SPR/PMO time, five business days after the purchaser is deemed to have received them.

C.21 Billing and payment—with purchaser's letter of credit.

(a) All purchasers not electing a cash deposit shall provide a letter of credit in accordance with Exhibit F. After the evaluation of offers is completed the Contracting Officer shall telephone the tentatively selected offeror and inform it that its offer is apparently successful. The Contracting Officer will inform the offeror that the letter of credit specified in Provision No. C.19(c) must be submitted within the time limit set by the Contracting Officer. This time limit shall be three business days, or such other time as the Contracting Officer may decide. The Contracting Officer may, at his discretion, send a confirming telegram, but the timeliness of the letter of credit is determined by the date of the telephone call.

(b) All costs associated with the letter of credit will be borne by the purchaser. Payment via sight draft against that letter of credit shall be made by wire transfer to the U.S. Treasury Department Account at the Federal Reserve Bank in New York in accordance with the letter of credit.

(c) After delivery of the SPR petroleum, and completion of the form DD250, the SPR/PMO Finance Division, with the approval of the Contracting Officer, shall prepare an invoice for the amount due in accordance with the contract and the DD250. The Contracting Officer shall have sole responsibility for determining the amount of any invoice.

(d) Upon completion of the invoice, the SPR/PMO Finance Division shall prepare a wire message in accordance with the letter of credit and present it to the New Orleans Branch of the Federal Reserve Bank in Atlanta for transmittal over the FEDWIRE system to the bank issuing the letter of credit. The bank shall use the wire transfer procedure specified in the letter of credit to transfer the invoiced funds to the Government.

(e) The SPR/PMO Finance Division Shall provide copies of the invoices and the draft to the purchaser and the issuing bank by U.S. Express Mail or U.S. Mail.

(f) In the event that the issuing bank refuses to honor the sight draft against the letter of credit, the purchaser shall be responsibile for paying any interest due from the time the wire message is transmitted to the notifying bank.

C.22 Method of payments—general.

(a) Notwithstanding any other clause of the contract, the Government may invoice the purchaser at any time for payment of monies due under the contract. If the invoice is for money, the payment of which is delinquent, interest on the money shall accrue from the date of the deliquency and not from the deemed date of receipt by purchaser of the invoice.

(b) All amounts payable by the purchaser in excess of $1,000.00 shall be by wire transfer as a deposit to the account of the U.S. Treasury through the Federal Reserve Communications System (FRCS), i.e., payments made by wire transfer to a Federal Reserve Bank. Certain information which must be included on each wire trahsfer is

specified in Exhibit H, Instructions Guide for Funds Transfer.

(c) Payments in amounts less than $1,000.00 shall be by check made out to the "Treasurer of the United States." Such payments will be sent to the SPR/PMO Finance Division.

(d) The Government may designate another place, different timing, or another method of payment after reasonable notice to the purchaser.

(e) No payment due the Government hereunder shall be subject to reduction or set-off for any claim of any kind against the United States arising independently of the contract.

(f) If a purchaser disagrees with the amounts claimed by the Government to be due from the purchaser on any invoice, the purchaser shall pay immediately the amount billed in the invoice, and notify the Contracting Officer of the basis for his disagreement. Any request for adjustment under this provision must be asserted within 10 days of the date the purchaser is deemed to have received the objectionable invoice; provided, however, that if the Contracting Officer decides that the facts justify such action, he may receive and act upon any such objection asserted at any time prior to final payment under this contract. Failure to agree to any adjustment shall be a dispute, and purchaser shall file a claim promptly in accordance with Provision No. C.36, Disputes.

C.23 Currency for payment of contracts.

Payment for all petroleum purchase from the SPR shall be made in U.S. dollars only.

C.24 Interest.

All amounts due from and payable by the purchaser or its bank must be paid in accordance with the provision governing such payments. Amounts not paid in accordance with such provisions shall bear interest from the date due until the date payment is received by the Government. Interest shall be computed on a daily basis. The interest rate shall be in accordance with the Current Value of Funds rate as indicated in the Treasury notice published in the **Federal Register**, Vol. 48, No. 17, on January 25, 1983, at page 3443, or as subsequently amended quarterly by the Department of the Treasury in Bulletins to the Treasury Fiscal Requirements *Manual* and in the **Federal Register**.

C.25 Government options if payment is not received.

(a) All amounts due from and payable by the purchaser or by the bank issuing the purchaser's letter of credit must be paid by the deadlines set by the provisions governing them.

(b) If any amount owed to the Government is not paid within the time deadlines specified by the applicable provisions, the Contracting Officer may, at his discretion, take any of the actions listed in (1) thru (5) below. The Contracting Officer may take these steps simultaneously or in any sequence he deems appropriate. The Contracting Officer may, with or without prior notice to the purchaser:

(1) Invoice the purchaser for the amount on which payment is delinquent or provide written notice that payment is delinquent;

(2) Draw against the letter of credit for all amonts due and delinquent;

(3) Apply any advance payment received aganist the amount due and delinquent;

(4) Withhold all or any part of future deliveries under the contract; and/or

(5) Terminate the contract, in whole or in part, for purchaser default, in accordance with Provision No. C.26, by sending written notice of such default termination to the purchaser.

(c) Any disputes will be settled by the Contracting Officer in accordance with Provision No. C.36, Disputes.

C.26 Termination.

(a) Immediate termination:

(1) The Contracting Officer may terminate this contract in whole or in part, without liability of the Government, by written notice to the purchaser effective upon its being deposited in the U.S. Postal System addressed to the purchaser as provided in Provision No. C.34, Notices, in the event that the purchaser either notifies the Contracting Officer that it will not be able to accept, or fails to accept, any delivery line item in accordance with the terms of the contract. Such notice shall invite the purchaser to submit information to the Contracting Officer as to the reasons for the failure to accept the delivery line item in accordance with the terms of the contract.

(2) Within ten business days after the issuance of the notice of termination, the Contracting Officer may determine that such termination was a termination for default under subparagraph (b)(1)(ii), provided that in the absence of information which persuades the Contracting Officer that the purchaser's failure to accept the delivery line item was excusable, the Contracting Officer may base his default determination upon the fact of such failure without having to determine whether such failure was excusable under the terms of the contract. The Contracting Officer shall promptly give the purchaser written notice of such determination.

(3) Any termination other than one determined to be a termination for default in accordance with subparagraph (a)(2) and paragraph (b) shall be a termination for the convenience of the Government.

(b) Termination for Default:

(1) Subject to the provisions of subparagraphs (c)(2) and (c)(3) below, the Contracting Officer may terminate the contract in whole or in part for purchaser default, without liability of the Government, by written notice to the purchaser, effective upon its being deposited in the U.S. Postal System, addressed to the purchaser as provided in Provision No. C.34, in the event that:

(i) The Government does not receive payment in accordance with any payment provision of the contract;

(ii) The purchaser fails to accept delivery of petroleum in accordance with the terms of the contract; or

(iii) The purchaser fails to comply with any other term or condition of the contract within five (5) business days after the purchaser is deemed to have received written notice of such failure from the Contracting Officer.

(2) Except with respect to defaults of subcontractors, the purchaser shall not be determined to be in default or be charged with any liability to the Government under circumstances which prevent the purchaser's acceptance of delivery hereunder due to causes beyond the control and without the fault or negligence of the purchaser as determined by the Contracting Officer. Such causes shall include but are not limited to:

(i) Acts of God or the public enemy;

(ii) Acts of the Government of the United States, acting in its sovereign or contractual capacity;

(iii) Fires, explosions or other catastrophes;

or

(iv) Strikes.

(3) If the failure to perform is caused by the default of a subcontractor, and if such default arises out of causes beyond the control of the purchaser and its subcontractor, and without the fault or negligence of either of them, the purchaser shall not be determined to be in default or to be liable for any excess costs for failure to perform, unless the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the purchaser to meet the delivery schedule.

(4) In the event that the contract is terminated in whole or in part for default, the purchaser shall be liable to the Government for:

(i) The difference between the contract price on the contract termination date and any lesser price the Contracting Officer obtained upon sale of the petroleum; and

(ii) Liquidated damages as specified in Provision No. C.28 and paragraph (5) below.

(5) In the event that the Government exercises its right of termination for default as provided in this paragraph (b), then the purchaser shall be liable to the Government for liquidated damages in an amount as set forth in Provision No. C.28, as fixed, agreed, liquidated damages. Liquidated damages will be collected for each calendar day of delay or fraction thereof from the delivery date set forth in the line item contracted for until such time as another purchaser lifts that particular delivery line item. If that delivery line item is not resold, liquidated damages will run until the Government makes its first delivery under a contract awarded in response to the next NS issued after the defaulted contract's delivery date. In no event shall liquidated damages be assessed for more than 30 days.

(6) In the event that the Government exercises its right of termination for default, and it is later determined that the purchaser's failure to perform was excused in accordance with subparagraphs (2) and (3), the rights and obligations of the parties shall be the same as if such termination was a termination for convenience under paragraph (c).

(c) Termination for convenience:

(1) The sale of petroleum hereunder may, without liability of the Government, be decreased by more than 15 percent or terminated in whole or in part by the Government whenever the Secretary or his designee, at his discretion, determines that the current rate of sale from the SPR should be decreased or terminated.

(2) In addition to any other right or remedy provided for in the contract, the Government may terminate this contract at any time in whole or in part, without liability to the Government, whenever the Contracting Officer shall determine that such termination is in the best interest of the Government.

(3) The purchaser will be given immediate written notice of any decrease of greater than 15 percent, or of termination, under this paragraph (c). The termination or reduction shall be effective upon its being deposited in the U.S. Postal System unless otherwise specified in the notice. The purchaser is deemed to have received a mailed notice on the second day after its dispatch. A telegraphic notice is deemed to be received on the day after dispatch.

(4) Termination for the convenience of the Government shall not excuse the purchaser from liquidated damages accruing prior to the effective date of the termination.

(d) Nothing herein contained shall limit the Government in the enforcement of any legal or equitable remedy which it might otherwise have, and a waiver of any particular cause for termination shall not prevent termination for the same cause occurring at any other time or for any other cause.

(e) In the event that the Government exercises its right of termination, as provided in paragraphs (a), (b), or (c)(2) above, the Contracting Officer may sell, upon such terms and conditions as he deems appropriate, any undelivered petroleum.

(f) The Government's ability to deliver petroleum under another contract on the date which the defaulted purchaser was scheduled to accept delivery, shall not excuse a purchaser that has been defaulted for failure to perform in accordance with the contract, from either liquidated damages or the difference between the contract price and any lesser price obtained on resale.

(g) Any disagreement with respect to the amount due the Government for either resale costs or liquidated damages shall be deemed to be a dispute and will be decided by the Contracting Officer pursuant to Provision No. C.36, Disputes.

(h) As used in the Provision No. C.26, the term "subcontractor" or "subcontractors" includes subcontractors at any tier.

C.27 Other Government remedies.

(a) The Government's rights under this provision are in addition to any other right or remedy available to it in law or by virtue of this contract.

(b) The Government may, without liability on its part, withhold deliveries hereunder if payment is not made in accordance with this contract.

(c) If the purchaser fails to take delivery of a delivery line item in accordance with the terms of the contract, but the Government does not elect to terminate that item for default under Provision No. C.26, the purchaser nonetheless shall be liable to the Government for liquidated damages in the amount set forth in Provision No. C.28 as fixed, agreed and liquidated damages for each calendar day of delay or fraction thereof until such time as it accepts delivery of the petroleum, or until the delivery line item is terminated for the convenience of the Government, whichever occurs sooner. In no event shall such damages be assessed for longer than 30 days. No purchaser that fails to perform in accordance with the terms of the contract shall be excused from liability for liquidated damages in the event that the Government is able to deliver petroleum under another contract on the date which the non-performing purchaser was scheduled to accept delivery.

C.28 Liquidated damages.

(a) In case of failure on the part of the purchaser to perform within the time fixed in the contract or any extension thereof, the purchaser shall pay the Government liquidated damages in the amount of one percent (1%) of the contract price of the undelivered petroleum per calendar day of delay or fraction thereof (see paragraph (g) of Provision No. C.26, Termination for purchaser default, and paragraph (c) of Provision No. C.27, Other Government remedies).

(b) As provided in (a) above, liquidated damages will be assessed for each day or fraction thereof a purchaser is late in performing in accordance with the contract with respect to the delivery of petroleum sold under this contract, unless such tardiness is excused under the terms or this contract. For petroleum to be lifted by ocean vessel, damages will be assessed in the event that the tanker vessel has not commenced loading by 11:59 p.m. on the last day of the firm, agreed upon delivery window, unless the tanker has arrived at the roads and the tanker's Master has presented a notice of readiness to the Government or its agents prior to 6:00 p.m. of the last day of the firm, agreed upon delivery window. In the event that the vessel is tendered for loading after 6:00 p.m. on the last day of the delivery window, the Government shall use its best efforts to have the vessel loaded as soon as possible in its proper turn with other vessels under the circumstances prevailing at the time. However, purchasers are warned that except in the case of the DOE St. James Facility, loading arrangements must be made with privately owned docks and terminals in accordance with port manuals or other applicable documents, and the Government's authority to reschedule loading times accordingly may be limited to those facilities. Presentation of the notice of readiness after 6:00 p.m. of the last day of the firm, agreed upon delivery window by a vessel arriving late does not stop the assessment of liquidated damages, which shall continue until loading of the vessel is complete.

(c) Any disagreement with respect to the amount of liquidated damages due the Government will be deemed to be a dispute and will be decided by the Contracting Officer pursuant to Provision No. C.36, Disputes.

C.29 Failure to perform SPR contracts.

In addition to the usual debarment procedures, 10 CFR 625.3, provides that:

(a) In addition to any remedies available to the Government under the Contract of Sale, in the event that a purchaser fails to perform in accordance with applicable SPR petroleum sale contractual provisions, and such failure is not excused by those provisions, the [Headquarters Senior Procurement Official] or his designee, at his discretion, may make such purchaser ineligible for future awards of SPR petroleum sales contracts.

(b) No purchaser shall be made ineligible for the award of any SPR sales contract prior to notice and opportunity to respond in accordance with the requirements of this subsection.

(1) Upon the determination that a purchaser is to be considered for ineligibility, the purchaser shall be sent by certified mail return receipt requested, the following:

(i) Notification that the [Headquarters Senior Procurement Official], is considering making the purchaser ineligible for future awards;

(ii) Identification of the SPR sales contract which the purchaser failed to comply with, along with a brief description of the events and circumstances relating to such failure;

(iii) Advice that the Purchaser may submit in writing for consideration by the [Headquarters Senior Procurement Official], in determining whether or not to impose ineligibility on the purchaser, any information or argument in opposition to the ineligibility; and

(iv) Advice that such information or argument in opposition to the ineligibility must be submitted within a certain time in order to be considered by the [Headquarters Senior Procurement Official], such time to be not less than 21 days.

(2) After the elapse of the time period established under subsection (1) for receipt of the purchaser's response, the [Headquarters Senior Procurement Official] at his discretion, and after consideration of the purchaser's written response, if any, may make the purchaser ineligible for future award of SPR petroleum sales contracts. Such ineligibility shall continue for the time period determined by the [Headquarters Senior Procurement Official] as appropriate under the circumstances.

(3) The purchaser shall be notified of the [Headquarters Senior Procurement Official's] decision.

(c) Any purchaser who has been excluded from participating in any SPR sale under (a) may request that the [Headquarters Senior Procurement Official] reconsider the purchaser's ineligibility. The [Headquarters Senior Procurement Official] at his descretion, may reinstate any such purchaser to eligibility for future competitive sales.

C.30 Reserved.

C.31 Limitation of Government Liability.

The Government's obligation under these SSPs and any resultant contract is to use its best efforts to perform in accordance therewith. The Government under no circumstances shall be liable thereunder to the purchaser for the conduct of its contractors or subcontractors or for indirect, consequential, or special damages arising from its conduct; neither shall the Government be liable thereunder to the purchaser for any damages due in whole or in part to causes beyond the control and without the fault or negligence of the Government, including but not restricted to, Acts of God or public enemy, acts of the

Government acting in its sovereign capacity, fires, floods, earthquakes, explosions, or other catastrophes or strikes.

C.32 Government options in case of impossibility of performance.

In the event that the Government is unable to deliver petroleum contracted for to the purchaser due either to events beyond the control of the Government, or to acts of the Government, its agents or its contractors or subcontractors at any tier, the Government at its option may offer different SPR crudes or delivery times to the purchaser in substitute for the deliveryline items included in the contracts. In the event that different SPR petroleum than originally contracted for is offered to the purchaser, the contract price will be as actually agreed to by the parties but in no event shall this price if used, be lower than the minimum acceptable price if used, in the most recent NS. The Government's obligation in such circumstances is to use its best efforts, and the Government under no circumstances shall be liable ot the purchaser for damages arising from its failure to offer alternate SPR petroleum of delivery times.

C.33 Purchaser's responsibility.

The Government shall provide, at no cost to the purchaser, transportation by pipeline from the SPR storage sites to the supporting terminal facility specified in the master line item and, for tanker vessel loadings, a safe berth and loading facilities sufficient to deliver petroleum to the vessel's permanent hose connection. The purchaser agrees to assume responsibility for, to pay for, and to hold the Government harmless for any other costs associated with terminal, port, vessel and pipeline services necessary to receive and transport the oil, including but not limited to ship or port demurrage, tank storage charges and port charges incurred in the transportation of SPR petroleum sold under a contract incorporating this provision. The purchaser also agrees to assume responsibility for, to pay for and to hold the Government harmless for any liability, including consequential or other damages, incurred or occasioned by the purchaser, its agent, subcontractor at any tier, assignee or any subsequent purchaser, in connection with movement of oil sold under a contract incorporating this provision.

C.34 Notices

(a) Any notices required to be given by one party to the contract to the other shall be in writing, and shall be forwarded to the addressee, prepaid, by U.S. mail or telegram. Each party shall give the other written notice of any change of address.

(b) Notices to the purchaser shall be forwarded to the purchaser's address as it appears in the offer and in the contract.

(c) Notices to the Contracting Officer shall be forwarded to the following address:

U.S. Department of Energy, Strategic Petroleum Reserve, Project Management Office, Procurement Division, Mail Stop EP No. 5501, 900 Commerce Road East, New Orleans, Louisiana 70123

C.35 SPR/PMO representative for contract administration.

The SPR/PMO representative for each sale and the representative's telephone number will be provided in the NS. After award of a contract, the SPS/PMO representative for each contract and the representative's telephone number will be provided in the NA.

C.36 Disputes.

(a) This contract is subject to the Contract Disputes Act of 1978 (41 U.S.C. Section 601 *et seq.*). If a dispute arises relating to the contract, the purchaser may submit a claim to the Contracting Officer, who shall issue a written decision on the dispute in the manner specified in 41 CFR 1–1–318.1.

(b) "Claim" means:

(1) A written request submitted to the Contracting Officer;

(2) For payment of money, adjustment of contract terms, or other relief;

(3) Which is in dispute or remains unresolved after a reasonable time for its review and disposition by the Government; and

(4) For which a Contracting Officer's decision is demanded.

(c) In the case of dispute requests or amendments to such requests for payment exceeding $5,000, the purchaser shall certify at the time of submission as a claim, as follows:

I certify that the claim is made in good faith, that the supporting data are accurate and complete to the best of my knowledge and belief and that the amount requested accurately reflects the contract adjustment for which the purchaser believes the Government is liable.

Purchaser's Name _____

Signature _____

Title _____

(d) The Government shall pay the purchaser interest:

(1) On the amount found due to the purchaser on claims submitted under this clause;

(2) At the rates fixed by the Secretary of the Treasury;

(3) From the date the amount is due until the Government makes payment.

(e) The purchaser shall pay the Government interest:

(1) On the amount found due to the Government and unpaid on claims submitted under this clause;

(2) At the rates fixed by the Department of Energy for the payment of interest on past due accounts;

(3) From the date the amount is due until the purchaser makes payment.

(f) The decision of the Contracting Officer shall be final and conclusive and shall not be subject to review by any forum, tribunal, or Government agency, unless an appeal or action is commenced within the times specified by the Contract Disputes Act of 1978.

(g) The purchaser shall comply with any decision of the Contracting Officer and at the direction of the Contracting Officer shall proceed diligently with performance of this contract pending final resolution of any request for relief, claim, appeal, or action related to this contract.

C.37 Assignment.

The purchaser shall not make or attempt to make any assignment of a contract which incorporates these SSPs or any interest therein contrary to the provisions of Federal law, including the Anti-Assignment Act (41 U.S.C. Section 15), which provides:

No contract or order, or any interest therein, shall be transferred by the party to whom such contract or order is given to any other party, and any such transfer shall cause the annulment of the contract or order transferred, so far as the United States are concerned. All rights of action, however, for any breach of such contract by the contracting parties, are reserved to the United States.

C.38 Order of precedence.

In the event of an inconsistency between the terms of the various parts of this contract, the inconsistency shall be resolved by giving precedence in the following order:

(a) Written amendments to the contract concerning scheduling instructions issued by the Government to the purchaser;

(b) The NA;

(c) The NS;

(d) Those provisions of the SSPs (as published in the **Federal Register**) made applicable to the contract by the NS; and

(e) The successful offer.

C.39 Gratuities.

(a) The Government, by written notice to the purchaser, may terminate the right of the purchaser to proceed under this contract if it is found, after notice and hearing, by the Secretary of his duly authorized representative, that gratuities (in the form of entertainment, gifts, or otherwise) were offered by or given by the purchaser, or any agent or representative of the purchaser, to any officer or employee of the Government, with a view toward securing a contract or securing favorable treatment with respect to the awarding, amending, or making of any determinations with respect to the performing of such contract; *provided*, that the existence of the facts upon which the Secretary or his duly authorized representative makes such findings shall be in issue and may be reviewed in any competent court.

(b) In the event that this contract is terminated as provided in paragraph (a) hereof, the Government shall be entitled (1) to pursue the same remedies against the purchaser as it could pursue in the event of a breach of the contract by purchaser, and (2) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the Secretary or his duly authorized representative) which shall not be less than three nor more than ten times the cost incurred by the purchaser in providing any such gratuities to any such officer or employee.

(c) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

C.40 Officials not to benefit.

No member of or delegate to Congress, or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

016[illegible]	Delivery on 29th of month		Bbls	$	$
016FF	Delivery on 30th of month		Bbls	$	$
016[illegible]	Delivery on 31st of month		Bbls	$	$

Note that the letters "I" and "O" are not used in numbering the delivery line items.

Exhibit B—Telegraphic Notice of Sale (NS) (Sample)

(If the NS is sent by telegram, it could look substantially as shown below. If the NS is sent by mail, a Standard Form 33 will be included as a cover sheet.)

1. NS NO. DE–NS96–83P010001 IS ISSUED (date) FOR SALE OF STRATEGIC PETROLEUM RESERVE (SPR) CRUDE OIL. ALL REFERENCES TO "PROVISION NO." REFER TO THE STANDARD SALES PROVISIONS (SSPS) PUBLISHED IN THE FEDERAL REGISTER (date). ALL PROVISIONS ARE APPLICABLE TO THIS SALE EXCEPT THAT PROVISION NO(S). (give number or numbers) ARE CHANGED TO READ: (give changes). ADDITIONAL PROVISIONS ARE HEREBY ADDED (give new numbers which do not duplicate others in SSPs) WHICH READ (give text).

2. OFFERS AND OFFER GUARANTEES MUST BE RECEIVED BY 12 NOON LOCAL TIME ON (date) AT ADDRESSES FOR MAILED AND HANDCARRIED OFFERS GIVEN IN SSPS.

(or)

2. OFFERS AND OFFER GUARANTEES MUST BE RECEIVED BY 12 NOON LOCAL TIME ON (date) AT (address) FOR MAILED BIDS AND (address) FOR HAND CARRIED BIDS.

3. PUBLIC OPENING OF OFFERS WILL BE 1 P.M. LOCAL TIME, ROOM 333, (address). OFFERORS' REPRESENTATIVES ARE ENCOURAGED TO ATTEND.

4. SUBMIT TRANSPORTATION ARRANGEMENTS AS REQUIRED BY SSPS.

5. REPRESENTATIONS AND CERTIFICATIONS OF EXHIBIT G OF SSPS (ARE) (ARE NOT) REQUIRED.

(or)

5. ONLY REPRESENTATIONS NOS. (give numbers) OF EXHIBIT G OF SSPS ARE REQUIRED.

6. DIRECT QUESTIONS REGARDING NS TO (name of individual), TELEPHONE (504) 734–4220. COLLECT CALLS WILL NOT BE ACCEPTED.

7. QUALITY DIFFERENTIALS GIVEN PROV. NO. C. 7 IN SSPS NOT, REPEAT, NOT VALID. SUBSTITUTE PLUS OR MINUS ———— CENTS PER BBL.

8. MINIMUM ACCEPTABLE PRICES FOR OFFERED CRUDES ARE: BAYOU CHOCTAW SWEET, TEXOMA SWEET, AND SEAWAY SWEET ———— DOLLARS ($) PER BBL; BAYOU CHOCTAW SOUR, ———— DOLLARS ($) PER BBL; MAYA, ———— DOLLARS ($) PER BBL. WEEKS ISLAND MIX, TEXOMA SOUR, AND SEAWAY SOUR NOT OFFERED THIS SALE.

9. COMMON CARRIER AND PRIVATELY OWNED PIPELINE PICKUP WINDOW IS PLUS OR MINUS FIVE DAYS. TANKER AND BARGE PICKUP WINDOW IS PLUS OR MINUS ONE DAY.

10. LINE ITEM NUMBERS GIVEN HEREIN REFER TO THOSE CITED IN PROVISION NO. C.5 AND ATTACHED AS EXHIBIT A OF SSPS. THE SPECIFICS FOR LINE ITEMS ARE GIVEN IN EXHIBIT A. QUANTITIES FOR LINE ITEMS ARE GIVEN BELOW:

QUANTITIES OFFERED THIS SALE ARE: LI 001A, TWO HUNDRED THOUSAND BARRELS; LI 001D, ONE HUNDRED THOUSAND BARRELS; LI 001U, TWO HUNDRED THOUSAND BARRELS; LI 002C, ONE HUNDRED THOUSAND BARRELS; LI 002J, NINETY THOUSAND BARRELS; LI 002X, SIXTY THOUSAND BARRELS; LI 004P, TWO HUNDRED THOUSAND BARRELS; LI 004GG, TWO HUNDRED THOUSAND BARRELS; LI 0011M, THREE HUNDRED THOUSAND BARRELS; ETC.

Exhibit C

OFFEROR TRANSPORTATION PLAN

(check all applicable items and provide all requested information)

Name of Offeror: ————————————

———This is the transportation plan required to be submitted by the apparently successful offeror on delivery line item number ———.

The destination of this petroleum is: (Give geographical destination and identify facility which is to receive the shipment.)

———Shipment of this petroleum from the delivery point to its destination will be by ——— common carrier, ——— noncommon carrier pipeline. The identity of the pipeline(s) and the status of arrangments for the shipment of the delivery line item, through the pipeline(s) in accordance with the Notice of Sale, are as follows:

———Shipment of this petroleum from the delivery point to its destination will be by ——— tanker, ——— barge. The identity and basic characteristics of the vessel(s), and the status of arrangements for shipment of the delivery line item by the vessel(s) in accordance with the Notice of Sale, are as follows:

———The destination of the petroleum is a point within the United States for purposes of the Jones Act, 46 U.S.C. Section 883, and:

———the petroleum will be shipped by United States flag vessel(s) in accordance with that Act;

———the requirements of that Act have been or are being waived, as follows:

———The destination of the petroleum is outside the United States, its territories and possessions, but export of the delivery line item will be in accordance with applicable law, for the following reasons:

Documentation available in support of the above information will be provided with the submission of the transportation plan.

DELIVERY POINT DATA

Terminal	Seaway Terminal, Freeport, Texas	Sunoco Terminal, Inc., Nederland, Texas	DOE St. James Terminal, St. James, Louisiana
Delivery points:	(1) Seaway pipeline marine dock facility. (2) Jones Creek tank farm (Seaway pipeline).	(1) Sunoco terminal marine dock facility. (2) Sunoco terminal (Texoma or local pipelines).	(1) St. James terminal marine dock facility. (2) Locap terminal (Capline or local pipelines)
Marine dock facility data: (A)			
Number of berths	3	5	2.
Max LOA	750 ft [B]	1,000 ft	940 ft [B]
Max beam	107 ft	145 ft	NA.
Max draft (B)	35 ft	40 ft.	39 ft [B]
Max air draft	NA	136	153 ft.
Max DWT (C)	80,000 dwt [B]	140,000 dwt [B]	120,000 dwt [B]

EXHIBIT D—Continued
DELIVERY POINT DATA—Continued

Terminal	Seaway Terminal, Freeport, Texas	Sunoco Terminal, Inc., Nederland, Texas	DOE St. James Terminal, St. James, Louisiana
Barging capability	Yes [3]	Yes [3]	No.
	[1] Max LOA 615 ft during hours of darkness. [2] Dwt can be larger if draft, LOA and beam restrictions are met. Max at dock 1 is 50,000 dwt. Terminal permission is required for less than 32,000 dwt. [3] Only dock No. 1 has barge loading capability. [4] No deballasting facilities are available.	[1] 85,000 dwt or larger are limited to daylight transfer. Max dwt may be larger if draft, LOA and beam restrictions are met and the pilots agree to bring vessel in. [2] There are 2 crude barge docks; docks A&B with max draft of 15 ft. Other barges go to ship dock No. 1.	[1] Discharging ships over 750 ft LOA may require tugs in attendance. Holding tugs cannot be used for ships loading. Max LOA for loading is 750 ft. [2] St. James terminal draft is 42 ft at the dock. Draft at the bar at the mouth of the Mississippi is 39 ft for 100,000 dwt or over 40 ft for under 100,000 dwt. [3] Larger dwt can be accommodated with terminal approval. [4] No deballasting facilities are available.

(A) Contractor shall be responsible for confirming that proposed vessels can be accommodated by terminals, harbors and channels involved.
(B) Maximum draft is subject to varying limitations at river and harbor entrances due to tidal variances.
(C) Maximum DWT is theoretical berth handling capability; however, contractors must be aware that harbor and channel physical contraints are the controlling factor as to ship size, and are varying.

SPR CRUDE OIL SPECIFICATION RANGES FOR INFORMATION PURPOSE ONLY

The NS will establish the final ranges for the SPR petroleum to be sold.

	API gravity	Total sulfur, wt. %
Sweet (Bayou Choctaw, Texoma, Seaway)	32–38	0.1–0.5
Sour (Bayou Choctaw, Texoma, Seaway)	30–36	1.0–2.0
Weeks Island Mix	26–31	0.9–1.9
Maya	21–25	2.5–3.5

Oil delivered by the SPR to the purchaser that falls outside of the ranges for the oil contracted for as established by the NS may be rejected by the purchaser in accordance with Provision C 5.

Exhibit R

NAME OF OFFEROR ———————

OFFEROR RESPONSE SHEET (SAMPLE)

(The following provides general guidance only. Offer may take any written form. The offeror has total responsibiliity for the accuracy and completeness of its offer.)

1. We acknowledge receipt of Notice of Sale (NS) No. DE–NS96–83P010001 issued (date).

2. We acknowledge receipt, if applicable, of the following:

Amendment No.	Date issued
001	
002	
etc.	

3. We agree without exception to all provision of the Standard Sales Provisions (SSPs) which the NS makes applicable to this sale as well as all provisions in the NS and all amendments to the NS. We understand that our offer is not valid without this agreement.

4. We understand that our offer is not valid unless we submit an offer guarantee in the amount of $10 million or 30 percent of our total offer, whichever is less. The offer guarantee must reach you prior to the time and date set for receipt of offers.

a. The amount of our offer guarantee is (check one)

——— $10 million
——— $——— which is 30% of our total offer

b. The form of our offer guarantee is (check one)

——— a cash deposit to the special SPR/PMO account
——— a cashier's or certified check payable to the Treasurer of the United States
——— a Standard Form (SF) 24, entitled "Bid Bond"

c. Our offer guarantee was forwarded (check one)

——— by wire transfer
——— in this envelope with our offer
——— by our bank under a separate cover
——— by our surety company under a separate cover

d. If I submitted a cash deposit or cashier's or certified check, and, if I am an apparently successful offeror, (check one)

——— I want the amount of the offer guarantee applied toward the advance payment or cash guarantee.
——— I intend to furnish a letter of credit for a financial guarantee and want the cash returned as soon as the letter of credit is approved by DOE.
——— I will furnish the entire amount of the advance payment or cash guarantee by a new cash wire deposit. I want the original cash offer guarantee returned as soon as the new cash deposit is received.

5. We understand that a transportation plan must be submitted if we are an apparently successful offeror.

6. The NS ———, did ——— did not require any Representations or Certifications from Exhibit G. They are attached if they are required.

7. Our offers on available crude oil are:

Line Item No.	Quality offered (BBLs)	Unit price	Amount

8. We ——— do,——— do not want to be included for Phase II evaluation.

9. Our authorized agent ——— will, ——— will not attend the public opening of offers and be available for Phase II evaluation.

I am ———, (name) ——— (title) of ——— (name of company, etc). I am the authorized agent of the offeror, in proof of which I submit a power of attorney or other enabling documents.

———————

Signature of Authorized Agent

All offerors will supply the following information:

Name of firm
Mailing address
City, State, zip
Name of authorized agent
Telephone number for authorized agent including area code
TWX number (if any)
Telecopier brand name and model number (if any)
Is telecopier automatic or operator controlled?
Telephone number, including area code, for telecopier verification of message receipt
Dunn's number (if any)

Exhibit F—Letter of Credit

Procurement Division
Mail Stop EP–5501
Project Management Office
Strategic Petroleum Reserve
Department of Energy
900 Commerce Road East
New Orleans, Louisiana 70123

To the Strategic Petroleum Reserve Drawdown Sales Coordinator:

By order of our customer (name and address) ——— we hereby establish in the Department of Energy's favor an irrevocable Letter of Credit, Numbered ———, for an amount not to exceed U.S. $——— ——— ——— (the U.S. dollar amount expressed in word form) effective immediately and expiring at our office located at ——— (address) three hundred and sixty-five (365) days from the date of issuance of this Letter of Credit, relative to an offer by our customer dated ——— (date), to purchase Strategic Petroleum Reserve petroleum. Liability under this Letter of Credit shall commence upon

acceptance by the Government of our client's offer and the award of a contract for the delivery of Strategic Petroleum Reserve petroleum.

Funds under this Letter of Credit are available to the Department of Energy by its draft or drafts drawn on ourselves and accompanied by either a statement of a duly authorized official of the Department of Energy stating that:

This drawing is due the U.S. Government in payment for ——— barrels of petroleum sold to ——————— (customer's name) under Contract No. ——— at a price of $——————— per barrel ——————— (plus or minus) a sulfur differential of ——— tenths of one percent at $——————— per one tenth of one percent per barrel and ——————— (plus or minus) a gravity differential of ——— degrees at $——————— per degree API per barrel, for a total amount due of $——————— — ——————— (U.S. dollar amount expressed in word form). The Government's invoice and supporting standard form DD250 will be forwarded by regular mail,

or a statement that:

This drawing is due the U.S. Government because of the failure of

———————————————

(customer's name)

to accept delivery of petroleum under Contract No. ——————— at the time specified in the contract, resulting in damages due under the contract of $——————— — ——————— (U.S. dollar amount expressed in word form),

or both. The Department of Energy may make multiple drawings totalling not more than the amount of funds specified in the first paragraph as available under this Letter of Credit. We will honor drafts presented by wire provided that each such draft contains either one of the two above statements.

Upon receipt of the Department of Energy's draft and accompanying statement we will honor the draft and make payment by 3 p.m. Eastern Standard Time of the next business day following receipt of the draft by wire transfer to the account of the U.S. Treasury through the Federal Reserve Communications System. Each wire transfer shall be formatted in accordance with prescribed Treasury requirements as set forth in Exhibit H of the Standard Sales Provisions.

This Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (1974 Revision, International Chamber of Commerce Publication No. 290, and except as may be inconsistent therewith, to the Uniform Commercial Code in effect on the date of issuance of this Letter of Credit in the state in which the issuer's head office within the United States is located.

Address all communications regarding this Letter of Credit to ———————

———————————————

Authorized Signature.

Exhibit G—Information for Statistical Purposes

1. *Small and Small Disadvantaged Business Certification.*

a. The offeror ( ) certifies that it is ( ) is not ( ) a small business concern as defined in accordance with Section 3 of the Small Business Act (15 U.S.C. 632).

b. The offeror ( ) certifies that it is a small business concern (as set forth in a above) and is ( ) is not ( ) owned and controlled by socially and economically disadvantaged individuals. Such a firm is defined as one—

(1) which is at least 51 per centum owned by one or more such individuals or, in the case of publicly owned business, at least 51 per centum of the stock is owned by such individuals;

(2) whose management and daily business operations are controlled by one or more such individuals; and

(3) which certifies concerning said ownership and control in accordance with section c below.

c. The offeror ( ) certifies that it is ( ) is not ( ) a minority individual(s) in accordance with c(1) below or that it is ( ) is not ( ) socially and economically disadvantaged in accordance with section c(2) or c(3). Socially and economically disadvantaged individuals are defined as:

(1) United States citizens who are Black Americans, Hispanic Americans, Native Americans, Asian Pacific Americans, or other specified minorities;

(2) any other individual found to be disadvantaged pursuant to section 8(a) of the Small Business Act (15 U.S.C. 637); or

(3) any other individual defined by the Small Business Administration as socially and economically disadvantaged for purposes relating to other sections of the Small Business Act.

Failure to execute all parts of the representation will be deemed a minor informality and the bidder of offeror shall be permitted to satisfy the requirement prior to award.

2. *Woman-Owned Business (FPR Temp. Reg. 48, 1978 Dec).*

Concern is ( ), is not ( ) a woman-owned business.

A woman-owned business is a business which is, at least, 51 percent owned, controlled, and operated by a woman or women. Controlled is defined as exercising the power to make policy decisions. Operated is defined as actively involved in the day-to-day management.

For the purposes of this definition, businesses which are publicly owned, joint stock associations, and business trusts are exempted. Exempted businesses may voluntarily represent that they are, or are not, woman-owned if this information is available.

3. *Labor Surplus Area Concern (FPR § 1-1.807, 1968 Nov).*

It ( ) is, ( ) is not, a labor surplus area concern. (For definition of "labor surplus area concern," see Code of Federal Regulations, Title 41, Subpart 1-1.8, Section 01.)

4. *Type of Business Organization (1977 Mar).*

It operates as ( ) an individual, ( ) a partnership, ( ) a joint venture, ( ) a nonprofit organization, ( ) a not-for-profit organization, ( ) an educational institution, ( ) a hospital, ( ) a State or local government agency, ( ) a U.S. Government Agency, ( ) a corporation, etc.

Offeror shall indicate the State and/or county in which it is incorporated, authorized to do business, or in residence.

5. *Affiliation and Identification Data.*

a. Offeror shall incorporate in its offer the same data required by Provision No. A 6(c).

b. As part of its offer, offeror shall state whether it is owned or controlled by a parent company or other entity. If offeror is owned or controlled by a parent company or other entity, it shall state the name of the controlling entity, the main address of that entity, and the telephone number thereof.

c. A parent company for the purposes of this clause is a company which either owns the offeror or controls the activities and basic business policies of the offeror. To own another company means the parent company must own at least a majority (more than 50 percent) of the voting rights in the company. To control another company, such ownership is not required; if another company is able to formulate, determine, or veto basic business policy decisions of the offeror, such other company is considered the parent company of the offeror. This control may be exercised through the use of dominant minority voting rights, use of proxy voting, contractual arrangements, or otherwise.

Exhibit H—Instructions Guide for Funds Transfer Messages to Treasury

The following instructions provide specific information which is required so that a funds (wire) transfer message can be transmitted to the Department of the Treasury. The funds transfer message format is shown in Attachment 1. A narrative description of each item on the funds transfer message follows:

Line 1

Item 1—*Priority Code*—The priority code will be provided by the sending bank. (Note: Some Federal Reserve district banks may not require this item.)

Line 2

Item 2—*Treasury Department Code*—The 9-digit identifier "021030004" is the routing symbol of the Treasury. This item is a constant and is required for all funds transfer messages sent to Treasury.

Item 3—*Type Code*—The type code will be provided by the sending bank (will be a 10 or 12).

Line 3

Item 4—*Sending Bank Code*—This 9-digit identifier will be provided by the sending bank.

Item 5—*Class*—The class field may be used at the option of the sending bank. (Note: Some Federal Reserve Districts prohibit use of this field.)

Item 6—*Reference Number*—The reference number will be inserted by the sending bank to identify the transaction.

Item 7—*Amount*—The amount must include the dollar sign and the appropriate

punctuation including cents digits. This item will be inserted by the sending bank.

Line 4

Item 8—*Sending Bank Name*—The telegraphic abbreviation which corresponds to Item 4 will be provided by the sending bank.

Line 5

Items 9, 10, and 11—*Treasury Department, Name, Agency Location Code, Agency Number*—This item is of critical importance. It must appear on the funds transfer message in the precise manner as stated to allow for the automated processing and classification of funds transfer message to Treasury for credit to the Department of Energy. This item is comprised of a rigidly formatted, nonvariable sequence of characters as follows:

TREAS NYC/(89000201) DEPT OF ENERGY (SPRO)

Item 12—*Payment Identification*—The payment identification should be furnished by the remitter in the following manner:

Lines 6 and 7

The constant "Payment for the Sale of Crude Oil Under Contract No. ————, DD 250 No. ———— will be inserted.

Line 8

The constant "Deposit Account 89X0233" will be inserted.

Important Note: Line Nos. 2 and 5 are edited by the Federal Reserve Bank. If the wire transfer message is not formatted as prescribed above, the message will be rejected by the FED Bank and returned to the sending bank.

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 911]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: June 9, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, VA 22161.

Categories within each NGPA Section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir and old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

[FR Doc. 83-16056 Filed 6-14-83; 8:45 am]

BILLING CODE 6717-01-C

[Volume 912]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: June 9, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The application for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir and old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

Part IV

Securities and Exchange Commission

Equalization of Fees for Cash Tender Offers, Cash Mergers and Similar Acqisition Transactions; Final Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34-19870]

Equalization of Fees for Cash Tender Offers, Cash Mergers and Similar Acquisition Transactions

AGENCY: Securities and Exchange Commission.

ACTION: Notice of legislative action.

SUMMARY: The Commission today issued a notice of the enactment and effectiveness of legislation that requires the payment to the Commission of a filing fee for cash tender offers, proxy and information statements involving an acquisition, merger, consolidation or sale or other disposition of substantially all the assets of a company and certain other filings. In light of this legislation which became effective upon enactment, the Commission will commence the collection of these statutory fees and will no longer collect fees for affected filings which have been required pursuant to pre-existing rules.

FOR FURTHER INFORMATION CONTACT: Joseph G. Connolly, Jr. (202) 272-3097, Office of Tender Offers, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549.

EFFECTIVE DATE: June 7, 1983.

SUPPLEMENTARY INFORMATION: On June 6, 1983, President Reagan signed into law H.R. 2681 (Pub. L. 98-38) which, among other matters, amended Sections 13 and 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78m and 78n) (the "Exchange Act") to establish a fee for the filing of documents in connection with certain acquisitions and business combinations and consolidations. The statutory amendments which became effective immediately were enacted to equalize the fees imposed for similar types of business combinations as well as to raise additional revenues.[1]

Pub. L. 98-38 amended the Exchange Act to require a fee for filings made with the Commission pursuant to: a) Section 13(e)(1) of the Exchange Act (one-fiftieth of one percent of the value of the securities proposed to be purchased [2]); b) Section 14(a) and (c) of the Exchange Act of the filing relates to an acquisition, merger, consolidation or proposed sale or other disposition of substantially all the assets of an issuer (one-fiftieth of one percent of the consideration being offered in the transaction); and c) Section 14(d)(1) of the Exchange Act (on-fiftieth of one percent of the consideration being offered in the transaction).

The filings under the Exchange Act that, as of June 7, 1983, became subject to one-fiftieth of one percent filing fee are: (a) Schedule 13E-4 (17 CFR 240.13e-101) filed pursuant to Rule 13e-4 (17 CFR 240.13e-4); (b) Schedule 14D-1 (17 CFR 240.14d-100) filed pursuant to rule 14d-3 (17 CFR 240.14d-3); (c) preliminary proxy material filed pursuant to Rule 14a-6 (17 CFR 240.14a-6) relating to a proposed acquisition, merger, consolidation or sale or other disposition of substantially all the assets of the issuer; (d) preliminary information statements filed pursuant to Rule 14c-5 (17 CFR 240.14c-5) relating to such transactions; (e) Schedule 13E-3 (17 CFR 240.13e-100) filed pursuant to Rule 13e-3 (17 CFR 240.13e-3) in connection with the acquisition; of securities and which is not subject to any of the filing requirements set forth in paragraphs (a) through (d) above; and (f) a disclosure statement filed pursuant to Rule 13e-1 (17 CFR 240.13e-1).

The fee for the affected filings is to be paid by the person making the filing, except that in the case of proxy or information material involving two or more companies subject to the Commission's proxy rules, each such person must pay a proportionate share of such fee. Only one fee per transaction is required to be paid however. Accordingly, where a transaction involves more than one of the above referenced filing requirements or the registration provisions of the Securities Act of 1933, the payment of the fee with the initial filing will offset any subsequent filing fee obligation.

In view of the fact that the new filing fees are in lieu of, rather than in addition to the filing fees presently being collected for proxy material involving acquisitions, mergers and sales of assets pursuant to rule 14a-6(i) and information statements relating to similar acquisitions pursuant to Rule 14c-5 the Commission is suspending its collection of fees pursuant to Rule 14a-6(i) and Rule 14c-5(a), for the filings now subject to Public Law 98-38. The Commission intends to promptly initiate a rulemaking proceeding to rescind the suspended fees and to further implement this legislation.

In order to provide guidance, set forth below are the relevant sections of Public Law 98-38:

---

[1] H.R. Rep. No. 98-106, Cong. 1st Sess. 1-2 and 5-6 (1983). For example, prior to this legislation, a bidder in a tender offer in which the consideration offered was securities subject to the registration provisions of the Securities Act of 1933 (15 U.S.C. 77a et seq.) was required by Section 6(b) of that Act to pay a registration fee of one-fiftieth of one percent; had the bidder commenced a cash tender offer, no fee would have been required.

[2] Until the incorporation of the provisions of the amendments into the Commission's regulations, the Commission will not object if the computation of this fee is based upon the criteria set forth in Rule 457(e) (17 CFR 230.457(e)) promulgated under the Securities Act of 1933.

SEC. 2. (a) Section 13(e) of the Securities Exchange Act of 1934 (15 U.S.C. 78m) is amended by adding at the end thereof the following new paragraph:

"(3) At the time of filing such statement as the Commission may require by rule pursuant to paragraph (1) of this subsection, the person making the filing shall pay to the Commission a fee of 1/50 of 1 per centum of the value of securities proposed to be purchased. The fee shall be reduced with respect to securities in an amount equal to any fee paid with respect to any securities issued in connection with the proposed transaction under section 6(b) of the Securities Act of 1933, or the fee paid under that section shall be reduced in an amount equal to the fee paid to the Commission in connection with such transaction under this paragraph.".

(b) Section 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78n) is amended by adding at the end thereof the following new subsection:

"(g)(1)(A) At the time of filing such preliminary proxy solicitation material as the Commission may require by rule pursuant to subsection (a) of this section that concerns an acquisition, merger, consolidation, or proposed sale or other disposition of substantially all the assets of a company, the person making such filing, other than a company registered under the Investment Company Act of 1940, shall pay to the Commission the following fees:

"(i) for preliminary proxy solicitation material involving an acquisition, merger, or consolidation, if there is a proposed payment of cash or transfer of securities or property to shareholders, a fee of 1/50 of 1 per centum of such proposed payment, or of the value of such securities or other property proposed to be transferred; and

"(ii) for preliminary proxy solicitation material involving a proposed sale or other disposition of substantially all of the assets of a company, a fee of 1/50 of 1 per centum of the cash or of the value of any securities or other property proposed to be received upon such sale or disposition.

"(B) The fee imposed under subparagraph (A) shall be reduced with respect to securities in an amount equal to any fee paid to the Commission with respect to such securities in connection with the proposed transaction under section 6(b) of the Securities Act of 1933 (15 U.S.C. 77f(b)), or the fee paid under that section shall be reduced in an amount equal to the fee paid to the Commission in connection with such transaction under this subsection. Where two or more companies involved in an acquisition, merger, consolidation, sale, or other disposition of substantially all the assets of a company must file such proxy material with the Commission, each shall pay a proportionate share of such fee.

"(2) At the time of filing such preliminary information statement as the Commission may require by rule pursuant to subsection (c) of this section, the issuer shall pay to the Commission the same fee as required for preliminary proxy solicitation material under paragraph (1) of this subsection.

"(3) At the time of filing such statement as the Commission may require by rule pursuant to subsection (d)(1) of this section, the person making the filing shall pay to the Commission a fee of 1/50 of 1 per centum of the aggregate amount of cash or of the value of securities or other property proposed to be offered. The fee shall be reduced with respect to securities in an amount equal to any fee paid with respect to such securities in connection with the proposed transaction under section 6(b) of the Securities Act of 1933 (15 U.S.C. 77f(b)), or the fee paid under that section shall be reduced in an amount equal to the fee paid to the Commission in connection with such transaction under this subsection.

By the Commission.

George A. Fitzsimmons,

Secretary.

June 13, 1983.

Part V

Department of Housing and Urban Development

Office of the Secretary

Nondiscrimination Based on Handicap in Federally-Assisted Programs and Activities of the Department of Housing and Urban Development; Revocation of Notice of Effective Date of Interim Rule; and Proposed Rulemaking

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 8

[Docket No. R-83-528]

Nondiscrimination Based on Handicap in Federally-Assisted Programs and Activities of the Department of Housing and Urban Development

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Interim rule; revocation of notice of effective date.

SUMMARY: HUD is revoking the published effective date of the interim rule published May 6, 1983 (republished May 18, 1983) implementing Section 504 of the Rehabilitation Act of 1973, as amended. The interim rule, as published, will be treated as a proposed rule.

FOR FURTHER INFORMATION CONTACT: John Putman, Special Advisor to the Deputy Under Secretary for Intergovernmental Relations, or Clifton L. Baldwin, Disability Access Coordinator, Room 10184, 451 Seventh Street, S.W., Washington, D.C. 20410, (202) 755-6732. A telecommunications device for deaf persons (TDD) is available at (202) 426-0016. These are not toll free numbers.

SUPPLEMENTARY INFORMATION: On May 6, 1983 HUD published an interim rule establishing procedures and policies to assure nondiscrimination based on handicap in programs and activities receiving Federal financial assistance from the Department. The rule implemented Section 504 of the Rehabilitation Act of 1973, as amended. 48 FR 20638 (republished at 48 FR 22470, May 18, 1983). The interim rule was scheduled to become effective June 15, 1983, but public comments, to be considered prior to issuance of a final rule, were solicited for a 90-day period ending August 4, 1983.

A proposed rule was published on April 19, 1978 (43 FR 16652). In addition, ten public hearings were conducted throughout the country. More than 225 individuals and organizations presented testimony at the public hearings, and 258 written comments on the proposed rule were received. Many of the changes made in the interim rule reflected consideration of the comments received in the public hearings and in response to the proposed rule. However, as indicated in the preamble to the interim rule, substantial changes also were based on consideration of other factors, including the decision of the United States Supreme Court in *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979), and subsequent appellate decisions regarding the extent of obligations of a recipient of Federal financial assistance imposed by Section 504 to accommodate the needs of handicapped persons, and a Report to Congress (B-197756, June 19, 1981) issued by the Comptroller General entitled "Weaknesses in the Planning and Utilization of Rental Housing for Persons in Wheelchairs".

Because of substantial changes that had been made from the proposed rule published in 1978 on grounds not fully discussed in connection with the publication of the proposed rule, the Department noted, in the preamble to the interim rule, that it normally would publish the revised regulation as a revised proposed rule for further comment, rather than for immediate effect. However, on June 16, 1981 the United States District Court, Central District of California, issued an order requiring HUD and certain other Federal agencies to publish final regulations implementing Section 504 on an expedited basis. *Paralyzed Veterans of America, etc., et al.* v. *William French Smith, et al.*, No. 79-1979 WPG, June 16, 1981. The Department noted that while it did not construe the District Court order as necessarily overriding public notice and comment requirements otherwise applicable, the Department believed, on balance, that regulatory implementation of Section 504 with respect to HUD programs should not be subjected to further delay. In reaching this conclusion, the Department took into account the fact that principal substantive requirements under Subpart C of the rule, regarding program accessibility, already were in effect through program regulations and the HUD Minimum Property Standards.

Since publication of the interim rule, the Department has received comments which have led it to reconsider the balance struck between obtaining early effectiveness and encouraging broad participation in the rulemaking process through public comment. Certain organizations representing disabled persons have disclosed a concern that publication of an interim rule, to become effective before receipt and consideration of public comments, indicates that the Department is "locked in" to the provisions of the interim rule and will not give serious consideration to further changes in response to comments.

The Department reiterates that this is not its intention. The Department publishes interim rules frequently and gives no less open and serious consideration to comments received on interim rules than to comments on proposed rules. In this particular instance, moreover, the election to proceed by interim rule was based solely upon the circumstances of the *Paralyzed Veterans* action.

The Department is concerned, however, that notwithstanding its own intentions, the reaction noted above of some organizations may indicate that publication of the rule as an interim rule may deter other interested persons from preparing and submitting comments. The Department's own experience would not support a conclusion that interested persons are less inclined to comment on interim rules than on proposed rules. Nonetheless, because the interests affected by this rule are extraordinarily broad and diverse and in order to encourage the broadest possible participation in this rulemaking, the Department has determined to revoke the notice of effective date of the interim rule and to treat the rule, as published, as a proposed rule.

Accordingly, the notice of effective date of the interim rule is hereby revoked. A notice of proposed rulemaking, converting the interim rule to a proposed rule and extending the comment period to September 6, 1983, appears elsewhere in this Part V of today's issue of the **Federal Register.**

Dated: June 14, 1983.

John J. Knapp,

General Counsel.

[FR Doc. 83-16280 Filed 6-14-83; 12:30 pm]

BILLING CODE 4210-27-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 8

[Docket No. R-83-528]

Nondiscrimination Based on Handicap in Federally-Assisted Programs and Activities of the Department of Housing and Urban Development

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Notice of proposed rule making; cross reference.

SUMMARY: Elsewhere in this Part V of today's issue, HUD is publishing a document announcing revocation of the notice of effective date of an interim rule published in the **Federal Register** on May 6, 1983 (48 FR 20638) and republished on May 18, 1983 (48 FR 22470). As more fully explained in the document published elsewhere in this Part V, the interim rule, scheduled to become effective on June 15, 1983, would have established procedures and policies to assure nondiscrimination based on handicap in programs and activities receiving Federal financial assistance from the Department of Housing and Urban Development.

HUD will now treat the published interim rule as proposed rule making and will consider the public comments received on that interim rule as comments on the proposed rule making.

DATE: The 90-day public comment period announced in the interim rule (which was scheduled to expire August 4, 1983) is hereby extended until September 6, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, Room 10278, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying during regular business hours at the above address. The rule text is available on tape for persons with vision impairments in the office of the Rules Docket Clerk shown above.

FOR FURTHER INFORMATION CONTACT: John Putman, Special Advisor to the Deputy Under Secretary for Intergovernmental Relations, or Clifton L. Baldwin, Disability Access Coordinator, Room 10184, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410. Both of the above persons may be reached by telephone at (202) 755-6732. A telecommunications device for deaf persons (TDD) is available at (202) 426-0016. These are not toll free numbers.

Dated: June 14, 1983.

John J. Knapp,

General Counsel.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Rules and Regulations

Federal Register
Vol. 48, No. 117
Thursday, June 16, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL LABOR RELATIONS AUTHORITY AND GENERAL COUNSEL OF THE FEDERAL LABOR RELATIONS AUTHORITY

5 CFR Part 2423

Informal Resolution of Unfair Labor Practice Allegations

AGENCY: Federal Labor Relations Authority and General Counsel of the Federal Labor Relations Authority.

ACTION: Amendment of rules and regulations.

SUMMARY: The General Counsel of the Federal Labor Relations Authority, pursuant to section 7118(a)(5) of the Federal Service Labor-Management Relations Statute (5 U.S.C. 711(a)(5)), has determined to adopt the proposed revision of §§ 2423.2(c) and 2423.7(a) of the rules and regulations relating to informal resolution of unfair labor practice allegations published in the **Federal Register** on January 10, 1983 (48 FR 1074). The amendments provide that normally, an unfair labor practice investigation will not commence until the parties have had a reasonable period of time *after* the filing of a charge, not to exceed fifteen (15) days, to informally resolve their dispute.

EFFECTIVE DATE: June 20, 1983.

FOR FURTHER INFORMATION CONTACT: David L. Feder, Assistant General Counsel, Office of the General Counsel (202) 382-0834.

SUPPLEMENTARY INFORMATION: On January 10, 1983, the General Counsel of the Authority published proposed regulations at 48 **Federal Register** 1074 to: (1) Reaffirm the existing policy of the Authority and the General Counsel to encourage the informal resolution of unfair labor practice allegations both prior and subsequent to the filing of an unfair labor practice charge; and (2) reinforce this policy by affording the parties an opportunity to resolve among themselves unfair labor practice allegations after the filing of an unfair labor practice charge but prior to the commencement of an investigation of the charge.

Parties were afforded an opportunity to submit written comments by February 25, 1983. Three labor organizations (two national and one local) and eight agencies (five Departments and three independent agencies) submitted written comments on the proposed revision. All of the agencies commenting opposed the revision, taking the position *inter alia* that the parties should be required to attempt to settle alleged unfair labor practice charges prior to the commencement of an investigation. All of the labor organizations commenting took the position that the revision was unwarranted and only would further delay the processing of unfair labor practice charges.

The General Counsel of the Authority has carefully considered all of the comments received on the proposed revision and has concluded that the proposed amendments further the policy of the Authority and the General Counsel by affording the parties an apportunity to informally resolve an unfair labor practice allegation among themselves after the filing of the charge without the intervention of an Authority agent occasioned by the commencement of an investigation.

With regard to the agencies' comments, it was determined that a regulation *requiring* parties to attempt to settle alleged unfair labor practice charges prior to the commencement of an investigation could lead to allegations of noncompliance with this requirement thus raising issues collateral to the unfair labor practice dispute necessitating further investigations, determinations and litigation, only complicating resolution of the alleged unfair labor practice. Additionally, since the rules and regulations provide the parties with every opportunity to resolve their dispute voluntarily prior to the commencement of an investigation and throughout all subsequent stages of the processing of an unfair labor practice charge, it was concluded that *requiring* the parties to attempt to resolve their dispute would not promote the purposes and policies of the Statute. Moreover, parties are still strongly encouraged by the Authority and the General Counsel to attempt to resolve their dispute *prior* to the filing of a charge and to continue settlement efforts at all stages of the processing of a charge.

As to the commenting labor organizations' concern about delay in the processing of unfair labor practice charges resulting from adoption of the proposed amendments, it was determined that a fifteen (15) day time period would provide a reasonable opportunity for the parties to explore settlement after the filing of an unfair labor practice charge, while not unduly delaying the investigation and disposition of the charge. In this latter regard, and as noted in the publication of the proposed amendments, Regional Offices, in many instances, do not commence their investigations of unfair labor practice charges until at least fifteen (15) days after the filing of the charge. Further, the amendments, as adopted, provide that the investigation *normally* will not commence for a time period not to exceed fifteen (15) days from the filing of the charge. This allows investigations to commence prior to the expiration of such fifteen (15) day period in the discretion of the Regional Directors; e.g., where appropriate temporary relief under section 7123(d) of the Statute appears to be warranted or where a pending representation election is blocked by an unfair labor practice charge.

Accordingly, the General Counsel of the Authority adopts the amendments as proposed. The promulgation of the proposed rules is not intended to limit the discretion of Regional Directors in commencing investigations of unfair labor practice charges where circumstances warrant that an investigation be commenced prior to the expiration of the fifteen (15) day period or that an investigation be delayed beyond the expiration of the fifteen (15) day period where the parties agree that the investigation should be further delayed to afford them an additional opportunity to resolve their dispute. In this regard, Regional Directors retain the

discretion they now possess under the rules and regulations to conduct such investigations as they deem necessary.

List of Subjects in 5 CFR Part 2423

Administrative practice and procedure, Government employees, Labor management relations.

PART 2423—UNFAIR LABOR PRACTICE PROCEEDINGS

Accordingly, the final rules and regulations of the Authority and the General Counsel of the Authority are amended as follows:

1. Section 2423.2 is amended by adding a new paragraph (c) to read as follows:

§ 2423.2 Informal proceedings.

* * * * *

(c) In order to afford the parties an opportunity to implement the policy referred to in paragraphs (a) and (b) of this section, the investigation of an unfair labor practice charge by the Regional Director will normally not commence until the parties have been afforded a reasonable amount of time, not to exceed fifteen (15) days from the filing of the charge, during which period the parties are urged to attempt to informally resolve the unfair labor practice allegation.

2. Section 2423.7(a) is revised to read as follows:

§ 2423.7 Investigation of charges.

(a) The Regional Director, on behalf of the General Counsel, shall conduct such investigation of the charge as the Regional Director deems necessary. Consistent with the policy set forth in section 2423.2, the investigation will normally not commence until the parties have been afforded a reasonable amount of time, not to exceed fifteen (15) days from the filing of the charge, to informally resolve the unfair labor practice allegation.

* * * * *

(5 U.S.C. 7118(a)(5) and 7134)

Note.—In accordance with section 605(b) of the Regulatory Flexibility Act of 1980, the General Counsel of the Federal Labor Relations Authority has determined that this document does not require preparation of a Regulatory Flexibility Analysis.

Dated: June 2, 1983.

General Counsel of the Federal Labor Relations Authority.

John C. Miller,

General Counsel

BILLING CODE 6727-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 906

Oranges and Grapefruit Grown in Texas; Relaxation of Handling Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule relaxes current handling requirements to permit shipment of Texas grapefruit in bulk (not in any of the currently authorized containers), if it grades at least U.S. No. 2 Russet, and it is at least 3⁵⁄₁₆ inches in diameter. Such action is designed to provide an outlet for grapefruit remaining on the trees at the end of the season after the commercial packing and processing facilities have closed.

DATES: Effective June 10, 1983, through July 31, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been certified a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the Texas grapefruit crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under the marketing agreement, as amended, and Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Texas Valley Citrus Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This final rule relaxes until July 31, 1983, current grade and size requirements for grapefruit, provided such fruit is shipped in bulk and it grades at least U.S. No. 2 Russet and it is at least 3⁵⁄₁₆ inches in diameter. Such shipments shall be exempt from assessments, and inspection and certification requirements.

This action reflects the current crop and marketing conditions and the composition of the remaining supplies for Texas grapefruit. The Texas Valley Citrus Committee reports that all processing and packing facilities available to Texas grapefruit growers will likely be closed for the season by June 11. The committee estimates that about 2,000 tons of grapefruit remain unharvested and may be abandoned unless current handling requirements are relaxed. Reportedly, demand exists for such fruit in nearby markets. Prompt action is required because prolonged hot weather will likely render the grapefruit unmarketable. These shipments are viewed as special purpose shipments because the grapefruit would be shipped in bulk form by growers and the quantities handled would be relatively insignificant. Such shipments may be exempted from inspection and certification requirements and assessments under § 906.42 of the order. The regualtion provides for such exemption because it would be administratively impracticable to assure compliance with these provisions due to the small quantities involved.

It is found that it is impracticable and contrary to the public interest to postpone the effective date of this final rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that the time intervening between the date when information upon which this final rule is based became available and the time when this final rule must become effective in order to effectuate the declared policy of the Act is insufficient. Interested persons were given an opportunity to submit information and views on the revision of grade and size requirements for certain bulk shipments at an open meeting, at which the committee, without opposition, recommended the requirements specified in this final rule. It is necessary to effectuate the declared purposes of the Act to make this final rule effective as specified. This final rule relieves restrictions on the handling of grapefruit and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 906

Marketing agreement and orders, Oranges, Grapefruit, Texas.

PART 906—[AMENDED]

Therefore, § 906.365 (47 FR 1265) is amended by adding a new paragraph (c)

to the section to read as follows (this final rule expires July 31, 1983, and will not be published in the annual Code of Federal Regulations):

§ 906.365 Texas orange and grapefruit regulation 34.

* * * * *

(c) Notwithstanding the requirements specified for grapefruit in paragraphs (a) (3) through (6) of this section, during the period (insert date of signature of this final rule), through July 31, 1983, any handler may ship grapefruit in bulk (defined to mean in containers other than those specified in § 906.340): *Provided,* That such grapefruit grades at least U.S. No. 2 Russet and is not smaller than 3⅛₆ inches in diameter. Sections 906.34 (assessments) and 906.45 (inspection and certification) shall not apply to the handling of bulk grapefruit.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 10, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 83–16134 Filed 6–15–83; 8:45 am]

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 25

Amendment to the Timetable for the Publication of a Revised Access Authorization Fee Schedule

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to change the date of publication for the annual access authorization fee schedule from December to July. The Office of Personnel Management (OPM) sets the basic cost for the access authorization background investigations and notifies the NRC of adjustments for the cost on or about July 1. The change in publication date for the fee schedule will enable NRC to comply more promptly with OPM's revised cost adjustments.

EFFECTIVE DATE: June 16, 1983.

FOR FURTHER INFORMATION CONTACT: Richard A. Dopp, Chief, Security Policy Branch, Division of Security, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 Telephone: (301) 427–4549.

SUPPLEMENTARY INFORMATION: The current § 25.17 indicates that access authorization fees will be published in December of each year and will be applicable to each access authorization request received during the following calendar year. The Office of Personnel Management (OPM) conducts the access authorization background investigation for the NRC under an interagency agreement and set the basic cost for such investigations. However, OPM notifies the NRC of adjustments to the cost of these investigations on or about July 1 of each year. In order to comply more promptly with the OPM cost adjustment timetable, the NRC is amending this section to establish July rather than December as the month when the annual revised access authorization fee schedule will be published. In order to implement this change, no revised fee schedule was published during December 1982, and the next revised fee schedule will be published in July 1983. Since this is a minor procedural amendment, the notice and comment procedures of the Administrative Procedure Act (5 U.S.C. 553) do not apply, and good cause exists for making the amendment effective upon publication in the Federal Register.

Paperwork Reduction Act Statement

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150–0046.

List Of Subjects in 10 CFR Part 25

Classified information, Penalty, Reporting and recordkeeping requirements, Security measures.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, the Independent Offices Appropriation Act of 1952 and Section 553 of Title 5 of the United States Code, the following amendment to Part 25 of Title 10, Chapter 1, Code of Federal Regulations is published as a document subject to codification.

PART 25—ACCESS AUTHORIZATION FOR LICENSEE PERSONNEL

1. The authority citation for Part 25 continues to read as follows:

Authority: Secs. 145, 161, 68 Stat. 942, 948, as amended (42 U.S.C. 2165, 2201); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); E.O. 10865, as amended, 3 CFR 1959–1963 COMP., p. 398, (50 U.S.C. 401, note); E.O. 12356, 47 FR 14874, April 6, 1982.

Appendix A also issued under Title V, Pub. L. 82–137, 65 Stat. 290 (31 U.S.C. 483a).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 25.13, 25.17(a), 25.33(b) and (c) are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 25.13 and 25.33(b) are also issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 201(o)).

2. In § 25.17, paragraph (e) is revised to read as follows:

§ 25.17 Approval for processing applicants for access authorization.

* * * * * * *

(e) Applications for access authorization processing must be accompanied by a check or money order, payable to the United States Nuclear Regulatory Commission, representing the current cost for the processing of each "Q" and "L" access authorization request. Access authorization fees will be published in July of each year and will be applicable to each access authorization request received upon or after the date of publication. Applications from individuals having current Federal access authorizations may be processed expeditiously at less cost, since the Commission may accept the certification of access authorization and investigative data from other Federal Government agencies which grant personnel access authorizations.

Dated at Bethesda, Maryland, this 6th day of June 1983.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

[FR Doc. 83–16226 Filed 6–15–83; 8:45 am]

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83–ASW–23; Amdt. 39–4657]

Airworthiness Directives; Societe Nationale Industrielle Aerospatiale (SNIAS), Models AS350B, AS350C, AS350D, and AS350D–1

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires modification of a wiring harness previously installed as part of Aerospatiale Helicopter Corporation's (AHC) Supplemental Type Certificate (STC) number SH4032SW on Societe Nationale Industrielle Aerospatiale (SNIAS) Model AS350B or STC SH2825SW on Societe Nationale Industrielle Aerospatiale (SNIAS)

Models AS350C, AS350D, and AS350D–1. The AD is needed to prevent failure of the emergency flotation system (i.e., failure of float bags to inflate). Failure of a bag to inflate could result in loss of the helicopter in the event of ditching.

EFFECTIVE DATE: June 16, 1983.

Compliance is required prior to any further overwater flight operation of the helicopter after the effective date of this AD (unless already accomplished in accordance with Aerospatiale Helicopter Corporation (AHC) Service Bulletin No. SB 350–18, dated April 4, 1983).

ADDRESSES: The applicable service bulletin may be obtained from Aerospatiale Helicopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75051, Attention: Customer Support.

A copy of the service bulletin is contained in the Rules Docket at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: J. R. Bannister, Helicopter Certification Branch, ASW–170, Aircraft Certification Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone number (817) 877–2590.

SUPPLEMENTARY INFORMATION: The FAA has determined that the electrical wires to the float actuation squibs have been installed without adequate chafing protection and thus could fail and prevent proper inflation of the emergency flotation system and subsequent loss of the helicopter should a water landing be required. Since this condition is likely to exist or develop on other helicopters of the same type design, an airworthiness directive is being issued which requires modification of the electrical harness for the float actuation. The modification must be accomplished on all SNIAS Models AS350B, AS350C, AS350D, and AS350D–1 helicopters equipped with emergency flotation kits (Air Cruiser P/N E16636–505), except for AHC kits delivered after April 4, 1983, installed in accordance with AHC's STC SH4032SW or SH2825SW. Approximately 110 helicopters have the kits installed with adequate protection of the wiring harness.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Societe Nationale Industrielle Aerospatiale (SNIAS): Applies to all SNIAS Models AS350B, AS350C, AS350D, and AS350D–1 helicopters, certificated in all categories, that have Air Cruiser flotation kits, P/N E16636–505, installed in accordance with STC SH4032SW or SH2825SW, and delivered by AHC prior to April 4, 1983.

Compliance is required as indicated unless already accomplished in accordance with Aerospatiale Helicopter Corporation Service Bulletin No. SB 350–18, dated April 4, 1983.

To prevent possible failure of the Air Cruiser emergency flotation system, accomplish the following prior to further overwater flight.

(a) Reroute harness and add ¼ inch diameter heat shrink tubing to electrical harness in accordance with Figure 1.[1]

(b) Add ¾ inch diameter heat shrink tubing to encase both mechanical cable and electrical harness. Assure that ¾ inch tube overlaps ¼ inch shrink tubing as shown in Figure 1.

(c) Install four supporting clamps, P/N MS21919WDG2, on each float bottle valve assembly side plate (drill and fit per Figure 1).

(d) Install three clamps, P/N MS 21919WDG36, on each cross tube to support squib harness (reference Figure 2). Ground strap is to be clamped at the lowest point on cross tube that will allow float to be pivoted between operating and ground handling position.

(e) Inspect the harness installation and perform the electrical test described in Air Cruiser's Overhaul Manual, reference 25.60.93, page 706, or FAA approved equivalent.

(f) Materials necessary to complete the modification are listed below.

[1] Figures 1 and 2 are filed as a part of the original document only. They will not be published in the **Federal Register.**

Description	Part No.	[illegible]	Quantity
Rivet	MS20470AD3–4	Standard hardware	4
Bracket	AN743–13	Standard hardware	2
Clamp	MS21919WDG2	Standard hardware	8
Clamp	MS21919WDG36	Standard hardware	6
Screw	NAS603–[illegible]	Standard hardware	4
Washer	AN960–10L	Standard hardware	4
Nut	MS21044N3	Standard hardware	4
Heat shrink tubing	¾ inch	Raychem (Mouser Alt)	10 feet
Heat shrink tubing	¼ inch	Raychem (Mouser Alt)	3 feet

This amendment becomes effective June 13, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this regulation involves approximately 119 helicopters and the cost to each helicopter is approximately $165. Therefore, I certify that this action: (1) Is not a "major rule" under Executive Order 12291, and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

Issued in Fort Worth, Texas, on May 24, 1983.

C. R. Melugin, Jr.,

Director, Southwest Region.

BILLING CODE 4910–13–M

14 CFR Part 97

[Docket No. 23660; Amdt. No. 1244]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight

operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

* * * *Effective August 4, 1983*

Sherman-Denison, TX—Grayson County, RNAV Rwy 35R, Amdt. 1

* * * *Effective July 21, 1983*

Carlsbad, NM—Cavern City Air Terminal, RNAV Rwy 14R, Amdt. 1
Manassas, VA—Manassas Muni/Harry P. Davis Field, RNAV Rwy 16R, Amdt. 6

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a) 1421, and 1510); Sec 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

Issued in Washington, D.C. on June 10, 1983.

John M. Howard,

Manager, Aircraft Programs Division.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 146

[T.D. 83-139]

Customs Regulations Amendments Relating to the Transfer of Merchandise From a Foreign-Trade Zone to a Customs Bonded Warehouse

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to permit the transfer of zone-restricted merchandise from a foreign-trade zone to a Customs bonded warehouse pending exportation, without obtaining approval of the Foreign-Trade Zones Board, Department of Commerce. This change is being made because elimination of this unnecessary requirement will expedite the transfer process.

EFFECTIVE DATE: July 18, 1983.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: William D. Lawlor, Carriers, Drawback and Bonds Division (202–566–5856); Operational Aspects: John R. Holl, Office of Cargo Enforcement and Facilitation (202–566–8151); U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Foreign-trade zones (zones) are areas within the United States (but outside of the "Customs territory" of the United States, as defined in § 146.1, Customs Regulations (19 CFR 146.1)), where foreign or domestic merchandise may be brought for manipulation, manufacture, assembly, or other processing, or for

storage or exhibition, provided that these operations are not otherwise prohibited by law. Foreign merchandise may be brought into a zone without being subject to the usual Customs entry procedures and payment of duty. Foreign or domestic merchandise may be exported or entered into the Customs territory from a zone.

Zones are established under the Foreign-Trade Zone Act of 1934, as amended (19 U.S.C. 81a–81u), and the general regulations and rules of procedure of the Foreign-Trade Zones Board (the Board), Department of Commerce (15 CFR Part 400). Part 146, Customs Regulations (19 CFR Part 146), governs the admission of merchandise into a zone; the manipulation, manufacture, or exhibition in a zone; the exportation of merchandise from a zone; and the transfer of merchandise from a zone into the Customs territory.

Articles taken into a zone from the Customs territory for the sole purpose of exportation, destruction (except destruction of distilled spirits, wines, and fermented malt liquors), or storage are given "zone-restricted" status upon proper application. (Certain shipments of zone-restricted merchandise which have been placed in a zone to obtain the benefit of drawback or cancellation of a temporary importation bond are subject to footnote 3 of § 22.2, Customs Regulations (19 CFR 22.2) and T.D. 55819(11).)

Upon receiving zone-restricted status, merchandise is considered exported and may be returned to the Customs territory for domestic consumption only after the Board has determined that the transfer is in the public interest.

Because obtaining Board approval may be a time-consuming process and may result in lost sales to merchants who wish to transfer zone-restricted merchandise to a Customs bonded warehouse pending exportation, the question has arisen whether zone-restricted merchandise may be transferred to a Customs bonded warehouse pending exportation, without Board approval. While 19 U.S.C. 81c prohibits the return of merchandise to Customs territory from a zone for domestic consumption without Board approval, it does not prohibit the return of merchandise to Customs territory for warehousing prior to exportation. It is noted that section 557, Tariff Act of 1930, as amended (19 U.S.C. 1557), provides, in part, that the total period of time that merchandise may remain in a bonded warehouse shall not exceed five years from the date of importation.

Customs published a notice in the **Federal Register** on August 27, 1982 (47 FR 37927), proposing to amend § 146.47, Customs Regulations (19 CFR 146.47), to permit the transfer of zone-restricted merchandise from a zone to a Customs bonded warehouse pending exportation, without obtaining approval of the Board.

Discussion of Comments

Two of the three comments received in response to the notice support the change.

The third commenter opposes the change. He contends: (1) that there is no need to remove merchandise from a zone prior to actual exportation since an immediate export or a transportation and exportation movement can be arranged to take the merchandise directly from the zone to the exporting carrier without the involvement of the Board; (2) that the change creates a means of circumventing the prohibition against retail trade in a zone by allowing the merchandise to move from a zone to a warehouse, and eventually to a duty-free shop; and (3) that the change can only enhance the possibility that Customs may lose complete control of zone-restricted merchandise, in view of an historic control problem with warehouse entries and immediate export and transportation for exportation bonded movements, and in view of the new warehouse procedures.

As the commenter notes, an immediate export or a transportation and exportation movement can be arranged without approval of the Board. However, commercial realities sometimes require the movement of zone-restricted merchandise to the port of exportation before there is a firm commitment with an exporting carrier. The amendment will simply permit such merchandise to be held in a bonded warehouse pending exportation. Approval of the Board will still be necessary where the goods are to be entered into the Customs territory for consumption or into a warehouse for any purpose other than exportation.

With respect to the commenter's second contention, Customs notes that there is no prohibition against retail trade in a Customs bonded warehouse operated as a duty-free shop. Merchandise sold from a duty-free shop is for export, and not for domestic consumption. Retail trade in a duty-free shop is not in derogation of the Foreign-Trade Zones Act of 1934 or the Customs Regulations.

Customs believes that the new warehouse audit/inspection approach provided for by T.D. 82–204 (see **Federal Register** of November 1, 1982 (47 FR 49355)), provides for adequate control over merchandise in warehouses, including zone-restricted merchandise transferred to warehouses. Pursuant to § 146.47(e)(4), Customs will maintain "paper control" over zone-restricted merchandise.

After analysis of the comments and further review of this matter, the proposal to amend section 146.47 is adopted. Language has been added to proposed section 146.47(e)(4) to provide that zone-restricted merchandise transferred from a zone to a Customs bonded warehouse may not be manipulated, except packing or unpacking incidental to exportation. Further, pursuant to 19 U.S.C. 1557, the total period of time that merchandise may remain in a Customs bonded warehouse may not exceed five years from the date of importation.

List of Subjects in 19 CFR Part 146

Customs duties and inspection, Exports, Imports, Foreign-trade zones.

Amendments to the Regulations

Part 146, Customs Regulations (19 CFR Part 146), is amended as set forth below.

PART 146—FOREIGN-TRADE ZONES

1. Section 146.47(a) is revised to read as follows:

§ 146.47 Transfer of zone-restricted merchandise into Customs territory.

(a) *Types of entry.* If the return of zone-restricted merchandise to Customs territory for domestic consumption has been ruled by the Board to be in the public interest, it may be entered for consumption, for warehousing, or for immediate transportation without appraisement, unless the Board has specified which of these forms of entry shall be made. Otherwise, zone-restricted merchandise may be returned to Customs territory only for entry for exportation, for Customs bonded warehousing at the same or a different port prior to exportation, for entry for transportation and exportation, for destruction (except destruction of distilled spirits, wines, and fermented malt liquors), for transfer from one zone to another, or for delivery to a qualified vessel or aircraft or as ground equipment of a qualified aircraft under sections 309 or 317 of the Tariff Act of 1930, as amended.

* * * * *

2. Section 146.47 is further amended by adding a new paragraph (e)(4) to read as follows:

* * * * *

(e) * * *

(4) Zone-restricted merchandise may

be transferred from a foreign-trade zone to a Customs bonded warehouse for storage pending exportation. The warehouse entry, Customs Form 7502, shall be endorsed by the district director to show that the merchandise may not be withdrawn for consumption. In the case of zone-restricted merchandise transported in bond to another port for warehousing and exportation, Customs Form 7512 shall be endorsed by the district director to show that the merchandise is foreign-trade zone merchandise in zone-restricted status, which shall be entered for warehouse, with proper endorsement on Customs Form 7502, and which may not be withdrawn for consumption. Zone-restricted merchandise transferred from a foreign-trade zone to a Customs bonded warehouse may not be manipulated, except packing or unpacking incidental to exportation. Pursuant to section 557, Tariff Act of 1930, as amended (19 U.S.C. 1557), any merchandise placed in a Customs bonded warehouse may not remain in the warehouse after five years from the date of importation and no merchandise may be placed in a Customs bonded warehouse after five years from the date of importation.

(R.S. 251, as amended; section 1, 48 Stat. 998, *et seq.*, as amended; section 624, 46 Stat. 759 (19 U.S.C 66, 81a–81u, 1624)).

Regulatory Flexibility Act

Pursuant to section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that the regulations set forth in the document will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

Because this document does not meet the criteria for a "major rule" as defined in section 1(b) of E.O. 12291, a regulatory impact analysis as prescribed by section 3 of the E.O. is not required.

Drafting Information

The principal author of this document was Gerard J. O'Brien, Jr., Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Alfred R. De Angelus,

Acting Commissioner of Customs.

Approved: May 26, 1983.

John M. Walker, Jr.,

Tariff Classification of Footwear; Correction

AGENCY: Customs Service, Treasury.

ACTION: Correction.

SUMMARY: This document corrects an error in a document published in the **Federal Register** on Monday, May 23, 1983 (48 FR 22904), relating to the tariff classification of imported footwear.

FOR FURTHER INFORMATION CONTACT: Jesse V. Vitello, Regulations Control Branch, U.S. Customs Service (202–566–8237).

Background

In FR Doc. 83–13803, appearing at page 22911, in the issue of May 23, 1983, the word "upper" was inadvertently included in the first line of item 4 under the sub-heading "Characteristics of a Foxing-like Band". This line should read as follows:

4. A foxing-like band must be applied, or molded at the sole and must overlap the upper.

Dated: June 10, 1983.

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 416

[Reg. No. 16]

Supplemental Security Income for the Aged, Blind, and Disabled; Phaseout of Hold-Harmless Protection

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: These rules revise current regulations to implement section 184 of Pub. L. 97–248 (Tax Equity and Fiscal Responsibility Act of 1982) and continuing budget resolutions for fiscal year 1982 (Pub. L. 97–51, 97–85, 97–92, and 97–161) which provide for the phase-out of Federal hold-harmless payments which are payable to States under certain conditions toward the cost of federally administered State supplementary payments under the Supplemental Security Income Program (SSI) for the Aged, Blind, and Disabled. The law and thus the rules provide that for fiscal year 1982, these Federal payments were reduced to 60 percent of what they otherwise would have been. For fiscal year 1983, these Federal payments will be reduced to 40 percent of what they otherwise would be. For fiscal year 1984, they will be reduced to 20 percent. The Federal payments will be completely discontinued for fiscal years after fiscal year 1984. Since Hawaii and Wisconsin are the only States which continue to receive Federal contributions toward the cost of their supplementation programs, the phase-out of these payments will affect only these two States.

DATES: These regulations are effective June 16, 1983. The statutory amendments upon which the regulations are based became effective beginning on October 1, 1981. We will consider any comments received by August 15, 1983, and will revise these regulations if public comment warrants it.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Adminstration, 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Irving Darrow Esq., Legal Assistant, 3–B–3 Operations Building, 6401 Security Boulevard, Baltimore, Maryland, 21235; (301) 597–3409.

SUPPLEMENTARY INFORMATION: The hold-harmless provision was included in the legislation establishing the SSI program (Pub. L. 92–603) as an inducement to States which had payment levels in the pre-SSI assistance programs for the aged, blind, and disabled that were higher than the new Federal SSI benefit levels, to supplement Federal SSI benefits. Under the hold-harmless provisions as originally enacted, State liability for the cost of supplementing SSI benefits was limited to the amount spent by the State for assistance on behalf of aged, blind, and disabled people in calendar year 1972. Under certain conditions, costs for such supplementation which were above this amount were borne by the Federal government. The added cost against which States were protected related to increased numbers of people made

eligible for SSI and, thus, for State supplementary payments, by demographic changes or SSI eligibility provisions.

The hold-harmless provision was intended to be transitional with Federal contributions toward federally administered State supplementary payments phasing out as Federal SSI benefits increased. However, two of six States originally eligible to receive hold-harmless funds continue to receive Federal contributions toward the costs of their supplementary payments. Hawaii and Wisconsin continue to benefit from the hold-harmless provision of primary because of a 1976 change in the law (section 2(b) of Pub. L. 94–585) which provided that hold-harmless payments would no longer be reduced by the effect of cost of-living increases in Federal SSI benefits. The provisions of the continuing resolutions for fiscal year 1982 and section 184 of Pub. L. 97–248 ensure that hold-harmless funding will also phase out for Hawaii and Wisconsin.

Final Rule

Generally, it is the Department's policy to use notice and comment procedures in the development of rules. However, under the Administrative Procedure Act (5 U.S.C. 553(b)(B)), an agency for good cause may issue rules without using notice and public comment procedures. One such situation arises, as in this case, when the statute is so explicit that there is no room for policy formulation. Accordingly, we find that publication of a notice of proposed rulemaking is "unnecessary" because the statutory provision upon which the regulations are based allows for no discretion. Therefore, these rules are being issued as final rules.

Regulatory Procedures

Executive Order No. 12291—The phase out of hold-harmless payments is expected to result in Federal Savings of $13.2 million for fiscal year 1982, $17.4 million for fiscal year 1983, $20 million for fiscal year 1984, and $23 million for fiscal year 1985. Since these regulations do not "result in" a cost impact of $100 million or more or otherwise meet the criteria for a major regulation, a regulatory impact analysis is not required.

Regulatory Flexibility Act—We certify that these regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities because they affect only two States. Therefore, a regulatory flexibility analysis as provided for in Pub. L. 96–354, the Regulatory Flexibility Act, is not required.

Paperwork Reduction Act of 1980—These regulations impose no additional reporting and recordkeeping requirement requiring Office of Management and Budget clearance.

List of Subjects in 20 CFR Part 416

Administrative practice and procedure, Aged, Blind, Disabled, Public assistance programs, Supplemental security income (SSI).

Dated: March 23, 1983.

John A. Svahn,

Commissioner of Social Security.

Approved: May 19, 1983.

Margaret M. Heckler,

Secretary of Health and Human Services.

PART 416—[AMENDED]

Part 416 of Title 20 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Subpart T of Part 416 reads as follows:

Authority: Secs. 1102, 1601, 1616, 1631, and 1634, Social Security Act, as amended, sec. 401 of Pub. L. 92–603 as amended, sec. 212 of Pub. L. 93–66, sec. 8 of Pub. L. 93–233, secs. 1 and 2 of Pub. L. 93–335, 49 Stat. 647, as amended, 86 Stat. 1465, 1474, 1475, 1478, and 1485, 87 Stat. 155 and 956, 88 Stat. 291; 42 U.S.C. 1302, 1381, 1382e, 1383, 1383c, 1382e nts, 1382 nt (7 U.S.C. 2012 nts) Pub. L. 97–51, 97–85, 97–92, and 97–161.

2. In § 416.2080, paragraph (a) is revised to read as follows:

§ 416.2080 Limitation of fiscal liability of States.

(a) *Fiscal limits.* (1) *Fiscal years before fiscal year 1982.* For each fiscal year before fiscal 1982, the amount payable to the Secretary by a State for the amount of the supplementary payments described in paragraph (c) of this section which are made on its behalf pursuant to the administration agreement with the Secretary as described in § 416.2005 shall not exceed the total amount of the State's calendar year 1972 non-Federal share of expenditures as aid or assistance under the State plan(s) approved under title I, X, XIV, or XVI of the Act, as set forth in § 416.2082.

(2) *Fiscal years after fiscal year 1981.* For each fiscal year after fiscal year 1981, the amount payable to the Secretary by a State for the amount of the supplementary payments described in paragraph (c) of this section which are made on its behalf pursuant to the administration agreement with the Secretary as described in § 416.2005 shall not exceed the total amount of the State's calendar year 1972 non-Federal share of expenditures as aid or assistance under the State plan(s) approved under title I, X, XIV, or XVI of the Act, as set forth in § 416.2082. *Except that:* If the total amount of the supplementary payments described in paragraph (c) (protected payments) exceeds the total amount of the State's calendar year 1972 non-Federal share of expenditures as set forth in § 416.2082, for any fiscal year after fiscal year 1981, additional amounts shall be payable to the Secretary by the State as follows:

(i) For fiscal year 1982, 40 percent of the amount of the total protected payments that exceeds the State's calendar year 1972 non-federal share of expenditures;

(ii) For fiscal year 1983, 60 percent of the amount of the total protected payments that exceeds the State's calendar year 1972 non-federal share of expenditures;

(iii) For fiscal year 1984, 80 percent of the amount of the total protected payments that exceeds the State's calendar year 1972 non-federal share of expenditures; and

(iv) For fiscal years after fiscal year 1984, 100 percent of the amount of total protected payments that exceeds the State's calendar year 1972 non-federal share of expenditures.

BILLING CODE 4190-11-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 625

Design Standards for Highways; Resurfacing, Restoration, and Rehabilitation of Streets and Highways Other Than Freeways

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Rule-related notice.

SUMMARY: This notice provides information and advises interested persons of the steps FHWA has taken to effectuate section 110(a) of the Surface Transportation Assistance Act of 1982 and the implementing regulation issued March 31, 1983 regarding the FHWA policy and procedure applicable to resurfacing, restoration, and rehabilitation (RRR) projects on federally financed highways other than freeways.

FOR FURTHER INFORMATION CONTACT: David K. Phillips, Director, Office of Engineering (202) 426–4853, or Lee J. Burstyn, Office of the Chief counsel (202) 426–0800, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C., 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 110(a) of the Surface Transportation Assistance Act of 1982, Pub. L. 97–424, 96 Stat. 2105 (January 6, 1983), 23 U.S.C. 109(o), added to the Federal-Aid Highway Act a statement of Congressional intent that "any project for resurfacing, restorating, or rehabilitating any highway, other than a highway access to which is fully controlled, in which Federal Funds participate shall be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety."

To implement 23 U.S.C. 109(o), FHWA amended its nonfreeway RRR regulation. 48 FR 13410 (March 31, 1983). The amendment adds to the definition of RRR work at 23 CFR 625.2(b), the requirement that it be undertaken to enhance safety:

> The RRR work is defined as work undertaken to extend the service life of an existing highway and enhance highway safety.

The regulation implementing section 109(o) has the effect of superseding certain features of the prior regulation (47 FR 25268, June 10, 1982) and its accompanying preamble which may be construed as indicating that FHWA does not consider highway safety a primary objective of RRR projects. The FHWA does consider the enhancement of highway safety as a primary objective of RRR projects.

The FHWA has revised the Technical Advisory 5040.19 [1] issued July 16, 1982 as management guide to assure that certain design-related factors which enhance safety and preserve and extend service life are considered in the States' development of geometric design criteria for nonfreeway RRR projects. These revisions, as incorporated in a new Technical Advisory, T 5040.21, issued April 4, 1983, ensure its consistency with 23 U.S.C. 109(o) and the amended regulation.

On April 8, 1983, the FHWA took the added measure of instructing its field offices that all state procedures and separate geometric design criteria for nonfreeway RRR projects approved in the future shall be consistent with new section 109(o), the RRR regulation as amended on March 31, 1983, and the revised Technical Advisory.

Finally, the FHWA has instructed that all separate geometric design criteria and procedures submitted by the States for nonfreeway RRR projects approved prior to the issuance of the March 31 amendment and the revised Technical Advisory, including those approved under Certification Acceptance or Secondary Road Plan Procedures, be re-evaluated to assure that they are consistent with the intent of Congress that such RRR projects be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety.

Issued on: June 9, 1983.

L. P. Lamm,

Deputy Administrator, Federal Highway Administration.

Department of the Air Force

32 CFR Part 823

Individuals and Organizations

AGENCY: Department of the Air Force, Defense.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is amending its regulations by removing Part 823 Individuals and Organizations, of Chapter VII, Title 32. The source document, Air Force Regulation (AFR) 145–15, Air Force Commissary Store Regulation, has been revised. It is intended for internal guidance and has no applicability to the general public. This action is a result of departmental review in an effort to insure that only regulations which substantially affect the public are maintained in the Air Force portion of the Code of Federal Regulations.

EFFECTIVE DATE: June 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Odom, Headquarters Air Force Commissary Service (HQ AFCOMS/DOS), Kelly AFB, TX 78241, telephone (512) 925–6414.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 823

Armed Forces Reserves, Federal buildings and facilities, Military personnel, Veterans.

PART 823—[REMOVED]

Accordingly, 32 CFR is amended by removing Part 823.

(10 U.S.C. 8012)

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CDG 09–83–09]

Special Local Regulations; International Freedom Festival Fireworks; Detroit, Michigan

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the International Freedom Festival Fireworks. This event will be held on the Detroit River on 30 June 1983. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATES: These regulations become effective and terminate on 30 June 1983.

FOR FURTHER INFORMATION CONTACT: MSTC Bruce Graham, Office of Search and Rescue, Ninth Coast Guard District, 1240 E 9th St., Cleveland, OH 44199, (216) 522–4420.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making has not been published for these regulations. Following normal rule making procedures is unnecessary as per 5 U.S.C. 553(b)(3)(B). This has been an annual event for many years and no negative comments have been received concerning the holding of the event in the past.

Drafting Information

The drafters of this regulation are MSTC Bruce Graham, project officer, Office of Search and Rescue and LCDR A. R. Butler, project attorney, Ninth Coast Guard District Legal Office.

Discussion of Regulations

The International Freedom Festival Fireworks Display will be conducted on the Detroit River on 30 June 1983. An unusually large concentration of spectator boats could pose hazards to navigation in the area. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol

Commander (U.S. Coast Guard Group Detroit, MI).

List of Subjects in 33 CFR Part 100

Marine safety, Navagation (water).

Regulations

PART 100—[AMENDED]

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding a temporary § 100.35–0909 to read as follows:

§ 100.35–0909 Special Local Regulations

(a) *Regulated Area.*—(1) The following area will be closed to vessel navigation or anchorage for vessels of 65 feet in length or greater from 9:00 p.m. (local time) until 11:15 p.m. on 30 June 1983: The U.S. waters of the Detroit River between the Ambassador Bridge and the downstream end of Belle Isle. (2) The following portion of the Detroit River will be closed to all vessel traffic, from 9:00 p.m. (local time) until 11:15 p.m. on 30 June 1983: The area bound on the south by the International Boundary, on the west by 083 degrees 03 minutes West, on east by 083 degrees 02 minutes West, and the north by the U.S. shoreline.

(b) *Special Local Regulations.*—(1) Vessels under 65 feet shall begin clearing the shipping channels at 10:45 p.m. local or when the fireworks display ends, whichever comes first.

(2) Fireworks barges will be moved to positions in the Detroit River after 5:00 p.m. on 30 June 1983, and will be removed immediately after the fireworks display. The barges will be located within 950 feet of the U.S. riverbank opposite each of the following landmarks: Cobo Hall, Veterans Memorial Bldg., and the Ford Auditorium. Vessel masters shall pass with caution. Each barge will be marked in accordance with rule 30 of the Inland Rules of the road for a vessel at anchor, and a fixed white light on each corner of the barges will be shown at night and an orange buoy with horizontal white bands will mark each special mooring.

(3) If the weather on 30 June 1983 is inclement, the fireworks display and the river closure will be postponed until 9:00 p.m. to 11:15 p.m. on 01 July 1983. If postponed, notice will be given on 30 June 1983 over the U.S. Coast Guard Radio Net.

(4) Vessels desiring to transit the restricted area may do so only with prior approval of the Patrol Commander and when so directed by that officer. Vessels will be operated at a no wake speed to reduce the wake to a minimum and in a manner which will not endanger participants in the event or any other craft. These rules shall not apply to participants in the event or vessels of the patrol, in the performance of the their assigned duties.

(5) A succession of sharp, short signals by whistle or horn from vessels patrolling the areas under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels signaled shall stop and shall comply with the orders of the Patrol Vessel; failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(46 U.S.C. 454; 49 U.S.C. 1655(b); 49 CFR 1.46(b); and 33 CFR 100.35)

Dated: May 27, 1983.

GENERAL SERVICES ADMINISTRATION

Federal Supply and Services

41 CFR Ch. 101

[FPMR Temp. Reg. E–79, Supp. 1]

Supply and Procurement; Adjustments

AGENCY: Office of Federal Supply and Services, General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This supplement extends to April 30, 1984, the expiration date of FPMR Temporary Regulation E–79 (47 FR 20589, May 5, 1982) which raised the minimum line item dollar values required for shipping-type discrepancies in GSA or DOD shipments to $50 for reporting and $100 for billing adjustments. This change was necessary because the costs associated with processing discrepancies had increased significantly.

DATES: Effective date: April 23, 1983. Expiration date: April 30, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. James W. Jeremiah, Director, Requisition Management Division (703–557–7580).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual affect on the economy of $100 million or more; or major increases in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

CHAPTER 101—[AMENDED]

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter E:

Note.—The text to Supplement 1 to FPMR Temporary Regulation E–79 is filed with the original document, and its text does not appear in this volume.

[Federal Property Management Regulation Temporary Regulation E–79; Supplement 1]

May 20, 1983.

To: Heads of Federal agencies.

Subject: Adjustments.

1. *Purpose.* This supplement extends the expiration date of FPMR Temporary Regulation E–79.

2. *Effective date.* This regulation is effective on April 23, 1983.

3. *Expiration date.* This supplement expires on April 30, 1984.

4. *Explanation of change.* The expiration date in paragraph 3 of FPMR Temporary Regulation E–79 is revised to April 30, 1984.

Ray Kline,

Acting Administrator of General Services.

47 CFR Part 2

[Gen. Docket No. 80–739; FCC 83–272]

Frequency Allocation and Radio Treaty Matters; General Rules and Regulations; Implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979

AGENCY: Federal Communications Commission.

ACTION: Final rule (Report and Order).

SUMMARY: The Federal Communications Commission amends Part 2 of its Rules to implement domestically the Final Acts of the 1979 World Administrative Radio Conference with regard to the 11.7–12.2 GHz band. This action brings the Commission's Rules into conformity with international regulations. This provides domestic radio spectrum users with international recognition and rights

to protection from harmful interference as provided by international regulations.

EFFECTIVE DATE: July 18, 1983.

ADDRESS: Federal Communications Commission, 2025 M Street, NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mr. Fred Thomas/Mr. William Torak, Office of Science and Technology, 2025 M Street, NW., Washington, D.C. 20554, (202) 653–8171/(202) 632–7025.

First Report and Order

In the matter of amendment of Part 2 of the Commission's Rules Regarding Implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979, General Docket 80–739.

Adopted: June 2, 1983.
Released: June 10, 1983.

By the Commission: Commissioner Fogarty not participating; Commissioner Rivera concurring in the result.

Purpose

1. The purpose of this proceeding is to implement into Part 2 of the Commission's Rules and Regulations the Final Acts of the 1979 World Administrative Radio Conference. This First Report and Order will be limited to addressing the issues affecting only the 11.7–12.2 GHz band. Of particular interest in this band is the issue of domestic adoption of international footnote 836, which would allow transponders on space stations in the fixed-satellite service (FSS) to be used for broadcasting-satellite service (BSS) operations. This issue of BSS use of FSS satellites was originally raised by the Commission in its Order, *GTE Satellite Corporation*, 90 FCC 2d 1009 (1982), where the Commission authorized GSAT, pursuant to Section 214 of the Act, to acquire transponders for the provision of video service to single unit dwellings in addition to more conventional FSS terminals serving cable television systems, broadcast stations, hotels, etc. The Commission further decided that the domestic adoption of footnote 836 should be fully addressed in the instant proceeding. Accordingly the issue was raised in the Notice of Proposed Rule Making (NPRM), FCC 82–508, released December 30, 1982, of this proceeding. We believe that, due to the great interest and response to the NPRM regarding this issue by the public and due to the ongoing public concern regarding the GTE Order, it would be in the public interest to resolve this issue without delay. Additionally, we will address the issue of adopting footnote NG143, which would permit international FSS operations in this band, and the issue of a secondary mobile-satellite allocation in this band. The remainder of the issues addressed in the NPRM will be dealt with in future Report and Orders in this proceeding.

Discussion

2. Those who filed comments and reply comments to the issues raised in the NPRM regarding the 11.7–12.2 GHz band are listed in Appendix A.

International Footnote 836

3. Comments regarding footnote 836 were filed by SPSC, STC, USCI and USSB and reply comments were filed by DBSC, GSAT, MOBILSAT, RCA, STC, SPSC, USCI and USSB.

4. In their comments both SPSC and USCI supported the footnote and urged the Commission to adopt it domestically, as they claim that it provides flexibility. However, both STC and USSB in their comments were opposed to the footnote and requested that it be suppressed. STC and USSB argued that permitting BSS/FSS sharing in this band would go against the long standing policy of the Commission of providing separate allocations for BSS and FSS operations. They noted that this point was vigorously debated and thoroughly aired in the 1979 WARC preparatory proceeding. They also argued that allowing BSS/FSS sharing would be poor spectrum management and that the consumer of DBS services would lose because he would not be able to view all available DBS programming with one set of receiving equipment. Further, STC and USSB claimed that it may be impossible for the Commission to carry out its intentions of not compromising on its proposed 2° spacing policy. They argued that spacing greater than 2° would require more cumbersome and complex spectrum management and would reduce the number of FSS satellites that could be accommodated. STC, supported by its Technical Appendix, went on to argue that BSS operations would be subject to interference levels substantially higher than acceptable under established standards if co-channel adjacent fixed-satellite operations (2° away) were transmitting typical FM/TV programming. STC also argued that BSS operations would produce interference to co-channel adjacent (i.e. 2° away) FSS operations if the FSS operator was providing single-channel-per-carrier (SCPC) service. The interference levels in this case would be much higher than the international standards for such service. STC went on to note that these interference assessments assumed a homogeneous satellite environment and clear-sky conditions. However, STC claimed these conditions will probably not exist in a real environment and the interference levels will probably be worse. Further, STC claimed that permitting FSS/BSS sharing in this band would jeopardize the validity and integrity of the U.S. position to the RARC–83 because it would put in question both the need to divide the FSS and BSS allocations at 12.2 GHz and the need for a full 500 MHz allocation for BSS.

5. In reply comments, DBSC, STC and USSB supported and reinforced the comments of STC and USSB and requested that the footnote not be adopted. MOBILSAT in its reply comments also requested the footnote not be adopted. It shared the concern raised by STC regarding interference to SCPC operations and claimed the problem would be exacerbated by allowing effective isotropic radiated powers (e.i.r.p.'s) up to 53dBW.

6. In their reply comments GSAT, RCA, SPSC and USCI rejected the claims made by STC and USSB. Both GSAT and USCI argued that technology has changed since the formulation of the U.S. positions for the 1979 WARC and that it is now possible to provide a relatively inexpensive high quality direct-to-home service with medium-powered FSS facilities. They argued that no change is necessary to the adopted 2° satellite spacing in our *Report and Order* adopted April 27, 1983 in Docket No. 81–704, FCC 83–184, or to the 53dBW per channel power limit of the footnote in order to accommodate direct-to-home service in the FSS band. Further, they argued, STC's Technical Appendix, filed with STC's comments, was incomplete, full of mathematical errors, and based on invalid assumptions of a highly unlikely worst-case scenario. In response, USCI submitted its own Technical Appendix performed by Stern Telecommunications Corporation. USCI claimed that the study demonstrates that interference to and from adjacent FSS satellites, at 2° satellite spacing and under the parameters and limitations of footnote 836, would be well within acceptable limits and that the conclusions of the STC study are wrong. GSAT also argued, with regard to STC claims of video interference to SCPC signals, that FSS operators currently provide video service for a number of other users and that the potential for interference to SCPC signals from adjacent video operations will exist regardless of whether the video signals are for direct-to-home distribution or some other purpose. Both GSAT and

USCI rejected the STC and USSB assumption that adjacent satellite operators will make no prior effort to coordinate their frequency use. They argued that careful coordination between adjacent users is essential for realistic business planning regardless of whether or not footnote 836 is adopted. GSAT further argued that adoption of footnote 836 would provide a clear opportunity for direct-to-home video program providers to make and implement rational economic trade-offs in a "free market" environment.

7. We have reviewed the technical appendices filed by STC in its comments and by USCI in its reply comments and have come to the following conclusions. First, we agree with GSAT and USCI that technology has changed substantially since the U.S. positions for the 1979 WARC were formulated and that the assumptions made by STC are outdated and no longer valid. In particular, the assumption that led to the allocation of separate bands to the FSS and BSS at the 1979 WARC was based upon the large power difference between the high-powered BSS and low-powered FSS satellites. Prior to the 1979 WARC power differences as large as 20dB existed between then planned FSS systems and the BSS parameters adopted at the 1977 WARC-BS in these two 12 GHz services. Such large power differences would have resulted in a requirement for excessive orbit spacings and other sharing problems if both services were provided in the same band. For these reasons, as well as regulatory provisions governing the use of the 11.7–12.2 GHz band by both FSS and BSS in Region 2, we successfully advocated separate allocations for the two services. However, because of technical advances, domestic FSS systems in this band are now able to use medium-powered FSS satellites with powers about 10dB higher than the early domestic FSS satellites. These new satellites are capable of providing e.i.r.p.'s greater than 50dBW over significant portions of the U.S.[1] Further, the powers proposed for BSS operations in this band are substantially lower than those proposed for the 12.2–12.7 GHz BSS band. Therefore, these new medium-powered FSS satellites should be able to provide BSS operations as proposed without any adverse impact on orbit spacing in this band.

8. Second, a number of assumptions made in STC's technical analysis do not reflect the current state of technology nor do they reflect the ability to coordinate traffic on adjacent satellites. Some degree of coordination will be required by FSS systems to operate successfully with 2 degree orbit spacings. In addition, the copolar and cross-polar antenna patterns used by STC are several dB less stringent than the antenna standard in Part 25 of the FCC Rules, which is applicable to calculating interference into receiving antennas operating in this band.[2] Furthermore, small antennas of offset design, as proposed by USCI, are capable of exceeding the Part 25 antenna standard, thereby providing additional protection to the BSS receiver. Further, STC performs a voltage summation of the cross-polar antenna isolations to arrive at the total isolation available through cross-polarization. This model is inaccurate when applied to interference arriving through the sidelobes of an antenna. In addition, both STC and USCI assumed that all satellies are simultaneously located at the worst extreme of the 0.1 degree station keeping limit. This assumption is conservative since this is a parameter that is controllable by the satellite operators and the technology and economic incentives are there to maintain the station keeping to less than half this value. In fact, several recent domestic satellite applications have stated a station keeping accuracy of 0.05 degrees. With respect to interference from the BSS signal into FSS SCPC channels, STC has evaluated the co-channel case that has long been recognized as a potentially severe case that would require orbit spacings in excess of 10° to satisfy. However, this case is routinely avoided by all U.S. domestic satellite operators by simply avoiding SCPC assignments within the 2 MHz around the TV carrier frequency. This 2 MHz loss of bandwidth has little or no impact on the SCPC operator since he is generally power limited and cannot use the full bandwidth of the transponder.[3]

9. Finally, we believe that allowing BSS operations in this band will be in the best interest of the general public by enhancing the opportunities for the market place to develop BSS to the extent technically possible. In order to accommodate the intent of footnote 836 and remain consistent with the format of our domestic table we have adopted footnote NG145 which reads as follows:

"NG145 In the band 11.7–12.2 GHz, transponders on space stations in the fixed-satellite service may be used additionally for transmissions in the broadcasting-satellite service, provided that such transmissions do not have a maximum e.i.r.p. greater than 53 dBW per television channel and do not cause greater interference or require more protection from interference than the coordinated fixed-satellite service frequency assignment. With respect to the space services, this band shall be used principally for the fixed-satellite service."

Implementation of such service will be conducted in accordance with our domestic satellite licensing policies and procedures.[4]

Footnote NG143

10. Comments regarding footnote NG143 (see Appendix B), which would allow space stations to operate internationally so long as they impose no unacceptable constraints on operations or orbit locations of space stations in conformance with international footnote 839, were filed by AT&T, M/A-COM and WU and reply comments were filed by COMSAT.

11. M/A-COM supported the footnote, noting that the 10.7–11.7 GHz band, which is allocated for such international systems, is heavily used by terrestrial microwave; therefore, coordination of earth stations is difficult. Since terrestrial microwave is not allocated on a primary basis in the 11.7–12.2 GHz band, this problem does not exist. WV is opposed to the footnote and requested that it not be added to the Table until it has been conclusively demonstrated that there is a need for international fixed-satellite operations in this band (including showing that such operations cannot be provided in the 10.7–11.7 GHz band) and until the Commission provides a full explanation of the criteria used to determine what constraints on domestic or sub-regional systems would be acceptable. AT&T requested that NG143 be expanded to embrance all services, including terrestrial, that may be operating in accordance with the international Radio Regulations as well as U.S. domestic rules. It proposed the following language be added at the end of the footnote:

. . . and impose no unacceptable constraints on operations or locations and

[1] Generally this involves both higher power amplifiers and increased gain antennas to increase e.i.r.p. Thus, it appears that the FSS satellites will continue to increase the e.i.r.p. for all services, including data and message service as well as program distribution. In one recent example, the application from National Exchange (NEX) for the "Spotsat" domestic FSS system proposed 59 dBW e.i.r.p. spot beams. This power level is near that provided by the DBS satellites in the 12.2–12.7 GHz band and is 6dB higher than the limit in footnote 836.

[2] In particular, we refer to § 25.209 as modified in the Report and Order in CC Docket 81–704, FCC 83–184, adopted April 27, 1983. This antenna standard is 29–25 log θ (1–7 degrees off-axis) for the copolar pattern, and 19–25 log θ (1.8–7 degrees off-axis) for the cross-polar pattern.

[3] American Satellite Corporation, 72 FCC 2d 750, 758 (1979).

[4] *See* e.g., GTE Satellite Corporation, *supra*, *recns. den.* June 1, 1983.

pointing of terrestrial systems operating in accordance with the international Rules and Regulations and the domestic Table of Allocations.

12. COMSAT in its reply comments claimed that the concerns raised by both AT&T and WU are unfounded and requested that the footnote be included in the Table in its present form. It noted, as did M/A-COM, that the 11 GHz band currently allocated for international fixed-satellite service is shared with terrestrial microwave systems and that FSS users in that band are likely to suffer from interference in metropolitan areas where the demand for FSS service is strongest. Therefore, it claimed that the 11.7–12.2 GHz band would be desirable for international FSS use, recognizing that such use would only be permitted as long as it does not impose unacceptable constraints on the U.S. domestic fixed-satellite services. In reponse to AT&T's claim, COMSAT argued that it fails to see how interregional FSS could place any additional constraints on the secondary services than those already imposed by the national and sub-regional FSS.

13. We agree with M/A-COM and COMSAT that this band could provide additional opportunities for international FSS operations, particularly in light of the anticipated availability of earth station equipment capable of both domestic and international FSS service. We further agree with COMSAT that there is no reason to provide secondary terrestrial operations any more protection from this type of FSS operation than they currently receive from domestic FSS operations. Further, we believe that adoption of this footnote as proposed will result in a higher degree of flexibility in the use of this band, better spectrum utilization, and wider availability of services and equipment to users without adversly affecting the primary domestic use of this band. Consequently, sufficient reasons exist for use to adopt NG143 as proposed.

Secondary Mobile-Satellite

14. M/A-COM requested that the 11.7–12–2 GHz band be allocated on a secondary basis for the land mobile-satellite service (space-to-earth) to be paired with the mobile-satellite service (MSS) uplink allocation at 14.0–14.5 GHz, which was proposed by footnote US287. Also, MOBILSAT included its comments originally submitted in response to RM-4247 (NASA petition for establishment of a mobile-satellite service). In those comments it requested that 50 MHz of this band be allocated for feeder links for MSS. However, SPSC in its reply comments claimed that an allocation for feeder links for MSS could prove both spectrally ineffecient and disruptive to the FSS authorized to operate in these bands. It further argued that such an allocation is inappropriate for consideration in this proceeding.

15. With regard to MACOM's request for a secondary mobile-satellite allocation to be paired with the 14.0–14.5 GHz MSS allocation (US287), we feel the proposed allocations will satisfy current and proposed spectrum requirements including those for which US287 was written. The purpose of US287 was to provide for a one way MSS link from mobile or transportable earth stations to central or fixed earth station installations. We foresee no requirement or practical effect for a secondary downlink MSS allocation for a return link to the mobile earth station. Additionally, it should be noted that WARC-79 did not provide a MSS allocation in the band 11.7–12.2 GHz. With regard to MOBILSAT's request, we see no reason to provide specific recognition of feeder links in this band since the definition of the FSS currently provides for feeder links operations. Therefore, no additional footnotes are required.

Conclusion

16. We are adopting the allocations for the 11.7–12.2 GHz band as proposed in the NPRM with the exception of international footnote 836, which has been changed to NG145 and modified to include the band limits as discussed above. The revisions to § 2.106 of the Rules are shown in Appendix B. We will address adoption of the new format for the Table of Frequency Allocations (Table), proposed in the NPRM, in a subsequent Report and Order in this proceeding that will consider the vast majority of the allocations Table. Therefore, we are using the current Table format for the purposes of this proceeding.

Administrative

17. Regulatory Flexibility Act Final Analysis.

I. *Need for and objective of final rules:*

The objective is to allocate the 11.7–12.2 GHz band domestically taking into consideration the Final Acts of the 1979 World Administrative Radio Conference. This is necessary as domestic systems operating within the provisions of the treaty will have rights to international protection from harmful interference as provided for by the Final Acts.

II. *Summary of issues raised by public comments:*

There were no comments filed addressing the matters discussed in the initial regulatory flexibility analysis.

III. *Alternatives to the rule:*

It does not appear that there are any significant alternatives to the adopted rules that would accomplish the stated objectives. No public comment was received regarding such alternatives.

18. Accordingly, it is ordered, That pursuant to the authority found in Section 4(i), 301 and 303(r) of the Communications Act of 1934, as amended, (47 U.S.C. 154(i), 301, 303(r)), Part 2 of the Commission's Rules and Regulations is amended as specified in Appendix B. These amendments become effective July 18, 1983.

19. Points of contact on this matter are William Torak (202) 632-7025 and Fred Thomas (202) 653-8171.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

William J. Tricarico,

Secretary.

Appendix A

The following submitted timely Comments concerning 11.7–12.2 GHz band in response to the NPRM in General Docket 80-739, Implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979:

1. American Telephone and Telegraph Co., AT&T.
2. M/A-COM, Inc., M/A-COM.
3. Mobile Satellite Corporation, MOBILSAT.
4. Satellite Television Corporation, STC.
5. Southern Pacific Satellite Company, SPSC.
6. United Satellite Communications, Inc., USCI.
7. Western Union Telegraph Company, WU.

The following submitted late comments:

1. United States Satellite Broadcasting Company, Inc., USSB.

The following submitted timely reply comments:

1. Communications Satellite Corporation, COMSAT.
2. Direct Broadcasting Satellite Corporation, DBSC.
3. GTE Satellite Corporation, GSAT.
4. Mobile Satellite Corporation, MOBILSAT.
5. RCA American Communications, Inc., RCA.
6. Satellite Television Corporation, STC.
7. Southern Pacific Satellite Company, SPSC.
8. United Satellite Communications, Inc., USCI.
9. Unites States Satellite Broadcasting Company, Inc., USSB.

Appendix B

PART 2—[AMENDED]

Part 2 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

§ 2.106 [Amended]

1. In § 2.106, the Table of Frequency Allocations is revised for the band 11.7–12.2 GHz as follows:

United States			Federal Communications Commission				Nature of services of stations
Band (GHz)	Allocation	Band (GHz)	Service		Class of station	Frequency (GHz)	
	6	7	8		9	10	11
11.7–12.2	NG (839) (840)	11.7–12.2	FIXED-SATELLITE (NG143) (NG145)	(space-to-Earth) Mobile except aeronautical mobile.	Common carrier land. Common carrier mobile (except aeronautical mobile). Space.		

2. In the list of footnotes immediately following the table in § 2.106, footnotes 839, 840, NG143 and NG145 should be added in proper numerical sequence. The text of these footnotes is as follows:

839 The use of the band 11.7–12.7 GHz in Region 2 by the fixed-satellite and broadcasting-satellite services is limited to national and sub-regional systems and is subject to previous agreement between the administrations concerned and those having services, operating or planned to operate in accordance with the Table, which may be affected (see Articles 11, 13, 14, and Resolution 33).

840 For the use of the band 11.7–12.75 GHz in Regions 1, 2 and 3, see Resolutions 31, 34, 504, 700 and 701.

NG143 In the band 11.7–12.2 GHz protection from harmful interference shall be afforded to transmissions from space stations not in conformance with international footnote 839 only if the operations of such space stations impose no unacceptable constraints on operations or orbit locations of space stations in conformance with 839.

NG145 In the band 11.7–12.2 GHz, transponders on space stations in the fixed-satellite service may be used additionally for transmissions in the broadcasting-satellite service, provided that such transmissions do not have a maximum e.i.r.p. greater than 53 dBW per television channel and do not cause greater interference or require more protection from interference than the coordinated fixed-satellite service frequency assignments. With respect to the space services, this band shall be used principally for the fixed-satellite service.

[BC Docket No. 82-211; RM-4052; 82-236; RM-82-236]

FM Broadcast Stations in Pearl City, Hawaii; Kaneohe, Hawaii; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns FM Channel 270 to Pearl City, Hawaii, and Channel 282 to Kaneohe, Hawaii, as a first local broadcast service to each, in response to expressions of interest from Pearl City Broadcasting Company and Sunflower Broadcasting Co., Inc., respectively.

EFFECTIVE DATE: July 31, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Philip S. Cross, Mass Media Bureau (202) 632–5414.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Report and Order; Proceeding Terminated

In the matter of: amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Pearl City, Hawaii), BC Docket No. 82–211, RM–4052; amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Kaneohe, Hawaii), BC Docket No. 82–236, RM–4050.

Adopted: May 4, 1983.

Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has under consideration its *Further Notice of Proposed Rule Making*, published in the **Federal Register** on December 8, 1982 (47 FR 55256). The *Further Notice* proposed the assignment of FM Channel 270 to Pearl City, Hawaii, and Channel 282 to Kaneohe, Hawaii, as the result of petitions by Pearl City Broadcasting Company and Kaneohe Broadcasting Company, respectively.

2. Pearl City is located in Honolulu County, approximately 16 kilometers (10 miles) northwest of Honolulu, Hawaii. Kaneohe, also in Honolulu County, is located approximately 13 kilometers (8 miles) north of Honolulu. Neither city has a local broadcast service.

3. In the *Further Notice*, questions were raised concerning § 73.240(a) (1) and (2) of our rules regarding multiple ownership since Mr. J. Boyd Ingram is a principal of both Pearl City Broadcasting and Kaneohe Broadcasting. In addition, Maui Broadcasting Company, the proponent of an FM channel assigned to nearby Lahaina, Hawaii, also lists Mr. Ingram as a principal. The Pearl City and Kaneohe proposals involve prohibited overlap of the 1 mV/m contours; and the Pearl City, Kaneohe and Lahaina proposals appeared to involve prohibited regional concentration of control by the same owner.

4. Pearl City Broadcasting filed a response stating that J. Boyd Ingram will have no ownership interest in an application for operation on the Kaneohe channel. Rather, that interest has been assumed by U. J. Gilbert of Sunflower Broadcasting Co., Inc. ("Sunflower"). U J. Gilbert and Barbara

Gilbert are the sole principals of Sunflower and they filed comments stating that they would apply for Channel 282 at Kaneohe if it is assigned. The withdrawal of J. Boyd Ingram from the Kaneohe proposal removes the foregoing ownership questions.

5. We conclude that the public interest would be served by the assignment of Channel 270 to Pearl City, Hawaii, and Channel 282 to Kaneohe, Hawaii, in order to provide a first local broadcast service to each of the communities.

6. Authority for the adoption of the amendments herein is contained in Sections 4(i), 5(b)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.283 and 0.204(b) of the Commission's Rules.

7. Accordingly, *it is ordered*, That effective July 31, 1983, the FM Table of Assignments, § 73.202(b) of the Commission's Rules, *is amended* with regard to the following communities:

City	Channel No.
Kaneohe, Oahu, Hawaii	282
Pearl City, Oahu, Hawaii	270

8. *It is further ordered*, That this proceeding *is terminated*.

9. For further information concerning this proceeding, contact Philip S. Cross, Mass Media Bureau, (202) 632-5414.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

47 CFR Part 73

[BC Docket No. 82-698; RM-4172]

FM Broadcast Stations in Maljamar, New Mexico; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns and reserves for noncommercial educational use, Channel *254 to Maljamar, New Mexico, in response to a petition filed by the Board of Regents, Eastern New Mexico University.

EFFECTIVE DATE: August 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Report and Order; Proceeding Terminated

In the matter of; amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Maljamar, New Mexico), BC Docket No. 82-698, RM-4172.

Adopted: May 5, 1983.
Released: June 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration a *Notice of Proposed Rule Making*, 47 FR 45060, published October 13, 1982, proposing the assignment of FM Channel *254 to Maljamar, New Mexico, with the reservation of that channel for noncommercial educational use. The *Notice* was issued in response to a petition filed by the Board of Regents, Eastern New Mexico University ("Board"). Supporting comments were filed by the petitioner,[1] restating its intent to apply for the channel, if assigned. No oppositions to the proposal were received.

2. Mexican concurrence has been obtained in the proposed assignment of Channel *254 to Maljamar, New Mexico, since that community is located within 320 kilometers (199 miles) of the U.S.-Mexican border.

3. We believe that the public interest would be served by the assignment of Channel *254 to Maljamar, as it would provide a first noncommercial educational broadcast service to the community. We indicated in the *Notice* that we do not usually assign and reserve commercial channels for noncommercial educational use. Here, however, it has been shown that there are no FM channels available in the noncommercial band which would not cause interferrence to a Channel 6 television station pursuant to the proposals set forth in Docket No. 20735. The Commission has in similar situations reserved a commercial frequency for noncommercial educational use. See *Comobabi, Arizona*, 47 FR 32717, published July 29, 1982, and *Burlington and Newport, Vermont*, 45 R.R. 2d 786 (1979).

4. Accordingly, pursuant to the authority contained in §§ 4(i), 5(d) (1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b), and 0.283 of the Commission's Rules, *it is ordered*, That effective August 5, 1983, the FM Table of Assignments, § 73.202(b) of the Commission's Rules, *is amended* with respect to the community of Maljamar, New Mexico, as follows:

City	Channel No.
Maljamar, New Mexico	*254

5. *It is further ordered*, That this proceeding *is terminated*.

6. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau (202) 634-6530.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

[FR Doc. 83-16113 Filed 6-15-83; 8:45 am]

BILLING CODE 6712-01-M

[1] The Commission did not receive comments specifically referring to this docketed proceeding. Rather, the petitioner submitted its application before the channel was assigned. We have taken this response as sufficient to satisfy our usual request for a commitment that the petitioner would apply for the channel, if assigned.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 1-181]

Organization and Delegation of Powers and Duties; Federal Managers' Financial Integrity Act of 1982

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: This amendment reserves to the Secretary the functions vested in her as head of an executive agency by the Federal Managers' Financial Integrity Act of 1982. The purpose of this amendment is to reserve to the Secretary the functions vested in her by the Act so that the annual report will be a comprehensive report reflecting all DOT systems of internal accounting and administrative control.

EFFECTIVE DATE: The effective date of this amendment is June 16, 1983.

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Office of the General Counsel, (202) 426-4723.

SUPPLEMENTARY INFORMATION: Since this amendment relates to Departmental management, procedures, and practice, notice and comment on it are unnecessary and it may be made effective in fewer than thirty days after publication in the **Federal Register**.

The Federal Managers' Financial Integrity Act of 1982 (Pub. L. 97-255; September 8, 1982; 96 Stat. 814) requires the head of each executive agency to

report annually to the President and the Congress on the extent to which the agency's systems of internal accounting and administrative control comply with guidelines to be issued by the Comptroller General of the United States and the Director of the Office of Management and Budget under the Act. Under normal DOT practice, authority vested in the Secretary as head of the agency is automatically delegated to each DOT Administrator, under § 1.45(a)(2) of this title, unless reserved to the Secretary.

List of Subjects in 49 CFR Part 1

Authority delegations (Government agencies); Organization and functions (Government agencies); Transportation Department.

PART 1—[AMENDED]

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended in § 1.44 by revising the introductory text and adding paragraph (b)(3) to read as follows:

§ 1.44 Reservations of Authority.

The delegations of authority in § 1.45 through § 1.53 and § 1.66 and § 1.67 do not extend to the following actions, authority for which is reserved to the Secretary or the Secretary's delegatee within the Office of the Secretary:

* * * * *

(b) *Legislation and reports.* * * *

(3) Submission of the annual statement on systems of internal accounting and administrative control under the Federal Managers' Financial Integrity Act of 1982 (Pub. L. 97–255).

* * * * *

(49 U.S.C. 322)

Issued in Washington, DC, on April 12, 1983.

Elizabeth Hanford Dole,

Secretary of Transportation.

[FR Doc. 83–15974 Filed 6–15–83; 8:45 am]

BILLING CODE 4910-62-M

National Highway Traffic Safety Administration

49 CFR Part 501

Organization and Delegation of Powers and Duties

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Final rule.

SUMMARY: This notice amends the provisions on reservation of authority to allow the Deputy Administrator to exercise the authority of the Administrator when the office of the Administrator is vacant due to death or resignation.

EFFECTIVE DATE: June 16, 1983.

FOR FURTHER INFORMATION CONTACT: Kathy DeMeter, Assistant Chief Counsel for General Law, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202–426–1834).

SUPPLEMENTARY INFORMATION: This notice amends § 501.7 of Part 501 (49 CFR Part 501) to revise the provision on the authority which is reserved to the Administrator. As currently written, the section does not provide for instances when the office of the Administrator is vacant, due to death or resignation, and a new Administrator is not immediately appointed. The amendment adopted today provides that during the period between the death or resignation of an Administrator and the appointment and confirmation of a new Administrator, the Deputy Administrator shall exercise all of the authority of the Administrator. Upon appointment and confirmation of a new Administrator, only the Administrator can exercise the authority reserved by § 501.7.

List of Subjects in 49 CFR Part 501

Authority delegations (Government agencies), Organization and functions (Government agencies).

This amendment relates to matters of agency organization and procedure and therefore can be issued without opportunity for notice and comment.

PART 501—[AMENDED]

In consideration of the foregoing, Part 501 of Title 49 of the Code of Federal Regulations is amended as follows:

1. The introductory paragraph of § 501.7 is revised to read as follows:

§ 501.7 Administrator's reservations of authority.

The delegations of authority in this part do not extend to the following authority which is reserved to the Administrator and, in those instances when the office of Administrator is vacant due to death or resignation, to the Deputy Administrator:

* * * * *

(Delegation at 49 CFR Part 1.50)

Issued on June 9, 1983.

Diane K. Steed,

Acting Administrator.

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1152

[Ex Parte No. 274 (Sub-8)]

Exemption of Out of Service Rail Lines

AGENCY: Interstate Commerce Commission.

ACTION: Final rule and exemption.

SUMMARY: The Commission is adopting rules (in the Appendix) which exempt abandonments under 49 U.S.C. 10903–10905 from the requirements of prior approval where the lines have been out of service for at least 2 years, subject to certain conditions and standard labor protection provisions. Where a rail line has been out of service for at least 2 years, actual abandonment of the line would have no impact on interstate commerce or the rail transportation

policy. The rule will allow rail carriers to file a notice of exemption which will be published in the **Federal Register** designating the line to be abandoned.

EFFECTIVE DATE: August 16, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's full decision in this proceeding. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

The Secretary (See 49 CFR 1011.7(h)) has certified that this action (which will benefit railroads through a relaxation of regulation) will not have a significant economic impact on a substantial number of small entities. Because the lines at issue will not have been used for at least 2 years, small business entities that would be served by the lines either were not dependent on that rail service or have made other arrangements for service.

List of Subjects in 49 CFR Part 1152

Administrative practice and procedure, Railroads, Reporting and recordkeeping requirements, Uniform system of accounts.

This action is taken under the authority of 49 U.S.C. 10321 and 10505, and 5 U.S.C. 553.

Dated: June 3, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, and Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix

PART 1152—[AMENDED]

49 CFR Part 1152 is amended by adding a new Subpart F to read as follows:

Subpart F—Exempt Abandonments

§ 1152.50 Exempt abandonments.

(a) A proposed abandonment of a railroad line is exempt from the provisions of 49 U.S.C. 10903–10905 if the criteria designated in this section are satisfied.

(b) An abandonment is exempt if the carrier certifies that no local traffic has moved over the line for at least 2 years and any overhead traffic on the line can be rerouted over other lines, and that no formal complaint filed by a user of rail service on the line regarding cessation of service over the line either is pending with the Commission or has been decided in favor of the complainant within the 2-year period. The complaint must allege (if pending) or prove (if decided) that the carrier has imposed an illegal embargo or other unlawful impediment to service.

(c) The Commission has found that its prior review and approval of these transactions: (1) Is not necessary to carry out the rail transportation policy of 49 U.S.C. 10101a; and (2) is of limited scope or unnecessary to protect shippers from abuse of market power. 49 U.S.C. 10505. A notice must be filed to use this class exemption. The procedures are set out in § 1152.50(d). This exemption does not relieve a carrier of its statutory obligation to protect the interests of employees. 49 U.S.C. 10505(g)(2) and 10903(b)(2). This also does not preclude a carrier from seeking an exemption of a specific abandonment.

(d) Notice of exemption.

(1) At least 10 days prior to filing a notice of exemption with the Commission, the railroad seeking the exemption must notify in writing the Public Service Commission (or equivalent agency) in the State(s) where the line will be abandoned; The notice shall name the railroad, describe the line to be abandoned, indicate that the exemption procedure is being used, and include the approximate date the notice of exemption will be filed with the Commission.

(2) The railroad must file a verified notice using its appropriate abandonment docket number and sub number with the Commission at least 50 days before the abandonment is to be consummated, including the proposed consummation date, the certification required in § 1152.50(b), the information required in § 1152.22 (a) (1–4), (8) and (e)(5), the level of labor protection, and a certificate that the notice requirements of § 1152.50(d)(1) have been complied with.

(3) The Commission through the Director of the Office of Proceedings, shall publish a notice in the **Federal Register** within 20 days after the filing of the notice of exemption. Petitions to stay the effective date of the exemption must be filed within 10 days after publication and petitions for reconsideration must be filed within 20 days after publication (unless stayed pending reconsideration). If the notice of exemption contains false or misleading information, the use of this exemption is void *ab initio* and the Commission shall summarily reject the exemption notice.

(4) To address environmental issues and whether the right of way is suitable for other public purposes under 49 U.S.C. 10906, a party shall submit evidence to the Commission within 20 days of publication in the **Federal Register**. A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

(49 U.S.C. 10321 and 10505; 5 U.S.C. 553)

[FR Doc. 83–16149 Filed 6–15–83; 8:45 am]

Proposed Rules

Federal Register
Vol. 48, No. 117
Thursday, June 16, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-NM-88-AD]

Airworthiness Directives; Gates Learjet Model 35, 36, 35A, and 36A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws a Notice of Proposed Rulemaking (NPRM) which proposed the adoption of an Airworthiness Directive (AD) for Gates Learjet Model 35, 36, 35A and 36A series airplanes that would have required the installation of a trim-in-motion warning, redesigned pitch axis master interrupt, improved takeoff out-of-trim warning system, modified Mach trim system, modified stick pusher system, and modified overspeed warning system. Additionally, the proposal would have added Airplane Flight Manual (AFM) procedures for the above changes. Upon further consideration and in light of comments received, the FAA has determined that the proposed AD is not required at this time; and accordingly the NPRM is withdrawn.

DATE: This withdrawal is effective June 21, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Bennett Sorensen, Aerospace Engineer, Wichita Aircraft Certification Office, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209, telephone (316) 269-7012.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an Airworthiness Directive (AD) for Gates Learjet Model 35, 36, 35A and 36A series airplanes which, if adopted, would have required the installation of a trim-in-motion warning, redesigned pitch axis master interrupt, improved takeoff out-of-trim warning system, modified Mach trim system, modified stick puller system, modified overspeed warning system, and Airplane Flight Manual procedures for the above changes was published in the Federal Register on September 27, 1982 (47 FR 42371). The Learjet Model 30 series airplanes are similar in design to the Learjet Model 25 series airplanes on which an AD was previously issued to correct deficiencies in various pitch axis systems. The Model 30 series AD was proposed because similar failures in its pitch axis systems might also lead to possible unsafe conditions. Comments were requested from the public to help determine if any undocumented adverse service history of failures existed on any of the affected pitch axis systems.

Seventy-three written comments were received addressing the NPRM. Sixty-nine of the comments opposed the AD because no documented high speed accidents had occurred on the subject airplanes. Two comments stated that the system improvements were safety related and should therefore be made madatory. Two commenters were neutral on imposing the AD. No unsafe system malfunctions were disclosed in these comments. One commenter telephoned and stated that his overspeed warning and puller had failed even though they preflighted properly. No incident or injury resulted. Twenty-seven commenters felt that the proposed kits should be offered by Gates Learjet as a product improvement. Eighteen commenters stated that pilot training, inexperience or inadequate Type Rating requirements were at least partially responsible for the relatively high rate of Gates Learjet 24 and 25 series accidents.

The accident free service history of the 30 series airplanes in the high speed flight regime could be partially attributed to external differences between the 30 series airplanes and the 20 series airplanes. The Learjet 30 series airplanes are equipped with turbofan engines while the 20 series Learjets have turbojet engines. As a result of the larger turbofan engine nacelles, a higher drag rise at high Mach numbers causes the 30 series airplanes to accelerate much more slowly in the event of a nose down upset or system malfunction. Consequently it is more difficult to reach very high speeds. Each 30 series airplane also has a full time Mach trim system to artificially increase longitudinal stability at high speeds. The 20 series airplanes do not have Mach trim systems.

In consideration of all factors, the FAA has concluded that an Airworthiness Directive requiring the installation of a trim-in-motion warning, redesigned pitch axis master interrupt, improved takeoff out-of-trim warning system, modified stick puller system, and modified warning system in Gates Learjet Model 35, 36, 35A and 36A series airplanes is not justified. However, it has been recommended that the manufacturer offer the proposed modification kits as non-mandatory product improvements. Gates Learjet has agreed to do this. However, since many of the changes are interrelated, individual kits for each change may not be possible.

Withdrawal of this Notice of Proposed Rulemaking constitutes only such action, and does not preclude the agency from issuing another Notice in the future, or commit the agency to any course of action in the future.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Withdrawal

PART 39—[AMENDED]

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator, the proposed airworthiness directive published in the Federal Register on September 27, 1982, (47 FR 42371), is hereby withdrawn.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85.

Note.—Since this action withdraws a proposed restriction and imposes no additional burden on any person, it may be made effective in less than 30 days. It is neither a proposed nor final rule, and therefore, is not covered under Executive Order 12291, the Regulatory Flexibility Act, or DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Seattle, Washington, on June 1, 1983.

Wayne J. Barlow,
Acting Director, Northwest Mountain Region.

[FR Doc. 83-15987 Filed 6-15-83; 8:45 am]
BILLING CODE 4910-13-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

Public Comment Period and Opportunity for Public Hearing on Proposed Condition of Approval to the Illinois Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing a public comment period and opportunity for a public hearing on a proposed action to impose a new condition on the Secretary of the Interior's approval of the Illinois Permanent Regulatory Program (hereinafter referred to as the Illinois program) under the Surface Mining Control and Reclamation Act of 1979 (SMCRA). The proposed condition relates to the authority of the State to deny an application for a permit or permit renewal unless the applicant submits proof that all required Federal reclamation fees have been paid.

This notice sets forth the times and locations that the Illinois program and the proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and information pertinent to the public hearing.

DATES: Written comments, data or other relevant information relating to the propose amendment to the Illinois program not received on or before 4:00 p.m. on July 18, 1983, will not necessarily be considered.

A public hearing on the proposed modifications has been scheduled for 10:00 a.m., June 30, 1983, at the address listed under **ADDRESSES.**

Any person interested in making an oral or written presentation at the hearing should contact Mr. James Fulton at the address or phone number listed below by June 23, 1983. If no one has contacted Mr. Fulton to express an interest in participating in the hearing by the above date, the hearing will not be held. If only one person has so contacted Mr. Fulton by the above date, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

EFFECTIVE DATE: Written comments should be mailed or hand delivered to: James Fulton, Director, Springfield Field Office, Office of Surface Mining Reclamation and Enforcement, No. 4 Old Capitol Plaza North, Springfield, Illinois 62701.

The public hearing will be at the Springfield Field Office, Office of Surface Mining, No. 4 Old Capitol Plaza North, Springfield, Illinois 62701.

Copies of the Illinois program, a listing of any scheduled public meetings and all written comments received in response to this notice will be available for review at the OSM and State regulatory authority offices listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 "L" Street, NW., Washington, D.C. 20240.
Office of Surface Mining Reclamation and Enforcement, No. 4 Old Capitol Plaza, North, Springfield, Illinois 62701
Illinios Department of Mines and Minerals, Land Reclamation Division, 227 South 7th Street, Springfield, Illinois 62706

FOR FURTHER INFORMATION CONTACT: James Fulton, Director, Springfield Field Office, Office of Surface Mining, No. 4 Old Capitol Plaza North, Springfield, Illinois 62701, Telephone: (217) 492–4495.

SUPPLEMENTARY INFORMATION: The Illinois program was conditionally approved by the Secretary of the Interior on June 1, 1982 (47 FR 23858). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Illinois program can be found in the June 1, 1982 **Federal Register.**

Background

Sections 510(b) and 510(c) of SMCRA limit the issuance of new permits and permit renewals to those applicants who are in compliance with the requirements of SMCRA. As specified in section 402 of SMCRA and Subchapter R of 30 CFR, the operators of coal surface mines are to pay reclamation fees to the Secretary of the Interior. Further, section 402(f) of SMCRA specifically mandates full cooperation with the Secretary by all Federal and State agencies in the enforcement of this provision.

Recently it was brought to the Secretary's attention that the Illinois program does not contain regulatory language consistent with 30 CFR 786.19(h) which requires the State to deny permit applications and permit revision applications unless the applicant has submitted proof that all Federal reclamation fees required under 30 CFR Subchapter R have been paid. The Illinois regulation at 1786.19(h) requires that operators pay all fees required by the State's regulations.

To resolve this issue, on February 1, 1983, the Director, OSM, sent a letter to Illinois to request that Illinois confirm that section 1786.19(h) also requires the applicant to submit proof that all required Federal reclamation fees have been paid, consistent with 30 CFR 786.19(h). To date, Illinois has not formally responded to the February 1 letter.

Therefore, the Secretary proposes to add a new condition to the Illinois program requiring the State to amend its program by a specified date to incorporate requirements no less effective than 30 CFR 786.19(h). The Secretary requests public comment on this proposed action.

Pursuant to 30 CFR 732.17(e), the Secretary notified Illinois by letter of June 7, 1983, that a State program amendment is required because conditions or events indicate that the approved State program no longer meets the requirements of SMCRA and the Federal regulations. Therefore, pursuant to 30 CFR 732.17(f)(1), Illinois shall submit to the Secretary within 60 days of receipt of notification either a proposed written amendment or a description of an amendment to be proposed that meets the requirements of SMCRA and the Federal regulations, and a timetable for enactment which is consistent with established administrative or legislative procedures. Failure of the State to submit the proposed amendment or description and the enactment timetable within the prescribed 60 days, or subsequent failure to comply with the submitted timetable, or disapproval by the Secretary of the amendment, could result in proceedings under 30 CFR Part 733 to either enforce that part of the State program affected to withdraw approval in whole or in part, of the State program and implement a Federal program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared for this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or

conditional approval of State regulatory programs. Therefore, for this action OSM is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*)).

This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 913

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, 30 CFR 913.11 is proposed to be amended as set forth herein.

(Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 20) *et seq.*))

Dated: June 10, 1983.

Steven Griles,

Acting Director, Office of Surface Mining.

PART 913—ILLINOIS

30 CFR 913.11 is proposed to be amended to impose an additional condition by adding a new paragraph (f) to read as follows:

§ 913.11 Conditions of State regulatory program approval.

* * * * *

(f) Steps will be taken to terminate the approval found in § 913.10 unless Illinois submits to the Secretary by _____, a copy of promulgated regulations or otherwise amends it program to contain provisions no less effective than 30 CFR 786.19(h) to require the State to deny permit applications and permit revision applications unless the applicant has submitted proof that all Federal reclamation fees required under 30 CFR Subchapter R have been paid.

[FR Doc. 83–16212 Filed 6–15–83; 8:45 am]

BILLING CODE 4310–05–M

30 CFR Part 938

Permanent State Regulatory Program of Pennsylvania

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM), is considering modifying the deadline for Pennsylvania to meet condition (d) of its approved State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The condition relates to prime farmland requirements for a permit applicant who proposed to mine coal in the anthracite region.

DATE: Comments must be received by July 18, 1983, at the address below, no later than 4:00 p.m.

ADDRESS: Written comments must be mailed or hand-delivered to: Robert Biggi, Director, Harrisburg Field Office, Office of Surface Mining, 101 South 2nd Street, Suite L–4, Harrisburg, Pennsylvania 17101.

FOR FURTHER INFORMATION CONTACT: Robert Biggi, Director, Harrisburg Field Office, Office of Surface Mining, 101 South 2nd Street, Suite L–4, Harrisburg, Pennsylvania 17101, (717) 782–4036.

SUPPLEMENTARY INFORMATION: Under 30 CFR 732.13(i), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The curing of each deficiency is a condition of the approval. Steps to terminate the conditional approval must be taken if the conditions are not met according to the schedule. The dates are established in consultation with the State, based on the regulatory and administrative needs of the State's permanent program and SMCRA and the time required for changes to be adopted under State procedures or legislative schedules.

On February 29, 1980, the Secretary of the Interior received a proposed regulatory program from the State of Pennsylvania. On October 22, 1980, following a review of that proposed program as outlined in 30 CFR Part 732, the Secretary of the Interior disapproved the program. The State resubmitted its program on January 25, 1982, and, subsequently the Secretary approved the program conditioned on the correction of minor deficiencies. Information pertinent ot the general background of the permanent program submission, as well as the Secretary's findings, the disposition of comments and explanations of the conditions of approval of the Pennsylvania program can be found in the July 30, 1982 **Federal Register** (47 FR 33050).

In a letter dated April 25, 1983, from the Commonwealth of Pennsylvania, the State requested an additional six months to satisfy condition (d).

The State explains that because of the recently passed Regulatory Review Act, which took effect on March 1, 1983, proposed regulations must be submitted to both houses of the Pennsylvania General Assembly and an Independent Regulatory Review Commission prior to adoption. Proposed regulations can be disapproved by either the General Assembly or the Commission. Since a portion of the condition may require a regulatory change, and such a revision must be submitted to the General Assembly and the Commission, Pennsylvania claims it is highly unlikely that the State will be able to meet the August 1, 1983, deadline for satisfying the condition.

Therefore, the Secretary proposes to allow the State until February 1, 1984, to meet condition (d) pertaining to certain coal mine permit requirements with respect to prime farmland in the anthracite region

The Secretary is continuing to review with the State all of the outstanding program conditions. A final rule implementing this proposed extension may, in response to public comment, be different than the one proposed in this notice.

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemamking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subject in 30 CFR Part 938

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

(Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.))

Dated: June 10, 1983.

J. Steven Griles,

Acting Director, Office of Surface Mining.

The following are proposed amendments to 30 CFR, Chapter VII, Subchapter T, Part 938:

PART 938—PENNSYLVANIA

§ 938.11 [Amended]

30 CFR 938.11(d) is proposed to be amended by substituting "February 1, 1984" for August 1, 1983 each time it appears.

30 CFR Part 946

Public Comment Period and Opportunity for Public Hearing on Proposed Amendment to the Virginia Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing a public comment period and oportunity for public hearing on a proposed amendment to the Virginia Permanent Regulatory Program (hereinafter referred to as the Virginia program) submitted by the State pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The Proposed amendment relates to the State's Coal Surface Mining Reclamation Fund which is an alternative reclamation bonding system.

This notice sets forth the times and locations that the Virginia program and the proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed asmendment, and information pertinent to the public hearing.

DATES: Written comments, data or other relevant information relating to the proposed amendment to the Virginia program not received on or before 4:00 p.m. on July 18, 1983, will not necessarily be considered.

A public hearing on the proposed modifications has been scheduled for July 11, 1983, from 7:00 p.m. to 9:00 p.m. at the address listed under **ADDRESSES.**

Any person interested in making an oral or written presentation at the hearing should contact Mr. Ralph Cox at the address or phone number listed below by July 7, 1983. If no one has contacted Mr. Cox to express an interest in participating in the hearing by the above date, the hearing will not be held. If only one person has so contacted Mr. Cox by the above date, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: Written comments should be mailed or hand delivered to: Ralph Cox, Director, Virginia Field Office, Office of Surface Mining Reclamation and Enforcement, Highway 23, South, P.O. Box 626, Big Stone Gap, Virginia 24219.

The Public hearing will be held in the Conference Room of the Lebanon Area Office, Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266.

Copies of the Virginia program, the proposed amendment, a listing of any scheduled public meetings and all written comments received in response to this notice will be available for review at the OSM and State regulatory authority offices listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 "L" Street, NW., Washington, D.C. 20240;
Office of Surface Mining Reclamation and Enforcement, highway 23, South, Big Stone Gap, Virginia 24219;
Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266;
Virginia Division of Mined Land Reclamation, 622 Powell Avenue, Drawer U, Big Stone Gap, Virginia 24219.

FOR FURTHER INFORMATION CONTACT: Ralph Cox, Director, Virginia Field Office, Office of Surface Mining, P.O. Box 626, Big Stone Gap, Virginia 24219. Telephone: (703) 523-4303.

SUPPLEMENTARY INFORMATION: The Virginia program was conditionally approved by the Secretary of the Interior on December 15, 1981 (46 FR 61088-61115). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Virginia program can be found in the December 15, 1981, **Federal Register.** Information pertinent to the previous amendments submitted by Virginia concerning reclamation bonding can be found in the September 21, 1982, **Federal Register** (47 FR 41556), in the January 18, 1983, **Federal Register** (48 FR 2123) and in the February 28, 1983, **Federal Register** (48 FR 8271).

On May 20, 1983, Virginia submitted a proposed State program consisting of an act, which amends and reenacts Sections 45.1-270.2—45.1-270.4 of the Code of Virginia, passed by the 1983 Virginia General Assembly relating to the State's Coal Surface Mining Reclamation Fund (Fund) and a draft copy of proposed regulations developed to implement the statutory amendment. The statutory amendment, referred to as Chapter 131, modifies the statutory amendment creating the Fund submitted by Virginia on July 8, 1982, and approved by the Director, OSM, on September 21, 1982 (47 FR 41556). Chapter 131 would become effective upon approval by OSM. The draft proposed regulations to implement Chapter 131 have been tentatively approved by the State for adoption on an emergency basis once Chapter 131 becomes effective, although the regulations are being processed through the Virginia Administrative Process Act requirements for public comment with a public hearing scheduled for August 15, 1983. The State also provided a side by side comparison of the original program amendment of July 8, 1982, and the proposed Chapter 131 amendment.

Therefore, OSM requests public comment on the substantive adequacy of the above modifications.

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared for this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and

Budget (OBM) granted OSM an exemption from Sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSM is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

Rocky Mountain National Park, Colorado; Snowmobile Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The proposed regulations set forth below are necessary to provide the public the opportunity for snowmobile access in winter to certain areas of Rocky Mountain National Park and the adjacent Arapaho National Forest that are accessible by other vehicles during other seasons of the year. These regulations have been designed to provide for increased recreational use and enjoyment of park resources as well as to provide for the preservation of the Park in a way that is consistent with the general snowmobile policy of the National Park Service and the off-road vehicle policy of the Department of the Interior.

DATE: Written comments, suggestions or objections will be accepted until July 18, 1983.

ADDRESS: Comments should be directed to: Superintendent, Rocky Mountain National Park, Estes Park, Colorado 80517.

FOR FURTHER INFORMATION CONTACT: David J. Essex, Chief Park Ranger, Rocky Mountain National Park, Estes Park, Colorado 80517, Telephone: (303) 586–2371.

SUPPLEMENTARY INFORMATION:

Background

Executive Order 11644 (37 FR 2877; February 9, 1972), later amended by Executive Order 11989, imposed restraints on off-road uses on Federal lands in 1972, including snowmobiles. Pursuant to that order, the National Park Service promulgated the regulation contained in 36 CFR 2.34 on April 1, 1974, which had the effect of closing all National Park System lands to snowmobiling except those specifically designated as open through publication of a notice in the **Federal Register**. The Superintendent of Rocky Mountain National Park, in response to Executive Order 11644, prepared an environmental assessment of snowmobile use, and public meetings were held at Grand Lake, Colorado on October 24, 1973 and February 28, 1974, to discuss routes and areas of proposed snowmobile use on lands administered by the National Park Service, including the former Shadow Mountain Recreation Area. On April 12, 1975, a meeting attended by the Grand County commissioners, Grand Lake Chamber of Commerce directors and snowmobile club officers was held to hear proposals to open routes in addition to those proposed in a Federal Register notice of February 14, 1975 (40 FR 6797). The final notice was published in the **Federal Register** of January 13, 1976 (41 FR 1933) adopting the proposed routes, plus an additional access trail to Forest Service land. The route designations were: (a) Green Ridge Snowmobile Trail (now under U.S. Forest Service jurisdiction), (b) Summerland Park Snowmobile Trail, (c) Supply Creek Access Snowmobile Trail, (d) Trail Ridge Road (a portion of * * *), (e) Bowen Gulch Access Trail.

In August of 1977, the National Park Service appointed a task force to review snowmobile use in all areas of the National Park System and to: "develop a policy * * * that will clearly state the National Park Service's position on the legitimacy of mechanized over snow travel in the parks and enable the Superintendents to address the question uniformly."

During the winter of 1978–1979, a series of public meetings were held at key locations throughout the United States to hear comments on a proposed revised national snowmobile policy for NPS areas. A "Notice of Revised Snowmobile Policy" was published in the **Federal Register** (44 FR 47412) on August 13, 1979 which stated, in part, that in areas of the National Park System where snowmobiling is permitted, snowmobiles shall be confined to properly designated routes and water surfaces, and such routes shall be promulgated as special regulations in the Code of Federal Regulations, Title 36, Part 7.

The designated routes specified in the proposed rule are necessary to comply with Servicewide policy. These routes are as follows: (1) Summerland Park Route, a .5-mile unplowed roadway lying in Sections 32 and 33, T4N, R75W, just north of Grand Lake. The route is a continuation of a public road maintained by the Town of Grand Lake to service its water system, designated as a town snowmobile route. (2) Supply Creek Access Route, two spur access routes of about 2.2 miles connecting Grand Lake to "Supply Creek Road," for access to Forest Service trails designated as snowmobile routes. (3) Trail Ridge Road, specifically the 17-mile stretch from the West Unit Visitor Center to Milner Pass, of which the lower 9.7 miles from Timber Lake Trailhead to the visitor center would be plowed and open to dual-use with other motorized vehicles. (4) Bowen Creek

Access Trail, a .8-mile unplowed roadway leading from Trail Ridge Road to the Bowen Gulch Trail on Forest Service lands.

With the exception of the Trail Ridge Road route, the snowmobile routes proposed for designation are short-distance corridors or spurs leading to primary snowmobile use areas outside park boundaries. The 9.7 miles of dual-use on Trail Ridge Route, as well as a portion of the Supply Creek Access Route, represent a significant exception to the National Park Service's snowmobile policy by allowing snowmobilers on roads simultaneously with other motorized vehicles. The proposed regulations include operating restrictions to ensure snowmobile safety on dual-use roads. Four short segments, totaling 1.3 miles of abandoned roadway and open land, are used as point-to-point connectors on the Supply Creek Access Route to reach snowmobile routes on adjacent Forest Service lands. These too represent an exception to the Servicewide snowmobile policy.

The Act of October 11, 1978 (Pub. L. 95-450; 92 Stat. 1095), created the Arapaho National Recreation Area, transferring the former Shadow Mountain Recreation Area to the U.S. Forest Service. Certain National Park Service designated snowmobile routes were, therefore, transferred to the Forest Service to manage. House Report 95-1460, accompanying Pub. L. 95-450, instructed the National Park Service to address the possibility of designating a snowmobile route along the east shore of Shadow Mountain Lake, located in Rocky Mountain National Park, to connect with the Arapaho National Recreation Area.

Subsequently, the Act of December 22, 1980 (Pub. L. 96-560; 94 Stat. 3265), revising the boundaries of Rocky Mountain National Park, authorized the East Shore Trail along Shadow Mountain Lake for snowmobile use, provided studies show there will be no significant adverse impact on wildlife. Until the required studies are conducted, the East Shore Trail will not be proposed as a designated route.

Public Participation

The superintendent initiated action to prepare another environmental assessment in the winter of 1979-1980. The purpose of this environmental assessment was to re-analyze permitted snowmobile use in Rocky Mountain National Park (West Unit), along with environmental impacts expected to be associated with alternative courses of action addressed, prior to promulgation of special regulations. This involved continued public involvement through written responses, telephone contact, and re-contacting representatives from most all agencies and organizations contacted in the past and listed below:

U.S. Bureau of Reclamation
U.S. Forest Service
Colorado Division of Wildlife
Grand County Commissioners
Grand County Sheriff's Department
Town of Grand Lake (Mayor, Marshal, Town Council)
Grand Lake Metropolitan Recreation District
Grand Lake Chamber of Commerce
Trailblazers Snowmobile Club.

In reviewing the old assessment, addressing new proposals, and identifying other environmental concerns, additional contacts were made with representatives from U.S. Fish & Wildlife Service, National Wildlife Federation (Boulder) and Sierra Club (Denver).

Separate contact was made with private inholders and "use and occupancy" residents on the question of plowing the lower portion of Trail Ridge Road which has been open to dual use of snowmobiles and other wheeled vehicles since 1973.

The Environmental Assessment was completed and approved by the Acting Regional Director on April 4, 1980. Two public meetings were held on May 20 and 21, 1980 at Denver and Granby, Colorado, respectively. Written comments were received on the assessment until June 30, 1980.

A "Record of Decision" on the alternatives was prepared on September 16, 1980, along with a "Finding of No Significant Impact," for the purposes of the National Environmental Policy Act (42 U.S.C. 4332). Both documents are available from the Superintendent, Rocky Mountain National Park.

It is the policy of the Department of the Interior, whenever practical, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding the proposed regulations to the address noted at the beginning of this rulemaking.

Drafting Information

The following persons participated in the writing of these regulations: David J. Essex, Chief Park Ranger; Darrell C. Grossman, Supervisory Park Ranger, both of Rocky Mountain National Park.

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 49 U.S.C. 3501 *et seq.*

Compliance with Other Laws

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291, and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This conclusion is based on the finding that snowmobile use of the park now ranges from 2,500-3,500 snowmobiles annually. While most snowmobiling occurs on adjacent lands outside the park, the proposed rule will contribute to the local tourism economy of Grand Lake, Colorado, by ensuring the continued availability of snowmobiling opportunities in Rocky Mountain National Park.

As noted previously, pursuant to the National Environmental Policy Act (42 U.S.C. 4332), the Service has prepared an environmental assessment on this proposed regulation which is available at the address noted above.

Authority

Section 3 of the Act of August 25, 1916 (39 Stat. 535, as amended; 16 U.S.C. 3).

PART 7—[AMENDED]

In consideration of the foregoing, it is proposed to amend Part 7 of Title 36 of the Code of Federal Regulations by adding paragraph (i) to § 7.7, to read as follows:

§ 7.7 Rocky Mountain National Park.

* * * * *

(i) *Snowmobiles.* (1) Designated routes open to snowmobile use: The Summerland Park Snowmobile Trial, the Supply Creek Access Snowmobile Trail, the plowed portion of the Trail Ridge Road between the West Unit Visitor Center and the Timber Trailhead, the unplowed portion of the Trial Ridge Road between the Timber Lake Trailhead and Milner Pass, and the Bowen Gulch Access Trail. These routes will be marked by signs, snow poles or other appropriate means.

(2) Detailed descriptions of designated routes and appropriate maps are available at Park Headquarters, the West Unit Office and the Grand Lake Entrance Station.

(3) The maximum speed limit is 35 m.p.h. unless changed by the posting of appropriate signs. On routes open to dual use of both motor vehicles and snowmobiles, the maximum snowmobile

speed limit is 25 m.p.h. All posted speed limits are subject to further limitations as required under § 4.14 of this chapter. No person shall operate a snowmobile at a speed in excess of the maximum limits so posted.

(4) On roads designated for snowmobile use, only that portion of the road or parking area intended for other motor vehicle use may be used by snowmobiles. Such roadway is available for snowmobile use only when the designated road or parking area is closed to all other motor vehicle use by the public except on the dual use routes described in (5).

(5) Routes open to dual use of both motor vehicle and snowmobiles: that portion of the Supply Creek Access Snowmobile Trial which extends along the plowed Trial Ridge Road from the Grand Lake Lodge Road junction to Sun Valley Road junction, then along the plowed Sun Valley Road to the Park boundary where it intersects with a plowed Grand County road; that portion of the plowed Trail Ridge Road between the West Unit Visitor Center and the Timber Lake Trailhead. On such dual use routes, the operation of snowmobiles is permitted only along the far right portion of the plowed roadway and in a single-file manner. Dual use routes will be marked with appropriate signs and snow poles. The maximum snowmobile speed limit on such dual use routes is 25 m.p.h.

(6) The Superintendent shall determine the opening and closing dates for use of designated snowmobile routes each year, taking into consideration the location of wintering wildlife, road plowing schedules and other factors that may relate to public safety, and he/she shall notify the public of such dates through normal news media channels. Temporary closure of dual-use routes for public safety reasons will be initiated through the posting of appropriate signs and/or barriers when road plowing operations are taking place. Routes will be open to snowmobile travel when they are considered to be safe for travel but not necessarily free of safety hazards. Snowmobilers may travel these routes with the permission of the Superintendent, but at their own risk.

Dated: April 27, 1983.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 83-16097 Filed 6-15-83; 8:45 am]

BILLING CODE 4310-70-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6535]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Connecticut et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 83-490; RM-4395]

TV Broadcast Station in Fort Scott, Kansas and Poplar Bluff, Missouri; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF television Channel 26 to Fort Scott, Kansas, as its first television assignment, in response to a petition filed by K of K Communications, Inc.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau (202) 634-6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

In the matter of: amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Fort Scott, Kansas and Poplar Bluff, Missouri), MM Docket No. 83-490, RM-4395.

Proposed Rule Making

Adopted: May 9, 1983.
Released: June 2, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed March 7, 1983, by K of K Communications, Inc. ("petitioner") seeking the assignment of UHF television Channel 26 to Fort Scott, Kansas, as its first television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

2. Fort Scott (population 8,893),[1] seat of Bourbon County (population 15, 989), is located in eastern Kansas, approximately 140 kilometers (83 miles) south of Kansas City. It has no local TV service.

3. Petitioner states that Fort Scott has demonstrated remarkable population stability between the 1960 and 1980 censuses. Petitioner believes that Fort Scott is a vibrant area deserving a first television service.

4. The proposed assignment meets all spacing requirements if the offset of unused and unapplied for Channel *26 at Poplar Bluff, Missouri, is changed. In view of the above and the fact that Fort Scott could receive its first local commercial television broadcast service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following communities:

City	Channel No.	
	Present	Proposed
Fort Scott, Kansas		26-
Poplar Bluff, Missouri	15+, *26-	15+, *26+

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Commissions Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and

[1] Population figures are taken from the 1980 U.S. Census Advance Reports.

Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-486; RM-4425]

TV Broadcast Stations in Gainesville, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF television Channel 61 to Gainesville, Florida, as its third television service, as requested by Holt-Robinson Communications.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Proposed Rule Making

In the matter of: amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Gainesville, Florida), MM Docket No. 83-486, RM-4425.

Adopted: May 9, 1983.
Released: June 2, 1983.
By the Chief, Policy and Rules Division.

1. The Commission has before it a petition filed by Holt-Robinson Communications ("Holt") to assign UHF television channel 61 to Gainesville, Florida, as its third television outlet. Gainesville (population 81,371) [1] the seat of Alachua County (population 151,348), is located in north central Florida, approximately 105 kilometers (65 miles) southwest of Jacksonville, Florida. Holt states tht Gainesville, often referred to as the "University City," is the focal point for health and educational services throughout the state and is also the agricultural hub of Florida. Holt further states that if the proposed assignment is made, it will promptly apply for a construction permit to operate on the channel and will, if granted, construct and operate a new television station on the channel. The proposed assignment meets all minimum spacing requirements of our Rules.

2. In view of the foregoing, we conclude that the public interest would be served by our proposing an amendment of the TV Table of Assignments, § 73.606(b) of the Commission's Rules, for the following community:

City	Channel No.	
	Present	Proposed
Gainesville, Florida	*6-, 20	*6-, 20, 61+

3. The commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

4. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

6. For further information concerning this proceeding, contact Philip S. Cross, Mass Media Bureau, (202) 632-5414. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.
Roderick K. Porter,
Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

FM Broadcast Stations in Harbor Beach, Michigan, Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the assignment of Channel 288A to Harbor Beach, Michigan, as that community's first FM assignment, in response to a petition filed by Midwest Radio Consultants, Inc.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Radio broadcasting.

Proposed Rule Making

In the matter of; amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Harbor Beach, Michigan), MM Docket No. 83-487, RM-4403.

Adopted: May 9, 1983.
Released: June 2, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed March 15, 1983, by Midwest Radio Consultants, Inc. ("petitioner"), proposing the assignment of FM Channel 288A to Harbor Beach, Michigan, as that community's first local FM broadcast service. Petitioner submitted information in support of the proposal and expressed interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements.

2. Since the assignment of FM Channel 288A is within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian clearance must be obtained.

3. In view of the fact that the proposed assignment would provide a first local FM broadcast service to Harbor Beach, Michigan, the Commission believes it is appropriate to propose amending the FM Table of Assignments (§ 73.202(b) of the Commission's Rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Harbor Beach, Michigan		288A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concering this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and

307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.402(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an orginal and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-462; RM-4402]

FM Broadcast Station in Williams, Arizona; Proposed Changes in Tables of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes to assign FM Channel 257A to Williams, Arizona, in response to a petition filed by Soho Broadcasting. The assignment could provide Williams with a second local FM service.

DATES: Comments must be filed on or before July 18, 1983, and reply comments must be filed on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Proposed Rule Making

In the matter of; amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Williams, Arizona) MM Docket No. 83-462, RM-4402.

Adopted: May 4, 1983.
Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making has been filed by Soho Broadcasting ("petitioner"), seeking the assignment of Channel 257A to Williams, Arizona, as that community's second FM assignment.

2. Previously, Soho filed a petition for rule making seeking the assignment of Channel 244A to Williams, Arizona (BC Docket No. 81-714, RM-3890), which was granted by *Memorandum Opinion and Order*, adopted August 23, 1982, 47 FR 40168, published September 13, 1982. Thereafter, on October 21, 1982, petitioner filed an application for a construction permit to operate on Channel 244A (File No. 821021AC), followed on February 14, 1983, by a second application for than channel by T.A. Hunt and R. Hunter ("H&H") (File No. 830214AD).

3. In view of the second expression of interest in Channel 244A, petitioner requests that, in order to avoid a comparative hearing, the Commission consider amending the FM Table of Assignments to also assign Channel 257A to Williams, Arizona; grant the construction permit application of H&H for Channel 244A; and amend petitioner's construction permit application to specify Channel 257A in lieu of Channel 244A.

4. Based on petitioner's expression of interest in providing Williams with a second local FM service, Channel 257A will also be proposed for assignment. However, we cannot abide by petitioner's request to grant the construction permit for Channel 244A to H&H as a part of this rule making proceeding. Nor can we amend petitioner's application to specify Channel 257A, if assigned.

5. In accordance with *Ashbacker Radio Corp.* v. *FCC*, 326 U.S. 327 (1945), the addition of a new channel at a community requires that the assignment be made available for competing applications. Petitioner has not set forth any precedent for its request. Therefore, petitioner will have no protected rights as against other potential applicants for Channel 257A. If petitioner does in fact apply for Channel 257A, it will be required to withdraw its pending application for a construction permit for Channel 244A at that time. Petitioner is requested to set forth its intention to file for Channel 257A if assigned to Williams.

5. Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Williams, Arizona	244A	244A, 257A

6. The Commission's authority to institute rule making procedings, showings required, cut-off procedures,

and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to lrule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in this proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) and 0.204(b) of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (see § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in the *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rule and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of: amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Morton, Washington), MM Docket No. 83–481, RM–4382.

Adopted: May 4, 1983.
Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. The Daily Chronicle, Inc. ("petitioner") submitted a petition for rule making on February 16, 1983, requesting the assignment of UHF Television Channel 39 to Morton, Washington, as a first commercial television assignment. Petitioner stated that it, or an entity of which it is a part, will apply for the channel, if assigned.

2. Morton (population 1,264),[1] in Lewis County (population 55,279), is located in

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

western Washington, approximately 120 kilometers (75 miles) south of Seattle. Morton is currently without local television service.

3. In support of its proposal, petitioner submitted population data and statistics on the consumer spendable income and retail sales for Lewis County.

4. We believe that the petitioner's proposal warrants consideration. The assignment of Chanel 39 to Morton would require a site restriction of 1 mile north of the city to avoid short spacing to a construction permit on Channel 24 at Portland, Oregon. As Morton, Washington, is within 400 kilometers (250 miles) of the U.S.-Canadian border, Canadian coordination is required.

5. Comments are invited on the proposal to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules, with regard to the following community:

City	Channel No.	
	Present	Proposed
Morton, Washington		39

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which had not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-493; RM-4393]

FM Broadcast Stations in Gulf Breeze, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes a first FM assignment to Gulf breeze, Florida, in response to a petition filed by Eugene Hobdy.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

Proposed Rule Making

In the matter of amendment of § 73.202(b), table of Assignments, FM Broadcast Stations, (Gulf Breeze, Florida), MM Docket No. 83–493, RM–4393.

Adopted: May 9, 1983.
Released: June 3, 1983.

By the Chief; Policy and Rules Division.

1. Eugene Hodby ("petitioner") submitted a petition for rule making on February 23, 1983, which seeks the assignment of Channel 237A to Gulf Breeze, Florida, as its first FM assignment. Petitioner stated his intention to apply for the channel, if assigned.

2. In an effort to demonstrate a need for the requested assignment, petitioner submitted population and community data. In view of the action taken in *Revision of FM Policies and Procedures*, 90 F.C.C. 2d 88 (1982), this information is no longer needed in this type of proceeding.

3. We have determined that Channel 237A can be assigned to Gulf Breeze in conformity with the minimum distance separation requirements, provided the transmitter site is located approximately 5.6 miles northeast of the city. This restriction is necessary to avoid short-spacing to Station WKSJ–FM (Channel 235), Mobile, Alabama.

4. In view of the fact that the proposal could provide a first local broadcast service to Gulf Breeze, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Rules, with regard to the following community:

City	Channel No.	
	Present	Proposed
Gulf Breeze, Florida		237A

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules* 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307 (b) of the Communications Act of 1934, as amended, and §§ 0.281(b)(6) and 0.204(b) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 83-498; RM-4306]

TV Broadcast Stations in Miami, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF Television Channel 35 to Miami, Florida, as the result of a petition by Harry C. Powell, Jr. The assignment could provide a ninth commercial TV service to Miami.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or befor August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Philip S. Cross, Broadcast Bureau (202) 632-5414.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assigments, TV Broadcast Stations (Miami, Florida), MM Docket No. 83-498, RM-4306.

Adopted: May 5, 1983.
Released: June 6, 1983.

By the Chief; Policy and Rules Division.

1. The Commission has before it a petition by Harry C. Powell, Jr. ("Powell") to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules, by adding UHF Television Channel 67 to Miami, Florida. Powell states that, if the channel is assigned as requested, either he or an entity of which he is a part, will promptly apply for operation on the channel.

2. Miami (population 346,934) [1] is the county seat of Dade County (population 1,625,979) and is located in southeastern Florida.

3. Powell's Channel 67 proposal cannot be acted upon because it is short spaced to a proposal to add Channel 67 to Lake Worth, Florida, BC Docket No. 82-597. Moreover, his proposal cannot be accepted as a counterproposal in that docket because it is untimely. However, Channel 35 could be assigned to Miami with a site restriction of 7.8 miles southwest of the city to avoid a short-spacing conflict with Station WDZL, Channel 39, Miami.

4. We conclude that the public interest would be served by our seeking comments on a proposal to amend § 73.606(b) of the Commission's Rules, the TV Table of Assignments by adding Channel 35 to Miami, Florida, as its ninth commercial TV service, as follows:

City	Channel No.	
	Present	Proposed
Miami, Florida	*2, 4, 6, 7-, 10+, *17-, 23-, 33, 39, 45+.	*2, 4, 6, 7-, 10+, *17-, 23-, 33, 35, 39, 45+

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Philip S. Cross, Mass Media Bureau, (202) 632-5414. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, and original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Wamego, Kansas), MM Docket No 83-492, RN-4405.

Adopted: May 9, 1983.

Released: June 2, 1983.

By the Chief, Policy and Rules Division:

1. A petition for rule making was filed March 16, 1983, by Cheryl A. Stallard ("petitioner") seeking the assignment of Channel 237A to Wamego, Kansas, as its first FM assignment. Petitioner submitted information in support of the proposal and stated that she will apply for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements.

2. In view of the fact that the proposed assignment could provide a first local FM broadcast service to Wamego, Kansas, the Commission believes it is appropriate to propose amending the FM Table of Assignments (§ 73.202(b) of the Commission's Rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Wamego, Kansas	.....	237A

3. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

4. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, Published February 9, 1981.

6. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this appendix is attached proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Paintsville and West Liberty, Kentucky), MM Docket No. 83-479, RM-4390.

Adopted: May 4, 1983.
Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has before it a petition by Morgan Supply Company ("Morgan") to reassign UHF Television Channel 69 from Paintsville, Kentucky, to West Liberty, Kentucky. The channel was assigned to Paintsville on May 19, 1981, 46 FR 30089, in response to a request from Hometown Television, Inc. No application has been filed for operation of a station on the channel. Morgan states that no other UHF channel is available for use at West Liberty. Morgan states further that it will promptly apply for a construction permit on Channel 69 at West Liberty, if the reassignment is made.

2. West Liberty (population 1,381),[1] the seat of Morgan County (population 12,103), is located in eastern Kentucky, approximately 110 kilometers (80 miles) east of Lexington, Kentucky. It has no local TV service.

3. Paintsville (population 3,815), the seat of Johnson County (population 24,432), is located approximately 42 kilometers (26 miles) east of West Liberty. It has one unoccupied and unapplied for channel (69). Inasmuch as no interest has been expressed in use of the channel at Paintsville and Morgan would provide a first television outlet in West Liberty, we believe that the public interest would be served by the proposal to amend the TV Table of Assignments, § 73.606(b) of our Rules, as follows:

City	Channel No.	
	Present	Proposed
Paintsville, Kentucky	69-	
West Liberty, Kentucky		69+

4. The Commission's authority to institute rule making proceedings, showing required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Philip S. Cross, Mass Media Bureau, (202) 632-5414. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

[1] Population figures are taken from the 1980 U.S. Census Advance Reports.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompained by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 83-499; RM-4391]

FM Broadcast Stations in Van Buren, Indiana; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign FM Channel 257A to Van Buren, Indiana, as its first FM assignment in response to a petition filed by William Edwin Loucks.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Van Buren, Indiana), MM Docket No. 83-499, RM-4391.

Adopted: May 5, 1983.
Released: June 6, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed February 22, 1983, seeking the assignment of Channel 257A to Van Buren, Indiana, as its first FM assignment. The requested assignment is short spaced by 5 miles to the current location of Station WZPL (Channel 258), Greenfield, Indiana. However, Station WZPL was recently granted a construction permit to move its transmitter. Based on this move taking place, the Van Buren channel can be assigned provided that a 1.2 mile north site restriction is adhered to. Petitioner failed to state that he would apply for the channel, if assigned. He merely indicated that he would be a possible owner with an undetermined percentage. Petitioner should indicate in comments a specific commitment.

2. Since the proposed assignment of Channel 257A to Van Buren, Indiana, is located within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian clearance must be obtained.

3. In view of the fact that the proposed assignment could provide a first local FM broadcast service to Van Buren, Indiana, the Commission believes it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Van Buren, Indiana		257A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before July 18, 1983 and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assigment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petition for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendiix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.202(b), table of Assignments, FM Broadcast Stations (Baraga, Michigan), MM Docket No. 83-480, RM-4366.

Adopted: May 4, 1983.
Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making by Keweenaw Bay Tribal Center ("petitioner") was filed March 2, 1983, proposing the assignment of Class C FM Channel 278 to Baraga, Michigan, as its first FM assignment. Petitioner submitted information in support of the proposal but failed to state that it would apply for the channel, if assigned. It is expected to do so in its comments. A site restriction of 5.3 miles south of Baraga is required to avoid short spacing to unused Channel 279C in Nipigan, Ontario (Canada).

2. Since Baraga, Michigan, is located within 320 kilometers (20 miles) of the U.S.-Canadian border, Canadian clearance must be obtained.

3. In view of the fact that the proposed assignment could provide a first local FM broadcast service to Baraga, Michigan, the Commission believes it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Baraga, Michigan		278

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in

the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel that was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, and original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of; amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Cadillac, Michigan), MM Docket No. 83–496, RM–4384.

Adopted: May 9, 1983.
Released: June 8, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed February 18, 1983, by GRK Productions ("petitioner") seeking the assignment of UHF Television Channel 33 to Cadillac, Michigan, as its third television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other criteria.

2. Cadillac (population 10,199),[1] seat of Wexford County (population 25,102), is

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

located approximately 280 kilometers (175 miles) northwest of Detroit, Michigan..

3. Since Cadillac, Michigan, is located within 402 kilometers (250 miles) of the U.S.-Canadian border, Canadian clearance must be obtained.

4. In view of the fact that Cadillac could receive its third local television broadcast service, the Commission believes it is appropriate to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Cadillac, Michigan	9, *27	9, *27, 33+

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 F.R. 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.202(b), table of assignments, FM Broadcast Stations (Glen Arbor, Michigan), MM Docket No. 83-497, RM-4404.

Adopted: May 9, 1983.
Released: June 6, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed March 15, 1983, by Midwest Radio Consultants, Inc. ("petitioner"), seeking the assignment of Channel 261A to Glen Arbor, Michigan, as its first FM broadcast service. Petitioner submitted information in support of the proposal and expressed its interest in applying for the channel, if assigned.

2. The requested assignment is short-spaced to a proposal for Channel 261A in Bear Lake, Michigan. Our staff has determined that Channel 232A in Glen Arbor meets all spacing requirements.

3. Since the assignment of Channel 232A to Glen Arbor, Michigan is within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian concurrence must be obtained.

4. In view of the fact that the proposed assignment could provide a first local FM broadcast service to Glen Arbor, Michigan, the Commission believes it is appropriate to propose amending the FM Table of Assignments (§ 73.202(b) of the Commission's Rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Glen Arbor, Michigan		232A

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of The Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See §1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding wil be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

FM Broadcast Station in Baker, Oregon; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the assignment of Class C Channel 284 to Baker, Oregon, as that community's second FM assignment, in response to a petition by James T. Frakes.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau (202) 634-6530.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Baker, Oregon), MM Docket No. 83-491, RM-4420.

Adopted: May 9, 1983.
Released: June 2, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed March 31, 1983 by James T. Frakes ("petitioner"), seeking the assignment of Class C FM Channel 284 to Baker, Oregon as that community's second FM assignment. Petitioner submitted information in support of the proposal and expressed his interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements.

2. In view of the fact that the proposed assignment could provide a second local FM broadcast service to Baker, Oregon, the Commission believes it is appropriate to propose amending the FM Table of Assignments (§ 73.202(b) of the Commission's Rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Baker, Oregon	...	237A, 284

3. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

4. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

6. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a massage (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitoner consititutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in section 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in intital comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies

of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Blanco, Texas), MM Docket No. 83-478, RM-4371

Adopted: May 4, 1983.
Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed February 3, 1983, by Opal Chadwell ("petitioner") seeking the assignment of UHF television Channel 52 to Blanco, Texas, as its first television asignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

2. Since Blanco is located within 320 kilometers (199 miles) of the U.S.-Mexican border, the proposed assignment requires the concurrence of the Mexican government.

3. Blanco (population 1,179)[1] in Blanco County (population 4,681), is located in central Texas approximately 72 kilometers (45 miles) west of Austin, Texas.

4. In view of the fact that Blanco could receive its first local television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Blanco, Texas		52+

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules.* 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1068, 1082; 47 U.S.C. 154, 303.)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in §§ 4(i), (5)(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will be govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

---

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Antigo, Wisconsin), MM Docket No. 83-477, RM-4397.

Adopted: May 4, 1983.
Released: June 1, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed February 18, 1983, by Stewart-Monroe Broadcast Enterprises ("petitioner") proposing the assignment of Channel 280A to Antigo, Wisconsin, as its second FM assignment. Petitioner submitted information in support of the proposal but failed to express an interest in applying for the channel, if assigned. It is expected to do so in its comments. A site restriction of 6.7 miles east of Antigo is required to avoid short spacing to Station WWIB (Channel 279), Ladysmith, Wisconsin, and to Station WWRW (Channel 277) in Wisconsin Rapids, Wisconsin.

2. Since the proposed asignment of Channel 280A to Antigo, Wisconsin, is located within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian clearance must be obtained.

3. In view of the fact that the proposed assignment could provide a second local FM broadcast service to Antigo, Wisconsin, the Commission believes it is appropriate to propose amending the FM Table of Assignments (§ 73.202(b) of the Commission's Rules), with respect to the following community.

City	Channel No.	
	Present	Proposed
Antigo, Wisconsin	257	280A, 257

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the persons(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the

consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply coments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rule and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Trempealeau, Wisconsin), MM Docket No. 83-494, RM-3494.

Adopted: May 9, 1983.
Released: June 2, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed on February 28, 1983, by Greater Trempealeau Broadcasting Company ("petitioner"), proposing the assignment of Channel 288A to Trempealeau, Wisconsin, as its first FM assignment. Petitioner expressed its desire to apply for the channel, if assigned.

2. The proposed assignment of Channel 288A to Trempealeau can be made in conformity with the minimum distance separation requirements, provided the transmitter site is located approximately 4.9 miles southwest of the city. [1] This restriction is necessary to avoid short-spacing to Station WCFW(FM) (Channel 288A) at Chippewa Falls, Wisconsin.

3. In view of the foregoing and the fact that the proposed assignment could provide a first FM service to Trempealeau, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Rules, with regard to the following community:

[1] Petitioner proposed a transmitter site 5.1 miles southwest of the city.

City	Channel No.	
	Present	Proposed
Trempealeau, Wisconsin		288A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 F.R. 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and

307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to reassign UHF noncommercial television Channel *35 from Tulsa, Oklahoma, to Claremore, Oklahoma, and to assign Channel *59 to Tulsa, Oklahoma, in response to petition for rule making.

DATES: Comments must be filed on or before July 18, 1983, and reply comments on or before August 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Notice of Proposed Rule Making

In the matter of Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Claremore and Tulsa, Oklahoma), MM Docket No. 83-495, RM-4407.

Adopted: May 9, 1983.
Released: June 3, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed March 18, 1983, by Rogers State College, seeking the reassignment of UHF noncommercial educational television Channel *35 from Tulsa, Oklahoma, to Claremore, Oklahoma. Petitioner also proposed the assignment of non-commercial educational UHF television Channel *53 to Tulsa, Oklahoma, to replace Channel *35. Petitioner submitted information in support of the proposal and expressed an interest in applying for the Claremore channel, if assigned.

2. Channel *35 in Claremore meets all spacing requirements. However, the assignment of Channel *53 to Tulsa, Oklahoma, is mutually exclusive with a petition from Harry C. Powell (MM Dkt. 83-241) requesting the assignment of Channel 53 to Tulsa for commercial use. As an alternative, we have determined that Channel *59 can be assigned and reserved at Tulsa for noncommercial educational use in compliance with all spacing requirements.

2. Claremore (population 12,085)[1], seat of Rogers County (population 46,436), is located approximately 40 kilometers (25 miles) northeast of Tulsa. It has no local TV service.

4. In view of the fact that Claremore, Oklahoma, could receive its first noncommercial educational television broadcast service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following communities:

City	Channel No.	
	Present	Proposed
Claremore, Oklahoma	.....	*35
Tulsa, Oklahoma	2+, 6+, 8-, *11-, 23, *35-, 41+, and 47.	2+, 6+ 8-, *11-, 23, 41+, 47, 53, and *59

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channmel will be assigned.

6. Interested parties may file comments on or before July 18, 1983, and reply comments on or before August 2, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules.

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Denial of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration (NHTSA), Dot.

ACTION: Denial of petition for rulemaking.

SUMMARY: This notice explains the denial of a petition for rulemaking submitted by Ms. Margo Savitz to amend Safety Standard No. 208 to preclude the use of seat belts having automatic locking retractors in rear seats of vehicles. The petition stated that these seat belts tighten excessively on small children and cause extreme discomfort. The petition is being denied because the agency has previously considered this issue during a rulemaking proceeding and determined that considerations other than comfort make use of these retractors advantageous in rear seating positions.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Nelson, Office of Vehicle Safety Standards National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–2264).

SUPPLEMENTARY INFORMATION: Ms. Margo Savitz submitted a petition for rulemaking stating that the rear seat belts on her passenger car do not work properly on small children (3–4 years of age) because they continually retract and get tighter, thereby causing great discomfort. Ms. Savitz requested that another design of seat belt be required for rear seating positions.

Safety standard No. 208, *Occupant Crash Protection* (49 CFR 571.208), currently requires lap belts to be equipped with either automatic locking retractors (ALR's) or emergency locking retractors, in order to assure that belts are sufficiently tightened to be effective in the event of a crash. Emergency locking retractors are sensitive to vehicle deceleration (either directly or indirectly) and lock only when there is an accident. These retractors allow occupant movement without tightening when the belt is fastened, i.e., the belts do not lock until they are needed. On the other hand, ALR's lock to hold the occupant in place as soon as the belt is fastened. Moreover, if the occupant compresses the seat cushion as a result of movement, the belt can tighten further, making it necessary to unbuckle and refasten the belt if pressure becomes too great. This is the comfort problem to which the subject petition refers.

The agency considered the issues raised in Ms. Savitz's petition in a rulemaking proceeding commenced in 1979 to improve the comfort and convenience of seat belt systems. (See NPRM, 44 FR 77210, December 31, 1979; Final Rule, 46 FR 2064, January 8, 1981.) That proceeding recognized the comfort problems caused by ALR's and amended Standard No. 208 to preclude their use in the lap belt portion of belts installed in *front* outboard seating positions (this amendment is not yet effective; NPRM issued November 15, 1982, to delay effective date for two years until September 1, 1985, 47 FR 51432).

However, other overriding considerations led the agency to conclude that ALR's should not be prohibited in *rear* seating positions. The primary reason for this conclusion is that automatic locking retractors are better suited for use with child restraint systems than emergency locking retractors. Since emergency locking retractors allow movement when the belt is fastened, the child restraint system could slide out of position prior to a crash if the retractor cannot be locked manually. Given the low usage rate of rear seats compared to front seats and considering the cost of installing emergency locking retractors equipped with manual locking devices in rear seats, the agency determined that the requirement for emergency locking retractors should not apply to rear seats (although these retractors are permitted in rear seats, at the option of the manufacturer).

It is the agency's position that small children should be placed in child restraints in the rear seats rather than in front seating positions or in rear seating positions restrained by a lap belt only. NHTSA crash statistics show that a child restraint installed in the rear seat of a passenger car is the safest environment for small children during a crash. Since this is true, the agency encourages the use of child restraints in rear seats, and ALR's facilitate the proper use of these devices. If child

restraints are used, the comfort problems mentioned in the petition will not occur because the ALR tightens the seat belt against the restraint system and not against the child.

Ms. Savitz's petition did not provide any information which would cause the agency to reverse the conclusions it had reached in the above-referenced rulemaking proceeding. In consideration of this fact, the petition is hereby denied.

(Secs. 103, 119, Pub. L. 89-563 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on June 9, 1983.

Kennerly H. Digges,

Acting Associate Administrator for rulemaking.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1152

[Ex Parte No. 274 (Sub-No. 8A)]

Exemption of Out of Service Lines (Discontinuance of Service and Trackage Rights)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking and exemption.

SUMMARY: We propose to expand the exemption granted in Ex Parte No. 274 (Sub-No. 8), *366* I.C.C. *885*, which exempts abandonments of rail lines which have been out of service for at least 2 years by also exempting from regulation under 49 U.S.C. 10505 the discontinuance of service and of trackage rights over rail lines which have been out of service for at least 2 years. It appears that, as with abandonments, there is no evident need for the service and no shipper would be adversely affected by the discontinuance of service over a line or the discontinuance of trackage rights when no traffic has been handled locally on the line by the carrier seeking the discontinuance for at least 2 years. Carriers using this exemption will remain subject to standard employee protective conditions. We invite public comment on this proposal.

DATES: Comments must be submitted by July 18, 1983.

ADDRESSES: Send an original and 10 copies of comments to: Interstate Commerce Commission, Office of the Secretary, Room 2215, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. For a copy of the full decision, contact the Office of the Secretary, Interstate Commerce Commission, Room 2215 Twelfth and Constitution Avenue, N.W., Washington, DC 20423, or call (202) 275-7428.

The Secretary of the Commission has certified that this action will not have a significant economic impact on a substantial number of small entities. If no service has been performed for at least 2 years, small entities that could conceivably be served either were not dependent on that service or have made other arrangements for service.

List of Subjects in 49 CFR Part 1152

Administrative practice and procedure; Railroads; Reporting and record keeping requirements' uniform system of accounts.

This action is proposed under the authority of 49 U.S.C. 10321 and 10505, and 5 U.S.C. 553.

It does not appear that this action will significantly affect the quality of the human environment or the conservation of energy resources.

Decided: June 3, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, and Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Meeting of Study Committee To Study Alternative Methods of Establishing Premiums and Discounts for the Upland Cotton Loan Program

1. Meeting

Pursuant to the provisions of Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of the following committee meeting.

Name: Study Committee to Study Alternative Methods of Establishing Premiums and Discounts for the Upland Cotton Loan Program.

Date: July 6 and 7, 1983.

Place: U.S. Department of Agriculture, 14th and Independence Avenue S.W., Room 4960 South Building, Washington, D.C. 20250.

Time: 9:00 a.m.—4:00 p.m.

Purpose: To consider methods of establishing premiums and discounts for grade, staple and micronaire for 1984 and subsequent crops of upland cotton that will represent true relative market values and reflect actual market demand for upland cotton produced in the United States. The committee shall submit the results of the study to the Secretary at the earliest practicable date together with recommendations as the committee considers appropriate.

Agenda: The agenda will include consideration of methods of establishing premiums and discounts for the 1984 and subsequent crops.

The meeting will be open to the pub.ic but space and facilities are limited. Public participation will be limited to written statements submitted before the meeting to the Chairman unless their participation is otherwise requested by the Committee Chairman. Written statements should be sent Charles V. Cunningham, Deputy Director, Analysis Division, ASCS, Room 3741 South Building, P.O. Box 2415, Washington, D.C. 20013, telephone (202) 447–7954.

Signed at Washington, D.C., on June 13, 1983.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Federal Grain Inspection Service

Request for Comments on Need for Service in North Central Texas and Request for Designation Applicants to Perform Official Services (TX)

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice requests comments on the need for official inspection service in a currently unassigned area in North Central Texas. At the same time it requests applications from interested parties for designation as an official agency to provide official inspection services in this area.

DATE: Applications and comments to be postmarked on or before July 18, 1983.

ADDRESS: Applications should be submitted to James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647, South Building, Washington, D.C. 20250; telephone (202) 447–8525. All applications received will be made available for public inspection at the above address during regular business hours.

Comments must be submitted in writing, in duplicate, to Lewis Lebakken, Jr., Regulations and Directives Management Staff, Resources Management Division, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 0667, South Building, 1400 Independence Avenue, SW., Washington, D.C. 20250; telephone (202) 382–1738. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512–1; therefore, the Executive Order and Secretary's Memorandum do not apply to this action.

Section 7(f)(1) of the U.S. Grain Standards Act, as amended (7 U.S.C. *et seq.*, at 79(f)(1)) (Act), specifies that the Administrator of the Federal Grain Inspection Service (FGIS) is authorize, upon application by any qualified agency or person, to designate such agency or person to perform official services after a determination is made that the applicant is better able than any other applicant to provide such official services in an assigned geographic area. Applications submitted and other available information will be considered in making a determination as to which applicant will be designated to provide official services in a georgraphic area..

Interested parties are hereby given opportuinty to apply for designation as the official agency to perform official services in the geographic area, as specified below, under the provisions of Section 7(f) of the Act and § 800.196(b) of the regulations issued thereunder. Parties wishing to apply for this designation should contact the Regulatory Branch, Compliance Division, at the address listed above for appropriate forms and information. Applications must be postmarked not later than July 18, 1983 to be eligible for consideration.

Pursuant to Section 7(f)(2) of the Act, the geographic area that may be assigned to the applicant selected for designation is the following Counties in North Central Texas: Archer, Baylor, Callahan, Cottle, Eastland, Erath, Fisher, Foard, Haskell, Hood, Jack, Jones, King, Knox, Montague, Nolan, Palo Pinto, Parker, Shackelford, Somerville, Stephens, Stonewall, Taylor, Throckmorton, Wise, and Young.

This geographic area available for assignment has never previously been assigned to an official agency. FGIS has information that there will be a need for official inspection service in this area. Comments are solicited on the need for such service in North Central Texas. All comments must be submitted to the Regulations and Directives Management Staff, Resources Management Division, specified in the address section of this notice, and postmarked not later than July 18, 1983.

A 30-day period for submission of comments and applications is deemed appropriate so as to permit the performance of official inspection service, if determined to be needed, at the earliest possible time. Consideration will be given to comments and to all other available information before a final decision is made in this matter.

(Sec. 8, Pub. L 94-582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: June 13, 1983.

J. T. Abshier,

Director, Compliance Division.

Lincoln National Forest Grazing Advisory Board; Meeting

The Lincoln National Forest Grazing Advisory Board will meet at 9:00 a.m., July 15, 1983, at the Multipurpose Room, Cloudcroft High School, Cloudcroft, New Mexico. The agenda for the meeting will be as follows:

(a) Reading of Minutes of January 27, 1983, meeting;

(b) Installation of officers;

(c) Management Plans update;

(d) Scott Able Allotment Management Plan;

(e) Range Betterment Funds.

Other items to be discussed are environmental analyses and assessments, Term 10-Year Grazing Permits, permittee/USFS law enforcement, fencing and maintenance requirements, and off-road travel for allotment management.

Persons who wish to attend should notify Don Cunico, Lincoln National Forest Supervisor's Office, Federal Building, 11th & New York, Alamogordo, New Mexico (Telephone: 505-437-6030). Written statements may be filed with the Board before or after the meeting.

Rules for public participation will be established at the meeting.

James R. Abbott,

Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 20-83]

Foreign-Trade Zone 6, Toledo, Ohio; Application for Subzone at Jeep Corporation Plants in Toledo

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Toledo-Lucas County Port Authority, grantee of Foreign-Trade Zone 6, requesting subzone status for the vehicle manufacturing facilities of Jeep Corporation, a subsidiary of American Motors Corporation, in Toledo, Ohio, within the Toledo Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on June 6, 1983. The applicant is authorized to make this proposal under section 1743.11 of the Ohio Revised Code.

On October 11, 1960, the Board authorized the Port Authority to establish a foreign-trade zone in Toledo (Board Order 51, 25 FR 9900, 10-15-60). the project currently involves a 135,000 square foot warehouse within the Port of Toledo's 135 acre general-cargo facility on Lake Erie.

The proposed subzone involves Jeep Corporation's two manufacturing facilities in Toledo, Ohio. One plant covers 108 acres at 940 North Cove Boulevard and the other 230 acres at 4000 Stickney Avenue. The plants produce four wheel-drive passenger vehicles. Most of the parts and material are purchased from domestic sources, with less than 5 percent purchased from foreign plants. Foreign parts include optional engines and transmissions, valves, springs, radios, relays and mirrors. Some 35 to 40 percent of the plant's output is exported.

Zone procedures will exempt Jeep from paying duties on foreign components used for its exports. On its domestic sales, the company will be able to take advantage of the same duty rate available to importers of finished vehicles. The average duty rate for the foreign components used by Jeep is 4.2 percent, whereas the rate for finished passenger vehicles is 2.8 percent. The savings from zone procedures are expected to help the company compete more effectively in foreign and domestic markets with comparable vehicles produced abroad.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; John F. Nelson, District Director, U.S. Customs Service, 55 Erieview Plaza, 6th Floor, Cleveland, Ohio 44114; and Colonel Robert R. Hardiman, District Engineer, U.S. Army Engineer District Buffalo, 1776 Niagara Street, Buffalo, NY 14207.

Comments concerning the proposed subzone are invited in writing from interested persons and organizations. They should be addressed to the Board s Executive Secretary at the address below and postmarked on or before July 13, 1983.

A copy of the application is available for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, 136 N. Summit Street, Toledo, Ohio 43604.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230.

Dated: June 10, 1983.

John J. Da Ponte, Jr.,

Executive Secretary.

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare a Supplemental Environmental Impact Statement (SEIS) for Barbers Point Deep Draft Harbor, Ewa, Oahu, Hawaii

AGENCY: Army Corps of Engineers, Honolulu District, DOD.

ACTION: Notice of Intent to Prepare a draft Supplemental Environmental Impact Statement (SEIS).

SUMMARY: 1. Construction of a deep draft harbor at Barbers Point, Ewa, Oahu, Hawaii is currently underway. This second supplemental EIS evaluates the environmental consequences of detailed master planning now being prepared by the local sponsor, the State of Hawaii Department of Transportation.

2. Alternative harbor sites or basin-channel configurations are not being considered. Alternative types, locations

and construction phasing of shoreside facilities will be addressed. Harbor facility construction is currently divided into three approximate implementation phases (1985–1993, 1993–1998, and 1999–2000) leading to a Year 2000 Plan and an undetermined phase leading to the Ultimate Development Plan by 2030. Most on- and off-site grading, drainage, emplacement of utilities and provision of administrative buildings would be accomplished in the first phase. Phase I consruction of piers, concrete aprons, paved storage areas and storage sheds for general cargo, dry-bulk cargo and liquid bulk cargo, including propane and high explosives would occur in the southern quadrant of the harbor area. Subsequently phased construction would occur counter-clockwise around the harbor with a new general cargo berth being constructed in the 3rd phase and a possible coal terminal berth in the 4th phase. Provision for recreational facilities as proposed in earlier planning are not addressed in the current preliminary master plan.

3. a. The State of Hawaii Department of Transportation is the principal cooperating agency in preparation of the Supplement. Other affected Federal, State or County agencies and other interested parties are invited to participate in the identification and evaluation of key issues and environmental impacts associated with planning for harbor-related facilities.

b. The scoping process and the Supplement will also update the public on environmental issues raised and environmental studies and coordination accomplished since filing the Final EIS in December 1976 and the first Supplement in February 1977, and it will summarize the environmental impacts associated with recent project changes which were addressed in an Environmental Assessment prepared in December 1982. An Information Packet discussing these various issues and impacts has been prepared and will be made available upon request.

c. Scoping meetings will be held with concerned agencies. If response to this notice indicates a significant desire for a public meeting, the District Engineer shall specify whether, when and where the public meeting will be held.

d. Significant issues which shall be analyzed in depth include primary and secondary socio-economic effects of the harbor facilities and their operation, provision for recreational/park facilities, construction of offsite drainage and road systems, water supply and waste disposal facilities, and an assessment of community response to long-range planning alternatives.

e. As principal cooperating agency, the State of Hawaii Department of Transportation will be responsible for providing input on the master planning process and alternatives and an assessment of road transportation needs. Other significant input may be expected from the County Board of Water Supply and Department of Public Works on water supply and waste disposal, the James Campbell Estate on offsite land-use planning, the National Marine Fisheries Service and U.S. Fish and Wildlife Service on marine resources, the State Department of Planning and Economic Development on coastal zone planning, and the State Department of Health on noise, air and water quality management.

f. There are no other requirements for Federal environmental review and consultation to address the master planning issue. The supplement will summarize all environmental reviews and consultations accomplished to date for Federal actions relating to the harbor project including ongoing consultation with the National Marine Fisheries Service, the State Historic Preservation Officer and Advisory Council on Historic Preservation, the State Department of Health, the Office of Coastal Zone Management of the State Department of Planning and Economic Development, and the U.S. Fish and Wildlife Service.

4. The draft Supplement is expected to be distributed to the public for review during the third quarter of calendar year 1983.

ADDRESS: For more information on this matter, please contact Dr. James Maragos, Chief, Environmental Resources Section, Planning Branch, U.S. Army Engineer District, Honolulu, Building 230, Fort Shafter, Hawaii 96858 or telephone (808) 438–2263.

Dated: June 3, 1983.

Kenneth E. Sprague,

Lt. Colonel, Corps of Engineers, Acting District Engineer.

Office of the Secretary

Defense Science Board Task Force on Fire Support for Amphibious Warfare; Advisory Committee Meeting

The Defense Science Board Task Force on Fire Support for Amphibious Warfare will meet in closed session on July 21–22, 1983 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on July 21–22, 1983 the Task Force will consider the basic requirements for fire support during amphibious warfare operations.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

June 13, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

BILLING CODE 3810-01-M

Defense Science Board, Advisory Committee Meeting

The Defense Science Board will meet in closed session August 8–12, 1983 at the Naval Ocean Systems Center, San Diego, California.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting to be held August 8–12, 1983 the Board will examine the substance, interrelationships, and U.S. national security implications of three critical areas identified and tasked to the Board by the Secretary of Defense and Under Secretary of Defense for Research and Engineering. The subject areas are Joint Service Acquisition Programs, Ground Survivability of NATO Tactical Aircraft/Air Bases, and Conventional Munitions and the Nuclear Threshold. The period of study is anticipated to culminate in the formulation of specific recommendations to be submitted to the Secretary of Defense, via the Under Secretary of Defense for Research and Engineering, for his consideration in determining resource policies, short- and long-range plans, and in shaping appropriate implementing actions as they may affect the U.S. national defense posture.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I, (1976)). It has been determined

that this DSB Summer Study meeting concerns matters listed in 5 U.S.C. 552b(c) (1) (1976), and that accordingly these meetings will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

Defense Science Board Summer Study Panel on Aircraft Survivability in NATO; Advisory Committee Meeting

The Defense Science Board 1983 Summer Study Panel on Aircraft Survivability in NATO will meet in closed session on 13–14 July 1983 at the Institute for Defense Analyses, Alexandria, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 13–14 July 1983 the Panel will examine the threat to tactical aircraft on the ground and assess the major sources of their attrition and sortie rate degradation.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Summer Study Panel meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

BILLING CODE 3810-01-M

Membership of the Office of the Secretary of Defense (OSD) Performance Review Board

AGENCY: Office of the Secretary of Defense (OSD), DOD.

ACTION: Notice of Membership of the Office of the Secretary of Defense Performance Review Board.

SUMMARY: This notice announces the appointment of the members of the Performance Review Board (PRB) of the Office of the Secretary of Defense. The OSD PRB's jurisdiction includes: OSD, OSD field activities, the Organization of the Joint Chiefs of Staff (OJCS), the Office of the Inspector General (IG), the Defense Investigative Service (DIS), the U.S. Court of Military Appeals (USCMA), and the U.S. Mission to NATO. The publication of PRB membership is required by 5 U.S.C. 4314(c)(4).

The Performance Review Board provides fair and impartial review of Senior Executive Service performance appraisals and makes recommendations regarding performance and performance awards to the Secretary of Defense.

EFFECTIVE DATE: June 30, 1983.

FOR FURTHER INFORMATION CONTACT: Mrs. Sharon B. Brown, Chief, Senior Executive Service Division, Directorate for Personnel & Security, WHS, Office of the Secretary of Defense, Department of Defense, The Pentagon, (202) 697–3305 or 697–8304.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 4314(c)(4), the following are names and titles of the executives who have been appointed to serve as members of the Performance Review Board. They will serve a one-year renewable term, effective on June 30, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

June 13, 1983.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 83-CERT-016]

Burlington Industries, Inc.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On April 12, 1983, Burlington Industries, Inc. (Burlington), P.O. Box 21207, Greensboro, North Carolina 27420, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application, and amended it on May 3, 1983, for certification of an eligible use of approximately 892,790 Mcf per year of natural gas which is expected to displace the use of approximately 4,962,541 gallons of No. 6 fuel oil (2.1 percent sulfur) per year at three of its facilities in Greensboro, Burlington and High Point, North Carolina.

The eligible seller of the natural gas is Oklahoma Natural Gas Company, Post Office Box 871, Tulsa, Oklahoma 74102. The gas will be transported by Transcontinental Gas Pipeline Corporation, Post Office Box 1396, Houston, Texas 77251; Northern Natural Gas Company, 2223 Dodge Street, Omaha, Nebraska 68102; and Piedmont Natural Gas Company, Inc., Post Office Box 33068, Charlotte, North Carolina 28233.

Notice of that application was published in the **Federal Register** (48 FR 22352, May 18, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed Burlington's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Burlington's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-169]

Eastern Stainless Steel Company; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Eastern Stainless Steel Company ("Eastern Stainless") Post Office Box 1975, Baltimore, Maryland 21203, filed an application on June 7, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Rolling Mill Road facility in Baltimore, Maryland, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Eastern Stainless indicates that the volume of natural gas for which it requests certification is approximately 1,300,000 Mcf per year. This volume is estimated to displace the use of approximately 9,538,960 gallons of No. 2 fuel oil (0.3 percent sulfur) per year.

The eligible sellers are: Yankee Oil & Gas, Inc., 1105 Schrock Road, Columbus, Ohio 43229; Target Exploration, Inc., Columbia, Maryland; Exxon Corporation, P.O. Box 2180, Houston, Texas 77001. This gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and by Baltimore Gas & Electric Company, P.O. Box 1475, Baltimore, Maryland 21203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**. An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary further notice will be given to Eastern Stainless and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels programs, Economic Regulatory Administration.

[ERA Docket No. 83-CERT-012]

J. P. Stevens & Company, Inc., Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On April 12, 1983, J. P. Stevens & Company, Inc. (Stevens), P.O. Box 2850, Greenville, South Carolina 29602, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application, and amended it on May 3, 1983, for certification of an eligible use of approximately 520,125 Mcf per year of natural gas which is expected to displace the use of approximately 3,569,524 gallons of No. 6 fuel oil (2.1 percent sulfur) at its facility in Lincolntown, North Carolina, and at eight of its facilities in Greenville (4), Piedmont (2), Slater (1) and Anderson (1), South Carolina.

The eligible seller of the natural gas is Oklahoma Natural Gas Company, Post Office Box 871, Tulsa, Oklahoma 74102. The gas will be transported by Transcontinental Gas Pipeline Corporation, Post Office Box 1396,

Houston, Texas 77251; Northern Natural Gas Company, 2223 Dodge Street, Omaha, Nebraska 68102; and Piedmont Natural Gas Company, Inc., Post Office Box 33068, Charlotte, North Carolina 28233.

Notice of that application was published in the **Federal Register** (48 FR 22353, May 18, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed Stevens' application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Stevens' application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83–CERT–166]

Koppers Company, Inc., Piston Ring and Seal Division; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Koppers Company, Inc., Piston Ring and Seal Division ("Koppers") P.O. Box 626, Baltimore, Maryland 21203, filed an application on June 7, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Piston Ring and Seal Division Plant in Baltimore, Maryland, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Koppers indicates that the volume of natural gas for which it requests certification is approximately 76,517 Mcf per year. This volume is estimated to displace the use of approximately 542,765 gallons of No. 6 fuel oil (1.0 percent sulfur) per year.

The eligible seller are: Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; Target Explorations, Inc., 301 Clark Building, Columbia, Maryland 21044; Yankee Resources, Inc., Suite 800, 1105 Schrock Road, Columbus, Ohio 43229. This gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and by Baltimore Gas and Electric Company, P.O. Box 1475, Baltimore, Maryland 21203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Koppers and any person filing comments will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–111]

Newport Steel Corporation; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Newport Steel Corporation (Newport), Ninth and Lowell Streets, Newport, Kentucky 41072, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its plant in Wilder, Kentucky, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Newport indicates that the volume of natural gas for which it requests certification is approximately 651 million cubic feet per year. This volume is estimated to displace the use of approximately 4,649,000 gallons of No. 2 and No. 6 oil (less than 1.0 percent sulfur) per year.

The eligible sellers are: Exxon U.S.A., P.O. Box 2810, Houston, Texas 77001; Texas Gas Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 45302; Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055; Kaiser Exploration and Mining Co., 300 Lakeside Drive, Oakland, California 94543; Sterling Drilling and Production Co., 360 Madison Avenue, New York, New York 10017; Devon Energy Corporation, P.O. Box 1134, Charleston, West Virginia 25324; Peake Operating Corporation, 201 Dunbar Office Park, Dunbar, West Virginia 25064; and Spartan Gas Corporation, P.O. Box 766, Charleston, West Virginia 25325. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and the Union Light, Heat and Power Company, P.O. Box 32, Covington, Kentucky 41012, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG–42, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention

Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Newport and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

[ERA Docket No. 83-CERT-113]

Ohio Dehy, Inc.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Ohio Dehy, Inc. (Dehy), P.O. Box 151, Oak Harbor, Ohio 43449, filed an application on May 23, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Cygnet and Oak Harbor, Ohio, plants, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Dehy indicates that the volume of natural gas for which it requests certification is approximately 58,000 Mcf per year (28,000 Mcf at Cygnet and 30,000 Mcf at Oak Harbor). This volume is estimated to displace the use of approximately 382,800 gallons of No. 6 fuel oil (0.6 percent sulfur) per year (184,800 gallons at Cygnet and 198,000 gallons at Oak Harbor).

The eligible sellers are J & J Enterprises, Inc., 43 South Ninth St., Indiana, Pennsylvania 15701; and Castle Gas, Inc., P.O. Box 10337, Pittsburgh, Pennsylvania 15324. The gas will be transported by Columbia Transmission Corporation, Charleston, West Virginia 25325; and Columbia Gas of Ohio, P.O. Box 910, Toledo, Ohio 43653 (for the Oak Harbor plant); and Consumers Natural Gas Co., Cygnet, Ohio 43412 (for the Cygnet plant), the local distribution companies.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Dehy and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-165]

Spaulding Fibre Company, Inc., Industrial Plastics Division; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Spaulding Fibre Company, Inc., Industrial Plastics Division (Spaulding), 310 Wheeler Street, Tonawanda, New York 14150, filed an application on June 7, 1983, with The Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its industrial plastics facility at Tonawanda, New York, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Fuels Conversion Division Docket Room, RG-42, Room GA-093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Spaulding indicates that the volume of natural gas for which it requests certification is approximately 517,700 Mcf per year. This volume is estimated to displace the use of approximately 89,425 barrels of No. 2 fuel oil (1.0 percent sulfur) per year.

The eligible seller is Northern Intrastate Pipeline Company, 2223 Dodge Street, Omaha, Nebraska 68102. This gas will be transported by National Fuel Gas Supply Corporation, 308 Seneca Street, Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Fuels Conversion Division, RG-12, Room GA-093, Forrestal Building, 100 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Richard A. Ransom, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Spaulding and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on June 10, 1983.

James W. Workman,

Director, Office of Fuels Program, Economic Regulatory Administration.

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of the Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, April 28, 1983. The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act.

Each entry contains the following information and is listed by the DOE sponsoring office (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent bruden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Thursday, April 28, 1983.

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H–023, Forrestal Building, 1000 Independence Ave., NW., Washington, D.C. 20585, (202) 252–2308;

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503, (202) 395–7340;

Vartkes Broussalian, Federal Energy Regulatory Commission Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503, (202) 395–3087.

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this should be directed to the OMB reviewer; as shown in "For Further Information Contact." If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C., June 10, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Arthritis Advisory Board and the Department of Defense Conference on Arthritis Prevention

Notice is hereby given of the "Arthritis Prevention Conference," sponsored by the National Arthritis Advisory Board with the assistance of the Department of Defense and the National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases. The Conference will be held on July 19, 20, 21, and 22, 1983 at the Airlie House in Warrenton, Virginia.

The goals of this conference are to identify current and prospective opportunities for effective prevention of major rheumatic diseases and, through interdisciplinary approaches, to develop strategies for implementing such interventions.

This Prevention Conference will convene riheumatologists, biomedical and bioengineering research scientists, orthopedic surgeons, public and patient educators, rehabilitation specialists, and other persons from relevant fields, consumers, and representatives of public interest groups. The conference will begin at 4:30 p.m. on July 19 and will continue until approximately noon on July 22. Attendance by the public is limited to space available.

Information on the Conference may be obtained from Mr. William Plunkett, Executive Director, National Arthritis Advisory Board, P.O. Box 30286, Bethesda, Maryland 20814, (301) 496–1991. Administrative information may be obtained from Ms. Michelle Dillon, Prospect Associates, 2115 East Jefferson Street, Rockville, Maryland 20852, (301) 468–6555.

Dated: June 9, 1983.

NIDR Special Grants Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Institute of Dental Research Special Grants Review Committee, July 14–15, 1983, in Conference Room 7, Building 31–C, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public from 9:00 a.m. to 9:30 a.m. July 14 for general discussions. Attendance by the public is limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 930 a.m. July 14 to adjournment July 15 for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. H. George Hausch, Executive Secretary, NIDR Special Grants Review Committee, National Institute of Dental Research, National Institutes of Health, Westwood Building, Room 504, Bethesda, MD 20205, (telephone 301 496–7658) will provide summaries of meeting, rosters of committee members, and substantive program information.

BILLING CODE 4140-01-M

Social Security Administration

Proposed Availability of Funding for Refugee Mental Health Demonstration Projects

AGENCY: Office of Refugee Resettlement (ORR), SSA, HHS.

ACTION: Notice of Availability of funding for Refugee Mental Health Demonstration Projects.

SUMMARY: This notice governs the award of grants to public or private non-profit agencies or organizations for demonstration projects to provide alternative mental health care for refugees. These projects also include provision for documenting alternatives successful mental health service models and effective treatment practices for dissemination to other refugee mental health service providers.

DATE: An application must be mailed or hand delivered by the closing date August 15, 1983. The Director invites application for projects to demonstrate alternative mental health care for refugees.

FOR FURTHER INFORMATION CONTACT: Nguyen T. Kimchi, Telephone: 202–245–0403.

Authorization

Authority for this activity is contained in the Immigration and Nationality Act (8 U.S.C. 1522) as amended by the Refugee Act of 1980, Section 412, Public Law 96–212. No catalogue of Federal Domestic Assistance Number has been issued.

Available Funds

It is expected that approximately $220,000.00 will be available for new grants in fiscal year 1983. The Director estimates that these funds could support three (3) projects. The anticipated award for a project is between $60,000 and $100,000. However, these estimates do not bind the Office of Refugee Resettlement to a specific number of grants or to the amount of any grant unless the amount is otherwise specified by statute or regulations.

Awards will be for 12 months with no further funding anticipated.

Application Delivered by Mail

An application sent by mail must be addressed to the U.S. Department of Health and Human Services, Social Security Administration, Office of Refugee Resettlement, Grants Management Branch, Room 1332, Switzer Building, 330 C Street, S.W., Washington, DC 20201. An applicant must show proof of mailing on or before the closing date, August 15, 1983, consisting of one of the following:

(1) A legible dated U.S. Postal Service postmark;

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service;

(3) A dated shipping label invoice or receipt from a commercial carrier.

If an application is sent through the U.S. Postal Service, the Director does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

Applicants should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method the applicant should check with its local post office.

Applicants are encouraged to use registered or at least first class mail. Each late applicant will be notified that the application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Department of Health and Human Serivces, Social

Security Administration, Office of Refugee Resettlemnt, Grants Management Branch, Room 1332, Switzer Building, 330 C Street, S.W., Washington, D.C. 20201.

The Grants Management Branch will accept a hand-delivered application between the hours of 8:30 am and 5:00 pm Eastern Standard time daily except Saturday, Sunday or Federal Holidays. Hand delivered applications will not be accepted after 5:00 pm on the closing date for the announcement.

Supplementary Information

This announcement describes the availability of funding for demonstration projects in the following areas of refugee mental health care: (1) training in mental health problem detection and referral methods, crisis intervention and crisis management techniques for non-professionals including service providers and community leaders, (2) development of one or more models for mainstream mental health service providers to provide culturally appropriate mental health services using refugee staff and (3) development of service models using indigeneous healing practices.

I. Purpose and Scope

The purpose of this program is to provide for effective delivery of refugee mental health services through demonstration projects that emphasize the role of the refugee community. These projects would develop and test alternative mental health service delivery models for different refugee populations, in particular for the high risk goups.

Though current data on the prevalence of mental health problems among refugee populations are not available, there is no question that refugee mental health problems do exist. A survey conducted in 1979 by the Bureau of Research and Training, Pennsylvania Office of mental Health, funded by this office, confirmed such problems. Another study by the Southeast Asian Refugee Mental Health Training Project in California found that 86.5 percent of the refugees apparently were suffering from depression. ORR recognized these mental health services needs and funded several programs annually through fiscal year 1980. With the enactment of the Refugee Act of 1980, all direct funding for social services were assumed by the States. Accordingly, on April 28, 1980, ORR issued a Program Instruction to States—ORR–AT–80–2—to clarify that mental health services activities are allowable with refugee social services funds.

However, efforts to deliver adequate mental health care to refugees have been hampered by cultural differences, a scarcity of resources and the lack of bilingual/bicultural service capacity in the mainstream mental health system. Currently, the majority of refugees suffering from non-physical health problems appear to be primarily dependent upon their families and/or friends to deal with their problems. (Moon, Anson, and Tashmina, Nathaniel—*Help Seeking Behavior and Attitudes of Southeast Asian Refugees*—San Francisco: Pacific Asian Mental Health Research Project, November 1982, pp. 16–19)

This community support has always been important to Southeast Asians. In traditional Vietnam, life centered around the village and villagers were supposed to help each other during crises. In Cambodia and Loas, the *Wat*—Buddhist Pagoda—served as a "community center" where religious and cultural activities took place. The Hmong have always been tightly knit people who depend on the community through the clan system (Le, Xuan Khoa—*Indochinese Mutual Assistance Associations As Mechanisms In community Mental Health*, Paper presented at the Natinal Conference on Social Welfare, Cleveland, Ohio, May 1980). In the United States, the same traditions still exist where friends and relatives are frequently called upon for advice and counsel. (Moon, Anson, and Tashima, Nathaniel, pp. 16–19)

Not all refugees, however, are fortunate enough to come to the United States with families and friends. Many are now relying on services providers, in particular bilingual/bicultural staff, to assist them with social adjustment or mental health problems.

Bilingual/bicultural staff, if properly trained, could also bridge the gap between the cultural context of the client and that of the existing mental health system. Additionally, given appropriate training, members of the refugee community and organizations can also provide effective outreach and orientation service resulting in early detection and prevention of mental health problems. Bilingual/bicultural staff drawn from the refugee community are likely to enhance the credibility of the system and thereby increasing its utilization. Such culturally relevant programs will become more effective in service to the refugee population. ORR proposes that culturally relevant programs are more likely to occur if refugee traditions beliefs and resources can become integral parts of mental health care to refugees.

To encourage the development of culturally appropriate mental health services, ORR proposes to fund three types of projects as follows:

Objective I: The Office of Refugee Resettlement proposes to strengthen the refugee community support system by providing training in mental health problems detection and referral methods, crisis intervention and crisis management techniques for non-professional refugee service workers and refugee community leaders, including Mutual Assistance Association members, Buddhist monks, Catholic priests, clergy, healers and indigenous leaders.

Objective II: The second objective is to encourage the delivery of linguistically and culturally appropriate mental health services through utilization of trained refugee paraprofessionals in the mainstream mental health system, which currently has neither the personnel nor the resources to provide such services for refugees. ORR proposes to provide incentives to mainstream mental health facilities located in high refugee concentration areas to hire one or more qualified refugee paraprofessionals and to demonstrate the effectiveness of this mental health treatment approach.

Objective III: The third objective of this program is to develop treatment models that are culturally appropriate to special groups of refugees as an alternate way to respond to their mental health problems.

As numerous studies have indicated, indigenous concepts of health and illness often differ considerably from Western concepts. It has been noted that among some groups of refugees, traditional healers are being utilized despite the existence of the sophisticated American mental health system. Other groups indicate their preference for seeking advice from spiritual leaders such as monks or priests for adjustment problems. ORR proposes to develop and test the refugee practice of using indigenous healers in mental health treatment.

II. Eligible Grantees

Eligible grantees are public entities and private organizations incorporated as non-profit under the laws of their state. Applicants submitting proposals for Project II—Grant to Integrate Refugee Paraprofessionals into the Mainstream Mental Health System—must be established mental health service facilities. That is, facilities receiving Federal, State or local funding for a minimum of one year prior to the date of this grant application, for the

specific purpose of providing mental health services to a broadly based clientele.

III. Activities

Applicants may submit proposals for any or all of the following activities:

Project I: Mental Health Training for Refugee Service Workers and Community Leaders

Applicants seeking assistance under Project I shall carry out the following activities:

1. Identification ans selection of participants for a series of short-term training workshops. Participants may include state and local governments refugee staff, voluntary agencies staff, sponsors, Mutual Assistance Associations' members, refugee community leaders and other servie providers who are in contact with refugees.

2. Design and implementation plan for a short-term training program, using the workshop format to (a) increase the participants' awareness and knowledge of serious emotional problems which may be experienced by refugees and their families; (b) instruct participants in method of identifying mental health problems of refugees; (c) provide them with methods of encouraging refugees to seek professional help; and (d) instruct participants in crisis intervention and management techniques.

3. Workshop content shall include but not be limited to the following topics:

- Cross-cultural orientation with special emphasis on refugee versus Western health and mental health concepts, and pertinent cultural/traditional practices;
- Current mental health service delivery system and refugee mental health programs;
- Major mental health problems of refugees—e.g., differentiation between culture shock, emotional difficulties and psychosis, identification of high risk populations;
- Methods of identifying mental health problems of refugees;
- Methods of encouraging refugees to seek professional help;
- Techniques to address crises; how to use existing resources; when to seek specialized help.

4. An evaluation plan to assess the success of each workshop and plan for revision as necessary.

Project II: Grant to Integrate Refugee Paraprofessionals into the Mainstream Mental Health System.

The Integration project application should include the following activities:

1. A discussion of needs in the proposed service area to include demonstrated need of culturally appropriate mental health services and the applicant's lack of bilingual/bicultural staff capacity.

2. The design of a comprehensive mental health program for refugees that is culturally relevant and acceptable. This program must provide for:

- The utilization of bilingual/bicultural refugee paraprofessionals in mental health treatment of refugees:
- The provision of on-going training and supervision of these paraprofessionals;
- The provision of cultural awareness training for the refugee paraprofessionals and the mainstream professionals involved;
- The refugee community's participation and comment, in particular through consultation with refugee professionals, where possible, and/or consultation with refugee leaders who are familiar with both the Western treatment system and the refugee cultural background.

3. The design of a capacity building plan which includes (a) the acquisition of one or more trained refugee paraprofessionals; (b) a plan to utilize the paraprofessional(s) during the grant period; and (c) a plan to permanently integrate the paraprofessional(s) into the regular mental health services provided to the community.

4. The design of an outreach and educational program for the community utilizing bilingual/bicultural paraprofessionals.

5. The coordination of sevices with other health and social service agencies serving refugees.

6. An evaluation component to assess the effectiveness of the program service model.

Jointly funded and supported activities are allowed and encouraged.

Project III: Utilization of Traditional Healers in Refugees Mental Health Treatment

Proposed projects will develop and test alternative models using indigenous healers for the provison of mental health care for refugees.

Proposed projects must provide for direct services for refugees and must be designed as therapeutic treatments. Grantees applying for Project III shall be required to carry out the following activities;

1. Identification of the target population and the need for culturally appropriate mental health services.

2. Design of an integrated mental health service program using both traditional healing practices and western treatment appropriate for the target population and under the general supervision of a qualified therapist who is knowledgeable in both western mental health system and in the refugee cultures.

3. Documentation of the treatment process and service results.

IV. Application Submission and Approval Procedures

Applicants may request grant applications from the Department of Health and Human Services, Social Security Administration, Office of Refugee Resettlement, Grants Management Branch, Room 1332, Switzer Building, 330 C Street, S.W., Washington, D.C. 20201, 202–472–4440. Prospective grantees must submit an original application and two copies to the Grants Management Branch. An independent panel will be convened to evaluate and rate applications. Final funding decisions will be made by the Director of the Office of Refugee Resettlement. Criteria for panel evaluation are listed in Section VI below. It is estimated that grant awards will be issued on or about September 15, 1983.

V. Applicable Regulations

The following HHS regulations apply to grants under this Notice:

45 CFR Part 16 Department Grant Appeals Process;
45 CFR Part 74 Administration of Grants;
45 CFR Part 75, Informal Grant Appeals Process;
45 CFR Part 80 Nondiscrimination Under Programs Receiving Federal Assistance Through the Department of Health and Human Services Effectuation of Title VI of the Civil Rights Act of 1964.
45 CFR Part 81 Practice and Procedures for Hearings Under Part 80 of this Title.
45 CFR Part 84 Nondiscrimination on the Basis of Handicap in Programs and Activities Benefitting from Federal Financial Assistance.
45 CFR Part 90 Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance.

VI. Criteria for Evaluating Applications

All competing applications received in response to this annoucement will receive a technical review by qualified experts.

Each project proposal will be evaluated separately and applicants seeking assistance for multiple projects

under this announcement should present each project as a separate entity.

Applications will be evaluated against the following criteria:

Project I: Mental Health Training for Refugee Service Workers and Community Leaders

A. Completeness and feasibility of the proposed training project design and work plan:

- Feasibility of participants recruitment plan including identification process and selection criteria; 10 points.
- Quality of proposed workshop content and its relevance to the project objectives; 25 points.
- Methodology to be employed in implementing the project and its feasibility for the achievement of the project objectives; 15 points.

B. Qualifications of the Project Director and instructional staff. Appointment of Project Director is subject to ORR's approval; 20 points.

Project II: Grant to Integrate Refugee Paraprofessionals into the Mainstream Mental Health System

A. Completeness and feasibility of the proposed integration plan and implementation:

- Quality of proposed integrative program with specific objectives and measurable outcomes; 15 points.
- Feasibility of the consultation process with refugee experts and leaders; 5 points.
- Qualify of the outreach and educational program; 5 points.
- Adequacy of proposed capacity building plan including the acquisition of refugee paraprofessionals and description of provision for integrating the paraprofessionals into the mainstream service. Documentation of plan for continuance of services beyond the grant support period; 25 points.

B. Experience of applicant organization in providing mental health services; 10 points.

C. Qualifications of proposed staff including refugee paraprofessionals. Appointment of project director is subject to ORR's approval; 5 points.

D. Potential for replication of the service model: plans for implementation and dissemination of results of project, including any products for use by others; 5 points.

Project III: Utilization of Traditional Healers in Refugee Mental Health Treatment

A. Completeness and feasibility of proposed culturally appropriate treatment model:

- Description of how applicant plans to determine client need for traditional healer services; 10 points.
- Description of the proposed traditional healer methods to be used, identification of the types of mental health problems for which these methods are appropriate, and evidence of the efficacy of these methods in treating the mental health problems of the target refugee population; 30 points.
- Description of role and relationship between trained therapist(s) and the indigenous healer(s); 5 points.

B. Familiarity and experience of applicant organization in refugee mental health programs; 5 points.

C. Qualification of proposed staff including indigenous healers. Appointment of project director is subject to ORR's approval; 10 points.

D. Likelihood of developing innovations and transferrable knowledge in refugee mental health service and significance in national program development; 10 points.

All Projects

- Relevance of the needs of the target population with special consideration for proposals which serve areas of large refugee populations. Indication of the number of refugees to be served; 10 points.
- The extent to which the proposal provides for an evaluation methodology, including the manner in which such methodology will be employed to measure project outcomes; 5 points.
- The evidence of coordination and linkages with service providers and the refugee community; 5 points.
- The reasonableness of the budget in relation to the proposed project and the anticipated results; 5 points.
- Adequacy of facilities and resources; 5 points.

VII. A–95 Notification Process

These projects are not covered by the requirements of OMB Circular A–95.

VIII. Application Content

All applicants will use Standard Form SSA–96, "Federal Assistance" in submitting project proposals. Grant applications must also include the following:

1. Discussion of need for culturally appropriate mental health services and discussion of characteristics of clients to be served;

2. A work plan to meet the project objectives including identification of all services and materials to be developed and a dissemination plan. The work plan should describe in detail the implementation and the evaluation of the required activities indicated in Section III above;

3. A management plan for fiscal and program administration to accomplish the grant objectives including a project management chart, time line and staff resume and assignments;

4. Detailed program budget;

5. Description of the applicant organization. If other than a public agency, description of its organizational mandate, funding sources, key staff, principal officers, organization chart, organization's address and telephone number;

6. Documentation of applicant's experience with the services proposed including description of other projects similar to the proposed activities; and

7. Documentation of non-profit status-IRS form 501 C3 or other proof of non-profit status.

IX. Records and Reports

Grantees will be required to maintain such fiscal and operational records as are necessary for federal monitoring and auditing of the grants. Grantees shall insure that ORR will:

1. Have complete access to all subrecipients' (contractors or subgrantees) records;

2. Receive all materials to be disseminated.

Quarterly fiscal and program progress reports will be due 30 days after the first calendar day of each quarter following the effective date of the grant award with the exception of final fiscal and program progress reports which shall be due 90 days after the expiration of the grant.

June 13, 1983.

Phillip N. Hawkes,

Director, Office of Refugee Resettlement.

BILLING CODE 4160–11–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Receipt of Petition for Reassumption of Jurisdiction St. Regis Mohawk Tribe of the St. Regis Mohawk Reservation

June 3, 1983.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary, Indian Affairs by 209 DM 8.

The Indian Child Welfare Act of 1978 provides, subject to certain specified conditions, that Indian tribes may petition the Secretary of the Interior for reassumption of jurisdiction over Indian child custody proceedings.

This is notice that a petition has been received by the Secretary from the St. Regis Mohawk Tribe of the St. Regis Mohawk Reservation, for the tribal reassumption of jurisdiction over child custody proceedings. The petition is under review, and may be inspected and copied at the Eastern Area Office, Bureau of Indian Affairs, 1951 Constitution Avenue, NW., Washington, D.C. 20245.

Kenneth Smith,

Assistant Secretary—Indian Affairs.

[FR Doc. 83-16192 Filed 6-15-83; 8:45 am]

BILLING CODE 4310-02-M

San Carlos Irrigation Project, Arizona; Operation and Maintenance Charges Villages, Towns, and Schools

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION: Public notice.

SUMMARY: The purpose of this public notice is to change the per acre foot assessment rate for the operation and maintenance of the irrigation facilities of the Joint Works of the San Carlos Irrigation Project serving Villages, Towns, and Schools, to properly reflect the cost of labor, materials, equipment, and services. The change is from $57.00 to $65.00 per acre foot.

EFFECTIVE DATE: This public notice shall become effective July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Ralph Esquerra, Project Engineer, San Carlos Irrigation Project, P.O. Box 250, Coolidge, Arizona 85228, telephone (602) 723-5439.

SUPPLEMENTARY INFORMATION: This notice is issued by authority delegated to the Assistant Secretary for Indian Affairs by the Secretary of the Interior in 209 DM 8 and redelegated by the Deputy Assistant Secretary for Indian Affairs (Operations) to the Area Directors in 10 BIAM 3. An analysis of the costs of operation and maintenance of the Joint Works of the San Carlos Irrigation Prject serving villages, towns, and schools was made and, on December 6, 1982, was presented to the Fact Finding Committee which is made up of representatives form the San Carlos Irrigation and Drainage District, San Carlos Irrigation Project, Gila River Indian Community, Pima Agency, and the Phoenix Area Office. There was no objection to increase the assessment rate.

The Public Notice shall read as follows:

San Carlos Irrigation Project

Assessment, Villages, Towns, and Schools

(a) Such project water as shall be available may be delivered to the villages, towns, and schools, not included in the designated area of the San Carlos Irrigation Project, for the irrigation of lawns and gardens. Beginning on July 1, 1983, and until further order, the charge for such service shall be $65.00 per acre foot of water delivered, payable in advance of delivery.

(b) The delivery of water and the collection therefor shall be made by the San Carlos Irrigation and Drainage District. It is agreed that the District shall retain $21.00 per acre foot on which collection shall be made, and as its compensation for rendering the service. The remainder of the collections shall be paid to the Project Engineer for the San Carlos Irrigation Project for the benefit of the Joint Works.

Walter R. Mills,

Acting Assistant, Area Director.

BILLING CODE 4310-84-M

Irrigation Operation and Maintenance Charges; Water Charges and Related Information on the Flathead Irrigation Project, Montana

This notice of operation and maintenance rates and related information is published under the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs in 209 DM8 redelegated by the Assistant Secretary—Indian Affairs to the Area Directors in 10 BIAM 3, and by authority delegated to the Project Engineer and to the Superintendents by the Area Director in 10 BIAM 7.0, Sections 2.70-2.75. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9), and also under 25 CFR 191.1(e).

Puruant to final rule published on June 14, 1977, in 42 FR 30361, this notice sets forth changes to the operations and maintenance charges and related information applicable to the Flathead Irrigation Project, St. Ignatius, Montana. These charges were proposed pursuant to the authority contained in the Acts of August 1, 1914, and March 7, 1928, (38 Stat. 583, 25 U.S.C. 382; 45 Stat. 210, 25 U.S.C. 387).

Interested persons were given 30 days in which to submit written comments, views or arguments regarding the proposed rates and related provision. No comments were received during the 30 days period.

In compliance with the above, the operation and maintenance charges for the lands under the Flathead Irrigation Project, Montana, for the season of 1983 and 1984 and subsequent years until further notice, are hereby fixed as follows:

For the season of 1983 for lands not included in an Irrigation District but including land held in trust for Indians, the rate per acre for the various divisions are as follows:

Jocko	$9.32/acre
Mission Valley	$8.29/acre
Cames	$8.12/acre

For the season of 1984 for lands included in an irrigation Disrict, the Project charge per acre is as follows:

Jocko Valley Irrigation District	$6.50/acre
Mission Irrigation District	$7.00/acre
Flathead Irrigation District	$8.34/acre

E. M. Axtell,

Project Engineer, Flathead Irrigation Project.

BILLING CODE 4310-84-M

Bureau of Land Management

[U-060]

Realty Action-Exchange; Public Land in Grand County, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Realty action-exchange; public land in Grand County, Utah.

This Notice of Realty Action involves an exchange of public land in Utah managed by the Bureau of Land Management (U-45314).

The following described lands have been determined to be suitable for exchange under Section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716).

Selected lands:

Salt Lake Base and Meridian, Grand County, Utah

T. 21 S., R. 16 E.,
Sec. 1, Lot 7, Lot 10, Lot 14, Lot 15;
T. 21 S., R. 17 E.,
Sec. 6, Lot 6, Lot 11, Lot 12, Lot 13, Lot 14, Lot 17, Lot 18, E½ SW¼.
Comprising 495.79 acres.

In exchange for the above lands the Federal Government would acquire the following private lands in Grand County, Utah from Donald K. Bazemore, Cupertino, California 94014.

Offered lands:

Salt Lake Base and Meridian, Grand County, Utah

T. 20 S., R. 16 E.,
Sec. 3, Lot 8, Lot 9, and Lot 10.

Comprising 60.29 acres.

The mineral estate (all minerals) on the offered land would be exchanged for 60 acres of the selected land described as Salt Lake Base and Meridian, T. 21 S., R. 16 E., Section 1, S½ lot 10 and lot 15. An appraisal indicated that mineral values are equal on an acre for acre basis. The surface estates of the selected and offered lands have been determined to be equal in value.

The selected lands are segregated from appropriation under the public land laws including the mining laws but not the mineral leasing laws. The segregative effect of this notice of realty action on the public lands shall terminate upon issuance of patent to such lands, upon publication in the **Federal Register** of a termination of the segregation or 2 years from the date of this notice, whichever comes first.

The purpose of the exchange is to obtain river front property for use as a takeout point for river trips and development of a recreation area. Presently use of the property is being allowed for takeout purposes, however, development of facilities cannot occur until the United States acquires an interest in the land.

The selected land would be subject to the following conditions:

1. A reservation for a right-of-way thereon for ditches and canals constructed by the authority of the United States (43 U.S.C. 945).

2. A reservation of all minerals except for 60 acres described as Salt Lake Base and Meridian, T. 21 S., R. 16 E., Section 1: S½ lot 10 and lot 15, together with the right to prospect for, mine and remove the same.

This exchange is consistent with the Bureau's planning and county officials have been consulted.

Detailed information concerning the proposed exchange, including the environmental assessment is available for review at the Moab District Office, 125 West 2nd South Main, Moab, Utah 84532.

For a period of 45 days interested parties may submit comments to the Moab District Manager, P.O. Box 970, Moab, Utah 84532. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department.

Dated: June 9, 1983.

Gene Nodine,

District Manager.

BILLING CODE 4310-84-M

Canon City District Grazing Advisory Board

A meeting of the Canon City District Grazing Advisory Board will be held at 10:00 a.m., Friday, July 29, 1983, at the Chaffee County Bank, 146 G Street, Salida, Colorado, pursuant to Pub. L. 92-463.

The purpose of the meeting is to review allotment management plan implementation, initiate, conduct and settle business pertaining to expenditure of Range Betterment and Improvement Funds, discuss Cooperative Management Agreement, and to hear an update on the grazing fee study.

The meeting will be open to the public. However, facilities and space to accommodate members of the public are limited and persons will be accommodated on a first come, first serve basis. Any person may file with the Board a written statement concerning matters to be discussed.

Persons wishing further information concerning this meeting may contact Melvin D. Clausen, District Manager, Bureau of Land Management, 3080 East Main Street, Canon City, Colorado 81212, at (303) 275-0631.

Minutes of the meeting will be made available for public inspection 30 days after the meeting.

Dated: June 9, 1983.

Melvin D. Clausen,

District Manager.

BILLING CODE 4310-84-M

State of California; Realty Action, Sale of Public Lands in Riverside County, Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: State of California, Realty Action, Sale of Public Lands in Riverside County—CA-13587 through CA-13602—Correction.

SUMMARY: This document corrects the requirements for participating in the oral bidding procedures. The original requirements were published on page 23924 and 23925 in *Federal Register* of Friday, May 27, 1983. This notice restricted participating in the oral bidding to only those bidders that submitted qualified sealed bids. This correction extends the opportunity to participate in the oral bidding to individuals that had not previously submitted a sealed bid.

On page 23924 column three, second paragraph titled "Dates," the sentence which begins on line thirty with the words "only those bidders" * * * and ends on line thirty-three should be deleted to read:

Anyone wishing to participate in the oral bid must meet all of the citizenship requirements as outlined in part 4 of this notice. Individuals wishing to participate in the oral bidding must submit not less than one-fifth of the payment by cash, personal check, bank draft, money order, or any combination for not less than one-fifth of the appraised value of the land.

Dated: June 8, 1983.

Gerald E. Hillier,

District Manager.

BILLING CODE 4310-84-M

[M 55145]

Montana; Conveyance and Order Providing for Opening of Public Lands

AGENCY: Bureau of Land Management, Montana State Office, Interior.

ACTION: Notice of Conveyance and Order Providing for Opening of Public Lands in Richland and McCone Counties, Montana.

SUMMARY: Notice is hereby given that pursuant to Section 206 of the Act of October 21, 1976 (43 U.S.C. 1716 (1976)), the following described land was conveyed to Robert G. Voorhees and Marjorie R. Voorhees, husband and wife, and O. Joyce Voorhees, tenants in common:

Principal Meridian, Montana

T. 26 N., R. 50 E.,
Sec. 2, Lots 3 and 4;
Sec. 11, SW¼NW¼, N½S½;
Sec. 12, NW¼NW¼, NE¼SW¼, SW¼SE¼;
Sec. 13, NW¼NE¼, S½NW¼; and
Sec. 24, SE¼NE¼.
T. 26 N., R. 51 E.,
Sec. 18, Lot 4, SE¼SW¼;
Sec. 19, Lot 1.
T. 27 N., R. 51 E.,
Sec. 31, Lots 3 and 4, E½SW¼, SE¼.

Aggregating 993.85 acres.

In exchange for the above land, the United States acquired the following described land in McCone County, Montana:

Principal Meridian, Montana

T. 27 N., R. 50 E.,
Sec. 25, S½SW¼; and
Sec. 26, Lots 1, 2, 3, SE¼.

Containing 311.34 acres.

No minerals were transferred in the exchange. This order restores the lands acquired by the United States to the operation of the public land laws generally.

DATES: At 8 a.m. on July 22, 1983, the lands shall be open to the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All applications received at or prior to 8 a.m. on July 22, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Dated: June 8, 1983.

John A. Kwiatkowski,

Deputy State Director, Division of Lands and Renewable Resources.

BILLING CODE 4310-84-M

Albuquerque District, New Mexico District Advisory Council Meeting

The BLM Albuquerque District Advisory Council meeting scheduled for July 21, 1983 has been postponed until July 26, 1983. The meeting will be held in the conference room of the District Office, 3550 Pan American Freeway, NE., Albuquerque, beginning at 9 a.m.

Following its field trip to the Bisti coal region and the Rio Puerco water pipeline system at its April 25–27 meeting, the District Advisory Council will determine which management issues facing the District Manager it will focus on to provide timely advice. Among the issues being considered are: federal coal leasing in the San Juan Basin; maintenance options for the Rio Puerco range watering system; public lands suitable for sale under BLM's assest management program; and planning issues and planning criteria for the Rio Puero Resource Area's Resource Management Plan.

This council is managed in accordance with the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Rangeland Improvement Act of 1976.

The public is welcome to attend all portions of this meeting. Statements by the public to members of the Council may be made at 11:30 a.m., July 26, 1983.

Minutes of the meeting will be prepared and made available for review within 30 days following the meeting.

L. Paul Applegate,

District Manager.

BILLING CODE 4310-84-M

[CA 13279]

State of California: Realty Action, Sale of Public Lands in Riverside County; Correction

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Realty Action—Sale of Public Lands in Riverside County—CA 13279—Correction.

SUMMARY: This document corrects the requirements for participating in the oral biding portion of the land sale. The original requiements were published on pages 23720 and 23721 in the **Federal Register** of Thursday, May 26, 1983.

Page 23720, column three, last paragraph and page 23721, column one, paragraphs one, two, and three should be corrected to read:

DATE: The above described land will be offered for sale by sealed and oral bids. The sealed bids will be opened at 10:00 a.m. on July 26, 1983, at the California Desert District Office of the Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507. Bids may be made by a principal or a duly qualified agent, either mailed or delivered to the California Desert District Office, Bureau of Land Management, at the above address. Sealed bids shall be considered only if received prior to 10:00 a.m. on July 26, 1983, and are made for at least the appraised value of the land. Each sealed bid shall be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount of the bid. The sealed envelope must be marked in the lower left hand corner "Public Sale Bid, Serial Number CA–13279, sale held July 26, 1983". No bid will be accepted for less than the appraised value, and bids must include all of the land in the parcel. The sealed bids shall be opened and publicly declared at the beginning of the oral bidding.

Anyone wishing to participate in the oral bidding must meet all of the citizenship requiements as outlined in part 4 of this notice. Individuals wishing to participate in the oral bidding must submit not less than one-fifth of the payment by cash, personal check, bank draft, money order, or any combination for not less than one-fifth of the appraised value of the land. Oral bidding will begin at 11:00 a.m. on July 26, 1983 at the California Desert District Office. The person declared to have entered the highest qualifying oral bid shall submit payment for cash, personal check, bank draft, money order, or any combination for not less than one-fifth of the amount of the bid immediately following the close of the sale.

The successful bidder, whether such bid is a sealed or oral bid, shall submit the remainder of the full bid price prior to the expiration of 30 days from the date of the sale. Failure to submit the

full bid price prior to, but not including the 30th day following the day of the sale, shall result in cancellation of the sale of the specific parcel and the deposit forfeited and disposed of as other receipts of sale. If two or more sealed bids for the same amount are received and no oral bids are received, then the apparent high bidder shall be determined by a drawing.

For a period of 30 days following the date of the sale, Ladyvest, Inc., will have the opportunity to claim the preference rights indicated above. Refusal or failure to meet the highest bid shall constitute a waiver of such bidding provisions.

FOR FURTHER INFORMATION CONTACT: Concerning the sale, including the land report and environmental assessment report, information is available for review at the California Desert District Office at the above address. For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Federal Office Building, 2800 Cottage Way, Room E–2841, Sacramento, California 95825. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination.

Dated: June 8, 1983.

Gerald E. Hillier,
District Manager.

BILLING CODE 4310–84–M

Utah; Intensive Wilderness Inventory, Decisions Set Aside and Remanded

AGENCY: Bureau of Land Management (BLM), DOI.

ACTION: Notice.

SUMMARY: On April 18, 1983, the Interior Board of Land Appeals (IBLA) set aside and remanded to the Utah State Director for further action the decisions on wilderness inventory units as summarized below:

Unit No.	Unit name	Approx. acreage appealed	Board's decision
UT–020–037	Newfoundland Mtns.	23,286	Set aside and remanded.
UT–020–129/050–130A	Dugway Mtns.	18,000	Set aside and remanded.
UT–040–075	Horse Spring Canyon	[1] 30,060	Set aside and remanded.
UT–040–076	Carcass Canyon	12,180	Set aside and remanded.
UT–040–077	Mud Spring Canyon	18,065	Set aside and remanded.
UT–040–078	Death Ridge	60,040	Set aside and remanded.
UT–040–079	Burning Hills	61,550	Set aside and remanded.
UT–040–204B	Central Wah Wah Range	37,228	Set aside and remanded.
UT–040–230	Parunuweap Canyon	[1] 180	Affirmed as modified.
UT–040–247	Paria-Hackberry	24,726	Affirmed in part; set aside and remanded in part.
UT–040–248	Wahweap	137,880	Set aside and remanded.
UT–050–238	Mt. Ellen	30,000	Set aside and remanded in part; appeal dismissed in part.
UT–050–241	Fiddler Butte	82,500	Set aside and remanded.
UT–050–248	Mt. Pennell	60,000	Set aside and remanded.
UT–061–056A	Desolation Canyon	70,000	Affirmed in part; set aside and remanded in part.
UT–061–056B	Floy Canyon	75,100	Set aside and remanded.
UT–060–100B	Diamond Canyon	4,300	Affirmed in part; set aside and remanded in part; appeal dismissed in part.
UT–060–100C	Cottonwood Canyon	21,470	Affirmed in part; set aside and remanded in part.
UT–060–161	Mancos Mesa	51,440	Set aside and remanded.
UT–060–730	Winter Ridge	43,963	Set aside and remanded.

[1] Approximate.

Pursuant to the action by IBLA, BLM will reassess pertinent information related to making a determination if the requisite wilderness characteristics exist within the unit or portion of units on remand from IBLA. A formal public comment period on a proposed decision will be conducted before finalizing and publishing a final decision in the **Federal Register**. The units or portion of units remanded by IBLA will remain under management restrictions imposed by Section 603 of Pub. L. 94–579. Those units or portions of units affirmed or dismissed by IBLA will no longer be subject to management restrictions imposed by Section 603 of Pub. L. 94–579 and are hereby released from further wilderness review. For those units which were affirmed in part or dismissed in part refer to the above list. Those units affirmed by IBLA in total are:

Unit No.	Unit name	Aprox. acreage
UT–040–104	Mountain Home Range	19,000
UT–040–266	East of Bryce	887
UT–050–221B	Fremont Gorge	5,500
UT–060–122/CO–070–132A	Granite Creek	7,920
UT–060–171	Sweet Alice Canyon	8,880
UT–060–191	Cheese Box Canyon	12,110
UT–060–205A	Arch Canyon	7,500

Two inventory unit decisions were reversed by IBLA. Both of these units are now Wilderness Study Areas (WSAs) and will remain under management restrictions imposed by Section 603 of Pub. L. 94–579. The two units are:

Unit No.	Unit name	Approx. acreage
UT–060–139A	Mill Creek	10,320
UT–060–175	Middle Point	5,000

FOR FURTHER INFORMATION CONTACT: Kent Biddulph, Utah BLM Wilderness Coordinator (801) 524–4257.

Dated: June 8, 1983.

The above land aggregates 301.48 acres in Cochise County, Arizona and 96.00 acres in Hidalgo County, New Mexico near Rodeo, New Mexico.

A patent for the land, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. All minerals will be reserved to the United States. These mineral estates may be conveyed to the successful bidder subject to Section 209 of the Federal Land Policy and Management Act.

3. A right-of-way under Serial Numbers NM–52975 and A–18639 for a road granted under the authority of the Federal Land Policy and Management Act of 1976 (90 Stat. 2776; 43 U.S.C. 1761) on Parcel Q.

The patent will also be subject to:

1. Those rights granted by Oil and Gas Leases A–13939 and NM–34069, made under Section 29 of the Act of February 25, 1920 (41 Stat. 437) and the Act of March 4, 1933 (47 Stat. 1570). This patent is issued subject to the right of the prior permittee or lessee to use so much of the surface of said land as is required for oil and gas exploration and development operations without compensation, resulting from proper oil and gas operations, for the duration of the leases A–13939 and NM–34069, and any authorized extension of the lease. Upon termination or relinquishment of said oil and gas lease, this reservation shall terminate. This lease applies to all parcels.

2. Those rights granted by a term permit for grazing lease Number 1515, which affect that portion of Parcel Q located in New Mexico including the allowance of continued year-long grazing of 12 head (144 AUMs) until February 29, 1990 at a cost not higher than the BLM grazing fee scheduled for a given year. The date of this Notice provides the beginning of the two year notice of the cancellation of the grazing preference if the land is sold.

3. Those rights granted by a term permit for grazing lease Number 5292, which affect that portion of Parcel Q located in Arizona, and Parcels R and S including the allowance of continued grazing of 5 head (57 AUMs) until May 12, 1985 at a cost not higher than the BLM grazing fee scheduled for a given year.

4. Range improvements consisting of 3.8 miles of fence granted under Permits Number NM 3–4–429 and Arizona Number 1170, located in Parcel Q. In accordance with 43 CFR 4120.6–6, the grazing lessees will be allowed a period of 180 days from the date of cancellation of the range improvement permit to salvage the fences. The cancellation of the range improvement permits will occur at the same time as the cancellation of the grazing.

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of non-discretionary appropriation under the public land laws, including the mining laws but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year period.

Lands not sold on August 25, 1983, will be reoffered for sale by competitive bid at the Safford District Office, 425 East 4th Street, Safford, Arizona, at 1:00 p.m. on September 22, 1983. Any remaining unsold land will be available for over-the-counter purchase beginning on September 23, 1983 at 8:00 a.m.

Additional information concerning these lands, terms and conditions of the sale, and bidding instructions may be obtained from the Safford District Manager, 425 East 4th Street, Safford, Arizona 85546, or by calling (602) 428–4040.

For a period of 45 days from the date of this Notice, interested parties may submit comments regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Daniel C. B. Rathbun,

District Manager, Las Cruces District, New Mexico.

Dated: June 9, 1983.

Lester K. Rosenkrance,

District Manager, Safford District, Arizona.

Dated: June 9, 1983.

BILLING CODE 4310-84-M

Casper District, Wyoming; Availability of Coal Core Analyses

AGENCY: Bureau of Land Management, Interior.

ACTION: Public notice of availability of four coal analyses within the Thunder Basin National Grasslands, Campbell County, Wyoming.

SUMMARY: Notice is hereby given that Bureau of Land Management (BLM) core analyses of four coal test holes located in the Thunder Basin National Grasslands of Campbell County, Wyoming, are now available to the public. The analyses, completed January 1982, as a result of U.S. Geological Survey, Conservation Division efforts during 1981 in support of the Federal coal management program, provide geologic information necessary to evaluate and classify coal resources on lands in the public domain.

The test holes, located in Townships 41, 42, and 43 North, Range 70 West, Sixth Principal Meridian, Wyoming, were designed to investigate coal quality in the Fort Union Formation of Paleocene age in the Eastern Powder River Basin of northeastern Wyoming.

Location of documents: Copies are available for reproduction at the address listed below.

FOR FURTHER INFORMATION CONTACT: To obtain copies for reproduction of the coal analyses or for additional information contact: Barbara L. Harris, Geologist, Casper District—Branch of Solid Minerals, 111 S. Wolcott, Room 111, Casper, Wyoming 82601, (307) 261-5181.

Dated: June 15, 1983.

[C-4275 and C-0125386]

Colorado; Coal Lease Applications; Rio Blanco County; Public Hearing and Request for Public Comments

The Department of the Interior, Bureau of Land Management, Colorado State Office, Denver, Colorado, hereby gives notice that a public hearing will be held on July 20, 1983, at 7:30 p.m. at the Fairfield Center, Basement Conference Room, 200 Main Street, Meeker, Colorado 81641. Applications have been made to the United States that it lease non-competitively coal resources in the public lands hereinafter described:

The coal resource to be leased under Serial No. C-4275 is located in the following-described lands approximately 9 miles northeast of Meeker, Colorado:

T. 2 N., R. 92 W., 6th P.M.
Sec. 31, NE¼, E½NW¼, NE¼SW¼, N½SE¼;
Sec. 32, W½NW¼, NW¼SW¼.
The area described contains 480 acres.

The coal resource to be leased under Serial No. C-0125386 is located in the following-described lands approximately 9 miles northeast of Rangely, Colorado:

T. 3 N., R. 102 W., 6th P.M.
Sec. 22, All.
The area described contains 640 acres.

The purpose of the hearing is to obtain public comments on the Environmental Assessments and on the following items: (1) The method of mining to be employed to obtain maximum economic recovery of the coal; (2) the impact that mining the coal in the proposed leaseholds may have on the area,

including, but not limited to, impacts on the environment.

Written requests to testify orally at the July 20, 1983, public hearing should be received at the Craig District Office, Bureau of Land Management, P.O. Box 248, Craig, Colorado 81625, prior to the close of business July 19, 1983. People who indicate they wish to testify when they check in at the hearing room may have an opportunity to testify if time is available after the listed witnesses have been heard. Both oral and written comments will be received at the public hearing, but speakers will be limited to a maximum of three or five minutes each depending on the number of persons desiring to comment. The time limitation will be strictly enforced, but the complete text of prepared speeches may be filed with the presiding officer at the hearing, whether or not the speaker has been able to finish oral delivery in the allotted minutes.

Written comments may also be submitted to Craig District Office at the above address, prior to close of business on July 22, 1983. Substantive comments, whether written or oral, will receive equal consideration prior to any lease issuance.

The Environmental Assessments will be available for review in the Craig District Office and the White River Resource Area Office at Meeker, Colorado. Single copies are available for distribution upon request from the Craig District Office at the above address.

Copies of the Environmental Assessments and the case files will be available for public inspection at the Colorado State Office, Bureau of Land Management, 1037—20th Street, Denver, Colorado 80202.

BILLING CODE 4310-84-M

Land Use Analysis on BLM Administered Lands in Eastern Plains Planning Units

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Land Use Analysis on BLM Administered Lands in Eastern Plains Planning Units (05-07).

SUMMARY: This notice issued pursuant to 43 CFR Parts 1600 and 2700, invites public review and comment on preliminary issues and planning criteria to be used in completing a land use analysis on a proposal to offer for sale certain public lands, administered by BLM, located in eastern counties of Colorado.

This proposed planning action involves preparation of a land use analysis and an environmental assessment utilizing input received from the public. The analysis and environmental assessment to be completed on or about December 29, 1983, will be prepared in accordance with 40 CFR Part 1500 and will include a determination of the consistency of the proposed action with the policies and programs of local, state, and other Federal agencies. A decision statement will then be issued by the District Manager with the concurrence of the State Director allowing a 30-day protest period (43 CFR 1601.6-1).

The public lands administered by BLM being analyzed and considered in this land use analysis are:

County	Acres
Kiowa	3,810
Prowers	830
Baca	1,200
Las Animas	1,040
Bent	1,135
Otero	4,292
Crowley	2,740
Pueblo	16,515
Total	31,628

If any lands are found potentially suitable for public sale during this planning effort, these lands will be offered at fair market value with all minerals reserved to the United States.

Preliminary issues identified include: economics of continued management as part of the public lands, rights of premittees and lessees, interests of adjoining landowners, and consistency with the plans and programs of other government entities.

Planning criteria to be used in evaluating the proposal are:

1. Public lands may be offered for sale when such lands, because of location or other characteristics, are difficult and uneconomical to manage and are not suitable for management by another Federal, state, or local public entity.

2. Disposal of these lands would better serve the public than retaining and managing such lands under Federal ownership.

The interdisciplinary team performing the land use analysis/environmental assessment represents the following disciplines: realty, wildlife, geology, cultural resources, recreation, and economics.

Public participation will be obtained by a public comment period initiated by this notice. Comments received on or before July 27, 1983, will be considered. An open house will be held July 12, 7:00 p.m. at the Sangre de Cristo Arts Center in Pueblo, Colorado, to allow the public the opportunity to discuss this planning effort and potential land disposal. Preliminary Issues and Planning Criteria will be available for review.

Comments or requests for further information should be addressed to: James Sazama, Area Manager, RGRA-BLM, P.O. Box 1470, Canon City, Colorado 81212; telephone (303) 275-7578.

Copies of the land use analysis and the environmental assessment will be available for review at the Royal Gorge Resource Area Office listed above and at the Canon City District Office, 3080 East Main Street, Canon City, Colorado.

Melvin D. Clausen,

District Manager.

[FR Doc. 83-16203 Filed 6-15-83; 8:45 am]

BILLING CODE 4310-84-M

Lands and Realty Planning Amendment

Summary: This notice issued pursuant to 43 CFR Part 1600, invites public review and comment on preliminary issues and planning criteria to be used in evaluating a proposal to offer for public sale certain public lands located in the San Luis Valley of Colorado.

The proposed planning action involves preparation of a Lands and

Realty Planning amendment and an environmental assessment utilizing input received from the public. The Lands and Realty Planning amendment and environmental assessment to be completed on or about March 5, 1984, will be prepared in accordance with 40 CFR 1500 and will include a determination of the proposed action's consistency with the policies and programs of local, state, and other federal agencies. A decision statement will then be issued by the District Manager with the approval of the State Director allowing a thirty-day protest period (43 CFR 1601.6–1).

The public lands being analyzed and considered as potentially suitable for public sale are:

County	Acres of public land
Alamosa	1,062.85
Conejos	1,825.29
Hinsdale	66.58
Rio Grande	475.43
Saguache	4,283.20
Total	8,526.25

Preliminary issues identified include: economics of continued management as part of the public lands, rights of permittees and lessees, interests of adjoining landowners, and consistency with the plans and programs of other government entities.

Planning criteria to be used in evaluating the proposal are:

1. Public lands may be offered for public sale when such lands, because of location or other characteristics, are difficult and uneconomic to manage and are not suitable for management by another federal, state, or local public entity.

2. Disposal will serve important public objectives which outweigh public objectives and values which would be served by maintaining such lands in federal ownership.

The interdisciplinary team performing the Lands and Realty Planning amendment and the environmental assessment represent the following disciplines: Realty, Range, Wildlife, Geology, Cultural Resources, Recreation, and Economics.

Public participation will be obtained by a public comment period initiated by this notice. Comments received on or before August 30, 1983, will be considered.

Comments or requests for further information should be addressed to: Tom Sieverding, Area Manager, SLRA—BLM, 1921 State Street, Alamosa, Colorado 81101; phone (303) 589–4975.

Copies of the Lands and Realty Planning amendment and the environmental assessment will be available for review at the San Luis Resource Area Office listed above, and at the Canon City District Office, 3080 East Main Street, Canon City, Colorado 81212.

Melvin D. Clausen,

District Manager.

Montana; Conveyance and Order Providing for Opening of Public Lands

AGENCY: Bureau of Land Management, Montana State Office, Interior.

ACTION: Notice of Conveyance and Order Providing for Opening of Public Lands in Powell County, Montana.

SUMMARY: Notice is hereby given that pursuant to Section 206 of the Act of October 21, 1976 (43 U.S.C. 1716 (1976)), the following described land was conveyed to Burlington Northern Railroad Company:

Principal Meridian, Montana

T. 12 N., R. 17 W.,
Sec. 4, Lots 1, 2, 3, SW¼NE¼, SE¼NW¼; and
Sec. 6, All.
T. 13 N., R. 17 W.,
Sec. 18, Lots 4, 5, 6, 7, S½NE¼, SE¼NW¼, E½SW¼ and SE¼;
Sec. 20, All;
Sec. 22, Lots 3 and 4, W½ and W½SE¼;
Sec. 26, All;
Sec. 28, N½ and SE¼;
Sec. 30, All;
Sec. 31, Lots 6 and 7, N½SE¼;
Sec. 32, Lots 1, 2, 3, 4, W½NW¼ and N½SW¼; and
Sec. 34, All.
T. 12 N., R. 18 W.,
Sec. 1, Lots 5, 6, 7, 8 and 9.

Aggregating 5,478.98 acres.

In exchange for the above land, the United States acquired the following described land in Powell County, Montana:

Principal Meridian, Montana

T. 13. N., R. 12 W.,
Sec. 19, All.
T. 12 N., R. 13 W.,
Sec. 1, All; and
Sec. 3, Lots 1 and 2, S½NE¼, SE¼.
T. 13 N., R. 13 W.,
Sec. 25, All;
Sec. 27, All;
Sec. 29, All;
Sec. 33, All; and
Sec. 35, All.

Aggregating 4,810.50 acres.

This order restores the lands acquired by the United States to the operation of the public land laws generally.

DATES: At 9 a.m. on September 1, 1983, the lands shall be open to the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All applications received at or prior to 9 a.m. on Septmenber 1, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Dated: June 10, 1983.

Edgar D. Stark,

Acting Deputy State Director, Division of Lands and Renewable Resources.

BILLING CODE 4310-84-M

[OR 23969]

Oregon; Order Providing for Opening of Public Lands

1. A Notice of Airport Lease application was published in the Federal Register (45 FR 65323) dated Thursday, October 2, 1980. The following described land was segregated from all forms of appropriation pursuant to the Act of May 24, 1928 (49 U.S.C. 211–214):

Willamette Meridian

T. 2 S., R. 4 E.,
Sec. 35, SW¼NE¼ and S½NW¼.

The area described contains 120.00 acres in Clackamas County, Oregon.

2. The application was rejected except as to the following described land which has been approved for lease and remains segregated from all forms of appropriation:

Willamette Meridian

T. 2 S., R. 4 E.,
Sec. 35, Beginning at the point of intersection of the projected airport runway centerline and the east line of the SW¼NE¼ of said Sec. 35; thence north along said east line 126.36 feet to an iron pipe; thence N 74°47'30" W, 1,657.81 feet to an iron pipe; thence S 09°29'30" W, 577.24 feet to an iron pipe; thence S 86°13'30" E, 1,694.00 feet, more or less, to an iron pipe, said pipe located on said east line; thence north along said east line 126.36 feet to the point of beginning.

The area described contains approximately 15.74 acres in Clackamas County, Oregon.

3. At 9:30 a.m., on July 22, 1983, the land described in paragraph 1, except as provided in paragraph 2, will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of

applicable law. All valid applications received at or prior to 9:30 a.m., on July 22, 1983, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

4. At 9:30 a.m., on July 22, 1983, the land described in paragraph 1, except as provided in paragraph 2, will be open to location under the United States mining laws. Appropriation of land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

5. The land has been and remains open to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Dated: June 8, 1983.

Harold A. Berends,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Roseburg District Advisory Council; Meeting

Notice is hereby given that in accordance with Section 309 of the Federal Land Policy and Management Act (as amended), the Roseburg District Advisory Council will meet July 19, 1983. The meeting will convene at 9:30 a.m. in the conference room at the Rosenburg District Office, 777 N.W. Garden Valley Blvd., Roseburg, Oregon. Agenda items will include: (1) Discussion of the final environmental impact statement on the district's 10-year timber management plan; (2) an overview of the Fiscal Year 1984 timber sale plan; and (3) an update on possible land sales in the Roseburg BLM District during Fiscal Year 1984.

All Council meetings are open to the general public and news media. Interested persons or organizations may make oral statements to the Council at 11:30 a.m. or they may file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager by July 12, 1983. Depending upon the number of people wishing to speak, a per person time limit may be established by the District Manager.

Summary minutes of each Council meeting will be maintained in the Roseburg District Office and will be available for public inspection and copying during regular business hours within 30 days following the meeting.

For more information, contact Gary Majors, Public Information Officer, telephone (503) 672-4491.

Dated: June 7, 1983.

James E. Hart,

District Manager.

Salem District Advisory Council; Meeting

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act of 1976 that a meeting of the Salem District Advisory Council will be held on July 15, 1983, at 8:30 a.m. at the BLM Salem District Office, 1717 Fabry Road S.E., Salem, Oregon.

Agenda for the meeting will include:

1. Briefing on the East Salem Final Environmental Impact Statement.
2. Oral statements from the public.
3. Briefing on public comments received regarding proposed decision on the Westside Salem Timber Management Plan.
4. Discussion and development of recommendations on the proposed decision on the Westside Salem Timber Management Plan.
5. Discussion on future council meetings.

The meeting is open to the public. Any organization, associations or individual may file a statement or appear before the council regarding topics on the meeting agenda. Anyone wishing to make an oral statement must notify the Salem District Manager, P.O. Box 3227, Salem, Oregon 97302, by July 11, 1983. Summary minutes will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Dated: June 7, 1983.

Joseph C. Doso,

District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Monthly Meeting of the Advisory Committee on Minerals Accountability

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of monthly meeting.

SUMMARY: The purpose of the Advisory Committee on Minerals Accountability is to develop over a 1-year period an expanded policy of cooperation with States and Indian tribes in the royalty management area and to develop a detailed plan for carrying out Federal/State/Indian cooperation on a comprehensive basis. The purpose of the Advisory Committee meeting will be to have State representatives and any other interested parties discuss with the Committee the Federal Oil and Gas Guidelines explaining Royalty Valuation Procedures. In addition, the Audit Standards governing Sections 202 and 205 will be discussed.

The meeting will be open to the public. However, facilities and space to accommodate attendees are limited and persons will be accommodated on a first-come, first-serve basis. Any member of the public may file with the Advisory Committee a written statement concerning the matters to be discussed.

Notice of the next monthly meeting will be published 15 days before the meeting is to take place.

DATE: Wednesday, June 29, 1983, 9:00 a.m.

ADDRESS: Casper Hilton Inn, I-25 at Rancho Road, Casper, Wyoming.

FOR FURTHER INFORMATION CONTACT: John Sullivan, Department of the Interior, 18th & C Streets, N.W., Room 4216, Washington, D.C. 20240, telephone: (202) 343-3526.

SUPPLEMENTARY INFORMATION: The Advisory Committee was created by the Secretary of the Interior on November 15, 1982 (Order No. 3071).

The Committee will have one or more Executive Sessions at this meeting.

Dated: June 13, 1983.

David C. Russell,

Acting Director, Minerals Management Service.

BILLING CODE 4310-MR-M

National Park Service

San Antonio Missions Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee

Act that a meeting of the San Antonio Missions Advisory Commission will be held at 1:30 p.m., Tuesday, June 21, 1983, at the Federal Building, 727, E. Durango, Room A612, San Antonio, Texas.

The San Antonio Missions Advisory Commission was established pursuant to Pub. L. 95–629, Title II, November 10, 1978. The purpose of the commission is to advise the Secretary of the Interior or his designee on matters relating to the park and with respect to carrying out the provisions of the statute establishing the San Antonio Missions National Historical Park.

Matters to be discussed at this meeting include:

—Park Operations Update;

—Commissioners' Committee Reports;

—Gifts Catalog Slide Presentation.

The meeting will be open to the public, however, facilities and space for accommodating members of the public will be limited and persons will be accommodated on a first-come, first-serve basis.

Any member of the public may file a written statement concerning the matters to be discussed with the Superintendent, San Antonio Missions National Historical Park.

Persons wishing further information regarding this meeting or who wish to submit a written statement may contact Jose A. Cisneros, Superintendent, 727 E. Durango, Room A612, San Antonio, Texas 78206, telephone (512) 229–6000.

Minutes of the meeting will be available for public review approximately four weeks after the meeting at the office of the San Antonio Missions National Historical Park.

Dated: June 1, 1983.

Robert Kerr,

Regional Director, Southwest Region.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–134]

Treadmill Joggers; Initial Determination Terminating Respondents on the Basis of Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondents on the basis of a settlement agreement: Heinz Kettler Metallwarenfabrik GmbH & Co. & Kettler International, Inc. (Kettler).

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on June 10, 1983.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

WRITTEN COMMENTS: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436 no later than 10 days after publication of this notice in the **Federal Register.** Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

By order of the Commission.

Issued: June 13, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Volume No. OP2–FC–261]

Motor Carriers; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

The decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 2, (202) 275–7030.

MC–FC–81378. By decision of June 7, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, and the Review Board approved the transfer to American International Freight Co., Inc., of Springfield, VA, of Permit No. FF–471 Sub 1, to American International Freight Forwarding, Inc., of Arlington, VA, authorizing authority to engage in operations as a freight forwarder, in the transportation of (a) used household goods and unaccompanied baggage; and (b) used automobiles, between points in the U.S. (including HI, but excluding AK).

Representative: Martin R. Martino, 333 So. Glebe Rd., Arlington, VA 22204 (703) 979–1627.

MC-FG–81417. By decision of June 7, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, the Review Board approved the transfer the Brighton Van Lines, INC., of Troy, MI, of Certificates No. MC–5722 and Sub-No. 2, issued March 15, 1957, and January 31, 1974, respectively, to M. T. P. R. CORP., of Orlando, FL, authorizing, as a common carrier, over irregular routes, the transportation of (1) household goods, (a) between Detroit, MI, and points within five miles of Detroit, on the one hand, and, on the other, points in OH and PA, and (b) between Detroit, MI, and points within ten miles of Detroit, on the one hand, and, on the other, points in IL, NY, IN, MD, NJ, OH, PA, WI, VA, WV, CT, MA, and DC, St. Louis, MO, and points in MO within ten miles of St. Louis, and points in KY bordering on the Ohio River; and (2) household goods, and used store fixtures and office fixtures, between points in St. Clair, Sanilac, and Huron Counties, MI, on the one hand, and, on the other, the U.S-Canada boundary line through the port of entry at Port Huron, MI, and points in WI, IL, IN, OH, KY, PA, and NY. Representative: William B. Elmer, P.O. Box 801 Traverse City, MI 49685–0801, (616) 941–5313.

MC-FC–81447. By decision of June 8, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, the Review Board approved the transfer to PRIME TRANSFER, INC., of Morristown NJ, of certificate No. MC–92193, issued October 11, 1966, to Despatch Moving & Storage Co., Inc., of New York, NY, authorizing, as a common carrier, over irregular routes, the transportation of household goods, between New York, NY, and points in Westchester County , NY, on the one hand, and, on the other, points in CT, NY, NJ, PA, RI, MA, MD, DE, and DC. Representative: Arthur J. Piken, 95–25 Queens Blvd., Rego Park, NY 11374, (202) 275–100.

MC-FC–81465. By decision of June 8, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, the Review Board approved the transfer to 4H MOUNTAIN VALLEY EXPRESS, INC., Los Angeles, CA, of authority issued to Peerless Trucking Company, City of Commerce, CA, in Certificate MC–96622 (Sub-No. 6)X, issued July 27, 1981 (and the underlying authority in MC–96622 (Sub-No. 5), issued Novermber 7, 1980), authorizing the transportation of general commodities (except clasess A and B explosives), between Los Angeles, CA, on the one hand, and, on the other, points in San Diego, Orange, Riverside, San Bernardino, Ventura, Los Angeles, Kern, Santa Barbara, San Luis Obispo, Kings, Tulare, Monterey, San Benito, San Joaquin, Fresno, Madera, Stanislaus, Merced, Santa Clara, Santa Cruz, San Mateo, San Francisco, Alameda, Contra Costa, Marin, Napa, Solano, Calaveras, Amador, and Sacramento Counties, CA. Representative: Robert Fuller, 13215 E. Penn St., Suite 310, Whittier, CA, 90602.

Note.—Issuance of a certificate in this proceeding is conditioned upon coincidental cancellation of Certificate of Registration MC–96622 (Sub-No. 3), issued April 14, 1964, pursuant to applicant's request.

BILLING CODE 7035–01

[Proposed Exemptions—OP3–261]

Motor Carriers; Proposed Exemptions; Alltex Industries, Inc., et al.

AGENCY: Interstate Commerce Commission.

ACTION: Notices of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: Comments must be received within 30 days after the date of publication in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: June 10, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

MC–F–15302; Alltex Industries, Inc.—Control Exemption—Wales Transportation, Inc.

Alltex Industries, Inc. (Alltex), and in turn, Edward L. McCormick (McCormick) seek an exemption from the requirements under 49 U.S.C. 11343 of prior regulatory approval for their acquisition of control of Wales Transportation, Inc. (Wales) (MC–83835). McCormick also owns 150 shares of preferred stock in C.A. White Trucking Company (MC–60157), which owns all of the stock of Federal Transport, Inc. (MC–167537). Send comments to: (1) Motor Section, Room 2139 Interstate Commerce Commission Washington, D.C. 20423, and (2) Petitioner's representative James W. Hightowers 5801 Marvin D. Love Freeway-Suite 301 Dallas, TX 75237. Comments should refer to No. MC–F–15302.

Petitioners

MC–F–15312; E. L. Tidd Truck Lines, Inc.—Purchase Exemption—Whiteford Truck Lines, Inc.

E. L. Tidd truck lines, Inc., seeks an exemption from the requirement under section 11343 of prior regulatory approval for its purchase of a portion of the operating rights of Whiteford Truck Lines, Inc. (No. MC–133635 Sub-Nos. 63, 69 and 71). Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423, and (2) Petitioners' representative; Mr. Donald W. Smith, P.O. Box 40248, Indianapolis, IN 46240. Comments should refer to No. MC–F–15312.

[FR Doc. 83–16152 Filed 6–16–83; 8:45 am]

BILLING CODE 7035–01–M

Office of Proceedings

Motor Carriers; Permanent Authority Decisions, Restriction removals

The following restriction removal applications, are governed by 49 CFR 1165. Part 1165 was published in the Federal Register of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, The Review Board, Members Joyce, Fortier, and Krock.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3, at (202) 275–5223.

MC 124964 (Sub-75)X, filed May 25, 1983. Applicant: BOOTH TRANSPORT, INC., P.O. Box 265, Tavares, FL 32778. Representative: E. Stephen Heisley, 1919 Pennsylvania Ave., N.W., Washington, DC 20006, (202) 828–5015. Sub–No. 38F permit: (1) remove the restriction limiting the service to transportation "in vehicles equipped with mechanical refrigeration," and (2) broaden the territorial description to between points in the U.S. (except AK and HI), under continuing contract(s) with named shipper.

[FR Doc. 83–16145 Filed 6–15–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.66. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (excepts those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.— All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a-named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275–7992.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers or property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings:

With the exception of those applications involving duly noted problems (e.g., unresolved common control fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team One at (202) 275–7992.

Volume No. OP1–213

Decided: June 7, 1983.

By the Commission, Review Board Members Krock, Carleton, and Parker.

MC–52460 (Sub-344), filed May 20, 1983. Applicant: ELLEX TRANSPORTATION, INC., 1420 West 35th St., Tulsa, OK 74107. Representative: William P. Parker, 4400 N. Lincoln, Suite 10, Oklahoma City, OK 73105 (405) 424–3301. Lucero, 601 E. 18th Ave., #107, Denver, CO 80203, (303) 861–8046. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

MC 168175, filed May 18, 1983. Applicant: J. H. SCHULER CO., a corporation, d.b.a. BROADWAY TRUCKING CO., 1649 Broadway, Hanover, PA 17331, Representative: Daniel M. Frey 31 York St., Hanover, PA 17331, (717) 637–6239. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between Baltimore, MD and Hanover, PA, under continuing contract(s) with Moller Steamship Company, Inc., of New York, NY.

Volume No. OP3–256

Decided: June 7, 1983.

By the Commission, Review Board Members Fortier, Carleton, and Parker.

MC 30464 (Sub-3), filed May 23, 1983. Applicant: BESTWAY FREIGHT LINES, INC., 30 Wood Rock Rd., Weymouth, MA 02189. Representative: David M. Marshall, 101 State St., Suite 304, Springfield, MA 01103, (413) 732–1136. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in MA, CT, RT, NH, ME, and VT, and New York, NY.

MC 128544 (Sub-10), filed May 24, 1983. Applicant: IOWA STEEL EXPRESS, INC., 2519 16th Avenue SW, P.O. Box 1926, Cedar Rapids, IA 52406. Representative: Richard D. Smith (same address as applicant), (319) 363–6268. Transporting *metal products,* between points in ND, SD, WI, IN, MI, OH, KS, CO, NE, IA, IL, MO, MN, WY, OK, TX, AR, LA, MS, AL, KY, TN, GA, SC, NC and FL.

MC 135364 (Sub-57), filed May 24, 1983. Applicant: MORWALL TRUCKING, INC., R.D. #3, Box 76–C, Moscow, PA 18444. Representative: Raymond Talipski 121 S. Main St., Taylor, PA 18517, (717) 344–8030. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Inner-Harbor Warehousing and Distribution. Inc., of Baltimore, MD.

MC 138184 (Sub-6), filed May 23, 1983. Applicant: WALLACE TRUCKING COMPANY, Route 4, Box A–71, Laurinburg, NC 28352. Representative: F. Kent Burns, P.O. Box 2479, Raleigh, NC 27602, (919) 828–2421. Transporting *containers, container components and ends, and container closures,* between points in the U.S. (except AK and HI).

MC 153634 (Sub-2), filed May 23, 1983. Applicant: LITTLE MONTANA TRANSPORTATION, P.O. Box 3485, 704 E. Front Street, Bozeman, MT 59715. Representative: Rand E. Little (same address as applicant), (406) 586–4503. Transporting *furniture and fixtures,* between points in the U.S. (except AK and HI).

MC 167724, filed May 24, 1983. Applicant: TRINITY TRUCKING, LTD., R. D. #1, Randolph Center, VT 05061. Representative: James M. Burns, 1365 Main St., Suite 403, Springfield, MA 01103, (413) 781–8205. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in VT, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 168114, filed May 23, 1983. Applicant: GROSCH IRRIGATION CO., INC., Box 337, Highway 30 West, Silver Creek, NE 68663. Representative: Lavern R. Holdeman, 1610 South 70th St., Suite 200, Lincoln, NE 68506, (402) 488–0985. Transporting *such commodities* as are dealt in or used by industrial, farm, and agricultural supply business houses, between those points in the U.S. in and south of CA, NV, ID, MT, WY, SD, IA, IL, KY, TN, and NC.

MC 168235, filed May 23, 1983. Applicant: EAGLE CARTAGE, INC., 16W523 Timberlake Dr., Hinsdale, IL 60521. Representative: Irwin Rozner, 134 North Lasalle St., Chicago, IL 60602, (312) 782–6937. Transporting *animal hides and skins,* between points in IL, on the one hand, and, on the other, points in IN, MI, WI, IA, NV, MO, and MN.

MC 168254, filed May 23, 1983. Applicant: J. A. MARTIN, JR. TRUCKING, INC., Rt. 2, Box 9, Axton, VA 24054. Representative: Terrell C. Clark, P. O. Box 25, Stanleytown, VA 24168, (703) 629–2818. Transporting *furniture and fixtures,* between points in VA, on the one hand, and, on the other, points in the U.S. (except AK and HI).

BILLING CODE 7035–01–M

[Finance Docket No. 30181]

Rail Carriers; Seaboard System Railroad, Inc—Abandonment Exemption—in Jefferson and Walker Counties, AL

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts the abandonment by the Seaboard System Railroad, Inc. of 15.15 miles of railroad in Jefferson and Walker Counties, AL, subject to conditions for protection of employees.

DATES: The exemption is effective on July 18, 1983. Petitions for reconsideration must be filed by July 6, 1983; petitions for stay must be filed by June 27, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30181 to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423, and

(2) Petitioners' representative: Emried D. Cole, Jr., 500 Water Street, Jacksonville, FL 32202

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Decided: June 8, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Vice Chairman Sterrett and Commissioner Andre would not impose a deadline for consummation of the transaction.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Proposed Consent Decree Under the Toxic Substances Control Act To Require Defendants To Remove PCB-Contaminated Oil, Sludge, Water and Soil From the Technical Services Company, Inc. Facility, Atkinson, Henry County, Illinois

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States* v. *Aluminum Company of America and Technical Services Company, Inc.*, Civil No. 83–1137, was lodged with the United States District Court for the Central District of Illinois, Peoria Division on June 1, 1983.

The complaint filed with the consent decree alleges that Aluminum Company of America (Alcoa) and Technical Services Company (Tech Services) transported PCB-contaminated waste oil to Tech Services' Atkinson, Illinois facility in violation of Section 6(e)(2) of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2605(e)(2) and 40 CFR 761.30. The waste oil was disposed of into a surface lagoon at the Atkinson facility in violation of Section 15 of TSCA, 15 U.S.C. 2614. The consent decree requires Aloca to remove and lawfully dispose of the waste oil, as well as water and PCB-contaminated soil from the lagoon.

The proposed consent decree may be examined at the Office of the United States Attorney, Room 271, 100 NE. Monroe Street, Peoria, Illinois; at the Region V office of the United States Enviromental Protection Agency, 230 South Dearborn Street, Chicago, Illinois; and at the Office of the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1521, Tenth and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. Please forward a check in the amount of $1.20 ($.10 per page) for each copy requested.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of thirty days from the date of this notice. Comments should be directed to the Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Tenth and Pennsylvania Avenue, NW., Washington, D.C. 20530 and should refer to the *United States of America* v. *The Aluminum Company of America and Technical Services Company, Inc.*, D.J. Ref. 90–5–1–1–1570.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

NUCLEAR REGULATORY COMMISSION

Ad Hoc Committee for Review of Nuclear Reactor Licensing Reform Proposals; Meeting

Notice is hereby given in accordance with Section 10 of the Federal Advisory Committee Act that NRC's Ad Hoc Committee for Review of Nuclear Reactor Licensing Reform Proposals will hold its next meeting at 10:00 a.m., July 6, 1983. This meeting will take place at the office of Shaw, Pittman, Potts and Trowbridge, South Building, 9th Floor Lobby, 1800 M Street, NW., Washington, D.C. and will be open for public observation.

At this meeting, the committee will continue its review of administrative proposals for reforming the NRC's licensing process for nuclear plants. A transcript of the meeting will be made available for public inspection and copying at NRC's Public Document Room, 1717 H Street, NW., Washington, D.C.

Further information on the meeting may be obtained from Mr. Rothschild, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Telephone: 202/634–1465).

Dated at Washington, D.C. this 10th day of June, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 83–16228 Filed 6–15–83; 8:45 am]

BILLING CODE 7590–01–M

Availability; Draft Technical Position

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The Nuclear Regulatory Commission (NRC) has completed a draft technical position on the "Solubility and Speciation of Radionuclide Compounds for High Level Waste Repository Safety Assessments."

A public comment period has been scheduled for 60 days following publication of this Notice of Availability.

ADDRESS: Copies of this draft document may be obtained free of charge upon written request to Nancy Still, Docket Control Center, Division of Waste

Management, U.S. Nuclear Regulatory Commission, Mail Stop 623–SS, Washington, D.C. 20555, (301) 427–4087.

FOR FURTHER INFORMATION CONTACT: Julia A. Corrado, Project Manager, High Level Waste Technical Development Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone No. (301) 427–4543.

SUPPLEMENTARY INFORMATION: This technical position is one in a series of technical positions prepared by the NRC staff establishing what must be achieved by DOE in investigation programs at potential repository sites. (Subsequent technical positions also will be noticed in the **Federal Register**). The purpose of this technical position is to provide guidance on methods for obtaining acceptable data on radionuclide solubility. The NRC staff considers that determining the solubility of radionuclides which are contained in waste disposed of in a high level waste repository will be essential to predicting long term repository performance.

The principal mechanism for providing guidance to the DOE is completion by the NRC staff of Site Characterization Analyses which document critical reviews on DOE Site Characterization Plans submitted according to the Nuclear Waste Policy Act of 1982 (H.R. 3809–2). The NRC staff already has dealt with major issues of isolation in a comprehensive fashion in NUREG–0960, the Draft Site Characterization Analysis of the Site Characterization Report for the Basalt Waste Isolation Project. In NUREG–0960, the NRC staff addresses the full gamut of issues that will present themselves in evaluating performance of the repository system, including both natural and engineered barriers.

On selected key issues important to repository performance, the staff will be addressing generic concerns in technical positions which are developed through a process that allows for public comment. The intent of the staff is to assure that guidance is provided to DOE at an early time and thus assure that the DOE gathers needed data in site characterization programs.

Dated at Silver Spring, Maryland, this 25th day of May 1983.

For the Nuclear Regulatory Commission.

Hubert J. Miller,

Chief, High-Level Waste Technical Development Branch, Division of Waste Management.

[FR Doc. 83–16227 Filed 6–15–83; 8:45 am]

BILLING CODE 7590–01–M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft, temporarily identified by its task number, MS 203–4 (which should be mentioned in all correspondence concerning this draft guide), is proposed Revision 1 to Regulatory Guide 1.82, "Sumps for Emergency Core Cooling and Containment Spray Systems." It is one of the documents developed to serve as the staff's resolution of Unresolved Safety Issue A–43, "Containment Emergency Sump Performance," when they are issued in final form. The other documents are NUGED–0897, "Containment Emergency Sumps Performance," proposed Revision 4 to Standard Review Plan Section 6.2.2, "Containment Heat Removal Systems," and NUREG–0869, "USI A–43 Resolution Positions." The issuance of these documents for public comment was announced in the **Federal Register** on May 9, 1983 (48 FR 20829).

This draft guide is being issued to involve the public in the early stages of the development of a regulatory position in this area. It has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the proposed revision, including its implementation schedule. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by July 11, 1983.

Although a time limit is given for comments on these draft guides, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 8th day of June 1983.

For the Nuclear Regulatory Commission.

Guy A. Arlotto,

Director, Division of Engineering Technology, Office of Nuclear Regulatory Research.

[FR Doc. 83–16224 Filed 6–15–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50-317]

Baltimore Gas and Electric Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–53 issued to Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit No. 1 located in Calvert County, Maryland.

The amendment would revise the Limiting Conditions for Operation and Surveillance Requirements for containment tendons as contained in the Appendix A Technical Specifications for Calvert Cliffs Unit No. 1 in accordance with the licensee's application dated March 7, 1983. The proposed changes in the Technical Specification include a provision to allow normalization of tendon lift-off forces in determining continued containment tendon integrity. In addition, a 90 day period would now be permitted to investigate evidence of possible adnormal degradation of the tendon system.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By July 18, 1983 the licensee or a petitioner may file a request for a hearing with respect to issuance of the amendment to the subject facility

operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chariman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effects of any order which may be entered in the proceding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

No later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington. D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be givern Datagram Identification Number 3737 and the following message addressed to Robert A. Clark: (petitioner's name and telephone number), (date petition was mailed); (plant name), and (publication date and page number of this Federal Register notice). A copy of the petition should also be sent to the Executive Legal Director. U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to James A. Biddison, Jr., General Counsel, G and E Building, Charles Center, Baltimore, Maryland 21203, attorney for the licensee.

Nontimely fillings of petitions for leave to intervene, amemded petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request. That determinatin will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and § 2.714(d).

For further details with respect to this action, see the application for amendment dated March 7, 1983, which is available for public inspection at the Commission's Public Document Room 1717 H Street, N.W. Washington, AD.C., and at the Calvert County Library, Prince Frederick, Maryland.

Dated at Bethesda, Maryland this 7th day of June, 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50-369 and 50-370]

Duke Power Co., Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License No. NPF–9 and Facility Operating License No. NPF–17, issued to Duke Power Company (the licensee), for operation of the McGuire Nuclear Station, Units 1 and 2, located in Mecklenburg County, North Carolina.

The amendments would revise the setpoint and its tolerance for the Upper Head Injection (UHI) accumulator automatic isolation, in accordance with the licensee's application for amendments dated April 18, 1983.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendments request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facilities in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3)

involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of these Standards by providing certain examples (48 FR 14870). One of these examples of actions likely to involve no significant hazards consideration relates to an amendment which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan. The Commission proposes to determine that the amendment does not involve a significant hazards consideration since the change does not adversely affect the most limiting large break LOCA event for the McGuire facility and will not cause the limits of 10 CFR 50.46 (Acceptance Criteria For Emergency Core Cooling Systems for Light Water Nuclear Power Plants) to be exceeded.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a finally determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By July 18, 1983, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commssion will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazard consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Elinor G. Adensam: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this FEDERAL REGISTER notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 2055, and to Mr. Albert Carr, Duke Power Company, P.O. Box 33189,442 South Church Street, Charlotte, North Carolina 28242, attorney for the license.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors

specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d)

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Atkins Library, University of North Carolina, Charlottee (UNCC Station), North Carolina 28242.

Dated at Bethesda, Maryland, this 9th day of June, 1983.

For the Nuclear Regulatory Commission.

Kahtan N. Jabbour,

Acting Chief, Licensing Branch No. 4, Division of Licensing.

[FR Doc. 83-16219 Filed 6-15-83; 8:45 am]

BILLING CODE 7590-01-M

Florida Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed no Significant Hazards Consideration Determination and Opportunity for Hearing

[Docket No. 50-335]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-67, issued to Florida Power and Light Company (the licensee), for operation of the St. Lucie Plant, Unit No. 1 located in St. Lucie County, Florida.

The amendment would permit operation after approval of changes to the Radiological Effluent Technical Specifications that bring them into compliance with Appendix I of 10 CFR Part 50. The amendment specifically deals with such changes as indicating shared instrumentation with St. Lucie Plant, Unit No. 2. It provides new Technical Specification sections defining limiting conditions for operation and surveillance requirements for radioactive liquid and gaseous effluent monitoring; concentration, dose and treatment of liquid, gaseous and solid wastes; total dose; radiological environmental monitoring that consists of a monitoring program, land use census, and interlaboratory comparison program. This change also incorporates into the Technical Specifications the bases that support the operation and surveillance requirements. In addtion, some changes were made in administrative controls, specifically dealing with the process control program and the offsite dose calculation manual. The amendment makes the United 1 Technical Specifications as similar as possible to those already approved by the Commission for St. Lucie Plant, Unit No. 2. The amendment is in accordance with the licensee's application for amendment dated March 29, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibity of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in margin of safety.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). One of the examples (ii) of actions not likely to involve a significant hazards considerations relates to changes that constitute additional restrictions or controls not presently included in the technical specifications.

The Commission, in a revision to Appedix I, 10 CFR Part 50 required licensees to improve and modify their radiological effluent systems in a manner that would keep releases of radioactive material to unrestricted areas during normal operation as low as is reasonably achievable. In complying with this requirement it became necessary to add additional restrictions and controls to the Technical Specifications to assure compliance. This caused the addition of Technical Specifications described above. In addition, since St. Lucie Plant, Unit 1, an existing operating reactor, and Unit 2, a newly licensed reactor, are colocated, it is desirable to have their Technical Specifications as nearly alike as possible for ease of application and interpretation. The staff proposes to determine that the application does not involve a singnificant hazards consideration since the change costitutes additional restrictions and controls that are not currently included in the Technical Specifications in order to meet the Commission mandated release of "as low as is reasonably achievable", and to make the technical specifications, as nearly as practicable, like those previously approved for St. Lucie Plant, Unit No. 2.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By July 18, 1983, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the

Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final detemination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Clark: petitoner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Harold R. Reis, Esquire, Lowestein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, N.W., Washington, D.C. 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450.

Dated at Bethesda, Maryland, this 10th day of June, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83–16220 Filed 6–15–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–335]

Florida Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–67, issued to Florida Power and Light Company (the licensee), for operation of the St. Lucie Plant, unit No. 1 located in St. Lucie County, Florida.

The amendment would permit operation after approval of changes to the Technical Specifications resulting from the installation of the overpressure mitigation system at St. Lucie Plant, Unit No. 1. The changes will incorporate limits and surveillance requirements associated with the overpressure mitigation system by the addition of new specifications that define the low temperature reactor coolant system overpressure protection range, incorporates a limit on the maximum primary-to-secondary differential temperature that is permitted prior to starting a reactor coolant pump and incorporates new requirements on the operability of power operated relief valves. The amendment also adds a note to limit the establishment of a high pressure safety injection pump flow path under certain conditions and revises requirements on the positioning of certain safety injection valves. These changes are in accordance with the licensee's application for amendment dated April 13, 1978.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). One of the

examples of actions involving no significant hazards considerations (ii) relates to changes that constitute additional restrictions or controls not presently included in the Technical Specifications. These changes are the direct result of compliance with requirements that resulted from Commission directed evaluations dealing with pressure transients at relatively low temperatures to obtain added assurance that the plant can be operated without violating operating curve limitations. As such, the changes enhance the ability of the licensee to monitor and control plant conditions under these operating circumstances. The staff proposes to determine that the application does not involve a significant hazard since the new specifications limits on the high pressure safety injection pump flow path under certain conditions, and the revision of the requirements on positioning of certain safety valves will provide the added assurance that the licensee will be able to operate St. Lucie Plant, Unit No. 1 without violating operating curve limitations.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S, Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By July 18, 1983, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Clark: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Harold R. Reis, Esquire, Lowestein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, N.W., Washinton, D. C. 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer of the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a

substantial showing of good cause for the granting of a late petition and/or request. That determiantion will be based upon a balancing to the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Indian River Junior College Library, 3209 Virginia Avenue, Forth Pierce, Florida 33450.

Dated at Bethesda, Maryland, this 10th day of June, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3 Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-344]

Portland General Electric Co., et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–1 issued to Portland General Electric Company, Pacific Power and Light Company, and the City of Eugene, Oregon (the licensee) for operation of the Trojan Nuclear Plant located in Columbia County, Oregon.

The amendment would revise the method for conducting the flow balance test for the four emergency core cooling injection lines from the centrifugal charging pumps and safety injection pumps. At present, each cold-leg injection line from these pumps must have a designated minimum and maximum flow. Under the licensee's proposal, the *sum* of the injection line flow rates, excluding the highest flow rate, must have a designated minimum value, and the total flow must be less than a specified maximum (pump runout limit).

The amendment would also revise the minimum injection flow from a single charging pump from 345 gpm (for 3 injection lines) to 339 gpm, consistent with a revised analysis, and delete the flow balancing requirement for the hot-leg injection lines for the safety injection system. These revisions to the technical specifications would be made in response to the licensee's application for amendment dated June 3, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The revised method for flow balancing represents an improvement in the surveillance method. It ensures that minimum injection line flow is maintained while at the same time allowing for differences in total flow between individual pumps.

The minimum injection flow change from 345 gpm to 339 gpm is not a significant change. It results in a calculated peak clad temperature for a loss-of-coolant accident of less than 1°F. Thus, the peak clad temperature, under the change, would be 1971°F, well below the acceptance criterion of 2200°F.

Deleting the flow balancing test for hot leg injection is not a significant change since flow balance is not required to satisfy the current safety analysis. Hot leg injection is used during the recirculation phase of a loss-of-coolant accident. Under this condition, the core is covered with water and all hot-leg injection water flows to the top of the core. Therefore, a specific flow balance between injection lines is not important. Therefore, based on these considerations and the three criteria given above, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission has determined that failure to act in a timely way would result in extending the shutdown of the facility. Therefore, the Commission has insufficient time to issue its usual 30-day notice of the proposed action for public comment.

If the proposed determination becomes final, an opportunity for a hearing will be published in the **Federal Register** at a later date and any hearing request will not delay the effective date of the amendment.

If the Commission decides in its final determination that the amendment does involve a significant hazards consideration, a notice of opportunity for a prior hearing will be published in the **Federal Register** and, if a hearing is granted, it will be held before any amendment is issued.

The Commission is seeking public comments on this proposed determination of no significant hazards consideration. Comments on the proposed determination may be telephoned to Robert A. Clark, Chief of Operating Reactors Branch No. 3, by collect call to 301–492–4559 or submitted in writing ot the Secretary to the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attn: Docketing and Service Branch. All comments received by July 6, 1983 will be considered in reaching a final determination. A copy of the application may be examined at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Multnomah County Library, 801 S.W. 10th Avenue, Portland, Oregon.

Dated at Bethesda, Maryland, this 10th day of June, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-508 and ASLBP No. 83-486-01-OL]

Washington Public Power Supply System, et al. (WPPSS, Nuclear Project No. 3); Order

June 10, 1983.

Rescheduling Special Prehearing Conference

It appearing, that a special prehearing conference was to be held in the captioned proceeding at 9:30 a.m. local time, on August 3 and 4, 1983, in the Commissioners' Conference Room, New County Courthouse, 100 West Broadway, Montesano, Washington; and

It further appearing, that on June 1, 1983, Washington Public Power Supply System, Nuclear Regulatory Commission Staff and Coalition for Safe Power have requested the rescheduling of the special prehearing conference to August 17 and 18, 1983 because of scheduling conflicts that have arisen.

It is hereby ordered, that the special prehearing conference scheduled for August 3 and 4, 1983 be rescheduled to August 17 and 18, 1983, at the same time of day and place as originally set.

Dated at Bethesda, Maryland this 10th day of June 1983.

For the Atomic Safety and Licensing Board.

Morton B. Margulies,

Chairman, Administrative Law Judge.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards Subcommittee on Human Factors; Meeting

The ACRS Subcommittee on Human Factors will hold a meeting on June 30, 1983, Room 1046, 1717 H Street, NW, Washington, DC.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows: *Thursday, June 30, 1983—8:30 a.m. until the conclusion of business.* The Subcommittee will meet to review draft versions of proposed rules and regulatory guides related to Pub. L. 97-425 Section 306, "Nuclear Regulatory Commission Training Authorization".

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information about topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, David Fischer (telephone 202/634-1414) between 8:15 a.m. and 5:00 p.m., EDT.

Dated June 13, 1983.

Samuel J. Chilk,

Acting Advisory Committee Management Officer.

BILLING CODE 7590-01-M

NATIONAL TRANSPORTATION SAFETY BOARD

Hazardous Materials Safety at Railroad Yards; Public Hearing

AGENCY: National Transportation Safety Board.

ACTION: Notice of public hearing.

SUMMARY: The Independent Safety Board Act of 1974 (49 U.S.C. 1901, et seq.) authorized the National Transportation Safety Board (Board) to conduct open public inquiries into matters pertinent to transportation safety. The Board, as part of a project to evaluate the need for improved hazardous materials safety and emergency preparedness for railroad yards, will hold a public hearing to inquire into hazardous materials safety at railroad yards. This document sets forth areas of interest the Board would like to have addressed in written and oral submissions.

DATES: The Public hearing will be held July 26 and 27, 1983, at 9:00 a.m.; written statements should be submitted on or about July 11, 1983.

ADDRESS: Hearing Location: Crystal City Marriott Hotel, 1999 Jefferson Davis Highway, Arlington, Virginia 22202.

Forward written statements to Chief, Hazardous Materials and Pipeline Division (AI-70), Bureau of Accident Investigation, National Transportation Safety Board, Washington, D.C. 20594.

FOR FURTHER INFORMATION CONTACT: Mr. Charles H. Batten, Chief, Hazardous Materials and Pipeline Accident Division (AI-70), Washington, D.C. 20594 (phone: 202-382-0870), or Mr. Bill Gossard, Program Analyst, Office of Safety Studies and Analysis (SP-10), Washington, D.C. 20594 (phone: 202-382-6566).

SUPPLEMENTARY INFORMATION: Under Section 304(a)(7) of the Transportation Safety Act (the Act) of 1974 (Pub. L. 93-633), the Congress specifically authorized the National Transportation Safety Board to ". . . evaluate, assess the effectiveness, and publish the findings of the Board with respect to the transportation safety consciousness and efficacy in preventing accidents of other Government agencies." The Board will hold a public hearing to gather information on specific problems and the need for improved hazardous materials safety and emergency preparedness for railroad yards, including but not limited to such issue areas as coordination among the various organizations involved in, or directly affected by hazardous materials emergencies in railroad yards; training and emergency preparedness; oversight of hazardous materials safety for railroad yards; and related tank car safety ad hazardous materials classification improvements.

The hearing will be held in the Crystal City Marriott hotel, 1999 Jefferson Davis Highway, Arlington, Virginia 22202 on July 26 and 27, 1983, commencing at 9:00 a.m., on each date. The format will involve oral/and written presentations by invited participants. interested persons are invited to submit written comments.

Four copies of the statement must be filed with the Chief, Hazardous Materials and Pipeline Division (AI-70), Bureau of Accident Investigation by July 11, 1983, copies of all written submissions will be available for public inspection and copying upon request in

accordance with the Safety Board's rule regarding availability of information.

Jim Burnett,

Chairman.

SECURITIES AND EXCHANGE COMMISSION

[File No. 2-83148]

Diversified Tech, Inc.; Order of Suspension of Trading

June 10, 1983.

In the Matter of Trading in the Securities of; Diversified Tech, Inc.; File No. 2-83148; Securities Exchange Act of 1934 Section 12(k).

It appearing to the Securities and Exchange Commission that because there is an apparent lack of adequate and accurate information concerning the company's business and finances, the protection of investors requires a summary suspension of trading in the securities of Diversified Tech, Inc.

Further, while the company has requested this ten day suspension of trading of its securities in order to enable the company to disseminate a release to its stockholders and others, the Commission has not passed upon the accuracy or adequacy of such release.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities is suspended for the period from 5:00 p.m. E.D.T. on June 10, 1983, through midnight June 19, 1983.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 10/10-0166]

Seafirst Capital Corp.; Filing of Application for Transfer of Ownership and Control

Notice is hereby given that an application has been filed with the Small Business Administration (SBA), pursuant to § 107.701 of the Regulations governing small business investment companies (13 CFR 107.701 (1983)) for transfer of ownership and control of Seafirst Capital Corporation, Fourth and Blanchard Building, Seattle, Washington, 19121, a Federal licensee under the Small Business Investment Act of 1958, as amended (Act), of 1958, as amended (Act), (15 U.S.C. 661, *et. seq.*). The proposed transfer of ownership and control of Seafirst Capital Corporation, which was licensed on June 18, 1980, is subject to prior written approval of SBA.

Seafirst Capital Corporation is a wholly-owned subsidiary of Seafirst Mortgage Corporation. Seafirst Mortgage Corporation is a wholly-owned subsidiary of a Seattle-First National Bank, which is a wholly-owned subsidiary of Seafirst Corporation, a bank holding company. The Board of Directors of Seafirst Corporation has recommended to the company's shareholders that Seafirst Corporation be merged with a subsidiary of Bank America Corporation, a bank holding company, 555 California Street, San Francisco, California 94109. While no direct change in the ownership of Seafirst Capital Corporation will occur, a change in control will occur because Bank America Corporation will have full control of Seafirst Corporation. No substantial changes in location, management, or the operations of Seafirst Capital Corporation are planned at this time by Bank America Corporation. No single stockholder of Bank America Corporation owns more than ten percent of its common stock.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed new owners and management, and the probability of the proposed new owners and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is given that any person may, no later than ten (10) days from the date of publication of this Notice, submit written comments on the proposed transfer of ownership and control to the Associate Administrator for Finance & Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Seattle, Washington, and San Francisco, California.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: June 10, 1983.

Edwin T. Holloway,

Associate Administrator for Finance and Investment.

Region IX—Advisory Council Meeting; Public Meeting

The Small Business Administration Region IX Advisory Council, located in the geographical area of Phoenix, Arizona, will hold a public meeting at 10:30 A.M., Thursday, July 7, 1983, at the Doubletree Inn, 3rd Avenue and Osborn, Phoenix, Arizona, to discuss such matters as may be presented by members, staff of the U.S. Small Business Administration, or others present.

For further information, write or call Walter Fronstin, District Director, U.S. Small Business Administration, 3030 North Central Avenue, Suite 1201, Phoenix, Arizona 85012, (602) 241-2206.

Jean M. Nowak,

Director, Office of Advisory Councils.

June 10, 1983.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Orange County, California

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in Orange County, California.

FOR FURTHER INFORMATION CONTACT: Albert J. Gallardo, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California 95809, Telephone: (916) 440-2804.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation (Caltrans) will prepare an Environmental Impact Statement (EIS) on a proposal to upgrade a section of conventional highway (State Route 133) from the San Diego Freeway (State Route 405) to Canyon Acres Drive in the City of Laguna Beach. The proposed upgrading is required in order to relieve congestion and to improve both the safety and the operational characteristics of the route. Alternatives considered for the project are:

A. *Transportation System Management.* This alternative may include improvements such as passing lanes.

B. *Highway Capacity Improvements.* This alternative may include: Widen the

highway. Realign the highway. Construct freeway.

C. *Transit.* This may include construction of transit lanes.

D. *No Project.* This alternative includes maintenance and operation of the existing facility essentially "as is", with such minor safety improvements as may be warranted from time to time.

Scoping meetings are tentatively scheduled for late June, 1983. Once dates are established, appropriate notification will be given so to encourage affected parties to identify crucial issues and insure that matters of importance are not overlooked in the early stages of review.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on: June 9, 1983.

Albert J. Gallardo,

District Engineer, Sacramento, California.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

Rulemaking, Research and Enforcement Programs; Public Meetings

The National Highway Traffic Safety Administration (NHTSA) will hold a meeting on July 21, 1983, to answer questions from the public and industry regarding the Agency's rulemaking, research and enforcement programs. The meeting will begin at 10:30 a.m., run until 1:00 p.m., and reconvene at 2:00 p.m. if necessary. It will be held in the Conference Room of the Environmental Protection Agency's Laboratory Facility, 2565 Plymouth Road, Ann Arbor, Michigan.

At the July meeting, representatives of DOT will answer questions received from the industry and the public relating to NHTSA's rulemaking, research and enforcement programs (including defects). The purpose of this is to focus on those phases of these NHTSA activities which are technical, interpretative or procedural in nature. (Questions regarding the Agency's fuel economy program will continue to be addressed at the EPA's meetings on vehicle emissions).

Questions for the July meeting should be submitted in writing by June 30 to Kennerly H. Digges, Acting Associate Administrator for Rulemaking, Room 5401, 400 Seventh Street, S.W., Washington, D.C. 20590. If sufficient time is available, questions received after the June 30 date may be answered at the meeting. The individual group, or company submitting a question does not have to be present for the question to be answered.

A consolidated list of the questions submitted by June 30 and the issues to be discussed will be mailed to interested persons on or before July 18, 1983, and will be available at the meeting. This list will serve as the agenda.

A transcript of the meeting will be available for public inspection in the NHTSA Technical Reference Section in Washington D.C., within four weeks after the meeting. Copies of the transcript will then be available at twenty-five cents for the first page and five cents for each additional page (length has varied from 100 to 150 pages) upon request to NHTSA, Technical Reference Section, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590.

Issued in Washington, D.C. on June 13, 1983.

Kennerly H. Digges,

Acting Associate Administrator for Rulemaking.

[FR Doc. 83-16306 Filed 6-15-83; 8:45 am]

B. Automobile Fuel Efficiency Act of 1980—Procedures for Petitions
C. Low Volume Manufcaturers
D. Automotive Fuel Economy Reporting Requirements
E. MY 1986-87 Light Truck Standards
Section IV: Legislative Recommendations
Section V: Use of Advanced Technology

Section I: Introduction

This Seventh Annual Report to the Congress (1983) summarizes the activities of the National Highway Traffic Safety Administration (NHTSA) during Fiscal Year (FY) 1982 regarding the implementation of applicable sections of Title V: "Improving Automobile Fuel Efficiency," of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901 *et seq.*), as amended (the Act). Section 502(a)(2) of the Act requires submission of a report by January 15th of each year. Included in this report are sections summarizing:

(1) Rulemaking activities during Fiscal Year 1982; (2) Recommendations submitted to Congress concerning proposed amendments to the Act; and (3) A discussion of the use of advanced automotive technology by the industry as required by Section 305, Title III of the Department of Energy Act of 1978 (Pub. L. 95-238).

Title V of the Act requires the Secretary of Transportation to administer a program for regulating the fuel economy of new passenger cars and light trucks in the United States' (U.S.) market. On June 22, 1976, the authority to administer the program was delegated by the Secretary to the Administrator of NHTSA (41 **Federal Register** (FR) 25015).

The National Highway Traffic Safety Administration's responsibilities in the fuel economy area include: (1) Establishing average fuel economy standards for manufacturers of passenger automobiles and light trucks as necessary; (2) promulating regulations concerning procedures, definition, and reports necessary to support the fuel economy standards; (3) considering petitions for exemption from established fuel economy standards by low volume manufacturers (those producing less than 10,000 passengers cars annually worldwide) and establishing alternative standards for them; (4) preparing reports to Congress annually on the progress of the fuel economy program; (5) enforcing the fuel economy standards and regulations; and (6) responding to petitions concerning domestic production by foreign manufacturers and other matters.

To date, passenger car fuel economy standards have been established by the

Congress for model years (MY's) 1978 through 1980 and for 1985 and thereafter and by the Department of Transportation for the 1981 through 1984 model years. Standards for light trucks have been established by the Department of Transportation for MY's 1979 through 1985. The standards are listed in Table I–1.

TABLE I–1.—FUEL ECONOMY STANDARDS FOR PASSENGER CARS AND LIGHT TRUCKS FOR THE 1978 THROUGH 1985 MODEL YEARS (IN MPG)

Model year	Passenger cars	Light trucks [1]		
		Two-wheel drive	4-wheel drive	Composite [2]
1978	[3] 18.0	(*)	(*)	(*)
1979 [4]	[3] 19.0	17.2	15.8	17.2
1980 [5]	[3] 20.0	16.0	14.0	
1981 [6]	22.0	16.7	15.0	
1982	24.0	18.0	16.0	17.5
1983	26.0	19.5	17.5	19.0
1984	27.0	20.3	18.5	20.0
1985	[3] [6] 27.5	21.8	19.5	21.0

[1] Standards for 1979 model year light trucks were established for vehicles with a gross vehicle weight rating (GVWR) of 6,000 lbs. or less. Standards for MY's 1980 through 1985 are for light trucks with a GVWR of up to 8,500 lbs.
[2] For model years 1982–1985 manufacturers may comply with the two-wheel and four-wheel drive standards or may combine their two-wheel and four-wheel drive light trucks and comply with the combined standard.
[3] Established by Congress in the Energy Policy and Conservation Act of 1975.
[4] For MY 1979, light truck manufacturers may comply separately with standards for four-wheel drive, general utility vehicles and all other light trucks, or combine their trucks into a single fleet and comply with the 17.2 mpg standard.
[5] Light trucks manufactured by a manufacturer whose fleet is powered exclusively by basic engines which are not also used in passenger automobiles, must meet standards of 14 mpg and 14.5 mpg in model years 1980 and 1981, respectively.
[6] For MY 1985 and thereafter.
[7] TBD/ established.

Section II: Fuel Economy Improvement by Manufacturers

During MY 1982, domestic passenger automobile and light truck manufacturers continued to increase the average fuel economy of their fleets. The fuel economy achievements of both domestic and foreign manufacturers in MY 1981 have been updated since their publication in the *Sixth Annual Report to the Congress*, and together with current data for MY 1982, are listed in Tables II–1 and II–2. The total fleet average fuel economy exceeded the passenger car standard by more than 3 mpg in MY 1981 nd by more than 2 mpg in MY 1982. Similarly, total fleet average fuel economy values of light trucks have exceeded standards in MY's 1981 and 1982. By 1995 the projected cumulative fuel savings if all new cars and light trucks were to just meet the Federal fuel economy requirements through 1985 would amount to approximately 400 billion gallons, compared to consumption projected at 1976 vehicle fuel economy levels.

TABLE II–1.—PASSENGER CAR FUEL ECONOMY PERFORMANCE BY MANUFACTURER AND MODEL YEAR [1]

Manufacturer	Model Year—CAFE [2] (MPG)	
	1981	1982
Domestic:		
AM	22.5	24.0
Chrysler	26.4	27.0
Ford	23.3	24.5
GM	23.2	24.3
Sales weighted average	23.5	24.6
Imported:		
Alfa Romeo	22.5	24.2
BMW	26.6	28.4
Chrysler	32.0	34.2
Datsun	30.5	30.8
Fiat	27.5	28.6
Ford	34.3	34.6
Honda	30.8	33.4
Isuzu	34.7	35.0
Jaguar Rover Triumph (JRT) [3]	18.4	18.6
Mazda	31.1	29.6

TABLE II–1.—PASSENGER CAR FUEL ECONOMY PERFORMANCE BY MANUFACTURER AND MODEL YEAR [1]—Continued

Manufacturer	Model Year—CAFE [2] (MPG)	
	1981	1982
Mercedes-Benz	25.1	26.1
Peugeot	27.9	27.1
Renault	29.4	32.2
Saab	23.4	24.1
Subaru	30.4	32.3
Toyota	30.9	30.4
Volvo	22.3	25.0
VW [4]	33.5	32.4
Sales weighted average	30.4	30.7
Total fleet average	25.1	26.2
Fuel economy standards	22.0	24.0

[1] Manufacturers of less than 10,000 passenger cars annually are not listed.
[2] Corporate Average Fuel Economy.
[3] JRT earned sufficient credits in MY's 1978 and 1979 to offset MY's 1981 and 1982 penalties.
[4] Includes VW domestic production as well as Audi and Porsche.

TABLE II–2.—LIGHT TRUCK FUEL ECONOMY PERFORMANCE BY MANUFACTURER AND MODEL YEAR

Manufacturer	Model year CAFE (MPG)				
	Two-wheel drive		Four-wheel drive		Combined [1]
	1981	1982	1981	1982	1982

[1] In MY 1982, manufacturers could comply with the two-wheel and four-wheel drive standards or could combine their two-wheel and four-wheel drive light trucks and comply with the combined standard.

Section III: Rulemaking Activities

A. MY 1982 Light Truck Standards

On March 31, 1980, separate standards were established for manufacturers of MY 1982 two-wheel drive (18.0 mpg) and four-wheel drive (16.0 mpg) light trucks. When standards were later established for the 1983–85 model years, NHTSA not only set separate two-and four-wheel drive standards, but also set an optional combined standard for each manufacturer's entire light truck fleet. The combined standard was intended to achieve essentially the same overall fuel efficiency improvement as the separate standards, while giving manufacturers the flexibility of making greater improvements to one class or the other.

When the MY 1983–85 standards were established in December 1980, NHTSA did not make corresponding changes to the MY 1982 standards by adding a separate combined standard option for that year. However, on July 29, 1982, NHTSA took such action by setting an optional combined standard of 17. 5 mpg. The figure of 17.5 mpg was dertermined by harmonically weighing the separate standards based on the 75 percent/25 percent sales mix of two-wheel drive light trucks and four-wheel drive light trucks used for MY 1982 in the MY's 1983–85 rulemaking. Thereby manufacturers have been given greater flexibility in all four model years, 1982–85, to choose how each one allocates its efforts to improve fuel economy between technology changes and sales mix changes.

B. Automobile Fuel Efficiency Act of 1980—Procedures for Petitions

The Automobile Fuel Efficiency Act of 1980 (Act of 1980) modified several provisions of Title V of the Motor Vehicle Information and Cost Savings Act. Four of these call for affected manufacturers to present data to NHTSA in support of a request for modification of existing Title V requirements. On July 29, 1982, the agency issued a final rule (47 FR 7245) identifying the specific information it would expect to receive on these four topics in order to meet the requirements outlined by the Congress in the Act of 1980.

1. The first set of requirements concerned the exemption provided by Section 4(a) of the Act of 1980 from the domestic content provision in section 503 of Title V. Section 503 specifies that passenger cars having less than 75 percent of the cost to the manufacturer attributable to value added in the U.S. or Canada are considered to be foreign manufactured. Conversely, vehicles with at least 75 percent value added in the U.S. or Canada are considered to be domestically manufactured for the purposes of complying with fuel economy regulations. Since section 503 also requires that domestically and foreign produced passenger automobiles not be grouped together for the purpose of complying with fuel economy standards, highly fuel efficient vehicles with less than 75 percent value added in the U.S. or Canada may not be used by a manufacturer to offset the lower fuel economy of its domestically produced cars.

The domestic content provision was included in Title V to promote employment in the U.S. autombile industry by encouraging manufacturers to produce high fuel economy vehicles in this country, instead of relying on the importation of such cars which they produce or purchase abroad. However, foreign manufacturers choosing to build their most fuel efficient vehicles in the U.S. or Canada, with at least 75 percent domestic content, would not, under the original domestic content provision, be permitted to average such cars with their less fuel efficient foreign-produced models. Thus there existed a disincentive for foreign manufacturers to initiate U.S. production and to achieve high levels of domestic content. The Act of 1980 permits manufacturers completing their first year or production in the period 1975–85 to petition NHTSA for exemption from the separate compliance provisions of Section 503 of Title V. Such a petiton must be granted unless the agency finds that doing so would result in reduced employment in the U.S. automobile industry.

In the July 29 rule the agency identified the information it believes would be necessary to determine whether granting a petition would reduce U.S. automobile employment. First, petitioners must stipulate the vehicle that is expected to be sold in the U.S. during the period for which the exemption is being sought, the projected sales of that vehicle, its domestic content, and plans for obtaining components from domestic sources. Petitioners must also indicate the extent, if any, to which additional sales of the petitioner's vehicles are expected to be gained at the expense of current U.S. manufacturers, and the net employment impact of the shift in sales. Data must also be submitted on the petitioner's total U.S. employment and the effect of the agency's granting or denying the petition on the petitioner's product plan and component sourcing decisions. The agency sought information like that outlined above before it granted Volkswagen of America, Inc.'s (VWOA) petition for relief from the domestic content provision on October 23, 1981. The agency could not find a basis for concluding that granting the petition would result in adverse effects on employment in the U.S. automobile industry.

As required by the Act of 1980 (Section 512(c)(1) of Title V), the Secretaries of Transportation and Labor have made during FY 1982 their first annual examination of the impact of the domestic content amendment to Title V. Although significant declines in vehicle sales experienced by VWOA and other domestic manufacturers in MY 1982 have prevented growth in U.S. autombile industry employment, VWOA has nonetheless followed its plan, as presented to NHTSA in 1981, and expects that its MY 1983 U.S. produced vehicles will contain over 75 percent domestic content. There is no reason, at present, to change the 1981 findings of NHTSA that granting VWOA's petition will promote employment in the U.S. automobile industry without causing undue harm to domestic manufacturers. Also, no evidence has been found that the domestic content provision has permitted a manufacturer of domestically produced cars to attain the 75 percent level, and then subsequently to fall below the 75 percent requirement.

2. The second provision of the Act of 1980 is intended to encourage manufacturers to transfer production of a foreign-produced vehicle to this country. Given the original provisions of Section 503, a passenger automobile with less than 75 percent U.S. content cannot be included in a domestic manufacturer's fuel economy compliance fleet. Although the manufacturer might intend to reach the 75 percent content level after a few years below that mark, it would not b permitted to average a higher fuel economy car model with its domestic fleet until that car model reached 75 percent U.S. content.

To remove this disincentive to domestic production and increase U.S. employment, the Act of 1980 permits any manufacturer to apply for an exemption from the domestic content requirement if it plans to phase in domestic production of a new vehicle by gradually increasing its domestic content to at least 75 percent. A manufacturer which satisfies the statutory requirements is permitted to include up to 150,000 passenger automobiles in its domestic fuel economy compliance fleet if the cars have at least 50 percent domestic content initially and if the manufacturer submits and the agency approves a plan for achieving 75 percent domestic content by the fourth year of the exemption. In its final rule of July 29, 1982, the agency stated that such a plan shall include an estimate of the total manufacturing costs of the vehicles whose production is to be transferred to the U.S., data on the changes in domestic content of such vehicles during each of the four years covered by the plan, and information on the timing and nature of the domestic content changes.

During FY 1982 one manufacturer, American Motors (AMC), petitioned the agency to be permitted to take advantage of this amendment to Title V. American Motors sought approval to include up to 150,000 of its new Alliance vehicles in its domestic average fuel economy calculation. To support its petition, AMC supplied the required data on costs and changes in domestic content. The National Highway Traffic Safety Administration granted the AMC petition on August 23, 1982. To include the Alliance in its domestic fleet for calculation of corporate average fuel economy, AMC must achieve a domestic content of at least 50 percent in MY 1983 and at least 75 percent in model year 1986.

3. The third provision authorizes the agency to adjust the manner in which agerage fuel economy is calculated for a petitioner's four-wheel drive light truck fleet or to provide other relief with repect to a fuel economy standard for four-wheel drive light trucks. A petitioner must show that it would be unable to comply with such a standard "withou causing severe economic

impacts such as plant closings or reduction in employment in the U.S. related to motor vehicle manufacturing."

In its July 1982 rulemaking the ageny specified that a petitioner seeking relief under this provision must: provide data on the vehicle changes being made to achieve compliance and the costs and fuel economy impacts of each change; and identify those compliance steps it believes would cause "severe impacts" and the nature of those impacts. Information must also be submitted on monetary credits likely to be earned in the three model years preceding and the three model years following the model year of which relief is sought. Finally, the petitioner must specify the precise type and extent of relief being sought. As of November 1982 NHTSA had received no petitions for relief based on this provision.

4. The Act of 1980 also amended the provisions of Title V concerning carry forward and carryback of fuel economy compliance credits. Prior to enactment of the amendment, manufacturers could use credits earned in one year to offset penalties assessed in the prior or succeeding model year. Both are calculated at the rate of $5 per tenth of a mpg by which the manufacturer exceeds or falls short of a standard, multiplied by the number of such vehicles it produces in the subject model year. The Act of 1980 changed the one year provision to three years. It also authorized a manufacturer which expects to fail to meet a fuel economy standard in a particular model year to file a plan with NHTSA regarding the prospects for earning credits in the next three model years. The July 1982 rule states that such a plan must include the individual actions to be taken by the manufacturer and a schedule for their accomplishment. It must also include a demonstration of the feasibility of the plan. It the plan is approved, the manufacturer avoids ever being deemed to have violated the fuel economy standard for a praticular model year, provided that the projected credits are actually earned.

C. Low Volume Manufacturers

In addition to the relief provisions discussed above in Section B, the Act of 1980 also authorizes a low volume manufacturer (one manufacturing fewer than 10,000 passenger automobiles whether or not in the United States) to apply to the Secretary of Transportation for alternative average fuel economy standards for two or more model years after model year 1980 and before model year 1986. Such a manufacturer could, given favorable action on its application, be exempted from meeting more stringent standards governing higher volume manufacturers. However, before approving a low volume manufacturer's request, the Secretary must determine that the existing standard is indeed more stringent than the maximum feasible average fuel economy level which the applicant can attain.

The original provisions of Title V concerning low volume manufacturers led to the setting of 17 alternative standards for model years 1978–80. Eleven notices of proposed rulemaking and eleven final rules were needed to set those standards. While the Congress in drafting the Act of 1980 did not approve NHTSA's request to reduce this administrative burden on the agency and the manufacturers by exempting the manufacturers entirely from meeting fuel economy standards, it did give the agency authority to grant an exemption and set an alternative standard or standards for all model years covered in an application.

During fiscal year 1982 Aston, Martin Lagonda, Ltd. (Aston Martin), Avanti Motor Corporation (Avanti), Checker Motors Corporation (Checker), Excalibur Automobile Corporation (Excalibur), and Rolls-Royce Motors, Ltd. (Rolls-Royce), petitioned the agency requesting that they be exempted from the generally applicable average fuel economy standards for model year 1981–85, and that lower alternative standards be established for them. As required by Title V, the agency reviewed each manufacturer's capability to improve fuel economy in order to determine each firm's maximum feasible fuel economy level for the five model years included in their petitions. Seven different methods for increasing fuel economy were examined of all five firms to determine the maximum feasible level: weight reduction, aerodynamic improvement, engine improvements, transmission improvements, drive line improvements, reduced rolling resistance, and mix shifts (decreasing sales of lower fuel economy models and increasing sales of higher fuel economy models). In making its evaluation of the actions available to each firm for improving fuel economy the agency included as a fundamental evaluation factor the economic practicability of the projected action.

Before concluding that it had made an accurate estimate of maximum feasible fuel economy levels to be used to establish alternative standards for the firms, the agency also sought to determine what effect other regulation of passenger cars might have on low volume manufacturer fuel economy achievement levels. The agency found that a fuel economy penalty of seven percent would result from California's MY 1983–85 emission standard for oxides of nitrogen. Each firm's projected fuel economy achievement level for those MY's was thus reduced by seven percent. California emission standards are critical for low volume manufacturers because they certify their vehicles to the most stringent standards to reduce costs and must be prepared to take advantage of the limited demand for their products whenever and wherever it may occur.

On May 13, 1982 (47 FR 20639), NHTSA issued a notice of proposed rulemaking outlining its analysis and proposing the establishing of a single standard for each petitioner for each model year 1981–85. Table III–1 contains a listing of the proposed standards. This approach was selected because it was viewed as providing maximum assurance that manufacturers will fully utilize their capabilities. Other alternatives such as a standard for each model year indentical to each manufacturer's maximum feasible average fuel economy level for the five year period or a single standard for all exempted manufacturers were considered less likely to assure full utilization of manufacturer capabilities.

On December 13, 1982 (47 FR 55684), the agency issued a final rule setting alternative standards for the petitioners. The standards are indentical to those proposed in May 1982 except in the case of Checker Motors Corporation. Checker ceased producing passenger automobiles on July 9, 1982, therefore its petition for exemption during MY's 1983–85 was deemed moot. Alternative standards were set for Checker for MY's 1981 and 1982.

TABLE III–1.—LOW VOLUME MANUFACTURER'S AVERAGE FUEL ECONOMY STANDARDS, MY'S 1981–1985 (MPG)

Model year	Avanti	Rolls-Royce	Checker	Aston Martin	Excalibur
1981	18.2	10.7	18.5	12.2	17.9
1982	18.2	10.6	18.4	12.2	17.9
1983	18.9	9.9	19.2	11.3	16.6
1984	16.9	10.0	21.0	11.3	16.6
1985	16.9	10.0	22.8	11.4	16.6

D. Automotive Fuel Economy Reporting Requirements

Title V requires each automobile manufacturer to submit to NHTSA semiannual reports relating to that manufacturer's efforts to comply with average fuel economy standards. Each report must include a statement indicating whether the manufacturer

will comply with standards for that year, steps taken or to be taken to comply, plus any other information the agency may require. On December 12, 1977 (42 FR 62374); the agency established form and content requirements for fuel economy reports. Those requirements were designed to elicit information necessary to monitor compliance with standards and to assist the agency in its standards setting activities for passenger automobiles and light trucks. Experience with the manufacturers' submissions showed that some of the data was not required as frequently as submitted, some was redundant, or could be obtained through other sources, and some proved not to be as useful as originally believed. For these reasons, coupled with the reduced rulemaking schedule in automotive fuel economy, the agency decided that some of the information required to be submitted in fuel economy reports is no longer needed.

On August 12, 1982 (47 FR 34985), the agency issued a final rule revising the fuel economy reporting requirements. As a result of that action manufacturers will not have to submit data on technology and sales changes from the preceding model year or changes during the current model year intended to increase fuel economy. No data will be required on marketing measures to be used to increase fuel economy. Also, manufacturers will be required to submit a variety of technical and sales data for each vehicle configuration only once rather than twice a year.

E. MY's 1986–87 Light Truck Standards

Section 502(b) of Title V requires NHTSA to issue light truck standards at least 18 months before the beginning of each model year after 1978. The agency therefore began in FY 1982 a rulemaking analysis which is intended to culminate in the issuance of fuel economy standards for MY's 1986–87 light trucks. The first step in the rulemaking was the issuance in October 1982 of a questionnaire to the five domestic manufacturers of light trucks and to four foreign manufacturers. Information was requested on such items as product plans, fuel economy gains expected from particular technology items, sales projections, capital expenditures, etc. Most responses were received in December 1982. They are now being used to develop proposed MY's 1986–87 standards on which public comments will be sought. Final standards are scheduled to be issued by December 1983.

Section IV: Legislative Recommendations

During FY 1982, the Secretary of Transportation submitted to the Congress three proposed amendments to Title V of the Motor Vehicle Information and Cost Savings Act. The first proposed amendment would make the MY 1985 light truck standards applicable to each model year thereafter. The Secretary would be given the authority to amend the standards for MY 1985 and any subsequent MY to a level which he determines is the maximum feasible average fuel economy level for such MY. The effect of this amendment would be to make the Secretary's authority to issue fuel economy standards for light trucks as parallel as is possible to his authority regarding passenger automobiles.

The second amendment is intended to provide for similar treatment of low volume and high volume passenger automobile manufacturers after MY 1985. This would be accomplished by continuing the MY 1985 alternative fuel economy standard(s) for low volume manufacturers, as prescribed by the Secretary, into subsequent model years. The Secretary (i.e., NHTSA) would be given the discretion to revise such an alternative standard(s) after MY 1985 at a level he determines is the maximum feasible average fuel economy level for such MY.

The third amendment would reduce the fuel economy reporting requirements of the automobile manufacturers by requiring the reports on an annual rather than a semiannual schedule. Annual reporting will, in the opinion of NHTSA, meet the information requirements for monitoring manufacturer compliance with fuel economy standards.

Section V: Use of Advanced Technology

This section fulfills the statutory requirement of the Department of Energy Act of 1978 (Pub. L. 95–238) Title III, Section 305, which directs the Secretary of Transportation to submit an annual report to Congress on the use of advanced technologies by the automotive industry to improve motor vehicle fuel economy. This report focuses on the application of materials to save weight, introduction of new engines and modification to existing power train and other improvements made during 1982.

Recent events in the automotive market caused manufacturers to improve product quality without incurring higher costs. The softness of domestic sales and the competition of foreign manufacturers required domestic manufacturers to rely on materials with proven qualities. Small improvements were made in the use of high strength steel, aluminum and plastics. *Ward's Automotive Yearbook 1982* estimated that between model years 1981 and 1982 the use of higher strength steel increased on the average by approximately 13 pounds, aluminum by 4 pounds and plastics by 2 pounds. The application of plain carbon steel decreased 133 pounds per vehicle. Total overall weight of a typical automobile dropped an average of 114 pounds.

Aluminum was used in new applications at General Motors whose engineers were anticipating the future of aluminum for major structural components. Transmission supports in the GMC S–15 and Chevrolet S–10 pickups and cast aluminum cases, covers and extensions for 4-speed automatic truck transmissions and new 4- and 5-speed manual transmissions are being produced used aluminum.

The Pontiac Division has an optional aluminum hood for the 1982 Firebird and front-wheel drive 6000. Ford Motor Company is using stamped aluminum hoods, forged aluminum wheels, and aluminum bumpers on its Lincoln Continental.

The increased use of high strength steel (HSS) was approximately 10 to 15 pounds per vehicle. Specific uses of HSS are in the wheels for GM's Camaro and Firebird models and in structural members of Ford's new Ranger pickup. The expanded use of HSS continued in applications such as suspension system cross members, seat backs, door beams, side rails, bumper reinforcements, and rear frame rails. Chrysler is using HSS in many applications on its new E car which is a stretched version of the K car. The Ford Escort and Lynx also have HSS fenders and hoods.

New applications of plastics were not as dramatic as in previous years when flexible fenders, plastic seats, and composite leaf springs were introduced. New application of plastics include hoods, grill, opening panels, and panels below the bumpers. The use of plastics increased by approximately 2 pounds per vehicle.

Ford engineers forecast significant growth in the use of magnesium. Magnesium was introduced by Ford into the clutch housing and pedal supports for the brake and clutch in the new Ranger pickups and in the steering column lock housing on the 1982 Escort/Lynx. However, usage in current domestic automobiles is less than 3 pounds per vehicle. General Motors is planning to use magnesium servo pistons in its new 440 hydramatic transmission in 1983 models.

Material substitution was only one of the methods used to reduce average vehicle weight. Manufacturers also transferred model names from heavier to lighter vehicle platforms and introduced smaller more fuel efficient front-wheel drive automobiles as compact and mid-size vehicles. For example, GM moved its Bonneville nameplate down to the mid-size G-body LeMans chassis and introduced an A-body for four of its divisions as a mid-size front-wheel drive passenger car. Chrysler moved the full sized New Yorker nameplate to the intermediate platform of the Le Baron and introduced a New Yorker E car, a slightly longer K car to compete in the mid-size market. Ford trimmed 18 inches and 500 pounds from its Lincoln Continental and placed it on a Thunderbird platform. It will introduce the Ford Tempo in model year 1983, a stretched version of the subcompact Escort to replace the compact Fairmont.

Along with these model changes, manufacturers reduced aerodynamic drag on the new models. Using wind tunnel testing, GM designed the front-wheel drive A-body and redesigned the rear drive F-body, Camaro and Firebird. Fords' two seater EXP/LN7 has one of the lowest drag coefficients in the industry. Its new Tempo/Topaz and Thunderbird/Cougar also reflect this effort to reduce wind drag. Other subtle changes such as flush mounted windshields, redesigned drip mouldings, new front dams, and repositioned hood ornaments are apparent in most of the domestic manufacturers' models.

New engines were also introduced into the 1982 model year automobiles including optional powerplants for the smaller automobiles and diesel engines for both passenger cars and trucks. General Motor introduced an overhead cam naturally aspirated 1.8 liter engine from Brazil into its J-body, subcompact line. It is also producing a new domestic 2.0 liter engine for the J-body Cavalier. To provide a broader selection of diesel engines, GM introduced a new V–6, 4.3 liter diesel for automobiles and a new V–8, 6.2 liter diesel for light trucks. Another development called throttle body fuel injection took the place of the traditional carburetor on GM's X-, A-, and F-bodies equipped with the 2.5 liter engine. Chrysler is upgrading its 2.2 liter engine to provide 16 percent more horsepower and 9 percent more torque for its K and E passenger automobiles. Ford has a new domestically produced 2.3 liter engine for its front wheel drive passenger cars which will be introduced in 1983. They are also upgrading the old 2.3 liter engine through turbocharging and by converting the engine to use propane. Ford offered a new fuel efficient 3.8 liter, V–6 engine as an option in the 1982 model year Continental, Granada, Thunderbird, Cougar, and XR–7 automobiles. Ford is also purchasing a 2.2 liter diesel engine from Toyo Kogyo for the Ranger pickup truck. A new electronic control module EEC–IV to improve fuel economy is being introduced in the 1.6 liter engine in the Escort and Lynx to control spark advance exhaust gas recirculation and air-fuel mixture. Staged two barrel carburetors using electronic feedback are also being installed on Chrysler's Aires/Reliant and GM's Chevette/T1000.

Sales of front-wheel drive cars increased to 40 percent of the car sales in the period from January through October of 1982. Front-wheel drive passenger automobiles were approximately 34 percent of the 1981 domestic fleet. Introduction of Ford's front-wheel drive Tempo/Topaz automobiles in 1983 will increase the market share of front-wheel drive vehicles. They can be expected to dominate the domestic market soon.

In 1982, the domestic industry experienced its worse sales year in more than 20 years. However, they now have their fleets of smaller more fuel efficient automobiles developed and in production. Diesel engines are available in the larger automobiles and light trucks. The technology is developed and awaiting acceptance in the marketplace. Technological improvements during 1982 were aimed at increasing efficiency through: improvements in aerodynamics; stretching existing front-wheel drive models to replace less efficient rear-wheel drive compact and mid-size automobiles; and adding domestically produced small pickups to existing light truck model lines.

BILLING CODE 4910–59–M

[Docket No. IP83–6; Notice 1]

Chrysler Corp.; Receipt of Petition for Determination of Inconsequentiality

Chrysler Corp., Detroit, Michigan ("Chrysler" herein), has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.110, *Tire Selection and Rims for Passenger Cars*, on the basis that it is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decisions or other exercise of judgment concerning the merits of the petition.

Approximately 1350 1983 model Dodge Shelby Charger passenger cars may carry tire inflation placards (required by Standard No. 110) with an incorrect minimum tire size designation. the placards indicate that the size is P195/50R15 when the correct designation is 195/50R15 (no ISO "P" symbol).

Chrysler argues that the incorrect designation do not exist, and therefore tires of this designation is inconsequential because such a tire size and designation are not available in the replacement market. If such a tire becomes available, it will be suitable for the vehicles in question, differing only in a slightly higher load rating. This difference is attributable solely to different methods used in the U.S. and Europe to rate tires. The tire inflation placard otherwise conforms to the requirements of Standard No. 110.

Interested persons are invited to submit written data, views, and arguments on the petition of Chrysler Corp. described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials will be filed, and comments received after the closing date will be considered to the extent possible. When the petition is granted or denied, notice will be published in the **Federal Register** pursuant to the authority indicated below.

The engineer and lawyer primarily responsible for this notice are P. L. Moore and Taylor Vinson, respectively.

Comment closing date: July 18, 1983.

(Sec. 102. Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on June 8, 1983.

[Docket No. IP82-20; Notice 2]

Goodyear Tire & Rubber Co.; Denial of Petition for Determination of Inconsequential Noncompliance

This notice denies the petition by the Goodyear Tire & Rubber Co. of Akron, Ohio, to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for a noncompliance with 49 CFR 571.109, Motor Vehicle Safety Standard No. 109, *New Pneumatic Tires—Passenger Cars.* The basis of the petition was that the noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of the petition was published on October 21, 1982, and an opportunity afforded for comment (47 FR 46956).

Paragraph S4.3 requires that the sidewalls of each passenger car tire be labeled with the maximum load rating. Between September 20, 1981, and June 5, 1982, Goodyear produced over 31,000 Convenience Spare Tire size T145/80D16 tires on which the maximum load was stated as 2260 pounds. The correct figure is 2050 pounds. The error came to Goodyear's attention when Transport Canada discovered failure to meet Canadian Standard No. 109's endurance test requirements, 4 of 18 tires failing when tested at 2240 pounds. Canada then tested 12 tires for endurance at 2030 pounds two of which failed the post inspection test with sidewall bulges. Goodyear's own test of 64 tires at 2050 pounds showed 15 failures.

Goodyear believes that the noncompliance is inconsequential as the heaviest vehicle using the tire, the 1982 Oldsmobile Custom Cruiser Station Wagon, uses as an optional extra load tire one which has a maximum load capacity of 1874 pounds. On the Oldsmobile, the maximum load on each tire will be 1499 pounds. There thus exists a 25% reserve load capacity. Tires tested for endurance under Standard No. 109 at 1874 pounds all passed. The noncompliance then is said to be inconsequential.

No comments were received on the petition.

There are in fact two noncompliances at the heart of this petition, one with the labelling requirements and one with the performance requirements of Standard No. 109. The labelling requirements are violated because the maximum load figure given on the tire is not what the manufacturer says it should be. The tires are labelled "2260" (Table 1–LL of Standard No. 109) but the correct figure, according to Goodyear, is "2050" (Table 1–AAA). The safety significance of the noncompliance is a vehicle driver may impose a heavier load on a tire labelled "2260" than if it is labelled "2050". The performance requirements are violated because, even at 2050 pounds, the tires have failed to meet the endurance requirements.

Nevertheless, Goodyear argues, the endurance test failures are "inconsequential" because the tire has sufficient reserve enven with the maximum weight on it expected in service. The agency does not agree. The reserve load of 25 percent quoted by Goodyear for this vehicle was found to be erroneous. Temporary spare tires need a large margin of reserve. When the Gross Axle Weight Rating (GAWR) of 3301 lbs, 1650 lbs per tire, of a similar vehicle was compared with the Goodyear calculated load of 1499 lbs per tire, the actual reserve load was 12 percent. NHTSA believes that they are often installed in an under inflated condition because they are neglected while stored unused in the trunk, and their pressure falls below the 60 psi required. Overloading of the tire can easily result under reduced pressure, with adverse consequences to safety. The margin of reserve is too close to the border under these circumstances. Further, as a tire infrequently used, the "space saver" spare may outlive the vehicle with which it was originally supplied, and find its way to a car for which it was not intended.

Accordingly, petitioner has not met its burden of persuasion that the noncompliance herein described is inconsequential as it relates to motor vehicle safety, and its petition is hereby denied.

The engineer and attorney primarily responsible for this notice are Art Neill and Taylor Vinson, respectively.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on June 8, 1983.

BILLING CODE 4910-59-M

[Docket No. IP82-18; Notice 2]

Suzuki Motor Co., Ltd.; Grant of Petition for Inconsequential Defect

This notice grants the petition by Suzuki Motor Co., Ltd., of Brea, California, to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for a defect in certain of is motorcycles that it deems is safety-related. The basis of the petition is that the defect is inconsequential as it relates to motor vehicle safety.

Notice of receipt of the petition was published on September 20, 1982, and an opportunity afforded for comment (47 FR 41458).

Among the information that 49 CFR Part 567 requires to be placed on a motor vehicle's permanently attached certification of compliance is the vehicle's gross vehicle weight rating (GVWR). The GVWR is "not less than the sum of the unloaded vehicle weight, rated cargo load, and 150 times the vehicle's designating seating capacity (§ 567.4(g)(3)). Suzuki manufactured, imported, and sold almost a thousand 1982 model year GS450GA motorcycles with incorrectly marked certification labels. The GVWR marked on these labels is 60 lbs. The correct value is 800 lbs.

Suzuki argued that the error is inconsequential as it relates to motor vehicle safety because directly beneath the erroneous value are the correct values for the front gross axle weight rating (330 lbs.) and the rear gross axle weight rating (530 lbs.). Therefore, simply by adding the two additional ratings the operator can determine the correct GVWR for the motorcycle.

No comments were received on the petition.

The erroneous GVWR is such a low value that it is not likely to mislead any motorcycle operator. The other axle ratings are correctly stated, and the noncompliance has no effect upon the ability of the motorcycle to carry the weight for which it was designed. Accordingly, petitioner has met its burden of persuasion that the noncompliance herein described is inconsequential as it relates to motor vehicle safety, and its petition is hereby granted.

The engineer and attorney responsible for this notice are James Thomas and Taylor Vinson, respectively.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on June 8, 1983.

BILLING CODE 4910-59-M

Tire Code Marks Assigned to New Tire Manufacturers

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Publication of tire code marks assigned to new tire manufacturers.

SUMMARY: The NHTSA last published a complete listing of the tire code marks assigned to new tire manufacturers in 1972. Since that time, there have been several additions and changes in names and addresses for the assigned code marks. This publication will inform the public of those additions and changes

FOR FURTHER INFORMATION CONTACT: P. L. Moore, Office of Vehicle Safety Standards, Crash Avoidance Division, NHTSA, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–2153).

SUPPLEMENTARY INFORMATION: Section 574.5 of the Title 49, Code of Federal Regulations, requires tire manufacturers to mold a tire identification number onto or into the sidewall of each tire they manufacture. In the case of new tires, the first two digits of the tire identification number are the code mark assigned to the manufacturer. This code mark identifies the manufacturer and the plant where the tire was manufactured.

The NHTSA published a complete listing of the tire codes at 37 FR 342, January 11, 1972. This list enables interested members of the public to identify the manufacturer and place of manufacture of any new tire.

Since 1972, there have been several changes in the names of the manufacturers and the plant addresses for the assigned code marks. Further, there have been some 150 additional code marks assigned for new tires since the 1972 publication. Accordingly, this updated listing of the assigned code marks for new tires is being published to bring the public up-to-date with the revisions and new code numbers which have been assigned since the publication of the 1972 list.

(Secs. 103,113,119,201,and 206, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1402,1407,1421, and 1426); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on June 8, 1983.

Kennerly H. Digges,

Acting Associate Administrator for Rulemaking.

[Docket No. IP83–5; Notice 1]

Zimmer Motor Vans; Receipt of Petition for Determination of Inconsequential Noncompliance

Zimmer Motor Vans, Cordele, Georgia, a division of Zimmer Corp., Pompano Beach, Florida, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 3161 *et seq.)* for an apparent noncompliance with 49 CFR 571.208, Motor Vehicle Safety Standard No. 208, *Occupant Restraint Systems.* The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Petitioner produces van conversions using Ford, General Motors, and Chrysler Corporation vehicles. The conversions are certified as "multipurpose passenger vehicles." The petition covers 3,570 conversions produced from September 1, 1981, through February 18, 1983.

Paragraph S4.2.2 of Standard No. 208 specifies that multipurpose passenger

vehicles have the same occupant protection systems as passenger cars under paragraph S4.1.2, in essence a Type 2 seat belt assembly at each front outboard designated seating position, a Type 1 assembly at all other designated seating positions, and a warning system. The Zimmer conversions have the requisite number and types of seat belt assemblies; however, the assemblies have a manual adjusting device instead of an emergency-locking adjusting device, and a single point push button latch release. Further, the vehicles (though having a warning light) lack an audible warning.

Zimmer comments that the level of protection it has provided exceeds that required for forward-control vehicles before September 1, 1981 when only Type 1 belts were mandated for the front seating positions and a warning need not have been provided. Because its van conversions are similar to motor homes and it meets motor home protection requirements, the petitioner asks that its noncompliances be deemed inconsequential. It also cites in support the agency's temporary exemption of Vintage Reproductions Inc. (47 FR 40047) from these requirements.

Interested persons are invited to submit written data, views and arguments on the petition of Zimmer Corporation described above. Comments should refer to the docket number amd be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: July 18, 1983.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on June 8, 1983.

Kennerly H. Digges,

Acting Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

Office of the Secretary

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB May 1–May 31, 1983

AGENCY: Office of the Secretary, DOT.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements, transmitted by the Department of Transportation, during May 1983 to the Office of the Management and Budget (OMB) for its approval. This notice is published in accordance with the requirments of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35)

FOR FURTHER INFORMATION CONTACT: John Windsor, John Chandler, or Annette Wilson, Information Requirement Division, M-34, Office of the Secretary of Transportation, 400 7th Street, SW., Washington, D.C. 20590, (202) 426-1887 or Gary Waxman or Wayne Leiss, Office of Management and Budget, New Executive Office Building, Room 3001, Washington, D.C. 20503, (202) 395-7313.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to the Office of the Management and Budget (OMB) for approval under that Act. OMB reviews and approves agency submittals in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements.

On Mondays and Thursdays, as needed, the Department of Transportation will publish in the **Federal Register** a list of those forms, reporting and recordkeeping requirements that it has submitted to OMB for review and approval under the Paperwork Reduction Act. This list will include new items imposing paperwork burdens on the public as well as revisions, renewals and reinstatements of already existing requirements. OMB approval of an information collection requirement must be renewed at least once every three years. The published list also will include the following information for each item submitted to OMB:

(1) A DOT control number.

(2) An OMB approval number if the submittal involves the renewal, reinstatement or revision of a previously approved item.

(3) The name of the DOT Operating Administration or Secretarial Office involved.

(4) The title of the information collection request.

(5) The form numbers used, if any.

(6) The frequency of required responses.

(7) The persons required to respond.

(8) A brief statement of the need for, and uses to be made of, the information collection.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the **"FOR FURTHER INFORMATION CONTACT"** paragraph set forth above.

Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the **"FOR FURTHER INFORMATION CONTACT"** paragraph set forth above. If You anticipate submitting substantive comments, but find that more than 5 days from the date of publication is needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB during May 1983:

DOT No: 2167.

OMB No: 2137-0030.

By: Research and Special Programs Administration.

Title: Application for exemption renewal.

Forms: None.

Frequency: Biennially.

Respondents: Applicants for exemption renewals.

Need/Use: Needed to make safety analysis of exemption holders who wish to renew their exemption. Used by staff of Materials Transportation Bureau (MTB) to evaluate the renewal request to determine if exemption should be renewed or denied.

DOT No: 2168.

OMB No: 2137-0027.

By: Research and Special Programs Administration.

Title: Exemption Holder Recordkeeping.

Forms: None.

Frequency: On Occasion.

Respondents: Holder of Exemptions.

Need/Use: Used by the MTB to evaluate the level of safety maintained by exemption holders during shipments of hazardous materials made under the terms of an exemption.

DOT No: 2169.
OMB No: 2137–0028.
By: Research and Special Programs Administration.
Title: Application to become a party to an exemption.
Forms: None.
Frequency: One-Time, when applying.
Respondents: Shippers and carriers of hazardous materials, manufacturers of containers for hazardous materials.
Need/Use: To allow applicants to be included in exemptions previously granted rather than applying separately for an exemption which would entail duplication of material previously submitted.

DOT No: 2170.
OMB No: (New).
By: Office of the Secretary.
Title: Department of Transportation Procurement Operations.
Forms: SF–33.
Frequency: On Occasion.
Respondents: The public, including businesses and local governments.
Need/Use: DOT is requesting an interim clearance to cover all procurements where information is provided by the public until a better estimate can be prepared for burdens on the public and accurate clearance requests prepared.

DOT No: 2171.
OMB No: 2137–0023.
By: Research and Special Programs Administration.
Title: Special Instructions for Cryogenic Liquids.
Forms: None.
Frequency: Each shipment of a flammable cryogenic of over 125 gallons.
Respondents: Motor carriers.
Need/Use: To ascertain that drivers know emergency procedures and who to notify in case of accident or container failure.

DOT No: 2172.
OMB No: 2137–0024.
By: Research and Special Programs Administration.
Title: Flammable Cryogenic Liquid Training Records.
Forms: None.
Frequency: Biennially.
Respondents: Motor Carriers.
Need/Use: To ascertain that drivers of vehicles transporting cryogenic liquids are educated in the regulations pertaining to cryogenic liquids, driver requirements of the Motor Carrier Safety Regulations, hazards of cryogenics and emergency procedures.

DOT No: 2173.
OMB No: 2137–0025.
By: Research and Special Programs Administration.
Title: Shipper or Carrier Registration Statement.
Forms: None.
Frequency: Biennnially.
Respondents: Shippers and Carriers of Flammable Cryogenic Materials.
Need/Use: To ascertain who is shipping flammable cryogenic liquids, location of facilities warranting public inspections, the number and types of portable tanks and cargo tank cars used to transport flammable cryogenic liquids.

DOT No: 2174.
OMB No: 2137–0026.
By: Research and Special Programs Administration.
Title: Cargo Tank Pressure and Temperature Record.
Forms: None.
Frequency: For each shipment of over 125 gallons of a flammable cryogenic.
Respondents: Motor Carriers.
Need/Use: To ascertain that cargo tanks have not been overfilled and to guard against possibilities of malfunction during the trip which would allow the product to expand causing the tank to explode; and to assure shippers and operators of motor carriers that the tank is safe to refill.

Issued in Washington, D.C., on June 7, 1983.

Karen S. Lee,
Deputy Assistant Secretary for Administration.

BILLING CODE 4910–62–M

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions; Los Alamos Scientific Laboratory, et al.

AGENCY: Materials Transportation Bureau, RSPA, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in May 1983. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
2000–X	DOT–E 2000	Los Alamos Scientific Laboratory, Los Alamos, NM.	49 CFR 172.101, 173.304(a), 173.315(a)(2).	To authorize use of a non-DOT specification portable tank or a DOT Specification 4L cylinder, for shipment of flammable liquefied compressed gases. (Mode 1.)
4108–P	DOT–E 4108	Welding and Therapy Service, Inc., Louisville, KY.	49 CFR 173.315(a)	To become a party to Exemption 4108. (Mode 1.)
6151–X	DOT–E 6151	Virginia Chemicals Inc., Portsmouth, VA	49 CFR 173.302(a)(4), 173.304(a)(1), 173.305(c).	To authorize shipment of liquefied, nonliquefied flammable and nonflammable gases, in DOT Specification 39 seamless aluminum cylinders. (Modes 1, 2)
6184–X	DOT–E 6184	Air Products and Chemicals, Incorporated Allentown, PA.	49 CFR 172.101, 173.315(a)(1)	To authorize use of non-DOT specification portable tanks, for transportation of a nonflammable gas. (Mode 1, 30)
6443–X	DOT–E 6443	Montana Sulphur & Chemical Company, Billings, MT.	49 CFR 173.315(a)(1)	To authorize use of DOT Specification MC–331 insulated cargo tanks not presently authorized, for transportation of a flammable gas. (Mode 1.)
6736–X	DOT–E 6736	El Paso Products Company, Odessa, TX	49 CFR 172.101, 173.315(a)	To authorize shipment of liquefied ethylene in non-DOT specification cargo tanks. (Mode 1.)
6738–X	DOT–E 6738	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 172.101, 173.315(a)	To authorize shipment of liquefied ethylene in non-DOT specification cargo tanks. (Mode 1.)
6739–X	DOT–E 6739	Texas Eastman Company, Longview, TX	49 CFR 172.101, 173.315(a)	To authorize shipment of liquefied ethylene in non-DOT specification cargo tanks. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6800–X	DOT–E 6800	Plasti-Drum Corporation, Lockport, Il	49 CFR 173.119(a), 173.119(b), 173.245(a)(26), 173.245b(a)(6), 173.249(a)(1), 173.250a(a)(1), 173.257(a)(1), 173.263(a)(26), 173.265(d)(6), 173.266(b)(8), 173.271, 173.272(i)(9), 173.277(a)(6), 173.287(c)(1), 173.289(a)(1), 173.292(a)(1), 173.357(b), 178.19.	To authorize manufacture, marking and sale of non-DOT specification 50- and 55-gallon polyethylene containers similar to DOT Specification 34, for shipment of certain flammable, corrosive, poison B liquids and hydrogen peroxide classed as an oxidizer (Modes 1, 2, 3.)
[illegible]	DOT–E 6863	Hedwin Corporation, Baltimore, MD	49 CFR 173.119, 173.154, 173.221, 173.245.(a)(26), 173.249(a)(1), 173.250(a)(1), 173.256(a), 173.257(a)(1), 173.263(a)(26), 173.265(d)(6), 173.266(b)(8), 173.272(g), 173.272(i)(9), 173.277(a)(6), 173.287(c)(1), 173.288, 173.289(a)(1), 173.292(a)(1), 173.346(a), 178.19.	To authorize manufacture, marking and sale of non-DOT specification molded polyethylene containers, for shipment of oxidizers, poison B, corrosive liquids, organic peroxides and flammable liquids. (Modes 1, 2, 3.)
7010–X	DOT–E 7010	Great Lakes Chemical Corporation El Dorado, AR.	49 CFR 173.252(a)(4)	To authorize transport of bromine in non-DOT specification lead lined portable tanks. (Modes 1, 2, 3.)
7252–X	DOT–E 7252	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE	49 CFR 173.93	To authorize transport of Pourvex and Tovex Extra in DOT Specification 17H metal drums. (Mode 3.)
7526–X	DOT–E 7526	Schering AG, West Berlin, West Germany	49 CFR 173.134	To authorize shipment of a pyrophoric liquid in non-DOT specification portable tanks. (Modes 1, 3.)
[illegible]	DOT–E 8008	Wheaton Aerosols Co., Mays Landing, NJ	49 CFR 173.305, 173.306(a)	To authorize manufacture, marking and sale of non-DOT specification aerosol container consisting of a glass bottle externally coated with plastic, for shipment of compressed gases. (Modes 1, 2, 3, 4.)
[illegible]	DOT–E 8079	Container Corporation of America, Wilmington, DE.	49 CFR 178.35a–1	To authorize manufacture, marking and sale of DOT Specification 2SL inside polyethylene containers using a higher density, higher melt index resin, for shipment of those materials authorized in a DOT Specification 2SL. (Modes 1, 2, 3.)
8269–X	DOT–E 8269	M–D Trailer Company, Fort Worth, TX	49 CFR 173.119(a), 173.119(m), 173.245(a), 173.346(a), 178.340–7, 178.342–5, 178.343–5.	To authorize manufacture, marking and sale of certain non-DOT specification cargo tanks complying with DOT Specification MC–307/MC–312 except for bottom outlet valve variations, for transportation of flammable, corrosives, poison waste liquid or semi solids. (Mode 1.)
[illegible]	DOT–E 8526	Bass Transportation Company, Inc., Farmington, NJ.	49 CFR 177.834(L)(2)(i)	To become a party to Exemption 8526. (Mode 1.)
8552–X	DOT–E 8552	Brenner Tank, Incorporated, Fond du Lac, WI.	49 CFR173.119(a),(m), 173.245(a), 173.346(a), 178.340–7, 178.342–5, 178.343–5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying generally with DOT Specification MC–307/312 except for bottom outlet valve variations, for transportation of flammable or corrosive waste liquids or semi-solids. (Mode 1.)
[illegible]	DOT–E 8556	Helium Sales, Inc., Amarillo, TX	49 CFR 172.101, 173.315(a)	To become a party to Exemption 8556. (Modes 1, 3.)
[illegible]	DOT–E 8556	Air Products and Chemicals, Incorporated, Bethlehem, PA.	49 CFR 172.101 173.315(a)	To authorize use of non-DOT specification containerized portable tanks for transportation of liquefied hydrogen. (Modes 1, 3.)
8644–X	DOT–E 8644	Richmond Lox Equipment Company, Livermore, CA.	49 CFR 172.101, 173.315	To authorize shipment of liquid nitrogen or oxygen, in vacuum insulated non-DOT specification cargo tanks. (Mode 3.)
[illegible]	DOT–E 8691	Aluminum Company of America, Palestine, TX.	49 CFR 173.333	To provide for shipments by common or contract carrier rather than private. (Modes 1, 2, 3.)
[illegible]	DOT–E 8723	Ireco Chemicals, Salt Lake City, UT	49 CFR 173.114a(h)(3)	To authorize a portable tank as an additional container for shipment of blasting agents. (Mode 1.)
[illegible]	DOT–E 8725	CGN Fuel Cylinder Corporation, Long Beach, CA.	49 CFR 173.302(a)	To use NOL ring testing instead of tensile testing and to modify cycling test requirements. (Mode 1.)
8877–X	DOT–E 8877	Allied Chemical, Morristown, NJ	49 CFR 173.119(m)(3), 173.245, 175.3	To authorize shipment of certain materials described as flammable liquids, corrosive, n.o.s. (corrosive to skin only) and corrosive liquids, n.o.s., in DOT–12B65 fiberboard boxes with inside glass bottles having a capacity not to exceed one-gallon. (Modes 1, 2, 3.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8896–N	DOT–E 8896	Kerrco Inc., Hastings, NE	49 CFR 178.19, Part 173, Subpart F	To authorize manufacture, marking and sale of non-DOT specification 55 gallon polyethylene drums comparable to DOT Specification 34, for shipment of those corrosive liquids presently authorized in DOT Specification 34. (Modes 1, 2.)
8917–N	DOT–E 8917	Morrison–Knudsen Company, Inc., Burlingame, CA.	49 CFR 173.182, 176.400	To authorize transport of ammonium nitrate prills in large, lined steel container. (Modes 1, 2, 3.)
8936–N	DOT–E 8936	Great Lakes Chemical Corporation, West Lafayette, IN.	49 CFR 173.357(b)(2)	To authorize shipment of a mixture containing 57% chloropicrin and 43% 1,3–dichloropropene, 1,2–dichloropropane and related hydrocarbons, respectively, by weight, in non-authorized DOT Specification 5B metal drums. (Modes 1, 2, 3.)
[illegible]	DOT–E 8948	Immuno Nuclear, Corporation Stillwater, MN.	49 CFR 173.242, 173.25(b)	To authorize shipment of limited quantities of a radioactive material, flammable liquid and corrosive material (liquid), in non-DOT specification single well, corrugated fiberboard boxes. (Modes 1, 4.)
8951–N	DOT–E 8951	Presto Products, Inc., Appleton, WI	49 CFR 173.1200(a)(1)(ii)	To authorize shipment of small quantities of a nail polish remover solution containing a mixture of ethyl acetate and aqueous isopropyl alcohol, almost completely absorbed in a roll of rayon fiber wipes (towelettes) and packaged in non-DOT specification containers. (Modes 1, 3.)
8968–N	DOT–E 8968	Degussa Corporation, Peterboro, NJ	49 CFR 173.206	To authorize use of a non-DOT Specification IMO Type 1 portable tank, for transportation of a flammable solid. (Modes 1, 2, 3.)
8978–N	DOT–E 8978	A/S Hellesens, Soborg, Denmark	49 CFR 172.101, 175.3	To authorize transport of lithium cells containing more than 12, but not more than 50, grams of lithium metal, in non-DOT specification, non-reusable, open head, steel drums. (Modes 1, 2, 4.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6987–N	DOT–E 6987	Hedwin Corporation, Baltimore, MD	49 CFR 178.35a–1	To authorize manufacture, marking and sale of DOT Specification 2SL inside polyethylene containers of Type III, high density, high molecular weight resin, for transportation of those commodities presently authorized to be packaged in a DOT Specification 2SL inside polyethylene container. (Modes 1, 2, 3.)
9012–N	DOT–E 9012	Thiokol Corporation, Brigham City, UT	49 CFR 173.182, 173.239a	To authorize shipment of ammonium perchlorate and sodium nitrate, classed as oxidizers, in DOT Specification 53 aluminum portable tanks modified to incorporate a pressure equalizing apparatus. (Modes 1, 2.)
9034–N	DOT–E 9034	Airco Industrial Gases, Murray Hill, NJ	49 CFR 173.302, 173.304, 173.328, 173.334, 175.3.	To authorize use of a previously not authorized DOT Specification 3AL aluminum cylinder, for transportation of certain gases and gas mixtures. (Modes 1, 2, 4, 5.)
9035–N	DOT–E 9035	Rohm and Haas Company, Philadelphia, PA.	49 CFR 173.245	To authorize use of DOT Specification 51 stainless steel portable tanks, for transportation of corrosive liquid. (Mode 1.)
EE 8907–X	DOT–E 8907	U.S. Department of Defense, Washington, DC.	49 CFR 172.101(6)(ix), 175.3, 175.30	To authorize air transport of Class A and C explosives that are packed, marked, labeled and loaded in accordance with 49 CFR Part 173 or AFR 71–4. (Mode 4.)
EE 9056–N	DOT–E 9056	Hodgdon Powder Co., Inc., Shawnee Mission, KS.	49 CFR 173.93(a)	To authorize shipment of certain identified solid propellant explosives, in polyethylene bottles packed in DOT Specification 12B boxes. (Mode 1.)

WITHDRAWALS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6958–X	Great Lakes Chemicals Corporation, El Dorado, AR.	49 CFR 173.252(a)(5)	To authorize Shipment of elemental bromine in a portable tank not presently authorized in the regulations. (Modes 1, 3.)
7060–X	Cheshire Airways, Inc., Keene, NH	49 CFR 175.702(b), 175.75(a)(3)(ii)	To authorize carriage of radioactive materials aboard cargo-only aircraft when the combined transport index exceeds 50.0 and/or the separation criteria cannot be met. (Mode 4.)
8393–N	United Parcel Service Greenwich, CT	49 CFR 172.200	To authorize shipment of radioactive materials, limited quantity, n.o.s. and radioactive devices n.o.s. without shipping papers. (Modes 1, 2.)
8941–N	Day & Zimmermann, Inc., Philadelphia, PA	49 CFR 172.101, 173.65, 175.30	To authorize a one-time shipment of a high explosive, Class A, contained in 35 non-DOT specification fiberboard drums net weight not over 139 pounds each. (Mode 4.)

Denials

8861–N Request by Hoover Universal, Inc., Beatrice, NE to reconsider denial of their request to manufacture, mark and sell DOT Specification 57 portable tanks for shipment of various flammable liquids which are also corrosive or poison and certain Class B poison liquids denied May 23, 1983.

8974–N Request by Fabricated Metals, Inc., San Leandro, CA to reconsider denial of their request to manufacture DOT Specification 56 portable tanks from an aluminum alloy which does not have the mechanical properties specified in 49 CFR 178.251–2(d)(1) denied May 26, 1983.

Issued in Washington, DC, on June 10, 1983.

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation Materials Transportation Bureau.

BILLING CODE 4910–60–M

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980; Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms Under Review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposals for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attention: Desk Officer for Tennessee Valley Authority, 395–7313.

Agency Clearance Officer: John O. Catron, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751–2523, FTS 858–2523

Type of Request: Extension

Title of Information Collection: Foreign Line Crossing Data (form TVA 6573)

Frequency of Use: Nonrecurring

Type of Affected Public: State or local governments and small businesses or organizations

Standard Industrial Classification: N/A

Small Businesses or Organizations Affected: Yes

Federal Budget Functional Category Code: 271

Estimated Number of Annual Responses: 135

Estimated Total Annual Burden Hours: 1,350

Estimated Annual Cost from Federal Government appropriated funds: None

Need For and Uses of Information: When a company wishes to build a line over or under a power transmission line owned by TVA, TVA must review certain engineering data to ensure reliability of the power system and to protect the public by ensuring that the crossing meets the National Electrical Safety Code. The information collection will provide such engineering data.

Dated: June 10, 1983.

John W. Thompson,

Assistant General Manager, Senior Agency Official.

Sunshine Act Meetings

Federal Register
Vol. 48, No. 117
Thursday, June 16, 1983

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94–409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Items
Equal Employment Opportunity Commission	1
Federal Election Commission	2
Federal Home Loan Bank Board	3
Federal Maritime Commission	4
Nuclear Regulatory Commission	5

1

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: Tuesday, June 21, 1983, 9:30 a.m. (eastern time).

PLACE: Commission Conference Room No. 200, second floor, Columbia Plaza Office Building, 2401 E. Street NW., Washington, D.C. 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote/s.
2. A Report on Commission Operations (Optional).
3. Freedom of Information Act Appeal No. 83–4–FOIA–31–NO, concerning a request for ADEA Charge Files.
4. Freedom of Information Act Appeal No. 83–3–FOIA–51–HQ, concerning a request for contents of an ADEA Charge File.
5. Recommended Mid-Year Modifications to FEP Agency FY 83 New Charge and ADEA Contracts.
6. Interpretative Bulletin on Employee Benefit Plans, 29 CFR 860.120 (For Public Comment on Particular Questions).

Closed:

1. Litigation Authorization General Counsel Recommendations.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notice on EEOC Commission meetings in the Federal Register, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings).

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Secretary to the Commission at (202) 634–6748.

This Notice Issued June 14, 1983.

[S–660–83 Filed 6–14–83; 3:42 pm]

BILLING CODE 6570–06–M

2

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, June 21, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Compliance. Litigation. Audits. Personnel.

DATE AND TIME: Thursday, June 23, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C. (fifth floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of dates for future meetings
Correction and approval of minutes
Draft advisory opinion 1983–15: J. Curtis Herge, on behalf of Republican Party of Virginia
Eligibility reports for candidates to receive presidential primary matching payments
Certification Reports:
(1) 1984 Democratic National Convention Committee
(2) Committee on Arrangements for the 1984 Republican National Convention
Explanation and justification of Presidential Election Campaign Fund Regulations (11 CFR 9001 *et seq.*) (Tentative)
Proposed changes in procedures for processing purchase orders, obligations, vendor invoices, and payments
Budget execution report for May 1983
Finance Committee Report
Routine Administrative matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer; telephone 202–523–4065.

Marjorie W. Emmons,
Secretary of the Commission.

[S–657–83 Filed 6–14–83; 12:55 pm]

BILLING CODE 6715–01–M

3

FEDERAL HOME LOAN BANK BOARD

TIME AND DATE: 10 a.m., Thursday, June 23, 1983.

PLACE: Board Room, sixth floor, 1700 G Street NW., Washington, D.C.

STATUS: Open meeting.

CONTACT PERSON FOR MORE INFORMATION: Ms. Gravlee (202–377–6970).

MATTERS TO BE CONSIDERED:

Information Disclosure Requirements in Connection with Conversions from the Mutual to the Stock Form of Organization, Filings Under the Securities Exchange Act of 1934, the Issuance of Mutual Capital Certificates, Debt Securities, and Retail Repurchase Agreements.

[No. 44, June 14, 1983]

BILLING CODE 6720–01–M

4

FEDERAL MARITIME COMMISSION

TIME AND DATE: 9 a.m., June 22, 1983.

PLACE: Hearing Room One, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Status of Agreement No. 10429 between Naviera Central, C.A. and Naviera Continental, S.A.
2. A. N. Deringer, Inc. and W. R. Filbin & Co., Inc.—Purchase and Sales Agreement and Related Covenants Not to Compete—Issue of Commission Jurisdition.
3. Agreement No. 10463: Sailing and Space Charter Agreement between Lineas Maritimas Paraguayas S.A. and Holland Pan-American Line.
4. Agreements Nos. 7540–38 and 7540–39: Modifications of the United States Atlantic and Gulf/Southeastern Caribbean Conference Agreement to clarify that the Conference has the authority to establish rules on demurrage and for other purposes.
5. Agreements Nos. 14–48, 5700–31, 10107–15 10108–10: Modifications, respectively, of the Trans Pacific Freight Conference (Hong Kong), New York Freight Bureau, and Agreements Nos. 10107 and 10108 to authorize payment of compensation to container freight station and container yard operations in Hong Kong and Tawain.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary (202) 523–5725.

[S–661–83 Filed 6–14–83; 3:15 pm]

BILLING CODE 6730–01–M

5

NUCLEAR REGULATORY COMMISSION

DATE: Week of June 13, 1983 (Revised) and Week of June 20, 1983.

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open and closed.

MATTERS TO BE DISCUSSED: *Wednesday, June 15:*

10:00 a.m.:
Discussion on Status of Staff Certification in TMI–1 Restart Proceeding (Public Meeting) (As Announced)
2:00 p.m.:
Briefing on Status of Midland Plant (Public meeting) (New Item)

Thursday, June 16:

2:00 p.m.:
Discussion of Management-Organization and Internal Personnel Matters (Closed—Exemptions 2 and 6) (As Announced)

Friday, June 17:

2:00 p.m.:
Discussion of Regulatory Reform Task Force—Administrative Proposals—Backfit Rule (Public Meeting) (Time Change)

Monday, June 20:

2:00 p.m.:
Briefing on Integrated Scheduling Concept—Duane–Arnold (Public Meeting)

Tuesday, June 21:

10:00 a.m.:
Discussion of TMI–1 Restart (Open/Closed to be Determined) (*Postponed* from June 16)

Wednesday, June 22:

10:00 a.m.:
Discussion of Regulatory Reform Task Force—Administrative Proposals—Revisions to Part 2 (Public Meeting)
2:00 p.m.:
Briefing on Prioritization of Generic Issues (Public Meeting)

ADDITIONAL INFORMATION: On June 9, 1983 the Commission voted 5–0 to hold Discussion and Vote on Indian Point Order, held on June 10.

AUTOMATIC TELEPHONE ANSWERING SERVICE FOR SCHEDULE UPDATE: (202) 634–1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

CONTACT PERSON FOR MORE INFORMATION: Linda Stoloff (202) 634–1410.

Linda Stoloff,

Office of the Secretary.

Federal Register Thesaurus of Indexing Terms

Federal Register Thesaurus of Indexing Terms

1 CFR 18.20 requires Federal agencies to identify major topics and categories of persons affected in their regulations in standard terms from the Federal Register Thesaurus of Indexing Terms. The Thesaurus was last published in the **Federal Register** of February 17, 1981 (46 FR 12618). A revised edition of the Thesaurus is published today for use by agencies and for public information.

Scope

The Federal Register Thesaurus is a basic indexing vocabulary for Federal regulations which are published in the **Federal Register** and the *Code of Federal Regulations*. It includes indexing terms to describe the specific program regulations of individual agencies as well as general administrative regulations common to all agencies. The indexing terms included are intended to express and organize the often technical regulatory concepts in research terms familiar to laypersons.

Use

The Office of the Federal Register uses the Thesaurus as the basis for the subject entries in the *Code of Federal Regulations* Index which is published annually as of January 1. Federal agencies also use the Thesaurus to prepare the "List of Subjects" which is included in rule and proposed rule documents submitted for publication in the **Federal Register**. The Office of the Federal Register selects terms from these agency-compiled subject lists to prepare the "Selected Subjects" which appears on the inside cover of the **Federal Register** daily.

Federal agencies and Office of the Federal Register staff members have suggested a number of additions and/or changes to the Thesaurus during the past two years. Some of these suggestions have been incorporated into this edition of the Thesaurus as indexing terms. Others have been added as cross-references to indexing terms. For the convenience of users a list of indexing terms added since the last printing of the Thesaurus appears below.

Adoption and foster care
Animal biologics
Animal welfare
Bank deposit insurance
Child support
Confidential business information
Countervailing duties
Disability benefits
Equal access to justice
Flood control
Food packaging
Fuel economy
Government publications
Hazardous substances
Hazardous waste
Homeworkers
Hostages
Indians-judgment funds
Indians-tribal government
Lobbying
Pension insurance
Plant diseases and pests
Real property acquisition
Reporting and recordkeeping requirements

Organization

There are two sections to the Thesaurus. The first is an alphabetic list of all indexing terms with a series of notations under each term to refer users to preferred or related terms. The second is a grouping of terms under 19 broad subject categories, allowing the user to determine quickly the existing Thesaurus terms for that broad subject.

Copies

Copies of the Thesaurus are available from the Office of the Federal Register, National Archives and Records Service, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Carol Mahoney, telephone (202) 523–5240.

Department of Transportation

Research and Special Programs Administration

Cryogenic Liquids; Final Rule

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171, 172, 173, 174, 176, 177, 178, and 179

[Docket No. HM-115, Amdt. Nos. 171-74, 172-82, 173-166, 174-43, 176-17, 177-60, 178-77, 179-32]

Cryogenic Liquids

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: This rule amends the Hazardous Materials Regulations to establish requirements for the transportation of certain cryogenic liquids and also to authorize the transportation of certain gases that are transported in cold liquid form.

Included in the final rule are provisions—

(1) To provide a new DOT specification cargo tank for the transportation of cryogenic liquids;

(2) To authorize the rail carriage of ethylene, cryogenic liquid in addition to hydrogen, cryogenic liquid;

(3) To establish requirements governing the maintenance and use of packagings used to transport these liquids;

(4) To establish minimum requirements for the transportation of nonflammable, nonpressurized cryogenic liquids that until now were not generally subject to the Hazardous Materials Regulations;

(5) To authorize the bulk transportation of ethane and hydrogen chloride in cold liquid form; and

(6) For flammable cryogenic liquids—

(i) To expand the scope of the regulations to apply to the intrastate as well as the interstate transportation of these materials; and

(ii) To require DOT registration of shippers and carriers and the specific training of drivers.

This rule will alleviate the difficulties engendered under the exemption program and the standardization achieved by issuing these rules will contribute to improved overall safety in the transportation of these materials.

EFFECTIVE DATE: January 1, 1984. However, compliance with the regulations as amended herein is authorized on and after September 15, 1983.

For the purpose of this final rule, the 30 day limitation for the receipt of a petition for reconsideration (49 CFR 106.35) is hereby waived and 90 days provided in place thereof. Petitions for reconsideration will be received on or before September 14, 1983.

The incorporation by reference of certain publications listed in the regulation is approved by the Director of the Federal Register as of January 1, 1984.

FOR FURTHER INFORMATION CONTACT: Jose Pena, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 755-4906. Office hours are 8:30 to 5:00 p.m., Monday through Friday

SUPPLEMENTARY INFORMATION: Information collection requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned the following numbers: OMB #2137-0541 (Shipper's or Carrier's Registration Statements, §§ 173.11 and 177.826), OMB #2137-0542 (Cargo Tank Pressure and Temperature Records, § 177.840), OMB #2137-0539 (Special Instructions for Cryogenic Liquids, § 177.818), OMB #2137-0540 (Flammable Cryogenic Training Records, § 177.816), and OMB #2137-0017 (Cargo Tank Certification Record Requirements, §§ 178.338-2, 178.338-4, 178.338-19).

This rulemaking has a long history. Prior to today's publication the following notices have been published in the **Federal Register**, and a public hearing held, with regard to Docket HM-115:

(1) On March 1, 1974, the Hazardous Materials Regulations Board, MTB's predecessor, published a Notice of Proposed Rulemaking (NPRM) (39 FR 7950).

(2) On June 19, 1974, the Board extended the comment period (39 FR 21166).

(3) On September 10, 1974, the Board converted the NPRM into an Advance Notice Of Proposed Rulemaking (ANPRM) and further extended the comment period (39 FR 32624).

(4) On March 8, 1979, MTB published a NPRM which, while in general terms continuing the regulatory scheme proposed in the 1974 ANPRM, made significant changes in several areas. Readers who wish more information on these changes are referred to the preamble discussion in the NPRM (44 FR 12826). This notice also announced a public hearing.

(5) On April 5, 1979, corrections and changes were made to the NPRM (44 FR 20461).

(6) On April 17, 1979, MTB held a public hearing on the NPRM.

(7) On June 21, 1979, additional changes were made in the NPRM and the deadline for filing comments was extended (44 FR 36211).

The purpose of this rulemaking is discussed in the March 8, 1979 preamble. Briefly, some of the transportation subject to this rule has historically been permitted only under an exemption (called in years past a special permit). This exemption program, provided for in § 107(a) of the Hazardous Materials Transportation Act (49 U.S.C. 1806(a)), has required those wishing to transport these commodities to come to MTB for specific approval of the packaging (and how the packaging is to be maintained), the hazardous materials to be transported in the packaging and the conditions of transportation. Exemptions create burdens on shippers, carriers, packaging manufacturers and the MTB itself and should be replaced by regulation as soon as appropriate. To the extent that the regulations have not provided for the carriage of these materials, these burdens have been necessary in order to accommodate commerce and, at the same time, ensure public safety. This rule will alleviate the difficulties engendered under the exemption program and the standardization achieved by issuing these rules will contribute to improved overall safety in the transportation of these materials.

Another major impact of this rule is the application of certain regulatory requirements to nonflammable cryogenic gases, like nitrogen and helium, transported in nonpressurized form. These commodities have previously been unregulated by MTB except when transported by vessel. However, MTB believes that the extreme thermal hazards these materials pose in their cryogenic form warrant the imposition of the limited requirements contained in this rule. This will be more fully discussed below.

Approximately 30 comments were received on the proposals contained in the NPRM. All comments, including late submissions, have been fully considered by MTB during the development of this final rule. Several well-defined aspects of the NPRM were the subject of most of the commentary. These significant issues are discussed below by subject. Following the subject-by-subject review is a Review by Section which briefly discusses each section of the rule and the significant changes that have been made since the NPRM.

Use of Aluminum

The NPRM proposed that aluminum be permitted to be used to fabricate the

inner vessel of an MC–338 cargo tank, but that the jacket surrounding the insulation of these containers, when used in oxygen service, must be made of steel. This proposal was based on the adequacy of recently developed industry cleaning standards. The NPRM included a discussion of the use of aluminum in certain packages that come in contact with cryogenic oxygen and specifically asked for public comment concerning this issue (44 FR 12828).

Several commenters supported the use of aluminum in the fabrication of the outer jacketing, as well as the inner vessels, of packagings used for the transportation of cryogenic oxygen. The commenters mentioned the excellent low temperature characteristics of aluminum and the fact that the oxygen does not react adversely with aluminum. In further support of this position, one commenter noted that MTB was planning to issue a proposal for an aluminum cylinder specification for the transportation of oxygen and other gases. (The final rule was published in the **Federal Register** on December 24, 1981, under Docket HM–176, Specification and Usage Requirements for DOT–3AL Seamless, Aluminum Cylinders (46 FR 62452)).

MTB agrees with these comments to the extent that it proposed, and now adopts in this rule, requirements permitting the use of inner tanks constructed of aluminum to transport cryogenic oxygen, if proper precautions are taken to ensure that the packaging is cleaned of all foreign matter. In order to ensure the cleanliness of cargo tanks, MTB is adopting the cleaning standards contained in Compressed Gas Association (CGA) Pamphlet G–4.1. However, MTB strongly believes that it should not permit the use of aluminum jackets on cargo tanks used to transport a flammable cryogen or pressurized, cryogenic oxygen. In a fire situation any escape of these materials would serve to greatly intensify the fire. Considering that aluminum loses most of its strength at 500° F. and melts at 1200° F., it follows that the protection afforded by aluminum is far less than that afforded by steel, which retains a great deal of its strength at aluminum's melting point and which does not melt until heated to approximately 2600° F. Notwithstanding the good safety experience of nonregulated, nonpressurized cryogenic oxygen cargo tanks, as well as some early exemption (special permit) tanks, and in the absence of any meaningful tests on cargo tanks demonstrating the survivability of aluminum in a fire environment, MTB has concluded that aluminum outer jackets do not provide an acceptable level of safety in cargo tanks used to transport cryogenic oxygen, at pressures in excess of 25.3 psig, or flammable cryogens.

As proposed in the NPRM, this rule prohibits the use of aluminum valves with rubbing or abrading aluminum internal parts in packagings transporting cryogenic oxygen. The reason for this prohibition is the possibility that the heat generated by abrading parts, together with the formation of feather-tipped projections creates a potential for combustion. The same prohibition was also proposed for flammable cryogens; however, in the final rule, based on comments and MTB's reevaluation of potential consequences resulting from release in a fire, this prohibition has been extended to any aluminum valve, pipe or fitting.

Pressure Relief Device Systems

Several commenters suggested that the requirements contained in CGA Pamphlets S–1.1, S–1.2 and S–1.3 provide adequate protection for cargo tanks from overpressurization. One commenter contended that a single relief device system that is sized using the CGA standards is adequate. The commenter believes that the proposal in the NPRM, that there be a primary and secondary pressure relief device system of equal capacity, was excessive and unwarranted. This contention has also been raised in applications for exemption. MTB has consistently maintained that spring loaded relief valves are mechanical and therefore subject to malfunction, and that in an accident situation a tank may be in an inverted position discharging liquid and therefore relieving pressure at a much lower rate than when discharging vapor. There is also a significant body of analytical and experimental data that raises questions as to the adequacy of the CGA valve sizing due to several assumptions made in the formulas, such as the heat conduction values of the insulation and the total tank area considered as exposed to fire, which provide lower calculated capacities than MTB believes is necessary to assure an acceptable level of safety in a fire situation. Therefore, MTB considers that the primary and secondary relief capacities prescribed in the NPRM are necessary to assure an acceptable level of protection in transportation and they have been retained in this rule at § 173.318(b).

One commenter objected to the proposed marking of each valve with a rated pressure equal to or exceeding the tank design pressure at the coldest temperature expected to be encountered (proposed § 178.338–8(b)(2)). The commenter believed that such marking conflicts with requirements found to be acceptable by the ASME Code and various piping codes. MTB agrees and has determined that this marking is not necessary and therefore has revised this paragraph to require only that each valve must be constructed and rated for a pressure equal to or exceeding the tank design pressure at the coldest temperature to be encountered. Additional proposed market requirements in § 173.318(b)(5)(ii), for pressure relief devices remain unchanged in this final rule.

Minimum Outage and Filling Densities

One commenter implied that the proposed minimum outage requirement was too restrictive for pressurized nonflammable cryogenic liquids. The commenter expressed that the minimum outage for pressurized nonflammable cryogenic liquids should be 0.5%. MTB believes that a 2.0% minimum outage is appropriate for pressurized nonflammable as well as flammable cryogenic liquids. The greater minimum outage requirement will significantly reduce the likelihood that a cryogenic liquid will vent as a liquid through a pressure relief device. Given the fact that thermal hazards are posed by the release of these extremely cold liquid materials, whether they are flammable or not, this rule retains the proposed outage requirements.

Section 173.318(d) has been revised to exclude helium from the outage requirement because at relieving pressures it is no longer a liquid.

The commenter also recommended that the filling densities proposed in § 173.318(f) be changed to be consistent with his minimum outage recommendation. Since MTB will continue to use a minimum outage of 2.0%, the filling density changes are not necessary.

Venting, Holding Time, Trip Monitoring, and Equilibration of Cryogenic Liquids

In the NPRM venting, holding time and trip monitoring were addressed in proposed §§ 173.33(d)(1)(ii), 173.318(e), 177.840 (h), (i), and (j), and 178.338–9, and these requirements would have applied to all cryogenic liquids. Several commenters strongly urged that these requirements only apply to flammable cryogenic ladings. MTB has looked again at the issue of enroute venting and agrees with the commenters that enroute venting of nonflammable atmospheric cryogens and helium presents little hazard. Except for the holding time test contained in the MC–338 cargo tank specification, these requirements now

only apply to flammable cryogenic liquids. Each MC–338 cargo tank must have a rated holding time to be considered a specification cargo tank, whether it is used to transport flammable or pressurized nonflammable cryogenic liquids.

Equilibration, which was not addressed in the NPRM, is permitted at § 177.840 (i) and (j) of this rule. The concept of equilibration was advocated by several commenters. Essentially it represents a relaxation of the holding time requirement for flammable cryogens by allowing one-way travel time to be redetermined after a full equilibration of the cargo tank is performed. Equilibrations may only be performed at a facility that handles, and is therefore familiar with, flammable cryogenic liquids. Allowing such equilibrations will permit longer hauls to be made safely.

Liquefaction Temperature

There has been some confusion regarding the term "liquefaction temperature" which was used at several points in the NPRM in specifying design service requirements for packagings (see §§ 173.315(a) Table, Note 11, 178.338–1(c)(2)). The term was used without specifying the pressure at which the liquefaction temperature was to be established. This was an unintended omission because the liquefaction temperature of a cryogenic liquid or cold refrigerated gas varies with pressure. When transported in a pressurized condition the temperature is higher than at one atmosphere.

Several commenters called MTB's attention to this problem. (In the ANPRM at § 178.338–1(b)(2) the liquefaction temperature had been stated as being at one atmosphere.) Some commenters who favor design service temperatures based on liquefaction temperatures under pressurized shipping conditions indicated their belief that the omission seemed to support their position. One commenter indicated that it was his understanding that liquefaction temperature was to be determined at one atmosphere. It was MTB's intention that the liquefaction temperature be determined as indicated by this latter commenter.

Despite the omission in the NPRM, in the exemption process for cryogenic liquids and refrigerated gases such as ethane-propane mixes, MTB has, with but a single exception, specified that design service temperature be based on the liquefaction temperature at a pressure of one atmosphere, and MTB is continuing with the limitation in this rule. If a packaging has a design service temperature based on the liquefaction temperature of the lading under pressurized conditions and there is a sudden rapid release of the pressure for one reason or another, the release could result in temperatures colder than the design temperature of the packaging.

The reference pressure of one atmosphere has been added in the rule at §§ 173.315, Note 11, and 178.338–1(c)(2) to make the meaning of the term "liquefaction temperature" absolutely clear.

Jacket Design

Both the ANPRM and the NPRM contained lengthy formulas, details of welding and reinforcing ring construction, etc. for cargo tank evacuated jackets, which were patterned from rail car specifications. The June 21, 1979 **Federal Register** publication of changes to the NPRM altered this approach, at § 178.338–1(f), by simply referring to specific paragraphs of the ASME Code. One industry commenter was critical of this approach asserting that the ASME charts could be misapplied and/or are in error. As best MTB can determine, the commenter's point is that using ASME Appendix V charts in designing a tank for 7.5 p.s.i. minimum external pressure, which based on a safety factor of four should produce a collapsing pressure of 30 p.s.i., will theoretically result in a collapsing pressure of less than 30 p.s.i. as a result of a reduction in safety factors by ASME in 1977. MTB has dealt with this concern by revising § 178.338–1(f)(1) to reference a critical collapsing pressure of 30 p.s.i. rather than a design pressure of 7.5 p.s.i. This gives the same result as was intended in the NPRM and at the same time avoids any possible ambiguity that may result from the use of the ASME charts. This is consistent with the original Compressed Gas Association (CGA) proposal in CGA–341.

Postweld Heat Treatment

One commenter recommended that in the case of tanks constructed in accordance with Part UHT of the Code, postweld heat treatment be required by MTB only when required by the ASME Code (§ 178.338–2(e)). If postweld heat treatment were only conducted when required by the ASME Code, most of these cargo tanks would not be postweld heat treated since the cargo tank thickness is less than the thickness that the ASME Code requires be postweld heat treated. However, MTB believes that the postweld heat treatment of these thinner materials is necessary to provide maximum ductility to resist the vibrations and stresses inherent in the highway environment. Experience over many years with the use of postweld heat treatment in cargo tanks has been favorable and MTB feels there are important safety considerations justifying the requirement with regard to MC–338 tanks.

Pressure Testing

The NPRM, at § 178.338–16, proposed that newly constructed tanks be subjected to a pressure test at 1½ times design pressure, except that for tanks constructed of UHT steel a test pressure of two times design pressure was proposed. Several commenters urged that a test pressure of only 1¼ times design pressure be required. MTB believes that a test to 1½ times design pressure is necessary to prove tank integrity. One industry group asserted that such a requirement precludes pneumatic testing, which is necessary for tanks designed to carry large volumes of low density material, such as hydrogen or helium, and for which testing with dense material such as water presents difficulties. To the extent that a manufacturer does not wish to perform a pneumatic test, MTB does not believe this point is meritorious with regard to initial manufacturer's testing which can be performed while a tank is still on the fabrication floor where it can be supported over sufficient tank area to avoid distortion from water weight. MTB believes the general test pressure requirement of 1½ times design pressure ensures tank integrity and represents sound design and engineering practice in light of the fact that the highest setting for a relief device is 150 percent of design pressure.

The two times design pressure requirement for tanks constructed in accordance with Part UHT of the ASME Code is also being retained. It is not anticipated that this material will be used frequently in the construction of MC–338 cargo tanks; however, to the extent that it is used, MTB believes that the particular composition of this material and the process by which it is manufactured justify the higher test pressure requirements. This is consistent with other MTB requirements that exceed ASME Code requirements in several areas (such as in § 178.337 for MC–331 cargo tanks) when UHT steels are used.

One commenter recommended that the retest requirement at proposed § 173.33(d)(2) be eliminated for MC–338 cargo tanks with evacuated jackets. The commenter stated that such tanks in cryogenic liquid service are not subject to internal or external corrosion, and

that in effect the tank is under constant "leak test" because the slightest leak into the vacuum space would be readily detected. MTB does not agree that this retest should be eliminated. The retest, at higher that service pressure, is necessary to ensure the continued integrity of the tank.

MTB does agree with industry commenters that the proposed retest at 1½ times design pressure would, for purposes of personnel safety, require hydrostatic testing and that this not only poses structural problems for hydrogen and helium tanks, but creates problems in drying and preventing contaminants from entering the tank. Since the cryogenic materials are noncorrosive and since the tank has been subjected to a pressure integrity test of 1½ times design pressure at time of manufacture, MTB believes it is appropriate, without compromising safety, to allow the retest to be performed at 1¼ times design pressure. A procedure for performing pneumatic tests is provided at § 178.338–16(b).

Design Loadings

MTB received several comments concerning the "g" loading requirements. Concern was expressed regarding the different methods contained in the NPRM for defining the loadings (i.e., by "g" loadings and also as a function of weight of the tank). In order to clarify the support and anchoring requirements, MTB has revised § 178.338–13 by expressing all design forces as a function of the static loading imposed in the cargo tank and its attachments when the cargo tank is filled to the design weight of lading. These design forces apply to the tank and jacket as well as the support system.

One commenter urged that the proposed design forces be reduced. While present DOT exemptions (not specifying MC–331 construction) do not specify design forces for the tank or jacket of the vacuum-insulated cargo tank, MTB believes that it is necessary to specify some minimum design force considerations. It should be noted that the static loading requirements for the inner tank of a vacuum-insulated cargo tank were reduced from those proposed in the original NPRM by the June 21, 1979 publication modifying the NPRM. At the time this change was made, MTB stated that it would "not compromise the safety of the cargo tank because the outer tank, which is the structural member used in place of a motor vehicle frame, is proposed to be designed to "g" loadings of three vertical and two longitudinal and lateral." (44 FR 36211.)

As for the outer tank (generally referred to as a jacket in this rule) of a vacuum-insulated cargo tank, the same commenter believes the static loading requirements should be reduced from three vertical and two in all other directions to two vertical and 1½ in all other directions. This is the same loading requirement that was proposed (and is here made final) for the inner tank and its suspension members. MTB does not believe the commenter's recommended design forces are adequate. However, upon reevaluation, MTB does believe that the vertical loading requirement of three, proposed in the NPRM can be safely reduced since, for tanks with evacuated jackets, any dynamic forces are dampened by virtue of the double wall construction. This rule, therefore, imposes static loading requirements for the jacket of an MC–338 cargo tank of two in all directions. This agrees with the industry standard expressed in CGA–341.

Nonvacuum-insulated MC–338 cargo tanks are very similar in construction to MC–331 tanks with support members attached directly to the cold liquid tank. The NPRM proposed static loadings for this type of MC–338 tank that were the same as the required loadings for the MC–331. MTB believes the construction of this tank justifies the loading requirement of three in the vertical downward direction since those dampening factors that supported the reduction in vertical loading for the evacuated jacket are not present in this type of construction. There is also no logical reason for having a lower vertical loading requirement for this tank than for the MC–331 tank. For this tank, the proposed loadings in the NPRM are retained in the final rule.

Nonpressurized Atmospheric Gases and Helium

The MTB is adopting regulations that will apply to nonpressurized atmospheric gases and helium. In the NPRM, MTB stated as a basis for its proposed regulation of nonpressurized atmospheric gases and helium that "* * * certain requirements apply due to the extreme thermal hazard these low temperature materials pose to human tissue and, in the case of vessels, to shipboard structures."

Several commenters took strong exception to this specific proposal. Generally, they questioned the value of shipping papers and incident reports in dealing with the "so-called" thermal hazard of these cryogens. Also, commenters took exception to a statement in the regulatory evaluation for the proposal that indicated such materials could be considered corrosive from a technical standpoint. A commenter suggested that MTB's actual motivation was to obtain a reliable record (through incident reporting) of experience in transportation of such materials for purposes of more extensive regulation in the future. This commenter suggested such a record could be developed based on existing incident and accident reports without additional regulation. Further, he asserted that the existing safety record leads inevitably to the conclusion that such a "thermal hazard" does not, in fact, exist.

Another commenter noted that the ANPRM issued on March 1, 1974, and September 10, 1974 (39 FR 7950; 39 FR 32624) did not include these materials. He further indicated that MTB's proposal to regulate these materials due to the extreme thermal hazards these low temperature materials pose is tantamount to a finding by MTB, which the commenter felt had not been adequately supported, that, pursuant to 49 U.S.C. 1803 (enacted after the ANPRM was issued), the transportation of these cryogens may pose an unreasonable risk to health and safety or property.

MTB finds that the quantity and form of all materials subject to this final rule as cryogenic materials may pose an unreasonable risk to health and safety or property when transported in commerce due to the extreme thermal hazard they pose to human tissue. However, MTB acknowledges that the unreasonable risk potential presented by these materials because of their low temperature is not as significant as the risks posed by many other hazardous materials and, therefore, only a limited number of regulations should apply to their transportation.

If a liquid cryogen were to come into contact with any part of a human body, irreversible damage to tissue could be caused unless the contact is of short duration. This fact is verified in industry literature. While the industries known by MTB to engage in shipment and transportation of these materials have a good safety record, MTB concludes these materials are hazardous materials for purposes of transportation in commerce and that some, but not all, of the hazard communication regulations and the incident reporting requirements should apply to them.

Other cryogens are regulated because they pose risks in addition to their extreme thermal hazard. Principal among these risks are flammability and toxicity (e.g., carbon monoxide). A lesser degree of risk is posed by atmospheric gases and helium when transported at pressures greater than

25.3 psig. These pressurized materials are presently required to be carried in cargo tanks under conditions specified in exemptions because they are, by definition, compressed gases. The principal reason for a higher level of regulation of these materials is to assure that the integrity of their packagings is sufficient to prevent failure at the pressures the packagings can be expected to encounter during transportation. However, in terms of immediately available energy, there is no significant difference in the risk presented by a tank containing a cryogenic atmospheric gas at a pressure above 25.3 psig versus a tank containing a cryogenic atmospheric gas at a pressure below 25.3 psig. (MTB does not draw the same conclusion relative to tanks only partially filled since they have a greater immediate available energy potential when their relief valves are set at higher discharge pressures.)

Therefore, MTB concludes that the principal risk presented by packagings filled with atmospheric gases and helium is the thermal hazard these low temperture materials pose to human tissue and to shipboard structures and that specification packagings are not required for these materials when transported by motor vehicle or railroad at pressures at or below 25.3 psig.

It must be noted that the absence of accident data cannot be conclusive as to whether or not a material is a hazardous material. There are a number of hazardous materials currently subject to the regulations (e.g., spent nuclear fuel) for which there is no accident data indicating fatalities, injuries, or serious property damage as a result of accidents in transportation. If MTB were to agree that a material can not and should not be regulated unless there is accident data concerning transportation of the material in the form and manner to be regulated, MTB would be agreeing that it could only react to adverse experience in deciding if a material may pose an unreasonable risk when transported in commerce. The legislative history of the Hazardous Materials Transportation Act clearly establishes that a strictly reactive posture was not the intent of Congress.

In this final rule, MTB is adopting requirements pertaining to the identification of atmospheric gases and helium when they are carried in packagings at pressures at or below 25.3 psig, and incident reporting requirements consistent with those specified for other hazardous materials. The communications requirements relate to the preparation of shipping papers and the marking of packagings including cargo tanks and tank cars. Except for oxygen, MTB is not adopting requirements pertaining to labeling of packages and the placarding of vehicles and rail cars (except for carriage aboard aircraft and vessels). With the exception of oxygen, MTB does not believe that placarding and labeling are necessary for these materials. The identification of the materials by marking will be sufficient for communication of the risk they present during transportation and will allow for improved emergency response through use of identification numbers. MTB believes the risk presented by oxygen warrants the implementation of placarding and labeling requirements for this material (see NFPA Pamphlet 53M entitled, "Fire Hazards in Oxygen-Enriched Atmospheres 1979", for information concerning accidents involving oxygen, including cryogenic oxygen).

The Impact of This Rulemaking on Existing Exemptions

A number of cargo tanks are currently being operated under exemption, carrying pressurized and/or flammable cryogenic liquids. The NPRM proposed that where practicable these tanks be modified, remarked and rerated to MC-338 Specifications. Where not practicable, the NPRM proposed that the exemption holder so advise MTB, giving the reasons. The NPRM did not address what MTB would do after being so notified. The same process was proposed for rail cars currently transporting ethylene, cryogenic liquid under exemption. Exemption holders were concerned about the impact of the rule on outstanding exemptions and the extent of modifications to these existing tanks, and attendant expense, that MTB would require in an effort to bring them into compliance with the new specification requirements.

MTB has decided to completely resolve this issue by allowing existing cargo tanks and tank cars authorized to transport a cryogenic liquid or certain cold refrigerated gases under an outstanding exemption to be remarked and rerated as specification tanks without undergoing modification. MTB believes this "grandfathering" of existing tanks is necessary to avoid potential severe economic consequences to some exemption holders and can be justified from a safety point of view because of the thorough technical review involved in the exemption process, notwithstanding the fact that certain aspects of certain exemptions may differ from this final rule. However, no new construction under these exemptions may be initiated after January 1, 1984.

Under this rule, the owner or the person using a cargo tank or tank car complying with a DOT exemption listed below should remove the DOT exemption number stenciled on the cargo tank or tank car and stamp the identification plate as specified by § 173.31(a)(8), § 173.33(b)(2), or § 173.33(b)(3), as applicable, according to the proper specification. A copy of the applicable exemption in effect on December 31, 1983, must be retained by the owner or operator, if not the owner, for a tank remarked as a DOT specification packaging.

The DOT exemptions affected by this rulemaking are as follows:

Exemptions—Tank Cars

4717	6231	7491
5736	6193	
5792	6625	

Exemptions—MC-338 type Cargo Tanks

2587	5959	7102
2708	6039	7207
2805	6111	7444
3367	6113	7494
3648	6173	7513
4106	6197	7600
4299	6206	7603
4400	6218	7949
4404	6243	7911
4490	6403	8286
4497	6432	8393
4554	6464	8404
4760	6536	8583
5106	6545	8753
5108	6571	8763
5322	6738	8768
5365	6755	8776

5485	6802	8809
5825	6919	8894
5852	6923	8954
5954	7025	

Exemptions—MC-330 or MC-331 Cargo Tanks

5082	7744	8443
6939	7957	8476
6978	8336	8504
7632	8442	

Exemptions-Cylinders

Cylinders marked "DOT E-6668", "DOT E-8404" or cylinders marked "DOT SP-6668" prior to issuance of the exemption may be marked "DOT-4L" as specified by § 173.23(D) of the rule.

Review by Section

Readers are reminded that this Review discusses only significant comments on the proposals in the NPRM and changes made to the NPRM in this Final Rule. For those provisions that are unchanged, readers are referred to the preamble discussion in the original NPRM (44 FR 12826, March 8, 1979) and subsequent correction documents (44 FR 20461, April 5, 1979; 44 FR 36211, June 21, 1979).

Section 171.1. There is no change, except that the proposed language in § 171.1(a)(i) is now contained in § 171.1(a)(iii) due to amendments to the Hazardous Materials Regulations subsequent to the issuance of the NPRM. Due to the length of time between the NPRM and this Final Rule, provisions have been relocated within a section in a number of instances. Throughout the remainder of this preamble, only significant relocations will be commented on.

Section 171.7. In § 171.7, paragraph (c)(3) is revised to reflect the new address of the Compressed Gas Association and, although they were not a part of the NPRM, paragraph (d)(3)(v) is revised to recognize the 1980 edition of CGA Pamphlet S–1.2 and paragraph (d)(12) is revised to recognize the 1978 edition of Federal Standard H–28 which superseded National Bureau of Standards Handbook H–28. The purpose of these and other changes is to recognize the most up-to-date standards so that users of these references will not have to hold superseded editions. MTB has examined the new standards and for the purpose of this incorporation by reference, recognition of the newer editions does not substantively affect the Hazardous Materials Regulations.

Section 171.8. The proposed definition of "filling density" is changed by including a separate entry for hydrogen, cryogenic liquid, in cylinders. The separate filling density reference for hydrogen, cryogenic liquid, in cylinders is needed for clarity. The separate requirement for hydrogen existed at proposed § 173.316(c)(3) of the NPRM, however the lack of a separate reference in § 171.8 may have led to some confusion. This change will avoid that. Also, MTB has added definitions of "atmospheric gases", "BTU", "cryogenic liquids", and "NPT". These added definitions are also to add clarity. The definition of "atmospheric gases" is especially important since under certain circumstances this rule excepts these materials from certain requirements.

Section 172.101. Five commenters addressed the proposed changes to the Hazardous Materials Table, including the Air Transport Association (ATA) and the Compressed Gas Association (CGA).

ATA's comments included the following suggestions: (1) to add "air, cryogenic liquid", "neon, cryogenic liquid", and "cryogenic liquid, n.o.s." to the Hazardous Materials Table (the Table); (2) to forbid pressurized argon, helium, and nitrogen in cryogenic form from transportation by passenger aircraft; and (3) to authorize the use of cylinders for all cryogenic liquids listed in the Table. In the final rule, MTB has amended the Hazardous Materials Table as suggested by ATA to add "neon, cryogenic liquid". However, MTB does not agree that the descriptions "air, cryogenic liquid" and "cryogenic liquid, n.o.s." should be added to the Table. MTB is unaware of any exception from the practice whereby the various cryogenic liquid fractions are separated and shipped in the form of liquid oxygen, liquid nitrogen, etc. Concerning the prohibition proposed by the ATA on the transportation of cryogenic argon, helium and nitrogen aboard passenger carrying aircraft, ATA did not provide any explanation of its concerns that malfunctioning of a pressure controlling valve would result in operation of a safety relief valve. If for any reason, including a blockage in the pressure controlling valve, there is pressure rise in the cylinder, MTB believes that the safety valve should function at its set-to-discharge pressure. MTB's decision to authorize these materials aboard passenger carrying aircraft is consistent with the decision made by the Dangerous Goods Panel of the International Civil Aviation Organization (ICAO). MTB agrees with ATA that the use of cylinders should be allowed and, accordingly, has authorized these materials to be transported by air in DOT–4L cylinders or in accordance with ICAO requirements under § 171.11.

ATA also proposed that three separate entries be provided in the Table for each nonflammable cryogen. The entries would designate the cryogen as pressurized, low pressure and nonpressurized. MTB does not agree with ATA that three separate entries should be listed for the cryogenic liquids. The basis for ATA's recommendation was that separate entries, rather than the exception proposed at § 173.320, would clarify the applicable requirements for the varying pressures. MTB takes the position that the use of a single entry in the Table, with the exceptions referenced in column 5(a), is consistent with the format of the Table and is well understood by persons affected by the regulations. Should MTB conclude at some future date that some means are needed to differentiate among the various categories of these materials, it will consider the matter in a future rulemaking.

ATA also expressed concern that cryogenic liquids, such as helium and neon, having boiling points colder than the freezing point of air should not be permitted in air transportation when in Dewar flasks because of the possibility the vents may freeze with solid air thereby allowing internal pressure build-up MTB is aware that these packagings have been transported aboard passenger aircraft in the past with no reports of adverse experience that would justify such a prohibition. ATA provided insufficient data as to why this prohibition should be imposed and MTB is not aware of any data or information that supports ATA's position. MTB's decisions not to prohibit the transportation of Dewar flasks containing authorized cryogenic liquids by aircraft is consistent with ICAO. MTB's response is the same with regard to ATA's suggestion that, as another alternative, MTB should consider banning all air transportation of cryogenic liquids regardless of pressure in the packaging.

Another concern of ATA's was that the provisions in proposed § 173.320 do not clarify the fact that such shipments offered for transportation by aircraft are subject to shipping papers, marking, labeling and other requirements pertaining to carriage aboard an aircraft in Part 175. MTB agrees and has revised § 173.320 by removing the reference to aircraft.

Maximum net quantity limits aboard aircraft (the Table, column (6)) were recommended by ATA based on the pre-December 31, 1982 listings in the International Air Transport Association (IATA) Restricted Articles Regulations and the Air Transport Association's Tariff 6–D. CGA's comments also addressed quantity limits. CGA suggested quantity limitations for argon, helium, and neon (CGA, as well as ATA, suggested that neon be added to the Table) that exceeded those in the NPRM. A quantity limitation of 550 pounds of argon by cargo-only aircraft was recommended to allow the shipment of the "150 liter, industry standard container". A similar quantity limitation was recommended for neon. CGA recommended that the quantity limitation of 300 pounds of helium by cargo-only aircraft be increased to 1100 pounds to be consistent with present air shipments in standard containers that include a 1000 gallon container. CGA did not suggest any change in the proposed passenger aircraft limitation of 100 pounds for argon or helium and suggested the same limitation be provided for the new neon entry. MTB agrees with the intent of CGA's suggestions relative to maximum quantity per package aboard an aircraft, however, MTB has modified the suggestion by adopting the limitations used by ICAO for cryogenic liquids, rather than those of CGA, ATA or IATA. MTB believes usage of these

quantity limitations will facilitate transportation of these materials moving in international commerce by air without compromising safety. The maximum net quantity in one package by cargo-only aircraft of helium, neon, and nitrogen is 1,100 pounds and the maximum net quantity of argon is 300 pounds. The quantity limitation in one package of these gases by passenger aircraft is 100 pounds.

Several commenters addressed the proposed stowage requirements for water shipments, which in several instances were more stringent that the stowage currently allowed. Specifically, argon, cryogenic liquid and helium, cryogenic liquid were proposed to be allowed "on deck" stowage, and oxygen, cryogenic liquid was proposed to be allowed "on deck" stowage on a cargo vessel, but forbidden on a passenger vessel. (Present regulations allow helium and the cryogenic forms of argon and oxygen to be stowed on deck or under deck. Argon and oxygen when stowed under deck must be "under deck away from heat.") After further consideration of the proposed stowage requirements, the Coast Guard, which assisted MTB in the preparation of these requirements, agreed to the stowage requirements contained in the present regulations except for that which permits oxygen, cryogenic liquid, to be stowed "under deck" on a passenger vessel. This rule does, however, permit oxygen, cryogenic liquid to be stowed on deck on a passenger vessel and it does not appear there will be any hardship created by this requirement.

Three commenters also objected to the proposed provision prohibiting hydrogen, cryogenic liquid, on board a cargo vessel. The commenters argued that the "5" in column 7(a) should be changed to "1" for consistency with other flammable cryogenic liquids which have similar properties. MTB and the Coast Guard do not agree with the commenters because hydrogen with its wider flammability limits poses a greater potential hazard than other flammable cryogenic liquids. Therefore, the suggested change has not been made.

A change has been made in column (7)(b) for gaseous hydrogen from "54" to "4". The reason for this second change is to correct a typographical error since the number "54" had no meaning and the entries "5" and "4" were conflicting. Retaining only the number "4" allows the water shipment aboard passenger vessels of limited quantities of the material.

ATA and CGA were not in favor of including the term "cryogenic liquid" as part of the proper shipping name. ATA, as discussed earlier, supported use of the descriptions "low pressure", "non-pressurized" and "pressurized". CGA recommended that the term "pressurized liquid" be used for consistency with the terminology in existing regulations. MTB believes the "cryogenic liquid" terminology more readily conveys the thermal hazard posed by these materials to emergency personnel and transport workers. Therefore, the term "cryogenic liquid" is being retained as part of the proper shipping description in the final rule.

MTB has added identification numbers to the new entries being included in the Hazardous Materials Table. This is in accordance with the final rule issued under HM-126A (which was completed after the NPRM for this action (45 FR 34560; May 22, 1980)). The new cryogenic liquid descriptions are preceded by an "NA" prefix.

Another major change since the NPRM is the addition of certain entries designated as "liquid (*refrigerated*)". These entries cover materials that, while not meeting the definition of a cryogenic liquid, are gases at atmospheric pressure and ambient temperatures and are transported in cold liquid form. MTB has added these materials to this rulemaking in order to eliminate a number of exemptions. Because of the grandfathering of packagings covered by existing exemptions, the addition of these materials to the Table and related requirements will not add to the burden of current exemption holders. In fact, the addition of these materials to the Table eliminates the need for an exemption to transport these hazardous materials.

Finally, several commenters requested that the current proper shipping name of hydrogen chloride be retained rather than modified by the description "anhydrous", as proposed in the NPRM. The commenters pointed out that the use of "hydrogen chloride" to describe anhydrous material is universally known in the industry and adding the word "anhydrous" is unnecessary. As requested by these commenters, MTB has allowed the current name, "hydrogen chloride", to remain.

Section 172.203. Three commenters pointed out that the notation on shipping papers used to alert rail carriers that certain tank cars may not be humped or cut off while in motion should be applicable to DOT 113D tank cars. MTB agrees with the commenters. Omission of the DOT 113D tank car was an oversight. MTB has revised paragraph (g)(3) to clarify that the notation is applicable to any class DOT 113 tank car.

Section 172.328. The parenthetical language "(including a cryogenic liquid)" has been added to clarify the fact that this provision applies to those materials.

Section 172.504. Instead of deleting Note 2 to Table 2 and renumbering the remaining Notes, as proposed in the NPRM, the text to Note 2 is removed and Note 2 is reserved.

Section 173.11 (proposed as § 173.5). Several commenters objected to the proposed requirements in this section for shippers of flammable cryogenic liquids in portable tanks, cargo tanks and tank cars, and the proposed requirements in § 177.825 (now § 177.826) for carriers of flammable cryogenic liquids in cargo tanks by highway, to file registration statements with MTB. Three of the commenters opposed the requirements as unnecessary. One of the commenters pointed out that registration is not required for other hazardous materials, that there is no evidence that it is needed here, and that such a requirement is contrary to the intent of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520). Three commenters objected to the provision in the proposal that would require the registration statement to be acknowledged by MTB prior to shipment of flammable cryogenic liquids since it was believed this would result in unnecessary and unreasonable delays. A different commenter suggested that the words "cargo tank" should be included in paragraph (a)(5) for consistency with the intent stated in the preamble. The remaining commenter suggested that the requirement should not apply to shippers of tank cars since it was not a requirement in the exemptions and the requested information would not enhance safety.

MTB disagrees with the commenters who believe that there is no need for registration of shippers and highway carriers of flammable cryogens. The registration requirement adopted in this rule will provide important information which will enable MTB to identify and locate shippers and carriers of these very hazardous materials for periodic inspections of their operations. For the same reason, MTB has not excepted shippers of tank cars from the requirement.

MTB does agree with the commenters' concern regarding the potential time lapse prior to MTB acknowledgement. It is MTB's intention that the registration statements be processed in a timely manner. Accordingly, as suggested by one of the commenters, MTB has revised the requirement to allow the registration statements to be filed by certified mail with a return receipt requested. The signed copy of the returned certified

mail receipt will serve as MTB's acknowledgement of the registration statement. A similar change has been made to § 177.828.

Additional changes to this section since the NPRM, include the requirement that registration filings be with the Associate Director for Hazardous Materials Regulation, rather than the Associate Director for Operations and Enforcement. This is not a substantive change and merely represents a reorganization of functions within MTB. The section has been reorganized and the commenters suggestion that cargo tanks be added in proposed paragraph (a)(5) has been adopted (the corollary paragraph in the final rule is (b)(4)). Finally, the dates on which registration begins have been revised to be consistent with the effective date of this rule.

Section 173.23. A new paragraph (d) is added to permit remarking of cylinders covered by a DOT exemption, as discussed under the heading "Impact of This Rulemaking on Existing Exemptions."

Section 173.29. Proposed paragraph (f)(3) would have prohibited venting of any gas, other than an atmospheric gas, remaining in a tank car previously used to transport a cryogenic liquid. Upon review, MTB believes the same purpose is served by the present requirement of paragraph (c)(2) which requires that an empty tank car that has been used to transport a hazardous material must be shipped in the same manner as when it contained a greater quantity of material unless it has been cleaned, purged or reloaded with a material not subject to the regulations. Therefore, proposed paragraph (f)(3) has not been incorporated into the final rule.

Section 173.31. Proposed paragraph (a)(6) (paragraph (a)(8) herein) is revised as discussed under the heading "Impact of this Rulemaking on Existing Exemptions" to permit remarking of tank cars covered by a DOT exemption. Additionally, the provision has been changed to allow the operator as well as the owner to do the remarking.

A new paragraph (a)(9) is added to provide that tank cars built to Specifications DOT–113A175W, DOT–113C60W, DOT–113D60W, or DOT–113D120W may continue in service, but no new construction of these tank cars is authorized. No new construction of any of the tanks have been authorized under exemption since 1973. The only tank cars authorized for new construction are specification DOT–113A60W (for hydrogen) and specification DOT–113C120W (for ethylene).

Proposed paragraph (c)(13)(i) is revised, as suggested by two commenters, to clarify that a class DOT–113 tank car is not required to be retested unless the pressure rise in the tank exceeds 3 psi per day. If the pressure rise exceeds 3 psi, the tank must be properly retested prior to being returned to service. The NPRM language was not as clear and referred only to 113A cars. Application of this provision to all DOT–113 cars was intended. The correction of this oversight represents a relaxation of the proposed requirements. Two commenters to paragraph (c)(13)(i) stated that the requirement to monitor the cars for pressure rise should only apply to cars transporting flammable cryogens. MTB notes that at the present time the only cryogens authorized for shipment in tank cars are flammable and hence although the language of this section does not limit application to flammable cryogens, § 172.101 does.

In paragraph (c)(13)(ii)(B), the proposed evaporation rate retest has been replaced with a calculated heat transfer rate (CHTR) retest to more accurately reflect the performance tests specified for class DOT–113 tank cars operating under exemption and to be consistent with a change made to proposed § 179.400–4 and published in this rule. The CHTR retest provides a method for qualification of a tank car insulation system that can be more readily accomplished than that which was proposed in the NPRM.

Paragraph (c)(iii) has been rewritten to clarify the fact that successfully completing either of the retests prescribed in (c)(ii) will allow a car to be placed back in service.

In this section, as in a number of others, the term "safety relief valve" has been replaced by the term "pressure relief valve." While both terms are generally understood by industry to refer to the same device, MTB believes that "pressure relief valve" is the more accurate term and MTB, in line with certain industry groups, is using this terminology in this rule. MTB has not attempted to change all references in the Hazardous Materials Regulations where the term "safety relief valve" is used. For purposes of the Hazardous Materials Regulations the terms have the same meaning.

Retest Table 1, which until this rule followed paragraph (d)(4), now follows paragraph (c)(13) and has been expanded to include tank cars formerly under DOT exemption that are to be remarked in accordance with paragraph (a)(8) of this section. Additionally, the DOT–113A175W car, proposed to be deleted, has been left in the Retest Table to meet the needs of a commenter who indicated that tank cars of this type have been reconditioned and returned to service. In response to another comment, the footnote references have been corrected. Also, the vapor tight pressure for the DOT–113A175W tank car has been reduced to 80 percent of the start-to-discharge pressure of the safety relief valve. This change is consistent with the vapor tight pressure valves used for other DOT class tank cars. Two other commenters recommended that a new footnote "t" be added following the table to cover the retest of alternate safety relief valves when installed. Such a footnote is not necessary, however, because § 173.31(c)(13)(v) prescribes a retest that is applicable to any alternate safety relief device.

Section 173.33. Several changes to this section have been discussed previously in the preamble in the subject-by-subject review: (1) Cargo tanks currently used to transport cryogenic liquids under exemption will be "grandfathered" and will not have to be modified or have the inability to make such modifications explained to MTB (proposed §§ 173.33 (b)(2) and (b)(2)(iii)); (2) the holding time verification (proposed § 173.33(d)(1)(ii)) now only applies to cargo tanks containing flammable cryogenic liquids rather than all cryogenic liquids; and (3) the required retest pressure for an MC–338 tank (proposed § 173.33(d)(2)) has been reduced from 1⅛ times maximum allowable working pressure to 1¼ times that figure.

Additionally, the section has been revised to require cargo tanks currently used to transport certain cold, refrigerated gases under exemption to be stamped with the MC–330 or MC–331 specification identification followed by the exemption number. This serves to "grandfather" these tanks, thereby removing them from the exemption program (although the exemption number will remain with the tank for its service life to substantiate the authorized use of the tank).

The pneumatic testing method in paragraph (d)(2) no longer specifies that a soap and water solution or other suitable material must detect leaks through the presence of foaming or bubbling. Now any "equally sensitive method" is acceptable. This change provides greater flexibility and recognizes that there may be a number of acceptable methods for detecting leaks.

Another change allows either the owner or operator of a tank currently operating under exemption to perform the remarking. The NPRM spoke in terms of the exemption "holder". This

change recognizes the fact that frequently a tank may be under long-term lease to an operator who has exclusive use and possession of the tank. This person is authorized to perform the remarking, thereby reducing the possibility that a tank would have to be taken out of service so that the "holder" could perform the remarking.

The names "carbon dioxide" and "nitrous oxide" are removed and replaced by "carbon dioxide, liquid *(refrigerated)*" and "nitrous oxide, liquid *(refrigerated)*" each time they appear in this section.

Section 173.300. A commenter suggested that the definition of a cryogenic liquid in proposed paragraph (f) be changed to specify a reference pressure at 14.7 psig for "technical clarification." MTB believes a reference pressure would clarify the provision and, for consistency with the liquefaction temperature, has specified a pressure of one atmosphere.

In the NPRM, the definition for filling density in paragraph (g) would have been redesignated as paragraph (h) and amended to indicate the different sections applicable to cryogenic liquids. However, MTB has removed present paragraph (g) in the final rule since a definition of filling density has been added to § 171.8.

Section 173.304. The proposed Table to paragraph (a)(2) has been changed. "Hydrogen chloride" is no longer being deleted and added as "Hydrogen chloride, anhydrous." As noted in the discussion of § 172.101, the name of this material is no longer being changed. However, the name "carbon dioxide, liquefied" is being removed and the name "carbon dioxide" is added.

As noted in the April 5, 1979 addition to the NPRM, paragraph (b) has been revised to clarify filling limits for vinyl fluoride, inhibited.

Section 173.314. Several commenters suggested that tank cars containing hydrogen chloride, liquid *(refrigerated)* should be marked "HYDROGEN CHLORIDE" for consistency with the requirement for chloride materials which have similar hazards. MTB agrees and has added the requirement in paragraph (b)(6). In addition, in the Table to paragraph (c), the maximum pressure for tank cars containing hydrogen chloride, liquid *(refrigerated)* when offered for transportation is increased from 80 psig to 90 psig, based on the concerns of several commenters that increased time be allowed for adequate inspection of tank cars. The effect of the change is minimal and will have no adverse effect on safety. Also, the entries to the Table have been changed, as noted in discussions of other sections, to reflect different shipping names for carbon dioxide, liquid *(refrigerated)* and hydrogen chloride, liquid *(refrigerated)*.

Section 173.315. MTB believes the reference to the marking requirement in the introduction text to this paragraph is unnecessary and, therefore, it has been deleted. In the Table to paragraph (a), the obviously incorrect filling density for hydrogen chloride, liquid *(refrigerated)* of "10.3 percent" is changed to "103.0 percent". Also, MTB is authorizing the shipment of refrigerated ethane, ethane-propane mixture, and hydrogen chloride, liquid *(refrigerated)*, in insulated MC-338, as well as MC-331, cargo tanks. This eliminates an unnecessary restriction in the NPRM that precluded the use of an MC-338 tank for materials for which a less heavily insulated MC-331 tank was authorized.

Note 11 to the Table has been extensively revised. The NPRM proposed that each tank have a design service temperature no warmer than the material's liquefaction temperature. As discussed earlier in the preamble under the heading "Liquefaction Temperature," the term "liquefaction temperature" has been replaced with the more readily understood term "boiling point at one atmosphere" to eliminate possible ambiguity. The requirement in present Note 11 that a cargo tank must be designed for a service temperature no higher than minus 100° F, which was inadvertently omitted in the NPRM, has been retained.

The holding time requirement has been rewritten for clarity, but without changing the substance of the requirement.

The last sentence in proposed Note 11 would have required that, before being transported in an empty condition, a cargo tank be drained, vented or blown down sufficiently to prevent venting while en route. In view of the existing requirement that an empty cargo tank last used to transport a hazardous material must be transported in the same manner as when it contained a greater quantity of material, MTB does not believe the provision is necessary and therefore it has not been included in the final rule.

A requirement has been added to Note 11 that a cargo tank used to transport a flammable gas must have an outer steel jacket. The reasons are discussed earlier in this preamble under the heading "Use of Aluminum."

Finally, the names "carbon dioxide" and "nitrous oxide" are removed and replaced by the names "carbon dioxide, liquid (*refrigerated*)" and "nitrous oxide, liquid (*refrigerated*)," respectively, each time they appear in this section.

Section 173.316. Proposed paragraph (a)(3) has been changed so that the steel jacket requirement does not apply to cylinders transporting cryogenic oxygen. This change was urged by several commenters and also responds to petitions submitted by CGA dated July 3, 1975, and January 19, 1977. This change is supported by the satisfactory safety record of aluminum jacketed cylinders in cryogenic oxygen service under DOT E-6668, and the fact that prior to the granting of this exemption, in 1972, extensive fire tests were performed with satisfactory results. These factors, as well as the quality of material in each package, distinguish cylinders from cargo tanks and support the position adopted in this final rule that aluminum jackets be authorized for cylinders, but not for cargo tanks, used to transport cryogenic oxygen. See the earlier preamble discussion under the heading "Use of Aluminum."

Proposed paragraph (a)(4) has been revised to limit its applicability to cylinders used to transport cryogenic oxygen. Flammable cryogens are now addressed in a new paragraph (a)(5), which prohibits an aluminum valve, pipe or fitting on any cylinder used to transport a flammable cryogenic liquid. This prohibition was supported by the commenters and is necessary, due to the low melting point of aluminum, in order to preclude an increase in the consequences of a fire involving a cylinder containing a flammable cryogenic liquid.

One commenter suggested that pressure relief devices on cylinders should comply with CGA Pamphlet S-1.1, entitled "Pressure Relief Device Standards, Parts I—Cylinders for Compressed Gases." MTB adopted CGA Pamphlet S-1.1 under an earlier rulemaking to require that pressure relief devices on cylinders comply with CGA standards (Docket HM-163E, 46 FR 22194, April 16, 1981). The requirement is contained in § 173.34(d).

Hydrogen has been excepted from applicability of the filling density definition in paragraph (c)(1) and a separate definition has been added as Note 1 to the Table in (c)(3). This was an oversight in the NPRM since the Table to (c)(3) clearly stated that filling density was based on cylinder capacity at minus 423° F.

As suggested by commenters and discussed in the explanation for § 172-101, cryogenic helium and neon are authorized for shipment in cylinders in this final rule and this is reflected by their addition to paragraph (c)(2).

Section 173.318. The proposed requirement to allow aluminum valves

without rubbing or abrading aluminum parts has been retained in paragraph (a)(4) for cargo tanks used to transport cryogenic oxygen. However, a prohibition on an aluminum valve, pipe or fitting being used on a cargo tank used to transport a flammable cryogenic liquid has been placed in a new paragraph (a)(5). The reason for this change is the same as for the similar change made to §173.316.

A new paragraph (b)(1)(ii) has been added to clarify that each pressure relief valve must be designed and constructed for a pressure equal to or exceeding the tank design pressure at the coldest temperature to be encountered. New paragraph (b)(5)(iii) contains a requirement to mark the set-to-discharge pressure of each pressure control valve. This requirement is consistent with that contained in § 173.315 for other cargo tanks.

In the Table to proposed paragraph (f)(3), the design service temperature for methane or natural gas was −320° F. This was in error. The correct design service temperature specified in the final rule is −260° F.

The operational requirement, proposed in §§ 178.338–9(c) and 178.338–18(d), specifying that a cargo tank containing a flammable cryogenic liquid must be marked with the one-way travel time (OWTT) for the material contained in the cargo tank has been deleted from the specification section. The requirement is now, more appropriately, in new paragraph 173.318(g). Additional comments and changes to this section have been addressed earlier in this preamble under the headings "Pressure Relief Device Systems," "Minimum Outage and Filling Densities," and "Venting, Holding Time, Trip Monitoring and Equilibration of Cryogenic Liquids."

Section 173.319. The requirements in this section have been revised to clarify that they apply only to flammable cryogens.

MTB received conflicting comments on the use of scales to determine the amount of cryogenic liquids loaded into a tank car as proposed in paragraph (a)(2). MTB has decided to delete the required use of scales for hydrogen cars, but has retained the method for cars containing other cryogenic liquids. The exception for hydrogen is made due to the extremely low density of this material and the fact that even a reasonably accurate scale capable of weighing a rail tank car would likely have a plus or minus error that would make it unreliable as a method of checking the amount of hydrogen that has been loaded.

The requirement in proposed paragraph (a)(3) to notify the Bureau of Explosives (B of E) when a tank car has not been received by the consignee after 20 days was opposed by three commenters. One of these commenters pointed out that a tank car operating between such places as Texas and Alaska would exceed 20 days in transit on every shipment. The other two commenters argued that the design of cars for flammable cryogenic ladings provides for a 30 day holding time and therefore taking action after 20 days is premature. After considering the matter, MTB has decided to retain the notification requirement. MTB and the Federal Railroad Administration believe that, for tank cars transporting flammable cryogens, tracing should begin after 20 days in transit to ensure that a car will be located and routed to reach its destination within the holding time of the car.

Paragraph (c) has been changed to relate filling temperature to pressure rise, instead of the holding time, for consistency with changes made to § 179.400–4. These changes recognize that it is not current practice to conduct holding time tests on tank cars in cryogenic liquid service.

Finally, the permitted filling densities in the table in paragraph (d)(2) have been modified for ethylene to accommodate tank cars currently operating under a DOT exemption that under this rule will be remarked in accordance with § 173.31(a)(1). The DOT–113A175W car has been added to the authorized specifications for hydrogen as noted in the preamble discussion of § 173.31.

Section 173.320. The applicability of the exception provided by this section is expanded to include all atmospheric gases and to make it clear that the regulations pertaining to cryogenic liquids do not apply to refrigeration systems during transportation by motor vehicle, railcar, or vessel. The wording has also been clarified to emphasize that in order to qualify for this section, the design and construction of the packaging, not the thermal protection, must limit the pressure to 25.3 psig.

The exception has also been expanded to exclude atmospheric gases (except oxygen) and helium in qualifying packaging from the labeling and placarding requirements in Part 172. For carriage aboard aircraft, the provisions of § 173.11 apply; therefore, there is no reference to aircraft in § 173.320.

The issue of imposing any requirements on the shipment of atmospheric gases and helium is discussed earlier in this preamble under the heading "Nonpressurized Atmospheric Gases and Helium."

Part 174. Except for minor reorganization of § 174.204(a)(2), the sections in this Part are amended and revised as proposed in the NPRM.

Section 176.76. A number of changes have been made to this section. Several commenters recommended that this section be expanded to provide for cargo tanks formerly under a DOT exemption that have been remarked in accordance with § 173.33(b)(2). MTB agrees and this change has been made in paragraph (h)(1).

The reference, in proposed paragraph (h)(1) to § 173.316(a)(4) is now treated more clearly by restating the applicable requirements in paragraph (h)(2). Proposed paragraph (h)(2) is now (h)(3).

In line with other provisions regarding holding time, proposed paragraph (h)(2) (now paragraph (h)(3)) has been changed so that it now only applies to flammable cryogens. See the discussion under the heading "Venting, Holding Time, Trip Monitoring and Equilibration of Cryogenic Liquids" earlier in this preamble. Several commenters correctly pointed out that proposed paragraph (h) does not provide for tank cars containing a cryogenic liquid to be transported by vessel. This was an oversight on MTB's part. Accordingly, a new paragraph (h)(4) has been added to allow shipment of cryogenic liquids by vessel in DOT–113 or (for nonpressurized atmospheric gases and helium) AAR 240W tank cars. Because of the extreme thermal hazard cryogenic liquids pose to shipboard structures, a requirement has been added in new paragraph (h)(4) to require portable tanks, cargo tanks and tank cars containing cryogenic liquids to be stowed "on deck" only.

Section 177.816. The NPRM proposed that drivers of cargo tanks used to transport a flammable cryogenic liquid be required to receive formal training, at least once every 24 months, on the proper handling of the particular flammable cryogen being transported in the particular type of cargo tank. Included in the proposal were requirements that written records of training be kept by the carrier and that the driver be issued a certificate of training to be carried on his person while operating the motor vehicle. Three comments were received concerning this section. The Interstate Commerce Commission supported a detailed, structured curricula. The second commenter suggested that corresponding revisions should be made to §§ 391.11, 391.51, and 397.19 of the Federal Motor Carrier Safety Regulations, and the third commenter opposed the proposal as redundant and

as an unnecessary regulatory burden that would do nothing to enhance safety in view of § 177.800. This commenter also questioned whether the driver would be placed out-of-service if he did not have the certificate of training in his possession during a DOT roadside inspection.

This final rule adopts a driver training requirement because MTB believes that the program will increase a driver's knowledge and general awareness of the applicable Hazardous Materials Regulations, and his knowledge of the hazard of cryogenic liquids and the handling and operating characteristics of the particular vehicle used to transport the material. This requirement reflects good business practice and helps to ensure that this type of training will be performed at regular intervals.

In response to the comments, MTB notes that the training presently required by § 177.800 is general in nature and does not cover the details proposed, and now contained, in § 177.816, which is specifically applicable to flammable cryogenic liquids. Adoption of a structured curricula as suggested by the ICC, is outside the scope of this rulemaking. If MTB determines in the future that there is a need for a structured driver training program, it will be made the topic of a future rulemaking.

The major change to the NPRM is that a certificate of training is no longer required. MTB reevaluated the burdens and benefits of such a requirement and now believes that requiring the paperwork to be completed and then retained by the driver is unnecessary in view of the fact that the information can be obtained from the carrier's files.

In order to reduce paperwork burdens, MTB has reduced the period of time that a carrier must keep the driver's record of training after a driver has left the carrier's employ from three years to 90 days.

Paragraph (a) is changed to indicate that when interchange operations are involved, only the originating carrier is subject to this section.

Section 177.818. One commenter recommended that the provisions of this section be limited to transportation of *flammable* cryogenic liquids. The omission of the word "flammable" preceding "cryogenic liquid" in this section was in error. The omission has been corrected.

Section 177.824. This section is adopted as proposed in the NPRM.

Section 177.828. MTB has revised this section along the lines of § 173.11 to allow carriers to file registration statements by certified mail with a return receipt serving as MTB's acknowledgment. One commenter expressed concern that certain information contained in the registration statement, such as the number and type of vehicles in use by a carrier, may be considered proprietary and should be protected from public release. For years, each motor carrier has filed with the Federal Highway Administration's Bureau of Motor Carrier Safety (BMCS) a listing of all MC–330 and MC–331 cargo tanks the carrier has in service (49 CFR § 177.824(f)). MTB does not believe that the type of information that must be provided under this section is any more proprietary than that provided to BMCS on the MC–330 and MC–331 cargo tanks. However, if a carrier believes that its information is entitled to confidentiality under the Freedom of Information Act (5 U.S.C. 552), or is the type of material referred to in 18 U.S.C. 1905, the carrier is entitled to request confidential treatment under the terms of 49 CFR 107.5.

In paragraph (c), the initial filing period has been revised to be consistent with the effective date of this amendment.

Section 177.840. Paragraph (h) has been restructured for clarity.

Paragraphs (i) and (j) have been rewritten to allow for equilibrations. This is discussed earlier in the preamble under the heading "Venting, Holding Time, Monitoring, and Equilibration of Cryogenic Liquids."

MTB believes paragraph (j) of the NPRM which specified a 50 percent reduction in one-way travel time for cargo tanks used in distribution service (peddle runs) is no longer necessary in light of the new provision on equilibration specified in § 177.840 and the modified provisions to allow venting of nonflammable cryogens as specified in § 173.320. Accordingly, it has been deleted.

Paragraph (k) of the NPRM, which discussed empty cargo tanks has also been removed. as discussed previously in this preamble with regard to § 173.29, MTB believes that this proposal was unnecessary in light of the present requirement in § 173.29(c)(2).

Paragraph (l) of the NPRM is now paragraph (k) and has been clarified to indicate that the apparatus must be approved by the National Institute of Occupational Safety and Health.

Section 178.57. Several changes have been made to this section that were not addressed in the NPRM. These changes, however, reflect an expanded use of the DOT–4L cylinder and in most instances are necessary to conform to other changes that have been made in this rule.

In § 178.57–2, The maximum service pressure has been revised to more accurately reflect the maximum pressures authorized in Part 173 for cryogenic liquids during transportation. In paragraph (c) of this section, design service temperatures are specified for argon, helium, neon, nitrogen and oxygen, in addition to hydrogen. The temperatures specified are the same as those previously required under paragraph (c) except for helium and neon, which were not previously authorized for transportation in DOT–4L cylinders.

Section 178.57–5 has been changed to reflect the fact that for the carriage of certain commodities an aluminum outer jacket is authorized. See the discussion of this in the preamble discussion of § 173.316.

Section 178.57–8 has been revised to provide for aluminum as well as steel jackets on DOT–4L cylinders. A steel jacket on a non-evacuated insulation system may be no less than 0.060 inch thick, as prescribed by present regulations. When an aluminum jacket is used on a non-evacuated insulation system, it may be no less that 0.070 inch thick. This is consistent with existing exemptions. Paragraph (c) also provides that when a steel or an aluminum jacket is used on vacuum insulated cylinders, the jacket must be designed to a minimum collapsing pressure of 30 psi. The 30 psi minimum collapsing pressure will provide greater flexibility than the specification of a minimum thickness and is better suited to controlling the wall thickness of an evacuated jacket to provide resistance to collapsing. Paragraph (d) of the same section has been added to ensure that the requirement in § 178.57–20(a)(4) is complied with at the time of manufacture.

In § 178.57–10, the definition of "P" has been rewritten to indicate that the pressure test need not be hydrostatic and to clarify that this figure is to be expressed in psi.

Section 178.57–12 now provides that the fitting, boss or pad provided for each opening may be "integral" in lieu of "securely attached". The reference in paragraph (a)(2) has been changed from "American Standard taper pipe threads" to "NPT". This change, with the associated definition in § 171.8, helps pinpoint the reference without making a substantive change. Paragraph (a)(3) has been rewritten for clarity. As previously worded it was unclear whether the required inertness and leakage prevention characteristics referred to the threads or the gasket. Although the

answer may have been obvious, it has now been stated correctly.

Section 178.57–13 was addressed in the NPRM and it is adopted here with the added requirement that flow capacity meet the industry standard in CGA Pamphlet S–1.1.

In § 178.57–20, the references to "service temperature" in paragraph (a)(2) have been changed to "design service temperature", without substantive effect. An identical change has been made in paragraph (a)(4) along with minor rewriting for clarity. The examples shown in the present paragraph (a)(4) have been moved to paragraph (a)(5). Paragraphs (a)(8) and (a)(9) have been added to require special orientation instructions and, when appropriate, a marking which identifies a cylinder with an aluminum jacket.

Section 178.57–21 has been revised to recognize that an aluminum jacket is authorized for nonflammable cryogens and therefore the materials of construction for the cylinder and outer jacket are now specified separately.

Section 178.57–22 is being changed to make very minor changes to correct improper uses of plurals, to change "service temperature" to "design service temperature" and to move the chemical analysis table to the proper location.

Section 178.337. MTB has revised § 178.337–1(a) for clarity and to authorize MC–331 cargo tanks to be constructed with aluminum. If aluminum is used for the inner tank, the tank must be insulated. When an insulated tank is intended to be used to transport a flammable gas, a steel jacket is required. Although not addressed in the NPRM, MTB believes these modifications are justified in view of its decision to allow aluminum in the construction of MC–338 cargo tanks under similar conditions. Section 178.337–1(e) has been revised to recognize the changes made to §§ 173.315(a) Table Note 11 and 178.337–1(a).

Section 178.337–11(c) has been revised to include the term "NPT" as a reference standard for the discharge openings. Also the reference to hydrogen chloride has been changed to be consistent with the new proper shipping name "hydrogen chloride, liquid *(refrigerated)*."

Section 178.338–1. An additional reference has been added in paragraph (a)(2) of § 178.338–1 to clarify the design service temperature. See the preamble discussion under the heading "Liquefaction Temperature" for further discussion.

A commenter requested that paragraph (c)(1) be revised to require each tank to be "designed, constructed, *and stamped* * * *." A tank constructed to the MC–338 specification is required to be marked by stamping, embossing, or other means, as prescribed by § 178.338–18. Therefore, MTB believes adding the word "stamped" to this section is not appropriate. Also, the commenter requested that paragraph (c)(1) allow closing welds to be made with non-removable backing strips. Construction of such a cargo tank is not prohibited by the regulations provided the tank is designed and constructed to allow washing of the interior surface, as prescribed by paragraph (c)(3), and meets the cleanliness requirements contained in § 178.338–15. Therefore, no change is necessary. As suggested by the same commenter, MTB has made a minor revision in the lower design pressure value specified in paragraph (c)(1) from 25 psig to 25.3 psig for consistency with § 173.320. The word "cargo" has been removed, in the reference to "cargo tank" in paragraph (c)(3), for consistency with the definition of tank in § 178.338–1(b).

In paragraph (e), a commenter requested that MTB specify a thickness in inches, in addition to the gauge values specified for the minimum metal thicknesses, in order to ensure proper calculations. However, the gauge-to-inch values suggested by the commenter were not in accordance with guage thicknesses prescribed in the Table to § 173.24(c). The commenter did not explain why the values in § 173.24 were unsuitable. MTB has now specified minimum thicknesses, in inches, based upon the minimum thicknesses prescribed in § 173.24(c).

The design parameters for evacuated jackets in paragraph (f) were revised in the June 21, 1979 notice. In that notice, MTB acceded to commenter's requests and incorporated some of CGA's recommendations for a vacuum jacket contained in CGA–341 which, to a large extent, references the ASME Code. In its comments to the NPRM, as modified, the CGA recommended adoption of § 178.338–1(f) as initially proposed in the March 8, 1979 NPRM and expressed its view that the June 21, 1979 revision to paragraph (f)(2) was unsuitable. After considering these comments, and for reasons discussed under the heading "Jacket Design" earlier in this preamble, MTB has adopted the proposals for evacuated jackets contained in the June 21, 1979 notice, but has specified that the minimum collapsing pressure for evacuated jackets must be at least 30 p.s.i. This is consistent with standards in Pamphlet CGA–341.

Section 178.338–2. A commenter objected to the proposed requirements in paragraph (a) that jacket material must be in accordance with the ASME Code and to the additional postweld heat treatment required for cargo tanks constructed of UHT materials in proposed paragraph (e). The commenter stated that ASME material has never been mandatory for evacuated jacket material. This commenter cited the narrow temperature range for proper heat treatment of 5%, 8% and 9% nickel steels as the reason for opposing the proposed requirements for UHT materials. These same objections were raised to proposed § 178.338–4(a).

MTB is not aware of any test or experience data on the suitability of cargo tanks constructed of UHT materials that have not been postweld heat treated. Also, MTB is not aware of any cargo tank constructed of 5% or 8% nickel steels in pressurized cryogenic liquid service. Furthermore, there is no authorized cargo tank constructed of 9% nickel steels in pressurized cryogenic liquid service under exemption that MTB can use as the basis for obtaining experience data. The one cryogenic cargo tank constructed of a modified 9% nickel steel being operated under exemption has not been postweld heat treated, but it is mounted on a flat-bed trailer; therefore, it is not subject to full torsional forces and dynamic shock loadings normally encountered during transportation. In the absence of such data, MTB strongly believes the requirements proposed in the NPRM are justified in order to fully account for the dynamic forces encountered in the transportation environment. These forces are not considered by the ASME Code, which basically establishes standards for stationary pressure vessels. Furthermore, MTB believes that anyone who fabricates with UHT material is capable of properly heat treating these materials. Other UHT steel pressure vessels require postweld heat treatment. Therefore, the proposed requirements are retained in the final rule.

Section 178.338–3. A commenter requested that MTB incorporate the more lenient metal thickness requirements of the ASME Code. Since, as noted above, ASME designs do not consider the dynamics of the transportation environment, MTB is adopting the proposal contained in the NPRM.

Section 178.338–4. One commenter recommended that proposed § 178.338–4(c), which deals with the intersection of nozzles, supports, and other welds with longitudinal welds in the tank and load bearing jacket, be deleted. The commenter believes that the ASME Code adequately addresses welding

details. However, MTB believes that the prohibition on such intersections, other than by the welds of load rings or stiffening rings, contributes to overall tank integrity at negligible additional cost. Therefore, MTB is retaining § 178.338–4(c) and, along the same lines, is adding language to proposed § 178.338–13(d) (now at § 178.338–13(a)), specifically providing for fillet weld discontinuity in the attachment of supports and bumpers, in order to reinforce the § 178.338–4(c) requirement.

Section 178.338–5. This section is adopted as proposed in the NPRM.

Section 178.338–6. One commenter recommended that MTB delete the requirement for a manhole on cargo tanks in oxygen service. The manhole requirement was proposed as § 178.338–6 in the June 21, 1979 **Federal Register** publication amending the NPRM. The commenter stated that oxygen is not a corrosive and that by following the proposed tank cleaning requirements the possibility of contamination of the tanks would be reduced to a level that would eliminate the need for a manhole. The commenter also believes that a manhole would provide a means of future contamination by allowing for an internal inspection without proper follow-up cleaning procedures. MTB believes that contamination of oxygen tanks during construction could pose a serious safety problem and therefore, in order to assure that the proper degree of cleanliness has been accomplished, the tank must be internally inspected after construction and prior to final closure. At the time of tank manufacture, a manhole provides the surest means of ensuring that the tank is contaminant-free prior to final closure. This assurance of cleanliness is crucial in tanks intended for oxygen service.

After the tank has been in service, the presence of a manhole allows for subsequent thorough internal examination. MTB believes the benefits to be gained by having the manhole outweigh any risk that a subsequent examination will cause contamination. The cleanliness requirements are geared to ensuring that after a tank has been reentered, and prior to subsequent reuse, that an oxygen compatible environment, i.e. no contamination, is reestablished.

Section 178.338–7. A commenter recommended that proposed paragraph (a), providing for complete drainage of flammable ladings, be revised to remove the implication that a pipe must drain down from the lowest point of the tank. MTB agrees and has revised the paragraph accordingly. The requirement for the closure of openings in a tank in proposed paragraph (b) is addressed in §§ 178.338–8, 178.338–10 and 178.338–11; therefore, proposed paragraph (b) has not been adopted.

Section 178.338–8. Paragraph (a) has been reworded to specifically require compliance with § 173.318(b) rather than merely referring to that section. The wording in paragraph (b)(2) has been simplified without a change in meaning. In paragraph (b)(5), at the suggestion of one commenter, MTB is allowing a check valve to be used on MC–338 cargo tanks. Allowing the use of a check valve provides an alternative that meets the intent of MTB's initial proposal in that it provides for complete, positive closure. Further discussion of this section is contained under the heading "Pressure Relief Device Systems" earlier in the preamble.

Section 178.338–9. In response to proposed paragraph (b), a commenter pointed out that it is impossible to maintain a liquefied gas at a temperature corresponding to its boiling point at atmospheric pressure, as proposed in the NPRM. The commenter maintained that "in the absence of thermal stratification, the fluid would maintain itself at a saturation temperature corresponding to the lowest back pressure that can be maintained stable after filling the vessel." MTB agrees with the commenter. Accordingly, MTB has specified the boiling point at a reference pressure of one atmosphere and has revised the requirements to reflect a more practical pressure as suggested by the commenter. The requirement appears in paragraph (b)(1) of the final rule.

In proposed paragraph (b)(1) (paragraph (c) of this final rule), a commenter recommended that the holding time obtained in the optional test be required to be not less than 90% of the marked rate holding time, rather than requiring test results be within 10% of the original test. The commenter also recommended that MTB specify the Normal Evaporation Rate (NER) at not more than 110% of the original test. MTB has incorporated the suggested change to the optional test regimen in paragraph (c), but has not included the NER test (which was not defined by the commenter). This test has been mentioned by various industry members in the past and MTB has always requested that the test be defined. Further, MTB believes a test should be performed to validate the use of the NER test by comparing the results of the NER to the currently specified holding time tests. Without this information, MTB is unable to evaluate the value of the NER versus the holding time test.

Proposed paragraph (c) has been revised for clarity and it appears as paragraph (b)(2) in the final rule. The one-way travel time requirements have been moved to § 173.318(g).

Section 178.338–10. A commenter recommended certain changes be made in proposed paragraph (a) to specify applicability of the collision damage protection requirements to lines on a tank which, if damaged, could result in the loss of the lading, and to lines which connect to the safety relief devices. MTB has incorporated the intent of the comment into the final rule. In paragraph (c), the word "cargo" is added, as suggested by a commenter, when referring to the tank. MTB is not incorporating a comment suggesting a specific bumper height requirement. The NPRM contained a performance-oriented requirement ("adequate to protect all valves and fittings * * *.") that is adopted in this final rule.

Section 178.338–11. A commenter suggested that the first sentence in paragraph (b) be revised to read "Each *liquid* filling and *liquid* discharge line * * *." MTB agrees that the word "liquid" should be added since the lines being referred to in this paragraph are not those which discharge vapor. This change makes the meaning clearer and it has also been incorporated into paragraphs (b) and (c).

As proposed in paragraph (c) in the NPRM, the location of valve seats on cargo tanks was dependent on whether the tank was vacuum insulated or not. A commenter disagreed with the proposal as it related to tanks with evacuated jackets. The commenter pointed out that, based on its information, the construction of vacuum jacketed valves does not facilitate location of the valve seat inside the jacket. The commenter argued that attempts to comply with the proposed requirement will result in vacuum and maintenance problems. As part of its analysis of the comment, MTB reviewed the outstanding DOT exemptions for vacuum insulated cargo tanks designed to carry flammable cryogens. This review revealed that none of these cargo tanks had the construction specified in the NPRM. After reevaluating the matter, MTB agrees with the commenter that for evacuated jacket construction it is not necessary to specify valve seat location inside the jacket and therefore this provision has been changed to require the valve to be as close to the tank as practicable.

The wording regarding the remotely controlled valves in proposed paragraph (c) has been changed in response to a comment. For consistency with other requirements in paragraph (c), the references in proposed paragraphs (c)(1)

and (c)(2) to internal shut-off valves have been changed to remotely controlled shut-off valves. Paragraph (c)(1) has also been changed to make clear that the thermal means of closure need not be a fusible element and that equivalent devices are acceptable.

Section 178.338–12. A commenter objected to the proposal on yield section and suggested that it be deleted. The commenter indicated that it had been reported to him that yield sections are hazardous and voiced the opinion that the risk of catastrohpic failure appears to exceed the hazard which the yield section was intended to eliminate. The yield section is designed to break under strain without affecting the product retention capabilities of valves on a tank, and there is no evidence that safety has been compromised because of such a requirement in the past. Therefore, MTB has incorporated the requirement in the rule. The term "shear section" rather than "yield section" is being used since MTB believes the former term more accurately describes the mode of failure.

Section 178.338–13. This section has been reorganized. Paragraph (d) in the NPRM is now paragraph (a). Paragraph (b) in the NPRM is essentially continued as paragraph (b), however paragraph (c) in the NPRM, which referred to paragraph (b), has been deleted as unnecessary. Paragraph (e) in the NPRM is now paragraph (c). Paragraph (a) in the NPRM which dealt with cargo tanks that were "not permanently attached to or integrated with" the vehicle chassis has been deleted since it is unnecessary. MTB is not aware of any cargo tank designed or fabricated in this fashion that is used in cryogenic service.

Changes in static loading requirements in this section have been made and these are discussed earlier in the preamble under the heading "Design Loadings."

Section 178.338–14. The only change made to this section since the NPRM is in paragraph (a)(1) where the requirement that the device indicate the maximum permitted liquid level now specifies that this indication be "at the loading pressure." MTB believes this improves the clarity of this provision without making a substantive change.

Section 178.338–15. The only change to this section is that the closure that is now specified is that of the "manhole of the tank" instead of the "manway or the tank" specified in the NPRM. This change is necessary to conform to the requirements in § 178.338–6, which were first proposed in the June 21, 1979 amendment of the NPRM (§ 178.338–15 was not corrected at that time).

Section 178.338–16. The discussion of testing requirements in this section is discussed earlier in this preamble under the heading "Pressure Testing."

Paragraph (a) has been reorganized so that the basic test pressure requirements need not be stated twice, once under "hydrostatic test" and once under "pneumatic test". Now the basic test requirements have been set out as paragraph (a) and the additional requirements applicable to pneumatic testing are set forth in paragraph (b).

It was proposed in paragraph (b) that "all welds in or on the cargo tank shell or heads shall be radiographed * * *." One commenter recommended that jacket welds not be required to be radiographed and that additional methods of weld inspection be authorized for the internal tank. MTB agrees that jacket welds need not be radiographed because weld integrity is established by other means, such as the thermal integrity test. However, MTB believes that radiographic inspection of all tank heads and shell welds is necessary to ensure the pressure integrity of the tank. The revised requirement, which is at § 178.338–16(c) of the rule, does not preclude the use of other inspection methods in addition to that required by this rule, so long as any deposits or other contamination from such methods are removed prior to final tank closure. This incorporates a change to the NPRM that was made in the June 21, 1979 **Federal Register** publication.

Paragraph (c) in the NPRM (paragraph (d) herein) has been changed by removing the proposed requirement that any non-mechanical cutting undertaken in defect repair required the qualification of the cutter, the welder and the combination of cutting and welding. These requirements are covered by the ASME Code.

Section 178.338–17. This section has been adopted as proposed in the NPRM.

Section 178.338–18. A commenter recommended that the nameplate be affixed to the left side rather than to the right (curb) side of the vehicle. No reason was provided for the suggested change, which would modify a long standing requirement. The recommendation is not adopted.

The commenter also stated that it is unnecessary and redundant to require two plates. The matter of duplicate plates is particularly important. The ASME Code requires that the nameplate be attached to the Code vessel and be visible after insulation is applied to the Code vessel. If duplicate plates were not used, an opening would have to be made in the insulation system to expose the nameplate. Such an opening would adversely affect the efficiency of the insulation system. Further, paragraph UG–119(e) of the Code contains provisions for installation of a duplicate nameplate on the insulation jacket. This duplicate plate must contain all of the information found on the original plate, including the Code symbol. Therefore, MTB is retaining the requirement in this final rule.

Finally, the commenter favored a ¼ inch size letter requirement in place of the proposed ⅜ inch lettering for the identification plates. MTB believes ⅜ inch letters provide more legible markings than smaller sizes without imposing undue burdens on manufacturers and therefore has retained the proposed requirement in this rule.

Only minor changes have been made in this section. Paragraphs (b)(8) and (b)(9) in the NPRM have been placed in reverse order in this rule. Paragraph (b)(9) has been expanded to specify that for a cargo tank used to transport several cryogenic liquids only one MRHT need be marked on the specification plate. The MRHT's for the additional commodities may be placed adjcent thereto.

The NPRM proposal for paragraph (d) has been deleted from this section and is now the introductory paragraph of § 173.318(g).

Section 178.338–19. Certain minor changes have been made to this section. A commenter recommended to delete the words "including the ASME Code" in proposed paragraph (a) because "the manufacturer will provide the U–1 form as required by the Code." These forms are not always available. A person has only to review the exemption requests received by MTB to realize the significant number of instances wherein an applicant has a tank made to ASME Code, but where no drawings, nameplates, or U–1 forms are available. Therefore, the proposed requirement has been retained in the final rule. Paragraph (a) has been restructured and it now specifies that the manufacturer shall furnish the required documents to the owner.

Paragraph (b) has been changed to specifically require the manufacturer of each stage to not only furnish a certificate covering his work to any succeeding manufacturer, but also to pass along any certificates received from earlier manufacturers. This will ensure that at the end of staged construction the final manufacturer will possess certificates covering the entire construction. Another change requires that all these certificates be furnished to the owner.

Paragraph (c) has been changed so that upon change of ownership, the old owner does not retain the original documents for one year as proposed in the NPRM, but need only retain photocopies for that time. This change allows the original documents to be transferred to the new owner.

Section 179.100–7. In § 179.100–7(a), the reference entry "ASTM–A537–70, Grade A" is corrected to read "ASTM–A537–80, Class 1." The erroneous reference to Grade A has appeared in several editions of Title 49 CFR. This change correcting the error is also made at various other places in §§ 179.102–4 and 179.102–17.

Section 179.102—1. In § 179.102—1 the heading and the introductory text to paragraph (a) have been amended to read "carbon dioxide, liquid (refrigerated)."

Section 179.102–4. Several commenters recommended that proposed paragraph (b) be revised to allow the manway, nozzles and anchorlegs to be fabricated with stainless steel, which would not be required to be impact tested. The commenters supported their position on the grounds that stainless steel can substantially reduce the heat flow into the tank, and thereby increase the holding time and improve transportation safety. MTB believes the recommendation has merit and has provided for the use of ASTM A240 Type 304, 304L, 316, or 316L stainless steel. The use of ASTM Specification A516 and A537 materials are authorized, as proposed in the NPRM.

Several commenters objected to the requirement in proposed paragraph (c) that insulation material must be "self-extinguishing." The commenters argued that even though most insulations do not support combustion, the materials are not technically "self-extinguishing" as the term would indicate. Two commenters indicated that they were unsure how the term would be defined. MTB agrees with the commenters that the use of the term "self-extinguishing" without further definition would be confusing and that presently approved materials are not in fact "self-extinguishing." After reevaluating this proposal, MTB has decided to remove the "self-extinguishing" requirement and require that the insulation be of approved material.

Commenters pointed out that in proposed paragraph (d) there is no need to require dual safety relief systems for vinyl fluoride. Two commenters indicated that a rupture disc on a tank of flammable gas can be considered a poor safety practice. MTB agrees with the commenters and has deleted the proposed requirement for a safety vent. In proposed paragraph (d) the word "piped" is changed to "directed", as suggested by two commenters, for consistency with § 179.102–3(a)(2), which requires openings in the protective housing cover for relief valve discharge.

In paragraphs (f) and (h), the use of a thermometer well or a pressure gage has been made optional rather than mandatory. This option offers a shipper flexibility in the manner in which compliance with the provisions of Note 17 to the Table in § 173.314(c) is determined

Finally, paragraph (1) has been revised to define more clearly the acceptance standards for welds. The welds must meet the acceptance standards contained in W11.06 of AAR specifications for Tank Cars, Appendix W.

Section 179.102–17. Paragraphs (b), (c), (d), (f) and (m) have been changed in the same manner, and for the same reasons, as their counterparts in § 179.102–4 ((b), (c), (d), (f) and (l)). In addition, as suggested by commenters, paragraph (d) has been revised to allow a pressure relief device to be trimmend with monel "or other approved material" and to change "teflon coated monel" to read "fluoronated hydrocarbon polymer coated monel" since the word "teflon" is a registered trademark of E. I. du Pont de Nemours and Company.

Section 179.400. The nomenclature used to identify tank cars was questioned by two commenters. In the final rule, "Class DOT–113" is used to refer inclusively to specifications DOT–113A, DOT–113C, DOT–113D, etc. When a specific design is being referred to, it will be identified by a particular specification, for example "DOT–113A60W". This procedure conforms to that stated in section 2–2(b) of AAR Specifications for Tank Cars.

Section 179.400–1. Except for an editorial change, this section is adopted as proposed in the NPRM.

Section 179.400–2. This section is adopted as proposed in the NPRM.

Section 179.400–3. This section has been restructured for clarity. Additionally, a change was made to correct an error in the NPRM which indicated that the tank must have "heads designed concave to pressure." While this is correct for the inner tank heads, it is wrong with regard to the jacket heads. Jacket heads must be designed convex to pressure and this necessary change has been made in the final rule.

Section 179.400–4. The section heading and the requirements in § 179.400–4 are revised. The performance standard proposed in the NPRM has been modified, as suggested by commenters, to allow nitrogen to be used as the test medium rather than the actual lading which may be a flammable gas. In addition, the formulas for heat transfer rates have been defined and clarified.

Section 179.400–5. Two commenters to this section requested that MTB allow the use of nickel steel in the construction of DOT–113D tank cars. MTB is not authorizing nickel steels for newly constructed Class DOT–113 tank cars because this material does not have adequate impact properties when subject to temperatures as low as the design service temperature authorized for these tank cars.

Section 179.400–6. Two commenters requested that in proposed paragraph (b) the words "and stresses" be deleted since the AAR Specifications for Tank Cars specifies "loads". This has been done. An updated section of AAR Specifications for Tank Cars is also referenced.

Section 179.400–7 (proposed § 179.400–8). MTB has deleted the reference to "approved contour" of tank heads since all heads specified meet this requirement.

Section 179.400–8 (proposed § 179.400–7 (a) through (d)). In proposed paragraphs (a) and (b) (which are also paragraphs (a) and (b) herein), the inference that 2:1 or 3:1 ellipsoidal heads are required for the inner tank has been removed by replacing the word "the" with the word "any". Paragraph (d) has been reworded for consistency with the wording in the other paragraphs. Also, the jacket head thickness of ⅛ inch provides head puncture resistence equivalent to that required of certain other classes of tank cars.

Section 179.400–9 (proposed § 179.400–7(e)). The formula in paragraph (b) (proposed paragraph (e)(1)), which specifies the width of the jacket plate on each side of the stiffening ring, has been corrected. Also as suggested by commenters, MTB has reworded § 179.400–9(c) (proposed as § 179.400–7(e)(2)) to allow differing structural shapes to be credited for stiffening of the outer jacket with external pressure, and to add a provision to require external closed rings be provided with a drain opening to reduce corrosion of the stiffening ring.

Sections 179.400–10, 179.400–12 through 179.400–15, 179–400–18, 179.400–21 through 179.400–23 and 179.400–26. Except for minor corrections and editorial changes, requirements in these sections have been adopted as proposed in the NPRM. Most of the changes were suggested by commenters. The sections

have been renumbered in the sequence normally followed in designing a tank car:

Present	Proposed
179.400–10	179.400–7(f)
179.400–12	179.400–10
179.400–13	179.400–11
179.400–14	179.400–12
179.400–15	179.400–13
179.400–16	179.400–16
179.400–21	179.400–19
179.400–22	179.400–20
179.400–23	179.400–21
179.400–26	179.400–24

Section 179.400–11 (proposed as § 179.400–9). Two commenters suggested in proposed paragraph (a) that "access opening" be changed to "opening" to eliminate the implication that the opening is a manway, and to revise the weld procedures to recognize difficulties in performing a fusion double welded butt joint for certain circumferential closing joints in the cylindrical portion of the outer jacket. MTB agrees with the commenters and has revised paragraphs (a) and (b) accordingly.

Section 179.400–16 (proposed as § 179.400–14). Except for an editorial change, the requirements are adopted as proposed in the NPRM. Two commenters has suggested that the provision in the last sentence in paragraph (b), stating that a cutting torch "may not be used", be revised by using the wording "must not". The term "may not", as used in this sentence, means no person is authorized or permitted to use a cutting torch on the welded closure. This use of the term is consistent with the rule of construction set forth at § 171.9(b)(4).

Section 179.400–17 (proposed as § 179.400–15). Two commenters brought to MTB's attention that the proposed requirements for vacuum insulated loading and unloading lines and insulated shut-off valves in paragraph (a)(1) should apply only to DOT–113A60W tank cars (which are designed only for hydrogen). Other DOT–113 tank cars are designed for the warmer cryogens and the requirements are unnecessary. MTB agrees and has made an appropriate revision.

The commenters also requested that the proposed provision in paragraph (a)(3) requiring vapor phase blowdown line discharge to be directed upward and away from operating personnel be deleted. The commenters indicated that the vapor blowdown valve is used only when the tank car is hooked up to a closed system and that "blowdown flare may be hazardous to personnel." Despite the fact that in normal operations the line will only be opened to a closed system, MTB agrees with the commenters about the hazard of blowdown flare but believes if a flare occurs, for whatever reason (including inadvertently opening the wrong valve), the flare should be directed away from operating personnel. For this reason, MTB has retained this requirement in the final rule.

Section 179.400–19 (proposed as § 179.400–17). Proposed paragraph (b) of this section contained a requirement that a tank car be equipped with a connection for a liquid gage and, in addition, a fixed length dip tube and a vapor phase pressure gage. As recommended by two commenters, the word "liquid" has been removed before the word "gage" and all of paragraph (b) has been reorganized to clarify that a car is required to be equipped with only one of the two alternative methods provided in paragraph (b)(1) to determine the quantity of liquid lading in the car.

Section 179.400–20 (proposed as § 179.400–18). Paragraph (c)(4) has been revised to include a pressure controlling and mixing device on DOT–113A60W tank car, as required in the past by § 179.400–18(c)(3). The requirement in § 179.400–18(c)(3) that the device must prevent venting of certain gas mixtures was inadvertently omitted in the proposal and has been added in paragraph (c)(4)(iii) of the final rule.

Section 179.400–24 (proposed as § 179.400–22). Three commenters took exception to the proposal in paragraph (b) to prohibit marking, stenciling or stamping on shells or heads of inner tanks. One of the commenters pointed out the provision would conflict with requirements for identification markings of plate thickness, material, and welds contained in § AAR.15 (now contained in § AAR 5.1.4) and in Appendix W, § W10.04, of the AAR Specifications for Tank Cars. MTB believes that the structural integrity of a tank at cold temperatures should not be compromised by stamping; however, MTB agrees that there is no valid reason to preclude the marking or stenciling of a tank and these prohibitions have been removed from the final rule. The requirements in the final rule are consistent with present requirements in the AAR Specifications for Tank Cars.

Section 179.400–25 (proposed as § 179.400–23). Two commenters recommended that in proposed paragraph (a) MTB reference the standard stenciling requirements of Appendix C of the AAR Specifications for Tank Cars. MTB believes the commenters' suggestion has merit and has incorporated the change into the final rule at § 179.400–25.

Three commenters maintained that the requirement for marking the name of the hazardous material for which the tank was designed on a tank car is covered by § 173.319 and, therefore, proposed paragraph (b) is unnecessary. MTB agrees with the commenters. Proposed paragraph 173.319(a)(4)(iv) (which has been adopted into the final rule) requires a tank car be marked with the name of the material contained in the tank car during transportation. Therefore, proposed paragraph (b) has been removed. The remaining paragraphs have been redesignated as paragraphs (b), (c), (d), and (e) in this final rule.

Exceptions were taken, in proposed paragraph (c), to the use of the words "minimum loading temperature", on the basis that "design service temperature" was used elsewhere in the proposal to indicate the same thing. MTB agrees with the commenters and has made the change in the final rule.

Finally, exception was taken to the proposals in paragraphs (c) and (d) on the basis that these requirements would conflict with a suggestion by the commenters that the filling density volume be marked on the tank. This suggestion was tied to a suggested revision to the definition of filling density in § 173.300 of the NPRM. MTB has not adopted this revision to the definition of filling density in § 173.300 and therefore, has not incorporated these additional changes suggested here.

Section 179.401–1. Except for minor changes in terminology due to changes elsewhere in the rule, this section is adopted as proposed in the NPRM.

List of Subjects

49 CFR Part 171

Hazardous materials transportation, Reporting and recordkeeping requirements.

49 CFR Part 172

Hazardous materials transportation.

49 CFR Part 173

Gases, Hazardous materials transportation, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 174

Hazardous materials transportation, Railroad safety.

49 CFR Part 178

Hazardous materials transportation, Maritime carriers, Cargo vessels.

49 CFR Part 177

Motor carriers, Hazardous materials transportation, Highway safety.

49 CFR Part 178

Hazardous materials transportation, Packaging and containers.

49 CFR Part 179

Hazardous materials transportation, Packaging and containers.

In consideration of the foregoing, Parts 171, 172, 173, 174, 176, 177, 178 and 179 of Title 49 Code of Federal Regulations are amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. In § 171.1, paragraph (a)(3)(iii) is added to read as follows:

§ 171.1 Purpose and scope.

* * * * *

(a) * * *

(3) * * *

(iii) Flammable cryogenic liquids in portable tanks and cargo tanks.

* * * * *

2. In § 171.7, paragraphs (c)(3), (d)(3)(v) and (d)(12) are revised and paragraphs (d)(3)(ix) and (d)(5)(xix) through (d)(5)(xxiii) are added to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(c) * * *

(3) CGA: Compressed Gas Association, Inc., 1235 Jefferson Davis Highway, Arlington, Virginia 22202.

* * * * *

(d) * * *

(3) * * *

(v) CGA Pamphlet S–1.2 is titled, "Pressure Relief Device Standards, Part 2, Cargo and Portable Tanks for Compressed Gases," 1980 edition;

* * * * *

(ix) CGA Pamphlet G–4.1 is titled, "Cleaning Equipment for Oxygen Service," 1977 edition.

* * * * *

(5) * * *

(xix) ASTM A 20–81 is titled, "Standard Specification for General Requirements for Steel Plates for Pressure Vessels," revision C, 1982 edition.

(xx) ASTM A 240–82 is titled, "Standard Specification for Heat-Resisting Chromium and Chromium-Nickel Stainless Steel Plate, Sheet and Strip for Fusion-Welded Unfired Pressure Vessels," revision A, 1982 edition.

(xxi) ASTM A 370–77 is titled, "Standard Methods and Definition for Mechanical Testing of Steel Products," 1982 edition.

(xxii) ASTM A 516–79b is titled, "Standard Specification for Pressure Vessel Plates, Carbon Steel, for Moderate- and Lower-Temperature Service," 1982 edition.

(xxiii) ASTM A 537–80 is titled "Standard Specification for Pressure Vessel Plates, Heat-Treated, Carbon-Manganese-Silicon Steel," 1982 edition.

* * * * *

(12) Federal Standard H28 is titled, "Screw-Thread Standards for Federal Services," March 31, 1978, edition.

3. In § 171.8, definitions for "atmospheric gases," "Btu," "cryogenic liquid," "filling density," "NPT" and "SCF" are added in alphabetical sequence to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

"Atmospheric gases" means gases that are commercially derived through an air separation process. For purposes of this subchapter, "atmospheric gases" means argon, krypton, neon, nitrogen, oxygen and xenon.

* * * * *

"Btu" means British thermal unit.

* * * * *

Cryogenic liquid. See § 173.300(f).

* * * * *

"Filling density" has the following meanings:

(1) For compressed gases in cylinders, see § 173.304(a)(2) Table Note 1.

(2) For compressed gases in tank cars, see § 173.314(c) Table Note 1.

(3) For compressed gases in cargo tanks and portable tanks, see § 173.315(a) Table Note 1.

(4) For cryogenic liquids in cylinders, except hydrogen, see § 173.316(c)(1).

(5) For hydrogen, cryogenic liquid in cylinders, see § 173.316(c)(3) Table Note 1.

(6) For cryogenic liquids in cargo tanks, see § 173.318(f)(1).

(7) For cryogenic liquids in tank cars, see § 173.319(d)(1).

* * * * *

"NPT" means an American Standard taper pipe thread in compliance with the requirements of Federal Standard H28, Part II, Section VII. See § 171.7(d)(12).

* * * * *

"SCF" (standard cubic foot) means one cubic foot of gas measured at 60° F. and 14.7 psia.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

4. In § 172.101, the Hazardous Materials Table is amended by removing, revising and adding various entries, in alphabetical sequence, as follows:

§ 172.101 Hazardous Materials Table

(1)	(2)	(3)	(3A)	(4)	(5)		(6)		(7)		
					Packaging		Maximum net quantity in one package		Water shipments		
+EAW	Hazardous materials descriptions and proper shipping names	Hazard class	Identification number	Label(s) required if not excepted)	Exceptions	Specific requirements	Passenger carrying aircraft or rail car	Cargo only aircraft	Cargo vessel	Passenger vessel	Other requirements
					(a)	(b)	(a)	(b)	(a)	(a)	(c)
	Remove										
	Argon, liquid pressurized	Nonflammable gas	UN 1951	Nonflammable gas	None	173.304	Forbidden	300 pounds	1,3	1,3	
	Carbon dioxide, liquified	Nonflammable gas	UN 2187	Nonflammable gas	173.306	173.304 173.314 173.315	150 pounds	300 pounds	1,2	1,2	
+	Hydrogen, liquified	Flammable gas	UN 1966	Flammable gas	None	173.316	Forbidden	Forbidden			Forbidden.
	Nitrogen, pressurized liquid	Nonflammable gas	UN 1977	Nonflammable gas	None	173.304	Forbidden	300 pounds	1,3	1,3	
	Oxygen, pressurized liquid	Nonflammable gas	UN 1073	Oxidizer	None	173.304	Forbidden	Forbidden	1,3	1,3	Stow separate from acetylene. Do not overstow with other cargo.

(1)	(2)	(3)	(3A)	(4)	(5)		(6)		(7)		
					Packaging		Maximum net quantity in one package		Water shipments		
+EAW	Hazardous materials descriptions and proper shipping names	Hazard class	Identification number	Label(s) required if not excepted	Exceptions	Specific requirements	Passenger carrying aircraft or railcar	Cargo only aircraft	Cargo vessel	Passenger vessel	Other requirements

5. In § 172.203, paragraph (g)(3) is added to read as follows:

§ 172.203 Additional description requirements.

* * * * *

(g) * * *

(3) The shipping paper for each Class DOT–113 tank car must contain the appropriate notation, such as "DOT–113A," and the statement "Do Not Hump or Cut Off Car While in Motion."

* * * * *

6. In § 172.328, the introductory text of paragraph (c) is revised to read as follows:

§ 172.328 Cargo tanks.

* * * * *

(c) *Required markings: Gases.* Each cargo tank transporting flammable or nonflammable gas (including a cryogenic liquid) subject to this subchapter must be marked as specified

in this part on each end and each side with—

* * * * *

7. In § 172.504, Table 2 is amended by removing the entry for "Nonflammable gas (oxygen, pressurized liquid)", replacing it with an entry for "Nonflammable gas (oxygen, cryogenic liquid)" and footnote 2 is removed and reserved, as follows:

§ 172.504 General placarding requirements.

* * * * *

TABLE 2

If the motor vehicle, rail car, or freight container contains a material classed (described) as—	The motor vehicle, rail car, or freight container must be placarded on each side and each end—
(Remove) Nonflammable gas (oxygen, pressurized liquid).	Oxygen.
(Add) Nonflammable gas (oxygen, cryogenic liquid).	Oxygen.

* * * * *

[2] [Reserved]

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

8. The Table of Sections to Part 173 is amended by revising the headings for §§ 173.315 and 173.316 and adding headings for §§ 173.11, 173.318, 173.319 and 173.320 to read as follows:

Subpart A—General

* * * * *

Sec.

173.11 Shipper's registration statement; flammable cryogenic liquids.

* * * * *

Subpart G—Compressed gases; definition and preparation

* * * * *

173.315 Compressed gases in cargo tanks and portable tanks.

173.316 Cryogenic liquids in cylinders.

173.318 Cryogenic liquids in cargo tanks.

173.319 Cryogenic liquids in tank cars.

173.320 Cryogenic liquids; exceptions.

* * * * *

9. Section 173.11 is added to read as follows:

§ 173.11 Shipper's registration statement; flammable cryogenic liquids.

(a) No person may offer a flammable cryogenic liquid for transportation in a portable tank, cargo tank or a tank car unless he has filed a registration statement by certified mail, return receipt requested, with the Associate Director for HMR, MTB, in accordance with paragraphs (b), (c) and (d) of this section.

(b) The registration statement must contain the following information:

(1) The shipper's name and principal place of business;

(2) Location where flammable cryogenic liquids are offered for transportation, including transportation by private carriage;

(3) The name and principal place of business of each initial carrier used to transport flammable cryogenic liquids and the name of each flammable cryogenic liquid the carrier is offered for transportation; and

(4) The serial number or vehicle identification number of each portable tank and cargo tank, and the reporting mark and number of each tank car, owned, leased, or otherwise controlled by the shipper and used to offer a flammable cryogenic liquid for transportation.

(c) The registration statement must be filed:

(1) Initially between July 1 and August 31, 1984 (this initial statement is only required to contain information regarding operations that took place during the 90 days prior to the date of the statement); and

(2) Subsequently, between July 1 and August 31 of each even numbered year after 1984.

(d) For operations begun between the two-year filing intervals specified in paragraph (c) of this section, the information must be provided on the registration statement filed during the next required filing period.

10. In § 173.23, paragraph (d) is added to read as follows:

§ 173.23 Previously authorized packaging.

* * * * *

(d) After January 1, 1984, cylinders manufactured for use under exemptions DOT E-6668 or E-8404 may be continued in use, and must be marked "DOT-4L" in compliance with Specification 4L (§ 178.57 of this subchapter) before or at the time of the first required retest. The "DOT-4L" marking must appear in proximity to other required specification markings.

11. In § 173.31, paragraphs (a)(8), (a)(9) and (c)(13) are added; Retest Table I, which now appears after paragraph (d)(4), is amended by removing certain entries and adding others in the proper number/alphabet sequence and transferred to immediately follow paragraph (c)(13); footnote "s" following Retest Table I is revised to read as follows:

§ 173.31 Qualification, maintenance, and use of tank cars.

(a) * * *

(8) The owner or operator, if not the owner, of each tank car used under, and in conformance with, an exemption issued before January 1, 1984, which authorizes the transportation of a cryogenic liquid in a tank car, shall remove the exemption number stenciled on the car and stamp the tank car with the appropriate Class DOT-113 Specification followed by the applicable exemption number, for example, "DOT-113D60W-E****." (Asterisks to be replaced by the exemption number.) The owner or operator, if not the owner, of a tank car that is remarked in this manner must retain a copy of the exemption that is in effect on December 31, 1983. No new construction of such tank cars may be initiated on or after January 1, 1984.

(9) Specification DOT-113A175W, DOT-113C60W, DOT-113D60W, and DOT-113D120W tank cars may continue in use, but new construction is not authorized.

* * * * *

(c) * * *

(13) *Special requirements for Class DOT-113 tank cars.*

(i) A Class DOT-113 tank car need not be periodically pressure tested; however, each shipment must be monitored to determine the average daily pressure rise in the tank car. If the average daily pressure rise during any shipment exceeds 3 psi per day, the tank car must be retested for thermal integrity prior to any subsequent shipment.

(ii) Thermal integrity retest. Either of the following alternative thermal integrity retests may be used:

(A) *Pressure rise retest:* The pressure rise in the tank may not exceed 5 psi in 24 hours. When the pressure rise retest is performed, the absolute pressure in the annular space of the loaded tank car may not exceed 75 microns of mercury at the beginning of the retest, and may not increase more than 25 microns during the 24 hour period; or

(B) *Calculated heat transfer rate retest:* The insulation system must be performance tested as prescribed in § 179.400-4 of this subchapter. When the calculated heat transfer rate retest is performed, the absolute pressure in the annular space of the loaded tank car may not exceed 75 microns of mercury at the beginning of the retest, and may not increase more than 25 microns during the 24 hour period. The calculated heat transfer rate in 24 hours may not exceed—

(*1*) 120 percent of the appropriate standard heat transfer rate specified in § 179.401-1 of this subchapter, for DOT-113A60W and DOT-113C120W tank cars;

(*2*) .1164 Btu/day/lb. of inner tank water capacity, for DOT–113A175W tank cars;

(*3*) .3272 Btu/day/lb. of inner tank water capacity, for DOT–113C60W and 113D60W tank cars; or

(*4*) .4740 Btu/day/lb. of inner tank water capacity, for DOT–113D120W tank cars.

(iii) If the car fails either of the retests prescribed in paragraph (c)(13)(ii) of this section, the car must be removed from service and may not be placed back in service until one of the applicable retests in paragraph (c)(13)(ii) of this section is successfully completed.

(iv) Each frangible disc must be replaced every 12 months and the replacement date stenciled on the car near the pressure relief value information.

(v) An alternate pressure relief valve must be retested at the same time interval prescribed for the required pressure relief valve. The start-to-discharge pressure and vapor tight pressure requirements for the alternate pressure relief valve must be as shown in § 179.401–1 of this subchapter.

RETEST TABLE 1

Specification	Retest interval years[1]			Safety relief valve	Tank	Retest pressure—p.s.i.	
	Tank and interior heater systems					Safety relief valve	
	Up to 10 years	Over 10 to 22 years	Over 22 years			Start-to-discharge	Vapor tight
(Remove)							
DOT–113A60W	[2]	[2]	[2]	5	[2]	30	24
DOT–113A175W	[2]	[2]	[2]	5	[2]	115	92
(Add)							
DOT–113A60W	[2]	[2]	[2]	5	[2]	[2]30	[2]24
DOT–113A175W	[2]	[2]	[2]	5	[2]	[2]115	[2]92
DOT–113C60W	[2]	[2]	[2]	5	[2]	[2]45	[2]36
DOT–113C120W	[2]	[2]	[2]	5	[2]	[2]75	[2]60
DOT–113D60W	[2]	[2]	[2]	5	[2]	[2]45	[2]36
DOT–113D120W	[2]	[2]	[2]	5	[2]	[2]75	[2]60

[1] See paragraph (c)(13) of this section for additional requirements for Class DOT–113 cars.

* * * * *

12. In § 173.33, all references to "carbon dioxide" are changed to read "carbon dioxide, liquid (*refrigerated*)" and all references to "nitrous oxide" are changed to read "nitrous oxide, liquid (*refrigerated*)", paragraphs (a) and (b) are revised, and paragraphs (d) (1), (2) and (4) are revised to read as follows:

§ 173.33 Qualification, maintenance, and use of cargo tanks.

(a) *General:* Unless otherwise provided in this Part, every cargo tank (or compartment) used for the transportation of hazardous materials must be an authorized packaging. Such authorized packaging shall comply with requirements as set forth in this section, in addition to those regulations applicable for the transportation of the particular material. For the purposes of this Part, whenever reference is made to a Specification MC–338 insulated cargo tank, the definitions in §§ 178.338–1 (a) and (b) of this subchapter apply.

(1) A cargo tank is authorized for shipment of a hazardous material by vessel when in conformance with the requirements of Part 176 of this subchapter and the following limitations:

(i) On carfloats or trailerships if the material is permitted aboard a cargo vessel by § 172.101 of this subchapter, or

(ii) On passenger ferry vessels or railroad car ferry vessels if the material is permitted aboard a passenger vessel by § 172.101 of this subchapter.

(2) [Reserved]

(b) Cargo tank qualification as an authorized packaging requires compliance with the applicable specification MC–300, MC–301, MC–302, MC–303, MC–304, MC–305, MC–306, MC–307, MC–310, MC–311, MC–312, MC–330, MC–331, or MC–338 (§ 178.341, § 178.342, § 178.343, § 178.337 or § 178.338 of this subchapter), this section, and the inspection, retest and marking requirements of § 177.824 of this subchapter. Any specification MC–304 cargo tank on which construction began before September 2, 1967, may have the vents and outlets modified to comply with specification MC–307 cargo tanks (See §§ 178.342–4 and 178–342–5).

(1) A cargo tank of the specification listed in Column 1 may be used when authorized in this Part, provided the tank construction began before the date in Column 2:

Column 1	Column 2
MC–300	Sept. 2, 1967.
MC–301	June 12, 1961.
MC–302, MC–303, MC–304, MC–305, MC–310, MC–311.	Sept. 2, 1967.
MC–330	May 15, 1967.

(2) The owner or operator, if not the owner, of each cargo tank used under, and in conformance with, an exemption issued before January 1, 1984, which authorizes the transportation of a cryogenic liquid in a cargo tank, shall remove the exemption number stenciled on the cargo tank and stamp the specification plate (or a plate placed adjacent to the specification plate) "DOT MC–338" followed by the applicable exemption number, for example, "DOT MC–338–E****." (Asterisks to be replaced by the exemption number.) The owner or operator, if not the owner, of a cargo tank that is remarked in this manner must retain a copy of the exemption in effect on December 1, 1983. No new construction of such cargo tanks may be initiated on or after January 1, 1984.

(i) The holding time must be determined, as required in § 178.338–9 of this subchapter, on each cargo tank or on at least one cargo tank of each design. Any subsequent cargo tank manufactured to the same design, if not individually tested, must have the optional test regimen performed during the first shipment (see §§ 178.338–9 (b) and (c) of this subchapter). For the purpose of performing the holding time test, same design means cargo tanks having the same manufacturer, same drawings, same dimensions (of length, diameter, and volume), same materials of construction, and the same insulation system.

(ii) The holding time determined by test for one authorized cryogenic liquid may be used as the basis for establishing the holding time for other authorized cryogenic liquids.

(3) The owner or operator, if not the owner, of each MC–331 (§ 178.337 of this subchapter) cargo tank operating under an exemption issued before January 1, 1984, that authorizes the transportation of ethane, liquid (*refrigerated*); ethane-propane mixture, liquid (*refrigerated*); or hydrogen chloride, liquid (*refrigerated*) shall remove the exemption number stenciled on the cargo tank and stamp the exemption number on the specification plate immediately after the DOT Specification, for example, "DOT MC–331–E* * * *." (Asterisks to be replaced by the exemption number.) If there is not adequate room on the specification plate, the exemption number may be stamped on a plate placed adjacent to the specification plate. The owner or operator, if not the owner, of a cargo tank that is remarked in this manner must retain a copy of the exemption in effect on December 31, 1983.

* * * * *

(d) A Specification MC-330, MC-331 or MC-338 (§ 178.337 or § 178.338 of the subchapter) cargo tank may not be used unless it meets the following requirements, as applicable:

(1) Each cargo tank must be tested and inspected at least once every 5 years in accordance with paragraphs (d)(2), (3), (4), (10), (11) and (12) of this section.

(i) The tank, and each pressure relief valve, of any cargo tank used for the transportation of chlorine must be tested at least once every 2 years.

(ii) Each cargo tank used to transport a flammable cryogenic liquid must be examined after each shipment to determine its actual holding time. The record required by § 177.840(h) of this subchapter may be used for this determination. If the examination indicates that the actual holding time of the cargo tank, after adjustment to reflect an average ambient temperature of 85° F., is less than 90 percent of the marked rated holding time (MRHT) for the cryogenic liquid marked on the specification plate or adjacent thereto (§ 178.338-18(b) of this subchapter), the tank may not be refilled with any flammable cryogenic liquid until it is restored to its marked rated holding time value or it is re-marked with the actual marked rated holding time determined by this examination. If the name of the flammable cryogenic liquid that was transported and its marked rated holding time is not displayed on or adjacent to the specification plate, this requirement may be met by deriving the MRHT of the cargo tank for that flammable cryogenic liquid and comparing that derived MRHT with the actual holding time after adjustment.

(2) Each tank (less fittings) must be subjected to a minimum internal pressure as shown below:

Specification	Ratio[1]
MC-330, MC-331	1½
MC-338	1¼

[1] Ratio of test pressure to the design pressure (maximum allowable working pressure or re-rated pressures) of the tank.

The internal pressure may be hydraulically or pneumatically generated. If a pneumatic test is used, a suitable method must be used for detecting the existence of leaks at all joints under pressure. This method must consist either of coating the entire surface of all joints under pressure with a solution of soap and water, or using another equally sensitive method. When a pneumatic test is performed, suitable safeguards should be provided to protect employees and other persons should a failure occur.

* * * * *

(4) When testing cargo tanks, the insulation and jacketing need not be removed unless it is otherwise impossible to reach test pressure and maintain a condition of pressure equilibrium after test pressure is reached, or the vacuum integrity cannot be maintained in the insulation space.

* * * * *

13. In § 173.300, paragraph (g) is removed, paragraph (f) is redesignated paragraph (g), and a new paragraph (f) is added to read as follows:

§ 173.300 Definitions.

* * * * *

(f) *Cryogenic liquid.* A "cryogenic liquid" is a refrigerated liquefied gas having a boiling point colder than −130°F. (−90°C.) at one atmosphere, absolute.

* * * * *

14. In § 173.304, the text of paragraph (a)(2) preceding the Table is revised, paragraph (a)(2) Table is amended by removing the entries for "Argon, pressurized liquid," "Carbon dioxide, liquefied," "nitrogen, pressurized liquid" and "Oxygen, pressurized liquid," and by adding an entry for "Carbon dioxide", and paragraph (b) is revised to read as follows:

§ 173.304 Charging of cylinders with liquefied compressed gas.

(a) * * *

(2) The following requirements must be complied with for the gases named (for cryogenic liquids, see § 173.316):

Kind of gas	Maximum permitted filling density (see note 1)	Containers marked as shown in this column or of the same type with higher service pressure must be used except as provided in §§ 173.34 (a) and (b), and 173.301(j) (see notes following table)
(Remove)		
Argon, pressurized liquid.	115	DOT-4L200.
Carbon dioxide, liquefied (see Notes 4, 7 and 8).	68	DOT-3A1800; DOT-3AX1800, DOT-3AA1800; DOT-3AAX1800; DOT-3; DOT-3E1800; DOT-3T1800; DOT-3HT2000; DOT-39.
Nitrogen, pressurized liquid.	68	DOT-4L200.
Oxygen, pressurized liquid.	68	DOT-4L200.
(Add)		
Carbon dioxide (see Notes 4, 7, and 8).	68	DOT-3A1800; DOT-3AX1800, DOT-3AA1800; DOT-3AAX1800; DOT-3; DOT-3E1800; DOT-3T1800; DOT-3HT2000; DOT-39.

* * * * *

(b) *Filling limits.* Except for carbon dioxide, nitrous oxide and vinyl fluoride, inhibited, the liquid portion of a liquefied gas must not completely fill the packaging at any temperature up to and including 130°F. The liquid portion of vinyl fluoride, inhibited, may completely fill the cylinder at 130°F. provided the pressure at the critical temperature does not exceed one and one-fourth times the service pressure.

* * * * *

15. In § 173.314, paragraphs (b)(6) and (c) preceding the Table are revised, the Table in paragraph (c) is amended by removing, revising and adding various entries, in alphabetical sequence, Note 17 to the Table in paragraph (c) is revised, paragraph (g) is redesignated paragraph (h), and a new paragraph (g) is added to read as follows:

§ 173.314 Requirements for compressed gases in tank cars.

* * * * *

(b) * * *

(6) Each tank car containing anhydrous ammonia; hydrogen chloride, liquid (*refrigerated*); or chlorine must be marked "Anhydrous Ammonia," "Hydrogen Chloride," or "Chlorine," as appropriate, in accordance with the requirements of § 172.330 of this subchapter.

(c) *Authorized gases, filling densities, tank cars.* A compressed gas offered for transportation in a tank car must be prepared in accordance with paragraphs (b) and (h) of this section, § 173.432, and the following table (for cryogenic liquids, see § 173.319):

Kind of gas	Maximum permitted filling density, Note 1	Required tank car, see § 173.31(a) (2) and (3)
(Remove)		
Carbon dioxide, liquefied.	Note 5	DOT-105A500W, Note 6.
(Add)		
Carbon dioxide, liquid (refrigerated).	Note 5	DOT-105A500W, Note 6.
Hydrogen chloride, liquid (*refrigerated*).	59.0 maximum to 60.1 minimum at maximum 60 psig, when offered for transportation.	DOT-105A600W, Note 17.
(Revise)		
Vinyl fluoride, inhibited.	59.6 maximum to 53.8 minimum at maximum 105 psig, when offered for transportation.	DOT-105A500W, Note 17.

* * * * *

Note 17.— See paragraph (g) of this section.

* * * * *

(g) *Special requirements for hydrogen chloride, liquid (refrigerated), and vinyl fluoride, inhibited.*

(1) The shipper shall notify the Bureau of Explosives whenever a car is not received by the consignee within 20 days from the date of shipment.

(2) Prior to the release of an "empty" car for transportation, the pressure in the car may not exceed 70 psig.

(3) A tank car containing hydrogen chloride, liquid (*refrigerated*) must have the auxiliary valve on the pressure relief device closed during transportation.

* * * * *

16. In § 173.315, all references to "carbon dioxide" are changed to read "carbon dioxide, liquid (*refrigerated*)" and all references to "nitrous oxide" are changed to read "nitrous oxide, liquid (*refrigerated*)", the introductory text of paragraph (a) is revised, the Table in paragraph (a) is amended by adding certain entries in alphabetical sequence, Note 11 to the Table in paragraph (a), and paragraph (c) are revised, and the Table in paragraph (h) is amended by adding certain entries in alphabetical sequence to read as follows:

§ 173.315 Compressed gases in cargo tanks and portable tanks.

(a) A compressed gas offered for transportation in a cargo tank or a portable tank must be prepared in accordance with this section (for cryogenic liquids, see § 173.318) and may only be shipped in a tank as provided in §§ 173.32, 173.33 and this section, as follows:

Kind of gas	Maximum permitted filling density		Specification container required	
	Percent by weight (see note 1)	Percent by volume (see par. (f) of this section)	Type (see note 2)	Minimum design pressure (psig)
(Remove)				
Carbon dioxide, liquefied	See par. (c) of this section.	95	do	200; see Note 3
Nitrous oxide	See par. (c) of this section.	95	do	200; see Note 3.
(Add)				
Carbon dioxide, liquid (*refrigerated*)	See par. (c) of this section.	95	do	200; see Note 3.
Ethane, liquid (*refrigerated*)		See par. (c) of this section.	MC-331, MC-338	100; see Note 11.
Ethane-propane mixture, liquid (*refrigerated*).		See par. (c) of this section.	MC-331, MC-338	275; see Note 11.
Hydrogen chloride, liquid (*refrigerated*)	103.0, 91.6, 86.7	See Note 7	MC-331, Mc-338	100; see Note 11. 300; see Note 11. 450; see Note 11.
Nitrous oxide, liquid (*refrigerated*)	See par. (c) of this section.	95	do	200; See Note 3.

Note 11: MC–330, MC–331 and MC–338 cargo tanks must be insulated. Cargo tanks must meet all the following requirements. Each tank must have a design service temperature of minus 100°F., or no warmer than the boiling point at one atmosphere of the hazardous material to be shipped therein, whichever is colder, and must comply with the low-temperature requirements of the ASME Code. When the normal travel time is 24 hours or less, the tank's holding time as loaded must be at least twice the normal travel time. When the normal travel time exceeds 24 hours, the tank's holding time as loaded must be at least 24 hours greater than the normal travel time. The holding time is the elapsed time from loading until venting occurs under equilibrium conditions. The cargo tank must have an outer jacket made of steel when the cargo tank is used to transport a flammable gas.

* * * * * * *

(c) Except as otherwise provided, the loading of a liquefied gas into a cargo tank or a portable tank shall be determined by weight or by a suitable liquid level gauging device. The liquid portion of the gas shall not fill the tank at 105°F. if the tank is lagged, or at 115°F. if the tank is unlagged, except that this requirement shall not apply to—

(1) A tank containing carbon dioxide, liquid *(refrigerated)* or nitrous oxide, liquid *(refrigerated)*. Such tank is required to be equipped with suitable pressure control valves and may not be filled to a level exceeding 95 percent of the volumetric capacity of the tank.

(2) A tank containing ethane, liquid *(refrigerated)*; ethane-propane mixture, liquid *(refrigerated)*; or hydrogen chloride, liquid *(refrigerated)*. Such tank must be filled to allow at least two percent outage below the inlet of the pressure relief valve or pressure control valve under conditions of incipient opening, with the tank in a level attitude.

* * * * * * *

(h) * * *

Kind of gas	Gauging device permitted for filling purposes
(Remove)	
Carbon dioxide, liquefied	Rotary tube; adjustable slip tube; fixed length dip tube.
Nitrous oxide	Rotary tube; adjustable slip tube; fixed length dip tube.
(Add)	
Carbon dioxide, liquid (*refrigerated*)	Rotary tube; adjustable slip tube; fixed length dip tube.
Ethane, liquid (*refrigerated*)	Rotary tube; adjustable slip tube; fixed length dip tube.
Ethane-propane mixture, liquid (*refrigerated*)	Rotary tube; adjustable slip tube; fixed length dip tube.
Hydrogen chloride, liquid (*refrigerated*)	None.
Nitrous oxide, liquid (*refrigerated*)	Rotary tube; adjustable slip tube; fixed length dip tube.

* * * * * * *

17. In Part 173, § 173.316 is revised to read as follows:

§ 173.316 Cryogenic liquids in cylinders.

(a) *General requirements.*

(1) A cylinder may not be loaded with a cryogenic liquid colder than the design service temperature of the packaging.

(2) A cylinder may not be loaded with any material which may combine chemically with any residue in the packaging to produce an unsafe condition.

(3) The jacket covering the insulation on a cylinder used to transport any flammable cryogenic liquid must be made of steel.

(4) A valve or fitting made of aluminum with internal rubbing or abrading aluminum parts that may come in contact with oxygen in the cryogenic liquid form may not be installed on any cylinder used to transport oxygen, cryogenic liquid.

(5) An aluminum valve, pipe or fitting may not be installed on any cylinder used to transport any flammable cryogenic liquid.

(6) Each cylinder must be provided with one or more pressure relief devices, which must be installed and maintained in compliance with the requirements of this subchapter.

(7) Each pressure relief device must be installed and located so that the cooling effect of the contents during venting will

not prevent effective operation of the device.

(8) The maximum weight of the contents in a cylinder with a design service temperature colder than −320° F. may not exceed the design weight marked on the cylinder (see § 178.57–20(a)(4) of this subchapter).

(b) *Pressure control valves.* Each cylinder containing a cryogenic liquid must have a pressure control valve that complies with § 173.34(d) and is designed and installed so that it will prevent the cylinder from becoming liquid full.

(c) *Specification cylinder requirements and filling limits.* Specification 4L cylinders (§ 178.57 of this subchapter) are authorized for the shipment of cryogenic liquids as follows:

(1) For purposes of this section, "filling density," except for hydrogen, is defined as the percent ratio of the weight of lading in the packaging to the weight of water that the packaging will hold at 60° F. (1 lb. of water=27.737 cubic inches at 60° F.).

(2) The cryogenic liquids of argon, nitrogen, oxygen, helium and neon must be loaded and shipped in accordance with the following table:

Pressure control valve setting (Maximum start-to-discharge pressure, psig)	Maximum permitted filling density (percent by weight)				
	Argon	Nitrogen	Oxygen	Helium	Neon
45	133	76	108	12.5	109
75	130	74	105	12.5	104
105	127	72	103	12.5	100
170	122	70	100	12.5	92
230	119	69	96	12.5	85
295	115	69	96	12.5	77
360	113	69	93	12.5	
Design Service Temperature	−320°F	−320°F	−320°F	−452°F	−411°F

(3) *Hydrogen (minimum 95 percent parahydrogen)* must be loaded and shipped as follows:

Column 1	Column 2
Design service temperature	Minus 423° F. or colder.
Maximum permitted filling density, based on cylinder capacity at minus 423° F (see Note 1).	6.7 percent.
The pressure control valve must be designed and set to limit the pressure in the cylinder to not more than.	17 psig.

Note 1.—The filling density for hydrogen, cryogenic liquid is defined as the percent ratio of the weight of lading in a packaging to the weight of water that the packaging will hold at minus 423° F. The volume of the packaging at minus 423° F is determined in cubic inches. The volume is converted to pounds of water (1 lb. of water=27.737 cubic inches).

(i) Each cylinder must be constructed, insulated and maintained so that during transportation the total rate of venting shall not exceed 30 SCF of hydrogen per hour.

(ii) In addition to the marking requirements in § 178.57–20 of this subchapter, the total rate of venting in SCF per hour (SCFH) shall be marked on the top head or valve protection band in letters at least one-half inch high as follows: "VENT RATE**SCFH" (with the asterisks replaced by the number representing the total rate of venting, in SCF per hour).

(iii) Carriage by highway is subject to the conditions specified in § 177.840(a) of this subchapter.

18. In Part 173, § 173.318 is added to read as follows:

§ 173.318 Cryogenic liquids in cargo tanks.

(a) *General requirements.*

(1) A cargo tank may not be loaded with a cryogenic liquid colder than the design service temperature of the packaging.

(2) A cargo tank may not be loaded with any material that may combine chemically with any residue in the packaging to produce an unsafe condition (see § 178.338–15).

(3) The jacket covering the insulation on a tank used to transport a cryogenic liquid must be made of steel if the cryogenic liquid—

(i) Is to be transported by vessel (see §§ 173.320(a)(4) and 176.76(h)(1) of this subchapter); or

(ii) Is oxygen or a flammable material.

(4) A valve or fitting made of aluminum with internal rubbing or abrading aluminum parts that may come in contact with oxygen in the cryogenic liquid form may not be installed on any cargo tank used to transport oxygen, cryogenic liquid.

(5) An aluminum valve, pipe or fitting, external to the jacket may not be installed on any cargo tank used to transport oxygen, cryogenic liquid or any flammable cryogenic liquid.

(6) A cargo tank used to transport oxygen, cryogenic liquid must be provided with a manhole (see § 178.338–6 of this subchapter).

(b) *Pressure relief devices and pressure control valves.*

(1) *General requirements.*

(i) Each tank must be protected by a primary system of one or more spring loaded pressure relief valves and, except for tanks in carbon monoxide service, by a secondary system of one or more frangible discs arranged to discharge upward and unobstructed to the outside of the protective housing in such a manner as to prevent impingement of gas upon the jacket or any structural part of the vehicle. For tanks in carbon monoxide service, the secondary system must be comprised of one or more pressure relief valves instead of the frangible discs.

(ii) Each pressure relief device must be designed and constructed for a pressure equal to or exceeding the tank's design pressure at the coldest temperature reasonably expected to be encountered.

(iii) The rated relieving capacity for each pressure relief valve, pressure control valve and frangible disc must be as determined by the flow formulas contained in paragraph 4.3.4 of CGA Pamphlet S–1.2.

(iv) Each pressure relief valve must be designed and located to minimize the possibility of tampering. If the pressure setting or adjustment is external to the valve, the valve adjustement must be sealed.

(v) Each pressure relief device must have direct communication with the vapor space of the tank at the midlength of the top centerline.

(vi) Each connection to a pressure relief device must be of sufficient size to allow the required rate of discharge through the pressure relief device.

(vii) No shut-off valve may be installed between a pressure relief device and the tank except when two or more pressure relief valves or two or more frangible discs are installed on the same tank. In that case, one or more shut-off valves may be so installed if the installation is arranged to allow the required relief capacity at all times through at least one pressure relief valve and at least one frangible disc.

(viii) Any shut-off valve or device that interferes with the proper operation of a pressure control valve must be designed and installed so that the cargo tank may not be operated for transportation purposes when the pressure control valve operation is impeded.

(ix) Each pressure relief valve must be arranged or protected to prevent the accumulation of foreign material between the relief valve and the

atmospheric discharge opening in any relief piping. The arrangement or protection must not impede flow through the device.

(x) Each pressure relief device must be installed and located so that the cooling effect of the contents during venting will not prevent the effective operation of the device.

(2) *Capacity and performance.*

(i) The required primary system of pressure relief valves and the required secondary system of relief devices must each have, as a minimum, the total capacity prescribed in section 4 of CGA Pamphlet S–1.2 for a bare tank, unless the insulation remains in place and effective under accident-fire conditions, in which case the insulation space is considered to be saturated with the gaseous lading at atmospheric pressure.

(ii) The primary system of pressure relief valves must have the minimum total capacity specified in paragraph (b)(2)(i) of this section, at a pressure not exceeding 120 percent of the tank design pressure.

(iii) The secondary system of frangible dics or additional pressure relief valves must have the minimum total capacity specified in paragraph (b)(2)(i) of this section, at a pressure not exceeding 150 percent of the tank design pressure.

(iv) The primary system of pressure relief valves must have a liquid flow capacity equal to or exceeding the maximum rate at which the tank is to be filled, at a pressure not exceeding 120 percent of the tank design pressure.

(v) Each primary pressure relief valve must have a set pressure no higher than 110 percent of the tank design pressure.

(vi) The secondary system of pressure relief devices must be designed to commence functioning at a pressure no lower than 130 percent and no higher than 150 percent of the tank design pressure.

(3) *Pressure relief devices for piping, hose and vacuum-insulated jackets.*

(i) Each portion of connected liquid piping or hose that can be closed at both ends must be provided with either a hydrostatic pressure relief valve without an intervening shut-off valve, or a check valve permitting flow from the pipe or hose into the tank. If used, the relief valve must be located so as to prevent its discharge from impinging on the tank, piping, or operating personnel.

(ii) On a vacuum-insulated cargo tank the jacket must be protected by a suitable relief device to release internal pressure. The discharge area of this device must be at least 0.00024 square inch per pound of water capacity of the tank. This relief device must function at a pressure not exceeding the internal design pressure of the jacket, calculated in accordance with the ASME Code, or 25 psig, whichever is less.

(4) *Optional pressure relief devices and pressure control valves.*

(i) In addition to the required pressure relief devices, a cargo tank may be equipped with one or more pressure control valves if they meet applicable requirements contained in this Part.

(ii) In addition to the required pressure relief devices, a cargo tank may be equipped with one or more frangible discs set to function at a pressure not less than one and one-half times or more than two times the tank design pressure.

(5) *Tank inlet, outlet, pressure relief device and pressure control valve markings.*

(i) Each tank inlet and outlet, except pressure relief devices and pressure control valves, must be permanently marked to indicate whether it communicates with "vapor" or "liquid" when the tank is filled to the maximum permitted filling density.

(ii) Each pressure relief valve must be plainly and permanently marked with the pressure, in psig, at which it is set-to-discharge, the actual discharge rate of the device in SCF per minute (SCFM), and the manufacturer's name or trade name and catalog number. The marked set pressure valve must be visible with the valve in its installed position. The rated discharge capacity of the device must be determined at a pressure of 120 percent of the design pressure of the tank.

(iii) Each pressure control valve must be plainly and permanently marked with the pressure, in psig, at which it is set-to-discharge.

(c) *Weight of lading requirements.* The weight of a cryogenic liquid in the tank must be determined by weighing or by the use of a liquid level gauging device authorized in § 178.338–14(a) of this subchapter, and may not exceed the lesser of:

(1) The weight of lading in the tank, based on the water capacity stamped on the nameplate (§ 178.338–18(a)(4) of this subchapter) and the appropriate maximum permitted filling density specified in paragraph (f) of this section; or

(2) The maximum weight of lading for which the cargo tank was designed, as marked on the specification plate (see § 178.338–18(b) of this subchapter).

(d) *Outage.* Except for a cargo tank containing helium, cryogenic liquid, a cargo tank offered for transportation must have an outage of at least two percent below the inlet of the pressure relief device or pressure control valve, under conditions of incipient opening, with the tank in a level attitude.

(e) *Temperature.* A flammable cryogenic liquid must be loaded into a cargo tank at a temperature sufficiently cold that the pressure setting of the pressure control valve or the required pressure relief valve, whichever is lower, will not be reached in less time than the marked rated holding time for the cryogenic liquid (see §§ 173.33(d)(1)(ii) and 178.338–9(b) of this subchapter).

(f) *Specification MC–338 (§ 178.338 of this subchapter) cargo tanks* are authorized for the shipment of the following cryogenic liquids subject to the following additional requirements:

(1) For purposes of this section, "filling density" is defined as the percent ratio of the weight of lading in the tank to the weight of water that the tank will hold at the design service temperature (one pound of water=27.737 cubic inches at 60° F., or one gallon of water=231 cubic inches at 60° F. and weighs 8.32828 pounds).

(2) *Argon, helium, nitrogen, and oxygen, cryogenic liquids* must be loaded and shipped in accordance with the following table:

PRESSURE CONTROL VALVE SETTING OR RELIEF VALVE SETTING

Maximum set-to-discharge pressure (psig)	Maximum permitted filling density (percent by weight)			
	Argon	Helium	Nitrogen	Oxygen
26		12.5		
30	129	12.5	74	105
40		12.5		
50		12.5		
55	125	12.5	71	102
60		12.5		
80		12.5		
85	121	12.5		[illegible]
100		12.5		
105		12.5	67	
120		12.5		
140		12.5		
145	115	12.5	64	[illegible]
160		12.5		
200	110	12.5	61	[illegible]
250	106	12.5	57	[illegible]
275	105	12.5	56	[illegible]
325	101		53	[illegible]
Design service temperature.	Minus 320° F.	Minus 452° F.	Minus 320° F.	Minus 320° F.

(3) *Carbon monoxide, hydrogen (minimum 95 percent para-hydrogen), ethylene, and methane or natural gas, cryogenic liquids* must be loaded and shipped in accordance with the following table:

PRESSURE CONTROL VALVE SETTING OR RELIEF VALVE SETTING

Maximum set-to-discharge pressure (psig)	Maximum permitted filling density (percent by weight)			
	Carbon monoxide	Ethylene	Hydrogen	Methane or natural gas
13			6.8	
15	75.0		6.6	
17	74.0		6.5	
20		53.5		40.0
25	73.0			
30	72.0	52.7	6.3	38.1
35				
40		52.0		36.5
45	71.5			
50		51.4	6.0	36.2
55				
60		50.8		
70		50.2	5.7	37.5
90		49.2		
95				
100		48.4	5.4	36.6
115		48.2		
125			5.0	
175	62.5	45.8		
265	56.0			
Design service temperature.	Minus 320° F.	Minus 155° F.	Minus 423° F.	Minus 260° F.

(g) *One-way travel time; marking.* The jacket of a cargo tank to be used to transport a flammable cryogenic liquid must be marked on its right side near the front, in letters and numbers at least two inches high, "One-way Travel Time ——— hrs.", with the blank filled in with a number indicating the one-way travel time (OWTT), in hours, of the cargo tank for the flammable cryogenic liquid to be transported.

(1) OWTT is based on the marked rated holding time (MRHT) of the cargo tank for the cryogenic liquid to be transported in the cargo tank. If the MRHT for the flammable cryogenic liquid is not displayed on or adjacent to the specification plate, this MRHT may be derived.

(2) The MRHT is converted to OWTT, in hours, as follows:

(i) For a tank with an MRHT of 72 hours or less,

OWTT=MRHT−24/2

(ii) For a tank with an MRHT greater than 72 hours,

OWTT=MRHT−48

(3) Only the OWTT for the flammable cryogenic liquid in the cargo tank may be displayed on the cargo tank.

19. In Part 173, § 173.319 is added to read as follows:

§ 173.319 Cryogenic liquids in tank cars.

(a) *General requirements.*

(1) A tank car containing a flammable cryogenic liquid may not be shipped unless it was loaded by, or with the consent of, the owner of the tank car.

(2) The amount of flammable cryogenic liquid loaded into a tank car must be determined, either by direct measurement or by calculation based on weight, to verify that the tank has not been filled to a level in excess of the limits specified in paragraph (d)(2) of this section. The weight of any flammable cryogenic liquid loaded, except hydrogen, must be checked by use of scales after disconnecting the loading line.

(3) Whenever a tank car containing any flammable cryogenic lading is not received by the consignee within 20 days from the date of shipment, the shipper of the lading shall notify the Bureau of Explosives.

(4) A tank car may not be loaded with any flammable cryogenic liquid—

(i) That may combine chemically with any residue in the tank to produce an unsafe condition,

(ii) That is colder than the design service temperature of the tank,

(iii) If the average daily pressure rise in the tank exceeded 3 psi during the prior shipment (see § 173.31(c)(13)),

(iv) Unless it is marked with the name of contents, in accordance with § 172.330 of this subchapter.

(b) When a tank car containing a flammable cryogenic liquid is offered for transportation—

(1) At least 0.5 percent outage must be provided below the inlet of the pressure relief or pressure control valve at the start-to-discharge pressure setting of the valve, with the tank car in a level attitude, and

(2) The absolute pressure in the annular space must be less than 75 microns of mercury.

(c) *Temperature.* A flammable cryogenic liquid must be loaded into a tank car at such a temperature that the average daily pressure rise during transportation will not exceed 3 psi (see paragraph (a)(4)(iii) of this section and § 173.31(c)(13)).

(d) A Class DOT–113 tank car is authorized for the shipment of the following cryogenic liquids subject to the following additional requirements:

(1) For purposes of this section, "filling density" is defined as the percent ratio of the weight of lading in the tank to the weight of water that the tank will hold at the design service temperature (one pound of water = 27.737 cubic inches at 60° F., or one gallon of water = 231 cubic inches at 60° F. and weighs 8.32828 pounds).

(2) *Ethylene, and hydrogen (minimum 95 percent parahydrogen), cryogenic liquids* must be loaded and shipped in accordance with the following table:

PRESSURE CONTROL VALVE SETTING OR RELIEF VALVE SETTING

Maximum start-to-discharge pressure (psig)	Maximum permitted filling density (percent by weight)			
	Ethylene	Ethylene	Ethylene	Hydrogen
17				6.80.
45	52.6			
75		51.1	51.1	
Maximum pressure when offered for transportation.	10 psig	10 psig	20 psig	
Design service temperature	Minus 260° F.	Minus 260° F.	Minus 155° F.	Minus 423° F.
Specification (see § 173.31(a)(9))	113D60W. 113C60W.	113C120W.	113D120W.	113A175W. 113A90W.

20. In Part 173, § 173.320 is added to read as follows:

§ 173.320 Cryogenic liquids; exceptions.

(a) Atmospheric gases and helium, cryogenic liquids, in Dewar flasks, insulated cylinders, insulated portable tanks, insulated cargo tanks, and insulated tank cars, designed and constructed so that the pressure in such packagings will not exceed 25.3 psig under ambient temperature conditions during transportation (excluding loading and unloading operations or operation of a process system such as a refrigeration system) are not subject to the requirements of this subchapter when transported by motor vehicle or railcar except:

(1) Sections 171.15 and 171.16 of this subchapter pertaining to the reporting of incidents, not including a release that is the result of venting through a pressure control valve, or the neck of the Dewar flask.

(2) Subparts A, B, C, and D of Part 172, Sections 174.24 (for rail) and 177.817 for highway) and in addition, Part 172 in its entirety for oxygen.

(b) For transportation by vessel, the requirements of this subchapter do not apply to atmospheric gases used in a refrigeration system.

PART 174—CARRIAGE BY RAIL

21. The Table of Sections to Part 174 is amended by revising the heading for § 174.204 to read as follows:

Sec.

174.204 Tank car delivery of gases, including cryogenic liquids.

22. In § 174.25, paragraph (a), the Table is amended by removing the entry "Oxygen (liquefied)" and adding in its place the entry "Oxygen, cryogenic liquid," as follows:

§ 174.25 Additional information on waybills, switching orders and other billings.

(a) * * *

Hazardous material or class	Placard notation	Placard endorsement
REMOVE		
Oxygen (liquefied)	Placarded OXYGEN.....	Dangerous.
ADD		
Oxygen, cryogenic liquid.	Placarded OXYGEN.....	Dangerous.

* * * * *

23. In § 174.67, the introductory text of paragraph (a) is revised to read as follows:

§ 174.67 Tank car unloading.

(a) In unloading tank cars, the following rules must be observed (see subpart F of this Part for gases):

* * * * *

24. In § 174.83, paragraph (b) is revised to read as follows:

§ 174.83 Switching of cars containing hazardous materials.

* * * * *

(b) Any tank car placarded "EXPLOSIVE A" or "POISON GAS" and any Class DOT–113 tank car placarded "FLAMMABLE GAS" may not be—

(1) Cut off while in motion,

(2) Coupled into with more force than is necessary to complete the coupling, or

(3) Struck by any car moving under its own momentum.

* * * * *

25. In § 174.204, the heading and paragraph (a)(2) are revised to read as follows:

§ 174.204 Tank car delivery of gases, including cryogenic liquids.

(a) * * *

(2) The following tank cars may not be delivered and unloaded on carrier tracks unless the lading is piped directly from the car to permanent storage tanks of sufficient capacity to receive the entire contents of the car; however, such cars may be stored on a private track (see § 171.8 of this subchapter) or on carrier tracks designated by the carrier for such storage:

(i) A tank car containing flammable cryogenic liquid; or

(ii) A tank car, except for a DOT–106A or 110A multi-unit tank car tank (§ 179.300 or § 179.301 of this subchapter), containing anhydrous ammonia; hydrogen chloride, liquid (*refrigerated*); hydrocarbon gas, liquefied; or liquefied petroleum gas; and having interior pipes for liquid and gas discharge valves equipped with check valves.

PART 176—CARRIAGE BY VESSEL

26. In § 176.76, paragraph (h) is added to read as follows:

§ 176.76 Highway vehicles, railroad vehicles, freight containers, and portable tanks containing hazardous materials.

* * * * *

(h) *Cryogenic liquids.* For shipment of cryogenic liquids on board a vesel the packaging must be designed and filled so that:

(1) Any cryogenic liquid being transported in a cargo tank, regardless of the pressure in the package, must be contained in a steel jacketed Specification MC–338 (§ 178.338 of this subchapter) insulated cargo tank, or a cargo tank approved under the provisions of § 173.33(b)(2) of this subchapter.

(2) Any valve or fitting with moving or abrading parts that may come in contact with any cryogenic liquid may not be made of aluminum.

(3) For a flammable cryogenic liquid being transported in a cargo tank, the elapsed time between the loading of the cargo tank and the subsequent unloading of the cargo tank at its final destination may not exceed the marked rated holding time (MRHT) of the cargo tank for the cryogenic liquid being transported, which must be displayed on or adjacent to the specification plate.

(4) Portable tanks, cargo tanks, and tank cars containing cryogenic liquids must be stowed "on deck" regardless of the stowage authorized in § 172.101 of this subchapter. Cargo tanks or tank cars containing cryogenic liquids may be stowed one deck below the weather deck when transported on a trailership or trainship that is unable to provide "on deck" stowage because of the vessel's design. Tank cars must be Class DOT–113 or AAR–204W tank cars.

PART 177—CARRIAGE BY PUBLIC HIGHWAY

27. In Part 177, the Table of Sections is amended by revising the headings for §§ 177.816 and 177.840, and adding headings for §§ 177.818 and 177.826 to read as follows:

* * * * *

Sec.
177.86 Training
* * * * *
Sec.
177.818 Special instructions; flammable cryogenic liquids.
* * * * *
177.826 Carrier's registration statement; flammable cryogenic liquids.
* * * * *
177.840 Compressed gases, including cryogenic liquids.
* * * * *

28. In Part 177, § 177.816 is revised to read as follows:

§ 177.816 Training.

(a) *Applicability.* No carrier may transport a flammable cryogenic liquid in a cargo tank on a public highway unless the driver of the vehicle has received the training specified in paragraph (b) of this section This section applies only to an originating carrier when an interchange operation is involved.

(b) *Training required.* Each carrier subject to paragraph (a) of this section must—

(1) Provide the required training in written form;

(2) Provide the required training before a driver may drive a motor vehicle transporting a flammable cryogenic liquid in a cargo tank and at least one every 24 months thereafter;

(3) Include in the training program instructions pertaining to—

(i) Requirements in this subchapter applicable to cryogenic liquids, generally;

(ii) Requirements in the Federal Motor Carrier Safety Regulations, Parts 390–397 of this title, applicable to drivers;

(iii) The properties and potential hazards of the particular material to be transported;

(iv) The safe operation of the type of cargo tank the driver will be operating, including its handling characteristics, emergency features and loading limitations; and

(v) Procedures to be followed in case of accident or other emergency, including unanticipated pressure increase or decrease.

(c) *Record of training.* A record certifying that current training has been provided in accordance with paragraph (b) of this section shall be retained in the driver's qualification file (see § 391.51 of this title) for as long as the driver is employed by that carrier and for 90 days thereafter. The record shall include—

(1) The driver's name and operators license number;

(2) The date the driver was provided the training and the due date for subsequent training;

(3) A copy of the written training material required by paragraph (b) of

this section or a reference indicating the location of a readily available copy; and

(4) The name and address of the person providing the training.

29. In Part 177, § 177.818 is added to read as follows:

§ 177.818 Special instructions; flammable cryogenic liquids.

(a) No carrier may operate, and no driver may drive, a motor vehcile transporting a flammable cryogenic liquid in a package exceeding 125 gallons water capacity unless written instructions containing the following information are carried with the required shipping papers:

(1) General precautions,

(2) Manual venting instructions,

(3) Emergency procedures, and

(4) The names and telephone numbers of persons to be contacted in case of emergency or accident.

(b) [Reserved]

30. In § 177.824, paragraph (a)(1) is amended by revising the first phrase to read, "Each cargo tank, except a specification MC–330, MC–331, or MC–338 cargo tank, * * *." and paragraph (e) is revised to read as follows:

§ 177.824 Retesting and inspection of cargo tanks.

* * * * *

(e) *Compressed gas and cryogenic liquid cargo tanks, specifications MC–330, MC–331, and MC–338.*

(1(*Specification MC–330 and MC–331.* Each cargo tank constructed in compliance with specification MC–330 or MC–331 (§ 178.337 of this subchapter) must be inspected and tested in accordance with § 173.33 of this subchapter.

(2) *Specification MC–338 insulated cargo tanks.* Each insulated cargo tank constructed in compliance with specification MC–338 (§ 178.338 of this subchapter) must be tested, except for the retest pressure, in accordance with § 173.338–16(a) of this subchapter, and must be in compliance with § 173.33 of this subchapter. If the tank is opened for any reason, the cleanliness must be verified after closure in accordance with § 178.338–15.

* * * * *

31. In Part 177, §177.826 is added to read as follows:

§ 177.826 Carrier's registration statement; flammable cryogenic liquids.

(a) No person may transport a flammable cryogenic liquid in a portable tank or a cargo tank unless he has filed a registration statement by certified mail, return receipt requested, with the Associate Director for HMR, MTB in accordance with paragraphs (b), (c) and (d) of this section.

(b) The registration statement must contain the following information:

(1) The carrier's name and principal place of business.

(2) Locations where cargo tanks used to transport flammable cryogenic liquids are domiciled.

(3) The serial number or vehicle identification number of each cargo tank used by the carrier to transport flammable cryogenic liquids, and the name of each flammable cryogenic liquid transported in each cargo tank.

(c) The registration statement must be filed:

(1) Initially between January 1 and February 28, 1984 (this initial statement is only required to contain information regarding operations that took place during the 90 days prior to the date of the statement); and

(2) Subsequently, between January 1 and February 28 of each even numbered year after 1984.

(d) For equipment obtained or operations begun between the two-year filing intervals specified in paragraph (c) of this section, the information must be provided on the registration statement filed during the next required filing period.

* * * * *

32. In § 177.840, the heading and paragraph (a)(2) are revised; paragraphs (h), (i), (j), and (k) are added to read as follows:

§ 177.840 Compressed gases, including cryogenic liquids.

(a) * * *

(2) *Cylinders for hydrogen, cryogenic liquid.* A Specification DOT–4L cylinder containing hydrogen, cryogenic liquid may only be transported on a motor vehicle as follows:

(i) The vehicle must have an open body equipped with a suitable rack or support having a means to hold the cylinder upright when subjected to an acceleration of 2 "g" in any horizontal direction;

(ii) The combined total of the hydrogen venting rates, as marked, on the cylinders transported on one motor vehicle may not exceed 60 SCF per hour;

(iii) The vehicle may not enter a tunnel; and

(iv) Highway transportation is limited to private and contract carriage and to direct movement from point of origin to destination.

* * * * *

(h) The driver of a motor vehicle transporting a flammable cryogenic liquid in a package exceeding 125 gallons of water capacity shall avoid unnecessary delays during transportation. If unforeseen conditions cause an excessive pressure rise, the driver shall manually vent the tank at a remote and safe location. For each shipment, the driver shall make a written record of the cargo tank pressure and ambient (outside) temperature—

(1) At the start of each trip,

(2) Immediately before and after any manual venting,

(3) At least once every five hours, and

(4) At the destination point.

(i) No person may transport a flammable cryogenic liquid in a cargo tank unless the one-way travel time (OWTT), marked on the tank in compliance with § 173.318(g) of this subchapter, is equal to or greater than the elapsed time between loading and unloading of the cargo tank. This prohibition does not apply if, prior to expiration of the OWTT, the tank is brought to full equilibration as specified in paragraph (j) of this section.

(j) Full equilibration of a cargo tank transporting a flammable cryogenic liquid may only be done at a facility that loads or unloads a flammable cryogenic liquid and must be performed and verified as follows:

(1) The temperature and pressure of the liquid must be reduced by a manually controlled release of vapor;

(2) The pressure in the cargo tank must be measured at least ten minutes after the manual release is terminated, and

(3) The pressure in the cargo tank must be equal to or less than the pressure at which the cargo tank was loaded.

(k) A carrier of carbon monoxide, cryogenic liquid must provide each driver with a self-contained air breathing apparatus that is approved by the National Institute of Occupational Safety and Health; for example, Mine Safety Appliance Co., Model 401, catalog number 461704.

PART 178—SHIPPING CONTAINER SPECIFICATIONS

33. In Part 178, the Table of Sections is amended by adding a heading for § 178.338 to read as follows:

Sec.

178.338 Specification MC–338, insulated cargo tank.

34. In § 178.57–2, the heading and paragraphs (b) and (c) are revised and footnotes 1 and 2 are removed to read as follows:

§ 178.57–2 Type, size, service pressure, and design service temperature.

* * * * *

(b) The service pressure shall be at least 40 and not more than 360 pounds

per square inch. The service pressure limits the use of the cylinder and is shown by marks on the cylinder. For example, DOT–4L200 indicates the authorized pressure is 200 pounds per square inch.

(c) The design service temperature is the coldest temperature for which a cylinder is suitable. The required design service temperatures for each cryogenic liquid is as follows:

Cryogenic liquid	Design service temperature
Argon	Minus 320°F. or colder.
Helium	Minus 452°F. or colder.
Hydrogen	Minus 423°F. or colder.
Neon	Minus 411°F. or colder.
Nitrogen	Minus 320°F. or colder.
Oxygen	Minus 320°F. or colder.

* * * * *

35. Section 178.57–5 is revised to read as follows:

§ 178.57–5 Material.

(a) *Inner containmemt vessel (cylinder).* Designations and limiting chemical compositions of steel authorized by this specification shall be as shown in § 178.57–21(a) Table 1.

(b) *Outer jacket.* Steel or aluminum may be used subject to the requirements of § 178.57–21(b).

36. In § 178.57–8, paragraph (c) is revised and paragraph (d) is added to read as follows:

§ 178.57–8 Manufacture.

* * * * *

(c) The surface of the cylinder must be insulated. The insulating material must be fire resistant. The insulation on non-evacuated jackets must be covered with a steel jacket not less than 0.060-inch thick or an aluminum jacket not less than 0.070 inch thick, so constructed that moisture cannot come in contact with the insulating material. If a vacuum is maintained in the insulation space, the evacuated jacket must be designed for a minimum collapsing pressure of 30 psi differential whether made of steel or aluminum. The construction must be such that the total heat tranfer, from the atmosphere at ambient temperature to the contents of the cylinder, will not exceed 0.0005 Btu per hour, per Fahrenheit degree differential in temperature, per pound of water capacity of the cylinder. For hydrogen, cryogenic liquid service, the total heat transfer, with a temperature differential of 520 Fahrenheit degrees, may not exceed that required to vent 30 SCF of hydrogen gas per hour.

(d) For a cylinder having a design service temperature colder than minus 320°F, a calculation of the maximum weight of contents must be made and that weight must be marked on the cylinder as prescribed in § 178.57–20(a)(4).

* * * * *

37. In § 178.57–10, paragraph (b) is amended by revising the definition of "P" as follows:

§ 178.57–10 Wall thickness.

* * * * *

(b) * * *

P=minimum test pressure prescribed for pressure test in pounds per square inch;

* * * * *

38. In § 178.57–12, paragraph (a) is revised to read as follows:

§ 178.57–12 Openings in cylinder.

(a) Openings permitted in heads only. They must be circular and shall not exceed 3 inches diameter or one third of the cylinder diameter, whichever is less. Each opening in the cylinder must be provided with a fitting, boss or pad, either integral with, or securely attached to, the cylinder body by fusion welding. Attachments to a fitting, boss or pad may be made by welding, brazing, mechanical attachment, or threading. Threads must comply with the following:

(1) Threads must be clean-cut, even, without checks and cut to gauge.

(2) Taper threads to be of a length not less than that specified for NPT.

(3) Straight threads must have at least 4 engaged threads, tight fit and calculated shear strength at least 10 times the test pressure of the cylinder. Gaskets, which prevent leakage and are inert to the hazardous material, are required.

* * * * *

39. Section 178.57–13 is revised to read as follows:

§ 178.57–13 Pressure relief devices and pressure control valves.

Each cylinder must te equipped with pressure relief devices and pressure control valves as prescribed in §§ 173.34(d) and 173.316 of this subchapter. Flow capacity of relief devices must meet the requirements of paragraph 5.9 of CGA Pamphlet S–1.1.

40. In § 178.57–20, paragraphs (a)(2) and (a)(4) are revised, paragraphs (a)(5) and (a)(6) are redesignated (a)(6) and (a)(7) respectively, and new paragraphs (a)(5), (a)(8) and (a)(9) are added to read as follows:

§ 178.57–20 Marking.

(a) * * *

(2) ST followed by the design service temperature (for example, ST–423F), on cylinders having a design service temperature of colder than minus 320°F. only. Location to be just below the DOT mark.

* * * * *

(4) Maximum weight of contents, in pounds (for example, Max. Content 51#), on cylinders having a design service temperature colder than minus 320°F. only. Location to be near symbol.

(5) Examples of required markings are:

Design service temperature minus 320° F. or warmer.	Design service temperature colder than minus 320° F.
DOT–4L 150	DOT–4L 150
1234	ST–423F
XY	1234
	XY
	MAX CONTENT 51#

* * * * *

(8) Special orientation instructions (for example, THIS END UP), if the cylinder is used in an orientation other than vertical with openings at the top of the cylinder.

(9) "Aluminum Jacket," if the jacket of the cylinder is constructed of aluminum.

* * * * *

41. Section 178.57–21 is revised to read as follows:

§ 178.57–21 Authorized materials of construction.

(a) *Inner containment vessel (cylinder).* Electric furnace steel of uniform quality. Chemical analysis must conform to ASTM A240, Type 304 Stainless Steel. The following chemical analyses and physical properties are authorized:

TABLE 1—AUTHORIZED MATERIALS

Designation	Chemical analysis, limits in percent
Carbon [1]	0.08 max.
Manganese	2.00 max.
Phosphorus	0.045 max.
Sulphur	0.030 max.
Silicon	1.00 max.
Nickel	8.00–10.50
Chromium	18.00–20.00
Molybdenum	
Titanium	
Columbium	

[1] The carbon analysis must be reported to the nearest hundredths of one percent.

	Physical properties (annealed)
Tensile strength, p.s.i. (minimum)	75,000
Yield strength, p.s.i. (minimum)	30,000
Elongation in 2 inches (minimum), percent	30.0
Elongation other permissible gauge lengths (minimum), percent	15.0

NOTE 1.—A heat of steel made under the above specification is acceptable, even though its check chemical analysis is slightly out of the specified range, if it is satisfactory in all other respects, provided the tolerances shown in the following table are not exceeded

CHECK ANALYSIS TOLERANCES

Element	Limit or maximum of specified range, percent	Tolerance over the maximum limit or under the minimum limit
Carbon	To 0.030, inclusive	0.005
	Over 0.030 to 0.20, inclusive	0.01
Manganese	To 1.00, inclusive	[illegible]
	Over 1.00 to 3.00, inclusive	0.04
Phosphorus [1]	To 0.040, inclusive	[illegible]
	Over 0.040 to 0.20 inclusive	[illegible]
Sulfur	To 0.40, inclusive	[illegible]
Silicon	To 1.00, inclusive	[illegible]
Chromium	Over 15.00 to 20.00, inclusive	[illegible]
Nickel	Over 5.00 to 10.00, inclusive	0.10
	Over 10.00 to 20.00, inclusive	0.15

[1] Rephosphorized steels not subject to check analysis of the phosphorus.

(b) *Outer jacket.*

(1) *Nonflammable cryogenic liquids.* Cylinders intended for use in the transportation of nonflammable cryogenic liquid must have an outer jacket made of steel or aluminum.

(2) *Flammable cryogenic liquids.* Cylinders intended for use in the transportation of flammable cryogenic liquid must have an outer jacket made of steel.

42. Section 178.57–22 is revised to read as follows:

§ 178.57–22 Inspector's report.

(a) This report is required to be clear, legible and in following form:

(Place) ———
(Date) ———
Steel gas cylinders
Manufactured for ———
Location at ———
Manufactured by ———
Location at ———
Consigned to ———
Location at ———
Quantity ———
Size ——— inches outside diameter by ——— inches long
Cylinders were pressure tested at ——— pounds per square inch and found to be satisfactory.
Maximum and minimum weight ———
Maximum and minimum volumetric capacity ———
Jacket material ———
Insulation type ———
Marks stamped into the ——— (Location of marking) of the cylinder are:
Specification DOT ———
Design service temperature—minus——°F.
Maximum weight of content — (pounds)
Serial numbers — to — inclusive
Inspecter's mark ———
Identifying symbol (registered) ———
Test date ———
Tare weight (yes or no) ———
Other marks ———
These cylinders were made by process of———

The material used was authorized by § 178.57–21.

The material used was identified by the following ——— (Heat-purchase order) numbers ———

The material used was verified as to chemical analysis and record thereof is attached hereto. The heat numbers ——— (were—were not) marked on the material.

Test No.	Heat No.	Check analysis No.	Cylinders represented (serial Nos.)	Chemical analysis C	P	S	Si	Mn	Ni	Cr	Mo	Cu	Al	Zr

All material was inspected and all that was accepted was found free from seams, cracks, laminations and other injurious defects.

The compliance of cylinders with specification requirements was verified including markings, condition of inside, tests, threads, etc. All cylinders with defects which might prove injurious were rejected. The processes of manufacture and heat treatment were supervised and found to be efficient and satisfactory.

The cylinder walls were measured and the minimum thickness noted was —— inch. The outside diameter was determined by a close approximation to be —— inches. The wall stress was calculated to be —— pounds per square inch under an internal pressure of —— pounds per square inch.

Pressure tests, tensile tests of material, and other tests as prescribed in specification No. DOT–4L——— were made in the presence of the inspector and all cylinders accepted were found to be in compliance with the requirements of that specification. Records thereof are attached hereto.

Each cylinder ——— (Has—has not) been equipped with safety devices as follows:

I hereby certify that all of these cylinders proved satisfactory in every way and comply with the requirements of Department of Transportation specification No. 4L except as follows:

Exceptions ———
(Manufacturer's name) ———

By ———
(Signed) ———
(Inspector)
(Place) ———
(Date) ———

Record of Chemical Analysis of Steel for Cylinders

Numbered ——— to ——— inclusive.
Size —— inches outside diameter by —— inches long.
Made by ——— Company.
For ——— Company.

Steel was manufactured by ——— Company. The originals of the certified mill test reports are in the files of the manufacturer.

Note: Any omission of analyses by heats, if authorized, must be accounted for by notation hereon reading "The prescribed certificate of the manufacturer of material has been secured, found satisfactory, and placed on file," or by attaching a copy of the certificate.

Chemical analyses were made by ———

43. In § 178.337–1, paragraphs (a) and (e) are revised to read as follows:

§ 178.337–1 General requirements.

(a) *ASME Code construction.* Tanks must be—

(1) Seamless or welded construction, or a combination of both;

(2) Designed and constructed in accordance with the ASME Code;

(3) Made of steel or aluminum; however, if aluminum is used, the cargo tank must be insulated and the hazardous material to be transported must be compatible with the aluminum (see §§ 173.33(i), 173.315(a) Table Note 11, and 178.337–2(a)(1) of this subchapter); and

(4) Covered with a steel jacket if the cargo tank is insulated and used to transport a flammable gas (see § 173.315(a) Table Note 11 of this subchapter).

* * * * *

(e) *Insulation.* Compliance with the requirements for use and performance of insulation is required (see §§ 173.33(i), 173.315(a) Table Note 11, and 178.337–1(a)(3) of this subchapter).

* * * * *

44. In § 178.337–11, the introductory text to paragraph (c) is revised to read as follows:

§ 178.337–11 Emergency discharge control.

* * * * *

(c) *Liquid or vapor discharge openings.* Except for an engine fuel line on a truck-mounted tank of not over ¾ inch NPT and equipped with a valve having an integral excess flow valve, each liquid or vapor discharge opening in a tank intended to be used for a flammable liquid; flammable compressed gas; hydrogen chloride, liquid (*refrigerated*); or anhydrous ammonia, must be equipped with a remotely controlled internal shut-off valve. However, on any liquid or vapor discharge opening 1¼ inches NPT or smaller, an excess flow valve together with a manually operated external valve may be used in place of a remotely controlled internal shut-off valve. Each remotely controlled internal valve must comply with the following requirements:

* * * * *

45. In Part 178, § 178.338 consisting of §§ 178.338–1 to 178.338–19 is added to read as follows:

§ 178.338 Specification MC–338; insulated cargo tank.

§ 178.338–1 General requirements.

(a) For the purposes of this section—

(1) *"Design pressure"* means the "maximum allowable working pressure" as used in the ASME Code, and is the gauge pressure at the top of the tank.

(2) *"Design service temperature"* means the coldest temperature for which the tank is suitable (see §§ 173.318 (a)(1) and (f) of this subchapter).

(b) Each cargo tank must consist of a suitably supported welded inner vessel enclosed within an outer shell or jacket, with insulation between the inner vessel and outer shell or jacket, and having piping, valves, supports and other appurtenances as specified in this subchapter. For the purpose of this specification, "tank" means inner vessel and "jacket" means either the outer shell or insulation cover.

(c) Each tank must be designed and constructed to meet the requirements of the ASME Code.

(1) The design pressure of the tank must be at least 25.3 psig but not more than 500 psig. To determine the required thicknesses of the parts of the tank, the static head of the lading shall be added to the design pressure. If the jacket is evacuated, the tank must be designed for a pressure of 14.7 psi, plus the lading static head, higher than its "design pressure." The jacket must be designed in accordance with paragraph (e) or (f) of this section, as appropriate.

(2) The design service temperature of the tank, piping and valves may not be warmer than the liquefaction temperature at one atmosphere of the lading to be transported (see §§ 173.318 (a)(1) and (f) of this subchapter).

(3) Design and construction details of the tank interior may not allow collection and retention of cleaning materials or contaminants. To preclude the entrapment of foreign material, the design and construction of the tank must allow washing of all interior surfaces by the normal surging of the lading during transportation.

(d) The exterior surface of the tank must be insulated with a material compatible with the lading.

(1) Each cargo tank must have an insulation system that will prevent the tank pressure from exceeding the pressure relief valve set pressure within the specified holding time when the tank is loaded with the specific cryogenic liquid at the design conditions of—

(i) The specified temperature and pressure of the cryogenic liquid, and

(ii) The exposure of the filled cargo tank to an average ambient temperature of 85°F.

(2) For a cargo tank used to transport oxygen, the insulation may not sustain combustion in a 99.5 percent oxygen atmosphere at atmospheric pressure when contacted with a continuously heated glowing platinum wire. The cargo tank must be marked in accordance with § 178.338–18(b)(7).

(3) Each vacuum-insulated cargo tank must be provided with a connection for a vacuum gauge to indicate the absolute pressure within the insulation space.

(e) The insulation must be completely covered by a metal jacket. The jacket or the insulation must be so constructed and sealed as to prevent moisture from coming into contact with the insulation (see § 173.318(a)(3) of this subchapter). Minimum metal thicknesses are as follows:

Type metal	Jacket evacuated		Jacket not evacuated	
	Gauge	Inches	Gauge	Inches
Stainless steel	18	0.0439	20	0.0324
Low Carbon Mild Steel	12	0.0946	14	0.0677
Aluminum		0.155		0.0100

(f) An evacuated jacket must be in compliance with the following requirements:

(1) The jacket heads, shell and stiffening rings must be designed in accordance with paragraphs UG–28, UG–29 and UG–33 of the ASME Code to sustain a critical collapsing pressure of at least 30 psi. The jacket need not be marked with the ASME stamp.

(2) If the jacket also supports additional loads, such as the weight of the tank and lading, the combined stress, computed according to the formula in § 178.338–3(b), may not exceed 25 percent of the minimum specified tensile strength.

§ 178.338–2 Material.

(a) All material used in the construction of a tank and its appurtenances that may come in contact with the lading must be suitable for use with the lading to be transported. All material used for tank pressure parts, including evacuated jackets, must conform to the requirements of the ASME Code.

(b) All tie-rods, mountings, and other appurtenances within the jacket and all piping, fittings and valves must be of material suitable for use at the lowest temperature to be encountered.

(c) Impact tests are required on all tank materials, except aluminum, and must be performed using the procedure prescribed in the ASME Code.

(d) The direction of final rolling of the shell material must be the circumferential orientation of the tank shell.

(e) Each tank constructed in accordance with Part UHT of the ASME Code must be postweld heat treated as a unit after completion of all welds to the shell and heads. Other tanks must be postweld heat treated as required by the ASME Code. For all tanks the method must be as prescribed in the ASME Code. Welded attachments to pads may be made after postweld heat treatment.

(f) The fabricator shall record the heat and slab numbers and the certified Charpy impact values of each plate used in the tank on a sketch showing the location of each plate in the shell and heads of the tank. A copy of the sketch must be provided to the owner of the cargo tank and a copy must be retained by the fabricator for at least five years and made available, upon request, to any duly identified representative of the Department.

§ 178.338–3 Metal thickness.

(a) The metal thickness of the tank must be as prescribed in the ASME Code and paragraph (b) of this section.

Metal less than 3/16 inch thick may not be used for the shell or heads of a tank unless the tank is enclosed in an evacuated or load-bearing jacket. Metal less than 1/8 inch thick may not be used for the shell or heads of the tank under any circumstances.

(b) The minimum thickness of metal in the shell (cylindrical portion) of the tank must be such that at no point will the stress on a plane normal to the longitudinal axis exceed 25 percent of the minimum specified tensile strength of the metal. The forces, loads, and stresses considered in this requirement must take into account the weight of the tank itself, its maximum weight of contents, and articles supported by the tank, not including the weight of structures supporting the tank in normal conditions. The stresses involved are not all uniform through the length of the tank. For purposes of this requirement, calculation must be made by the following formula:

$$S=(T/2)+((T^2/4)+S_s^2)^{0.5}$$

where at any point under consideration and for the worst combination of loadings:

S = Effective stress as limited by this requirement, in psi;

T = The sum of the longitudinal tensile stresses due to external vacuum and internal pressure and other causes, including direct tensile stress due to a rearward acceleration force, tensile stress due to the bending moment of a rearward acceleration force applied at the road surface, and tensile flexure stress using applicable static loadings specified in paragraphs (b), (e) and (f) of § 178.338–13, in psi; and

S_s = The vectorial sum of the shear stresses in the plane in question, including direct vertical shear due to the static vertical loading, direct lateral shear due to a lateral accelerative force, and torsional shear due to a lateral accelerative force, applied at the road surface using applicable static loadings specified in paragraphs (b), (e) and (f) of § 178.338–13, in psi.

(c) Maximum stress concentrations that may be created at supports due to shear, bending, and torsion must be calculated in accordance with Appendix G of the ASME Code.

(d) Where a tank support is attached to any part of a tank head, the stresses imposed on the head must be in accordance with the requirements in paragraph (c) of this section.

§ 178.338–4 Joints.

(a) All joints in the tank, and in the jacket if evacuated, must be as prescribed in the ASME Code, with all undercutting in shell and head material repaired as specified therein.

(b) Welding procedure and welder performance tests must be made in accordance with Section IX of the ASME Code. Records of the qualification must be retained by the tank manufacturer for at least five years and must be made available, upon request, to any duly identified representative of the Department, or the owner of the cargo tank.

(c) All longitudinal welds in tanks and load bearing jackets must be located so as not to intersect nozzles or supports other than load rings and stiffening rings.

(d) Substructures must be properly fitted before attachment and the welding sequence must minimize stresses due to shrinkage of welds.

(e) Filler material containing more than 0.05 percent vanadium may not be used with quenched and tempered steel.

(f) All joints must be in accordance with Part UW of the ASME Code, except that a butt weld with one plate edge offset is not authorized. All tank nozzle to shell and nozzle to head welds must be full penetration welds.

§ 178.338–5 Stiffening rings.

(a) A tank is not required to be provided with stiffening rings, except as prescribed in the ASME Code.

(b) If a jacket is evacuated, it must be constructed in compliance with § 178.338–1(f). Stiffening rings may be used to meet these requirements.

§ 178.338–6 Manholes.

(a) Each tank in oxygen service must be provided with a manhole as prescribed in the ASME Code.

(b) Each tank having a manhole must be provided with a means of entrance and exit through the jacket, or the jacket must be marked to indicate the manway location on the tank.

(c) When a manhole is provided, it may not be located on the front head of the tank.

§ 178.338–7 Openings.

(a) The inlet to the liquid product discharge opening of each tank intended for flammable ladings must be at the bottom centerline of the tank.

(b) If the leakage of a single valve, except a pressure relief valve, pressure control valve, full trycock or gas phase manual vent valve, would permit loss of flammable material, an additional closure that is leak tight at the tank design pressure must be provided outboard of such valve.

§ 178.338–8 Pressure relief devices, piping, valves, and fittings.

(a) *Pressure relief devices.* Each tank pressure relief device must be designed, constructed, and marked in accordance with § 173.318(b) of this subchapter.

(b) *Piping, valves, and fittings.*

(1) All piping, valves, and fittings shall be as required by §§ 173.33(f) and 173.318(b) of this subchapter.

(2) Each valve must be suitable for the tank design pressure at the tank design service temperature.

(3) All fittings must be rated for the maximum tank pressure and suitable for the coldest temperature to which they will be subjected in actual service.

(4) All piping, valves and fittings must be grouped and protected from damage as required by § 178.338–10.

(5) When a pressure-building coil is used on a tank designed to handle oxygen or flammable ladings, the vapor connection to that coil must be provided with a valve or check valve as close to the tank as practicable to prevent the loss of vapor from the tank in case of damage to the coil. The liquid connection to that coil must also be provided with a valve.

§ 178.338–9 Holding time.

(a) "Holding time" is the time, as determined by testing, that will elapse from loading until the pressure of the contents, under equilibrium conditions, reaches the level of the lowest pressure control valve or pressure relief valve setting.

(b) *Holding time test.*

(1) The test to determine holding time must be performed by charging the tank with a cryogenic liquid having a boiling point, at a pressure of one atmosphere, absolute, no lower than the design service temperature of the tank. The tank must be charged to its maximum permitted filling density with that liquid and stabilized to the lowest practical pressure, which must be equal to or less than the pressure to be used for loading. The cargo tank together with its contents must then be exposed to ambient temperature.

(2) The tank pressure and ambient temperature must be recorded at 3-hour intervals until the pressure level of the contents reaches the set-to-discharge pressure of the pressure control valve or pressure relief valve with the lowest setting. This total time lapse in hours represents the measured holding time at the actual average ambient temperature. This measured holding time for the test cryogenic liquid must be adjusted to an equivalent holding time for each cryogenic liquid that is to be identified on or adjacent to the specification plate, at an average ambient temperature of 85°F. This is the rated holding time (RHT). The marked rated holding time (MRHT) displayed on or adjacent to the specification plate (see §178.318(b)(9)) may not exceed this RHT.

(c) *Optional test regimen.*

(1) If more than one cargo tank is made to the same design, only one cargo tank must be subjected to the full holding time test at the time of manufacture. However, each subsequent cargo tank made to the same design must be performance tested during its first trip. The holding time determined in this test may not be less than 90 percent of the marked rated holding time. This test must be performed in accordance with §§ 173.33(d)(1)(ii) and 177.840(h) of this subchapter, regardless of the classification of the cryogenic liquid.

(2) *Same design.* The term "same design" as used in this section means cryogenic cargo tanks made—

(i) By the same manufacturer;

(ii) To the same engineering drawings, and calculations;

(iii) To the same dimensions of length, diameter, and volume;

(iv) Of the same materials of construction; and

(v) With the same insulation system.

§ 178.338–10 Collision damage protection.

(a) All valves, fittings, pressure relief devices and other accessories to the tank proper, which are not isolated from the tank by closed intervening shut-off valves or check valves, must be installed within the motor vehicle framework or within a suitable collision resistant guard or housing, and appropriate ventilation must be provided. Each pressure relief device must be protected so that in the event of the upset of the vehicle onto a hard surface, the device's opening will not be prevented and its discharge will not be restricted.

(b) Each protective device or housing, and its attachment to the vehicle structure, must be designed to withstand static loading in any direction that it may be loaded as a result of front, rear, side, or sideswipe collision, or the overturn of the vehicle. The static loading shall equal twice the loaded weight of the tank and attachments. A safety factor of four, based on the ultimate strength of the material, shall be used. The protective device or the housing must be made of steel at least 3/16-inch thick, or other material of equivalent strength.

(c) Each tank motor vehicle must be provided with a least one rear bumper designed to protect the cargo tank and piping in the event of a rear end collision. The bumper design must transmit the force of the collision directly to the chasis of the vehicle. The rear bumper and its attachments to the chasis must be designed to withstand a load equal to twice the weight of the loaded cargo tank and attachments, using a safety factor of four based on the ultimate strength of the materials used, with such load being applied horizontally and parallel to the major axis of the cargo tank, or within 30 horizontal degrees thereof. The rear bumper dimensions must meet the requirements of §393.86 of this title and extend vertically to a height adequate to protect all valves and fittings located at the rear of the cargo tank from damage that could result in loss of lading.

(d) Every part of the loaded cargo tank, and any associated valve, pipe, enclosure, or protective device or structure (exclusive of wheel assemblies), must be at least 14 inches above level ground.

§ 178.338–11 Discharge control devices.

(a) Excess-flow valves are not required.

(b) Each liquid filling and liquid discharge line must be provided with a shut-off valve located as close to the tank as practicable. Unless this valve is manually operable at the valve, the line must also have a manual shut-off valve.

(c) Each liquid filling and liquid discharge line on a cargo tank intended for service transporting a flammable lading must be provided with a remotely controlled shut-off valve. If pressure from a reservoir or from an engine driven pump or compressor is used to open this valve, the control must be of fail-safe design, spring-biased to stop the admission of such pressure. If the jacket is not evacuated, the seat of the valve must be inside the tank, in the opening nozzle or flange, or in a companion flange bolted to the nozzle. If the jacket is evacuated, the remotely controlled valve must be located as close to the tank as practicable.

(1) On a cargo tank with a capacity in excess of 3,500 gallons of water, each remotely controlled shut-off valve must be provided with remote means of automatic closure, both mechanical and thermal, installed at the ends of the cargo tank in at least two diagonally opposite locations. The thermal means shall consist of fusible elements actuated at a temperature not exceeding 250°F., or equivalent devices. One means may be used to close more than one remotely controlled valve.

(2) On a cargo tank with a capacity of 3,500 gallons of water or less, each remotely controlled shut-off valve must be provided with at least one remote control station on the end of the cargo tank opposite the main control station. The remote control station must contain a manual means of closure. In addition, it may contain fusible elements actuated at a temperature not exceeding 250°F., or equivalent devices. One means may be used to close more than one remotely controlled valve.

§ 178.338–12 Shear section.

The design or installation of each valve, damage to which could result in loss of liquid or vapor, must incorporate a shear section or breakage groove adjacent to and outboard of the valve. The section or groove must yield or break under strain without damage to the valve that would allow the loss of liquid or vapor. The protection specified in § 178.338–10 is not a substitute for a shear section or breakage groove.

§ 178.338–13 Supports and anchoring.

(a) All attachments of supports and bumpers to tanks and to load-bearing jackets must be made by means of pads of material similar to that of the tank or jacket, by load rings, or by bosses designed or gusseted to distribute the load. The pad must be at least ¼-inch thick, or as thick as the tank or jacket material, if less, but shall in no case be thicker than the tank or jacket material. Each pad must extend at least four times its thickness, in each direction, beyond the weld attaching the support or bumper. Each pad must be preformed to an inside radius no greater than the outside radius of the tank or jacket at the place of attachment. Each pad corner must be rounded to a radius at least one-fourth the width of the pad and no greater than one-half the width of the pad. If weep holes or telltale holes are used, they must be drilled or punched before the pads are attached. Each pad must be attached to the tank or jacket by continuous fillet welding using filler material having properties conforming to the recommendations of the manufacturer of the tank or jacket material. Any fillet weld discontinuity may only be for the purpose of preventing an intersection between the fillet weld and a tank or jacket seam weld.

(b) A tank motor vehicle constructed so that the cargo tank constitutes in whole or in part the structural member used in place of a motor vehicle frame must have the tank or the jacket supported by external cradles or by load rings. A cargo tank mounted on a motor vehicle frame must have the tank or jacket supported by external cradles, load rings, or longitudinal members. If cradles are used, they must subtend at least 120 degrees of the cargo tank circumference. The design calculations for the supports and load bearing tank or jacket, and the support attachments must include beam stress, shear stress, torsion stress, bending moment, and acceleration stress for the loaded

vehicle as a unit, using a safety factor of four, based on the ultimate strength of the material, and static loadings that take into consideration the weight of the cargo tank and its attachments when filled to the design weight of the lading (see Appendix G of the ASME Code). The effects of fatigue must also be considered in the calculations. Minimum static loadings must be as follows:

(1) For a vacuum-insulated cargo tank—

(i) Vertically downward of 2;
(ii) Vertically upward of 2;
(iii) Longitudinally of 2; and
(iv) Laterally of 2.

(2) For a nonvacuum-insulated cargo tank—

(i) Vertically downward of 3;
(ii) Vertically upward of 2;
(iii) Longitudinally of 2; and
(iv) Laterally of 2.

(c) When a loaded tank is supported within the vacuum jacket by structural members, the design calculations for the tank and its structural members must use a safety factor of four, based on the ultimate strength of the material at the tank's design service temperature, and static loadings that take into consideration the weight of the tank and the structural members when the tank is filled to the design weight of lading (see Appendix G of the ASME Code). When load rings in the jacket are used for supporting the tank they must be designed to carry the fully loaded tank at the specified static loadings, plus external pressure. Minimum static loadings must be as follows:

(1) Vertically downward of 2;
(2) Vertically upward of 1½;
(3) Longitudinally of 1½; and,
(4) Laterally of 1½.

§ 178.338–14 Gauging devices.

(a) *Liquid level gauging devices.*

(1) Unless a cargo tank is intended to be filled by weight, it must be equipped with one or more gauging devices, which accurately indicate the maximum permitted liquid level at the loading pressure, in order to provide a minimum of two percent outage below the inlet of the pressure control valve or pressure relief valve at the condition of incipient opening of that valve. A fixed-length dip tube, a fixed trycock line, or a differential pressure liquid level gauge must be used as the primary control for filling. Other gauging devices, except gauge glasses, may be used, but not as the primary control for filling.

(2) The design pressure of each liquid level gauging device must be at least that of the tank.

(3) If a fixed length dip tube or trycock line gauging device is used, it must consist of a pipe or tube of small diameter equipped with a valve at or near the jacket and extending into the cargo tank to a specified filling height. The fixed height at which the tube ends in the cargo tank must be such that the device will function when the liquid reaches the maximum level permitted in loading. The setting (percent outage) must be indicated in a visible location at or adjacent to the valve.

(4) The liquid level gauging device used as a primary control for filling must be designed and installed to accurately indicate the maximum filling level at the point midway of the tank both longitudinally and laterally.

(b) *Pressure gauges.* Each cargo tank must be provided with a suitable pressure gauge indicating the lading pressure and located on the front of the jacket so it can be read by the driver in the rear view mirror. Each gauge must have a reference mark at the cargo tank design pressure or the set pressure of the pressure relief valve or pressure control valve, whichever is lowest.

(c) *Orifices.* All openings for dip tube gauging devices, trycock lines, and pressure gauges must be restricted at or inside the jacket by orifices no larger than 0.060-inch diameter.

§ 178.338–15 Cleanliness.

A cargo tank constructed for oxygen service must be thoroughly cleaned to remove all foreign material in accordance with CGA Pamphlet G–4.1. All loose particles from fabrication, such as weld beads, dirt, grinding wheel debris, and other loose materials, must be removed prior to the final closure of the manhole of the tank. Chemical or solvent cleaning with a material compatible with the intending lading must be performed to remove any contaminants likely to react with the lading.

§ 178.338–16 Inspection and testing.

(a) *General.* The material of construction of a cargo tank, its appurtenances, and the jacket if evacuated, must be inspected for compliance with the ASME Code. The tank must be subjected to either a hydrostatic or pneumatic test. The test pressure must be one and one-half times the sum of the design pressure, plus static head of lading, plus 14.7 psi if subjected to external vacuum, except that for tanks constructed in accordance with Part UHT of the ASME Code the test pressure must be twice the design pressure.

(b) *Additional requirements for pneumatic test.* A pneumatic test may be used in place of the hydrostatic test. Due regard for protection of all personnel should be taken because of the potential hazard involved in a pneumatic test. The pneumatic test pressure in the tank must be reached by gradually increasing the pressure to one-half of the test pressure. Thereafter, the test pressure must be increased in steps of approximately one-tenth of the test pressure until the required test pressure has been reached. Then the pressure must be reduced to a value equal to four-fifths of the test pressure and held for a sufficient time to permit inspection of the cargo tank for leaks.

(c) *Weld inspection.* All tank shell or head welds subject to pressure shall be radiographed in accordance with the ASME Code. A tank which has been subjected to inspection by the magnetic particle method, the liquid penetrant method, or any method involving a material deposit on the interior tank surface, must be cleaned to remove any such residue by scrubbing or equally effective means, and all such residue and cleaning solution must be removed from the tank prior to final closure of the tank.

(d) *Defect repair.* All cracks and other defects must be repaired as prescribed by the ASME Code. The welder and the welding procedure must be qualified in accordance with the ASME Code. After repair, the tank must again be postweld heat-treated, if such heat treatment was previously performed, and the repaired areas must be retested.

(e) Verification must be made of the interior cleanliness of a tank constructed for oxygen service by means that assure that all contaminants that are likely to react with the lading have been removed as required by § 178.338–15.

§ 178.338–17 Pumps.

See §§ 173.33(f) and 173.318(a)(4) of this subchapter.

§ 178.338–18 Marking.

(a) *Nameplate.* On the right side near the front of each tank a corrosion resistant metal nameplate must be permanently affixed by brazing or welding around its perimeter. If this nameplate is attached by welding, it must be welded before the tank is postweld heat-treated. The nameplate must be plainly marked by stamping, embossing, or other means of forming letters into the metal of the plate, in characters at least ⅜-inches high. The following information, in addition to that required by the ASME Code, must be included (parenthetical abbreviations may be used):

(1) DOT Specification number MC–338 (DOT MC–338);

(2) Material specification number (Mat. Spec. No.);

(3) Maximum density of lading for which the tank is designed (Max. Dens. of Lading);

(4) Water capacity, in pounds net at 60°F., with the tank at its coldest operating temperature, after deduction for the volume above the inlet to the pressure relief device or pressure control valve, structural members, baffles, piping, and other appurtenances inside the tank (W. Cap.); and

(5) Original test date (Orig. Test Date);

(b) *Specification plate.* An additional plate, in the form specified in paragraph (a) of this section, must be welded, brazed, or riveted to the jacket on the right side near the front, or at the control station, in a position readily legible to operating personnel. It must be marked with the information specified in paragraph (a) of this section and in addition, in characters at least ⅜-inches high, the following (parenthetical abbreviations may be used):

(1) Vehicle manufacturer (Veh. Mfr.);

(2) Manufacturer's vehicle serial number (Veh. No.);

(3) Lining material, if any (Lining);

(4) Date of manufacture (Date of Mfr.);

(5) Certificate date (Cert. Date);

(6) Design service temperature (Design Serv. Temp.);

(7) "Insulation for Oxygen Service" or "Not Authorized for Oxygen Service," as appropriate;

(8) Maximum weight of lading for which the cargo tank is designed, in pounds (Max. Net Wgt.——lbs.);

(9) Marked rated holding time for at least one cryogenic liquid, in hours, and the name of that cryogen (MRHT—— hrs., name of cryogen). MRHT markings for additional cryogenic liquids may be displayed on or adjacent to the specification plate.

(c) The design weight of lading used in determining the loading in §§ 178.338–3(b), 178.338–10 (b) and (c), and 178.338–13 (b) and (c) must be shown as the maximum weight of lading marking required by paragraph (b) of this section.

§ 178.338–19 Certification.

(a) The manufacturer of a cargo tank vehicle shall furnish to the owner of the completed vehicle, at or before the time of delivery, the following:

(1) the tank manufacturer's data report required by the ASME Code,

(2) a photograph, pencil rub, or other facsimile of the plates required by paragraphs (a) and (b) of § 178.338–18, and

(3) a certificate bearing the manufacturer's vehicle serial number stating that the completed cargo tank vehicle conforms to all applicable requirements of Specification MC–338, including the ASME Code, in effect on the date (month, year) of certification.

(b) In the case of a cargo tank vehicle manufactured in two or more stages, each manufacturer who performs a manufacturing operation on the incomplete vehicle or portion thereof shall furnish to the succeeding manufacturer, at or before the time of delivery, a certificate covering the particular operation performed by that manufacturer and any certificates received from previous manufacturers. The certificates must include sufficient sketches, drawings, and other information to indicate the location, make, model and size of each valve and the arrangement of all piping associated with the tank. Each certificate must be signed by an official of the manufacturing firm responsible for the portion of the complete cargo tank vehicle represented thereby, such as basic tank fabrication, insulation, jacket, or piping. The final manufacturer shall furnish the owner with all certificates, as well as the documents required by paragraph (a) of the section.

(c) The owner shall retain the data report, certificates, and related papers throughout his ownership of the cargo tank. In the event of change of ownership, the prior owner shall retain non-fading photographically reproduced copies of these documents for at least one year. Each operator using the cargo tank vehicle, if not the owner thereof, shall obtain a copy of the data report and the certificate or cetificates and retain them during the time he uses the cargo tank and for at least one year thereafter.

PART 179—SPECIFICATIONS FOR TANK CARS

46. The Table of Sections of Part 179 is amended by revising the headings for Subpart F and §§ 179.400 and 179.401 to read as follows:

Subpart F—Specification for Cryogenic Liquid Tank Car Tanks and Seamless Steel Tanks (Classes DOT–113 and 107A)

* * * * *

179.400 *General specification applicable to cryogenic liquid tank car tanks.*

179.401 *Individual specification requirements applicable to inner tanks for cryogenic liquid tank car tanks.*

* * * * *

47. In § 179.100–7, the Table in paragraph (a) is amended by removing the entry for "ASTM A 537–70, GR. A" and replacing it with an entry for "ASTM A 537–80, Class 1" as follows:

§ 179.100–7 Materials.

(a) * * *

Specifications	Minimum tensile strength (p.s.i.) welded condition [1]	Minimum elongation in 2 inches (percent) welded condition (longitudinal)
[REMOVE]		
ASTM A 537–70, GR. A	70,000	23
[ADD]		
ASTM A 537–80, Class 1	70,000	23

* * * * *

§ 179.102–1 [Amended]

48. In § 179.102–1, the heading and the introductory text of paragraph (a) are amended by removing the words "liquefied carbon dioxide" and inserting, in their place, the words "carbon dioxide, liquid (*refrigerated*)".

49. Section 179.102–4 is revised to read as follows:

§ 179.102–4 Vinyl fluoride, inhibited.

Each tank used to transport vinyl fluoride, inhibited, must comply with the following special requirements:

(a) The tank must comply with specification DOT–105A600W and must be designed for loading at minus 50° F. or colder.

(b) All plates for the tank, and appurtenances must be fabricated of—

(1) Stainless steel, ASTM Specification A240, Type 304, 304L, 316 or 316L, in which case impact tests are not required; or

(2) Steel complying with ASTM Specification A516; Grade 70; ASTM Specification A537, Class 1; or AAR Specification TC128, Grade B, in which case impact tests must be performed as follows:

(i) ASTM Specification A516 and A537 material must meet the Charpy V-notch test requirements, in longitudinal direction of rolling, of ASTM Specification A20.

(ii) AAR Specification TC128 material must meet the Charpy V-notch test requirements, in longitudinal direction of rolling, of 15 ft./lb. minimum average for 3 specimens, with a 10 ft./lb. minimum for any one specimen, at minus 50° F. or colder, in accordance with ASTM Specification A370.

(iii) Production welded test plates must—

(A) Be prepared in accordance with AAR Specifications for Tank Cars, Appendix W, W4.00;

(B) Include impact specimens of weld metal and heat affected zone prepared and tested in accordance with AAR Specifications for Tank Cars, Appendix W, W9.00; and

(C) Meet the same impact requirements as the plate material.

(c) Insulation must be of approved material.

(d) The tank must be equipped with at least one safety relief valve, set for the start-to-discharge pressure listed in § 179.101–1. The discharge capacity of each safety relief device must be sufficient to prevent the build up of pressure in the tank in excess of 82½ percent of the tank test pressure. The discharge from each safety relief device must be directed outside the protective housing.

(e) Excess flow valves must be installed under all liquid and vapor valves, except safety relief valves.

(f) A thermometer well may be installed.

(g) A gaging device may be installed. If one is installed it must be a fixed length dip tube.

(h) A pressure gage may be installed.

(i) Aluminum, copper, silver, zinc, or an alloy containing any of these metals may not be used in the tank construction, or in fittings in contact with the lading.

(j) The jacket must be stenciled, adjacent to the water capacity stencil, "COLDEST LADING TEMPERATURE ——— ° F."

(k) The tank car and insulation must be designed to prevent the vapor pressure of the lading from increasing from the pressure at the maximum allowable filling density to the start-to-discharge pressure of the safety relief valve within 30 days, at an ambient temperature of 90° F.

(l) Tank anchor-to-tank shell fillet welds must be examined by radioscopy or other non-destructive testing technique and must meet the acceptance standards of AAR Specifications for Tank Cars, Appendix W, paragraph W11.06.

50. Section 179.102–17 is added to read as follows:

§ 179.102–17 Hydrogen chloride, liquid (refrigerated).

Each tank car used to transport hydrogen chloride, liquid (*refrigerated*) must comply with the following special requirements:

(a) The tank car must comply with Specification DOT–105A600W and be designed for loading at minus 50° F. or colder.

(b) All plates for the tank and appurtenances must be fabricated of—

(1) Stainless steel, ASTM Specification A240, Type 304, 304L, 316, or 316L, in which case impact tests are not required; or

(2) Steel complying with ASTM Specification A516, Grade 70; ASTM Specification A537, Class 1; or AAR Specification TC128, Grade B, in which case impact tests must be performed as follows:

(i) ASTM Specification A516 and A537 material must meet the Charpy V-notch test requirements, in longitudinal direction of rolling, of ASTM Specification A20.

(ii) AAR Specification TC128 material must meet the Charpy V-notch test requirements, in longitudinal direction of rolling, of 15 ft./lb. minimum average for 3 specimens, with a 10 ft./lb. minimum for any one specimen, at minus 50° F. or colder, in accordance with ASTM Specification A370.

(iii) Production welded test plates must—

(A) Be prepared in accordance with AAR Specifications for Tank Cars, Appendix W, W4.00;

(B) include impact test specimens of weld metal and heat affected zone prepared and tested in accordance with AAR Specifications for Tank Cars, Appendix W, W9.00; and

(C) meet the same impact requirements as the plate material.

(c) Insulation must be of approved material.

(d) Safety relief valves must be trimmed with monel or other approved material and equipped with a frangible disc of silver, a fluorinated hydrocarbon polymer coated monel, or tantalum. Each safety relief device shall have the space between the frangible disc and the relief valve vented with a suitable auxiliary valve. The discharge from each safety relief valve must be directed outside the protective housing.

(e) Loading and unloading valves must be trimmed with Hastelloy B or C, monel, or other approved material, and identified as "Vapor" or "Liquid". Excess flow valves must be installed under all liquid and vapor valves, except safety relief valves.

(f) A thermometer well may be installed.

(g) A gaging device may be installed. If installed the gage must be a fixed length dip tube.

(h) A sump must be installed in the bottom of the tank under the liquid pipes.

(i) All gaskets must be made of, or coated with, a fluorinated hydrocarbon polymer, or other approved material.

(j) The tank car tank may be equipped with exterior cooling coils on top of the tank car shell.

(k) The jacket must be stenciled, adjacent to the water capacity stencil, "COLDEST LADING TEMPERATURE ——— ° F."

(l) The tank car and insulation must be designed to prevent the pressure of the lading from increasing from the pressure at the maximum allowable filling density to the start-to-discharge pressure of the safety relief valve within 30 days, at an ambient temperature of 90° F.

(m) Tank anchor-to-tank shell fillet welds must be examined by radioscopy or other non-destructive testing techniques and must meet the acceptance standards of AAR Specifications for Tank Cars, Appendix W, paragraph W11.06.

51. The heading of Subpart F and § 179.400 consisting of §§ 179.400–1 to 179.400–26 are revised to read as follows:

Subpart F—Specification for Cryogenic Liquid Tank Car Tanks and Seamless Steel Tanks (Classes DOT—113 and 107A)

§ 179.400 General specification applicable to cryogenic liquid tank car tanks.

§ 179.400–1 General.

A tank built to this specification must comply with §§ 179.400 and 179.401.

§ 179.400–2 Approval.

See § 179.3 for approval procedure.

§ 179.400–3 Type.

(a) A tank built to this specification must—

(1) Consist of an inner tank of circular cross section supported essentially concentric within an outer jacket of circular cross section, with the out of roundness of both the inner tank and outer jacket limited in accordance with Section VIII, Division I, Paragraph UG–80 of the ASME Code;

(2) Have the annular space evacuated after filling the annular space with an approved insulating material;

(3) Have the inner tank heads designed concave to pressure; and

(4) Have the outer jacket heads designed convex to pressure.

(b) The tank must be equipped with piping systems for vapor venting and transfer of lading, and with pressure relief devices, controls, gages and valves, as prescribed herein.

§179.400–4 Insulation system and performance standard.

(a) For the purposes of this specification—

(1) *Standard Heat Transfer Rate* (SHTR), expressed in Btu/day/lb., means the rate of heat transfer used for determining the satisfactory performance of the insulation system of a cryogenic tank car tank (see § 179.401–1 Table).

(2) *Test cryogenic liquid* means the cryogenic liquid, which may be different from the lading intended to be shipped

in the tank, being used during the performance tests of the insulation system.

(3) *Normal evaporation rate* (NER), expressed in lbs. (of the cryogenic liquid)/day, means the rate of evaporation, determined by test of a test cryogenic liquid in a tank maintained at a pressure of approximately one atmosphere, absolute. This determination of the NER is the NER test.

(4) *Stabilization period* means the elapsed time after a tank car tank is filled with the test cryogenic liquid until the NER has stabilized, or 24 hours has passed, whichever is greater.

(5) *Calculated heat transfer rate.* The calculated heat transfer rate (CHTR) is determined by the use of test data obtained during the NER test in the formula:

$$q=[N(\Delta h)(90-t_i)]/[V(8.32828)(t_s-t_f)]$$

Where:

q = CHTR, in Btu/day/lb.;
N = NER, determined by NER test, in lbs./day;
Δh = latent heat of vaporization of the test cryogenic liquid at the NER test pressure of approximately one atmosphere, absolute, in Btu/lb.;
90 = ambient temperature at 90° F.
V = gross water volume at 60° F. of the inner tank, in gallons;
t_i = equilibrium temperature of intended lading at maximum shipping pressure, in ° F.;
8.32828 = constant for converting gallons of water at 60° F. to lbs. of water at 60° F., in lbs./gallon;
t_s = average temperature of outer jacket, determined by averaging jacket temperatures at various locations on the jacket at regular intervals during the NER test, in ° F.;
t_f = equilibrium temperature of the test cryogenic liquid at the NER test pressure of approximately, one atmosphere, absolute, in ° F.

(b) DOT–113A60W tank cars must—

(1) Be filled with hydrogen, cryogenic liquid to the maximum permitted fill density specified in § 173.319(d)(2) Table of this subchapter prior to performing the NER test; and

(2) Have a CHTR equal to or less than the SHTR specified in § 179.401–1 table for a DOT–113A60W tank car.

(c) DOT–113C120W tank cars must—

(1) Be filled with ethylene, cryogenic liquid to the maximum permitted fill density specified in § 173.319(d)(2) Table of this subchapter prior to performing the NER test, or be filled with nitrogen, cryogenic liquid to 90 percent of the volumetric capacity of the inner tank prior to performing the NER test; and

(2) Have a CHTR equal to or less than 75 percent of the SHTR specified in § 179.401–1 Table for a DOT–113C120W tank car.

(d) Insulating material must approved.

(e) If the insulation consists of a powder having a tendency to settle, the entire top of the cylindrical portion of the inner tank must be insulated with a layer of glass fiber insulation at least one-inch nominal thickness, or equivalent, suitably held in position and covering an area extending 25 degrees to each side of the top center line of the inner tank.

(f) The outer jacket must be provided with fittings to permit effective evacuation of the annular space between the outer jacket and the inner tank.

(g) A device to measure the absolute pressure in the annular space must be provided. The device must be portable with an easily accessible connection or permanently positioned where it is readily visible to the operator.

§ 179.400–5 Materials.

(a) Stainless steel of ASTM Specification A240, Type 304 or 304L must be used for the inner tank and its appurtenances, as specified in AAR Specifications for Tank Cars, Appendix M, and must be—

(1) In the annealed condition prior to fabrication, forming and fusion welding;

(2) Suitable for use at the temperature of the lading; and

(3) Compatible with the lading.

(b) Any steel casting, steel forging, steel structural shape or carbon steel plate used to fabricate the outer jacket or heads must be as specified in AAR Specifications for Tank Cars, Appendix M.

(c) *Impact tests* must be—

(1) Conducted in accordance with AAR Specifications for Tank Cars, Appendix W, W9.01;

(2) Performed on longitudinal specimens of the material;

(3) Conducted at the tank design service temperature or colder; and

(4) Performed on test plate welds and materials used for inner tanks and appurtenances and which will be subjected to cryogenic temperatures.

(d) Impact test values must be equal to or greater than those specified in AAR Specifications for Tank Cars, Appendix W. The report of impact tests must include the test values and lateral expansion data.

§ 179.400–6 Bursting and buckling pressure.

(a) The inner tank shall have a bursting pressure no less than that listed in § 179.401–1.

(b) The outer jacket of the required evacuated insulation system must be designed in accordance with § 179.400–7(d) and in addition must comply with the design loads specified in Section 6.2 of the AAR Specifications for Tank Cars. The designs and calculations must provide for the loadings transferred to the outer jacket through the support system.

§ 179.400–7 Tank heads.

(a) Tank heads of the inner tank and outer jacket must be flanged and dished, or ellipsoidal.

(b) Flanged and dished heads must have—

(1) A main inside dish radius not greater than the outside diameter of the straight flange;

(2) An inside knuckle radius of not less than 6 percent of the outside diameter of the straight flange; and

(3) An inside knuckle radius of at least three times the head thickness.

§ 179.400–8 Thickness of plates.

(a) The minimum wall thickness, after forming, of the inner shell and any 2:1 ellipsoidal head for the inner tank must be that specified in § 179.401–1, or that calculated by the following formula, whichever is greater:

$$t=Pd/2SE$$

Where:

t = minimum thickness of plate, after forming, in inches;
P = minimum required bursting pressure, in psi;
d = inside diameter, in inches;
S = minimum tensile strength of the plate material, as prescribed in AAR Specifications for Tank Cars, Appendix M, Table M1, in psi;
E = 0.9, a factor representing the efficiency of welded joints, except that for seamless heads, E = 1.0.

(b) The minimum wall thickness, after forming, of any 3:1 ellipsoidal head for the inner tank must be that specified in § 179.401–1, or that calculated by the following formula, whichever is greater:

$$t=1.83\ Pd/2SE$$

Where:

t = minimum thickness of plate, after forming, in inches;
P = minimum required bursting pressure, in psi;
d = inside diameter, in inches;
S = minimum tensile strength of the plate material, as prescribed in AAR Specifications for Tank Cars, Appendix M, Table M1, in psi;
E = 0.9, a factor representing the efficiency of welded joints, except that for seamless heads, E = 1.0.

(c) The minimum wall thickness, after forming, of a flanged and dished head for the inner tank must be that specified

in § 179.401–1, or that calculated by the following formula, whichever is greater:

$t = PL[(3 + \sqrt{(L/r)}]/8SE$

Where:

t = minimum thickness of plate, after forming, in inches;
P = minimum required bursting pressure, in psi;
L = main inside radius of dished head, in inches;
r = inside knuckle radius, in inches;
S = minimum tensile strength of plate material, as prescribed in AAR Specifications for Tank Cars, Appendix M, Table M1, in psi;
E = 0.9, a factor representing the efficiency of welded joints, except that for seamless heads, E = 1.0.

(d) The minimum wall thickness, after forming, of the outer jacket shell may not be less than 7/16 inch. The minimum wall thickness, after forming, of the outer jacket heads may not be less than ½ inch and they must be made from steel specified in § 179.100–23(a)(1). The annular space is to be evacuated, and the cylindrical portion of the outer jacket between heads, or between stiffening rings if used, must be designed to withstand an external pressure of 37.5 psi (critical collapsing pressure), as determined by the following formula:

$P_c = [2.6E(t/D)^{2.5}]/[(L/D) - 0.45(t/D)^{0.5}]$

Where:

P_c = Critical collapsing pressure (37.5 psi minimum), in psi;
E = modulus of elasticity of jacket material, in psi;
t = minimum thickness of jacket material, after forming, in inches;
D = outside diameter of jacket, in inches;
L = distance between stiffening ring centers in inches. (The heads may be considered as stiffening rings located ⅓ of the head depth from the head tangent line.)

§ 179.400–9 Stiffening rings.

(a) If stiffening rings are used in designing the cylindrical portion of the outer jacket for external pressure, they must be attached to the jacket by means of fillet welds. Outside stiffening ring attachment welds must be continuous on each side of the ring. Inside stiffening ring attachment welds may be intermittent welds on each side of the ring with the total length of weld on each side not less than one-third of the circumference of the tank. The maximum space between welds may not exceed eight times the outer jacket wall thickness.

(b) A portion of the outer jacket may be included when calculating the moment of inertia of the ring. The effective width of jacket plate on each side of the attachment of the stiffening ring is given by the following formula:

$W = 0.78(Rt)^{0.5}$

Where:

W = width of jacket effective on each side of the stiffening ring, in inches;
R = outside radius of the outer jacket, in inches;
t = plate thickness of the outer jacket, after forming, in inches.

(c) Where a stiffening ring is used that consists of a closed section having two webs attached to the outer jacket, the jacket plate between the webs may be included up to the limit of twice the value of "W", as defined in paragraph (B) of this section. The outer flange of the closed section, if not a steel structural shape, is subject to the same limitations with "W" based on the "R" and "t" values of the flange. Where two separate members such as two angles, are located less than "2W" apart they may be treated as a single stiffening ring member. (The maximum length of plate which may be considered effective is 4W.) The closed section between an external ring and the outer jacket must be provided with a drain opening.

(d) The stiffening ring must have a moment of inertia large enough to support the critical collapsing pressure, as determined by either of the following formulas:

$I = [0.035D^2LP_c]/E$, or
$I' = [0.046D^2LP_c]/E$

Where:

I = required moment of inertia of stiffening ring about the centroidal axis parallel to the vessel axis, in inches to the fourth power;
I' = required moment of inertia of combined section of stiffening ring and effective width of jacket plate about the centroidal axis parallel to the vessel axis, in inches to the fourth power;
D = outside diameter of the outer jacket, in inches;
L = one-half of the distance from the centerline of the stiffening ring to the next line of support on one side, plus one-half of the distance from the centerline to the next line of support on the other side of stiffening ring. Both distances are measured parallel to the axis of the vessel, in inches. (A line of support is:

(1) A stiffening ring which meets the requirements of this paragraph, or
(2) A circumferential line of a head at one-third the depth of the head from the tangent line);

P_c = critical collapsing pressure (37.5 psi minimum), in psi;
E = modulus of elasticity of stiffening ring material, in psi.

(e) Where loads are applied to the outer jacket or to stiffening rings from the system used to support the inner tank within the outer jacket, additional stiffening rings, or an increased moment of inertia of the stiffening rings designed for the external pressure, must be provided to carry the support loads.

§ 179.400–10 Sump or siphon bowl.

A sump or siphon bowl may be in the bottom of the inner tank shell if—

(a) It is formed directly into the inner tank shell, or is formed and welded to the inner tank shell and is of weldable quality metal that is compatible with the inner tank shell;

(b) The stress in any orientation under any condition does not exceed the circumferential stress in the inner tank shell; and

(c) The wall thickness is not less than that specified in § 179.401–1.

§ 179.400–11 Welding.

(a) Except for closure of openings and a maximum of two circumferential closing joints in the cylindrical portion of the outer jacket, each joint of an inner tank and the outer jacket must be a fusion double welded butt joint.

(b) The closure for openings and the circumferential closing joints in the cylindrical portion of the outer jacket, including head to shell joints, may be a single welded butt joint using a backing strip on the inside of the joint.

(c) Each joint must be welded in accordance with the requirements of AAR Specifications for Tank Cars, Appendix W.

(d) Each welding procedure, welder, and fabricator must be approved.

§ 179.400–12 Postweld heat treatment.

(a) Postweld heat treatment of the inner tank is not required.

(b) The cylindrical portion of the outer jacket, with the exception of the circumferential closing seams, must be postweld heat treated as prescribed in AAR Specifications for Tank Cars, Appendix W. Any item to be welded to this portion of the outer jacket must be attached before postweld heat treatment. Welds securing the following need not be postweld heat treated when it is not practical due to final assembly procedures:

(1) the inner tank support system to the outer jacket,
(2) connections at piping penetrations,
(3) closures for access openings, and
(4) circumferential closing joints of head to shell joints.

(c) When cold formed heads are used on the outer jacket they must be heat treated before welding to the jacket shell if postweld heat treatment is not practical due to assembly procedures.

§ 179.400–13 Support system for inner tank.

(a) The inner tank must be supported within the outer jacket by a support

system of approved design. The system and its areas of attachment to the outer jacket must have adequate strength and ductility at operating temperatures to support the inner tank when filled with the lading to any level incident to transportation.

(b) The support system must be designed to support, without yielding, impact loads producing accelerations of the following magnitudes and directions when the inner tank is fully loaded and the car is equipped with a conventional draft gear:

Longitudinal	7"g"
Transverse	3"g"
Vertical	3"g"

The longitudinal acceleration may be reduced to 3"g" where a cushioning device of approved design, which has been tested to demonstrate its ability to limit body forces to 400,000 pounds maximum at 10 miles per hour, is used between the coupler and the tank structure.

(c) The inner tank and outer jacket must be permanently bonded to each other electrically, by either the support system, piping, or a separate electrical connection of approved design.

§ 179.400–14 Cleaning of inner tank.

The interior of the inner tank and all connecting lines must be thoroughly cleaned and dried prior to use. Proper precautions must be taken to avoid contamination of the system after cleaning.

§ 179.400–15 Radioscopy.

Each longitudinal and circumferential joint of the inner tank, and each longitudinal and circumferential double welded butt joint of the outer jacket, must be examined along its entire length in accordance with the requirements of AAR Specifications for Tank Cars, Appendix W.

§ 179.400–16 Access to inner tank.

(a) The inner tank must be provided with a means of access having a minimum inside diameter of 16 inches. Reinforcement of the access opening must be made of the same material used in the inner tank. The access closure must be of an approved material and design.

(b) If a welded closure is used, it must be designed to allow it to be reopened by grinding or chipping and to be closed again by rewelding, preferably without a need for new parts. A cutting torch may not be used.

§ 179.400–17 Inner tank piping.

(a) *Product lines.* The piping system for vapor and liquid phase transfer and venting must be made for material compatible with the product and having satisfactory properties at the lading temperature. The outlets of all vapor phase and liquid phase lines must be located so that accidental discharge from these lines will not impinge on any metal of the outer jacket, car structures, trucks or safety appliances. Suitable provison must be made to allow for thermal expansion and contraction.

(1) *Loading and unloading line.* A liquid phase transfer line must be provided and it must have a manually operated shut-off valve located as close as practicable to the outer jacket, plus a secondary closure that is liquid and gas tight. This secondary closure must permit any trapped pressure to bleed off before the closure can be removed completely. A vapor trap must be incorporated in the line and located as close as practicable to the inner tank. On a DOT–113A60W tank car, any loading and unloading line must be vacuum jacketed between the outer jacket and the shut-off valve and the shut-off valve must also be vacuum jacketed

(2) *Vapor phase line.* A vapor phase line must connect to the inner tank and must be of sufficient size to permit the pressure relief devices specified in § 179.400–20 and connected to this line to operate at their design capacity without excessive pressure build-up in the tank. The vapor phase line must have a manually operated shut-off valve located as close as practicable to the outer jacket, plus a secondary closure that is liquid and gas tight. This secondary closure must permit any trapped pressure to bleed off before the closure can be removed completely.

(3) *Vapor phase blowdown line.* A blowdown line must be provided. It must be attached to the vapor phase line specified in paragraph (a)(2) of this section, upstream of the shut-off valve in that line. A by-pass line with a manually operated shut-off valve must be provided to permit reduction of the inner tank pressure when the vapor phase line is connected to a closed system. The discharge from this line must be outside the housing and must be directed upward and away from operating personnel.

(b) Any pressure building system provided for the purpose of pressurizing the vapor space of the inner tank to facilitate unloading the liquid lading must be approved.

§ 179.400–18 Test of inner tank.

(a) After all items to be welded to the inner tank have been welded in place, the inner tank must be pressure tested at the test pressure prescribed in § 179.401–1. The temperature of the pressurizing medium may not exceed 100°F. during the test. The inner tank must hold the prescribed pressure for a period of not less than ten minutes without leakage or distortion. In a pneumatic test, due regard for the protection of all personnel should be taken because of the potential hazard involved. After a hydrostatic test the container and piping must be emptied of all water and purged of all water vapor.

(b) Caulking of welded joints to stop leaks developed during the test is prohibited. Repairs to welded joints must be made as prescribed in AAR Specifications for Tank Cars, Appendix W.

§ 179.400–19 Valves and gages.

(a) *Valves.* Manually operated shut-off valves and control valves must be provided wherever needed for control of vapor phase pressure, vapor phase venting, liquid transfer and liquid flow rates. All valves must be made from approved materials compatible with the lading and having satisfactory properties at the lading temperature.

(1) Liquid control valves must be of extended stem design.

(2) Packing, if used, must be satisfactory for use in contact with the lading and of approved materials that will effectively seal the valve stem without causing difficulty of operation.

(3) Each control valve and shut-off valve must be readily operable. These valves must be mounted so that their operation will not transmit excessive forces to the piping system.

(b) *Gages.* Gages, except portable units, must be securely mounted within suitable protective housings. A liquid level gage and a vapor phase pressure gage must be provided as follows:

(1) *Liquid level gage.*

(i) A gage of approved design to indicate the quantity of liquefied lading within the inner tank, mounted where it will be readily visible to an operator during transfer operations or storage, or a portable gage with a readily accessible connection, or

(ii) A fixed length dip tube, with a manually operated shut-off valve located as close as practicable to the outer jacket. The dip tube must indicate the maximum liquid level for the allowable filling density. The inner end of the dip tube must be located on the longitudinal centerline of the inner tank and within four feet of the transverse centerline of the inner tank.

(2) *Vapor phase pressure gage.* A vapor phase pressure gage of approved design, with a manually operated shut-off valve located as close as practicable to the outer jacket. The gage must

indicate the vapor pressure within the inner tank and must be mounted where it will be readily visible to an operator. An additional fitting for use of a test gage must be provided.

§ 179.400–20 Pressure relief devices.

(a) The tank must be provided with pressure relief devices for the protection of the tank assembly and piping system. The discharge from these devices must be directed away from operating personnel, principal load bearing members of the outer jacket, car structure, trucks and safety appliances. Vent or weep holes in pressure relief devices are prohibited. All main pressure relief devices must discharge to the outside of the protective housings in which they are located, except that this requirement does not apply to pressure relief valves installed to protect isolated sections of lines between the final valve and end closure.

(b) *Materials.* Materials used in pressure relief devices must be suitable for use at the temperature of the lading and otherwise compatible with the lading in both the liquid and vapor phases.

(c) *Inner tank.* Pressure relief devices for the inner tank must be attached to vapor phase piping and mounted so as to remain at ambient temperature prior to operation. The inner tank must be equipped with one or more pressure relief valves and one or more safety vents (except as noted in paragraph (c)(3)(iv) of this section), and installed without an intervening shut-off valve (except as noted in paragraph (c)(3)(iii) of this section). Additional requirements are as follows:

(1) *Safety vent.* The safety vent shall function at the pressure specified in § 179.401–1. The safety vent must be flow rated in accordance with the applicable provisions of AAR Specifications for Tank Cars, Appendix A, and provide sufficient capacity to meet the requirements of AAR Specifications for Tanks Cars, Appendix A, A8.07(a).

(2) *Pressure relief valve.* The pressure relief valve must:

(i) be set to start-to-discharge at the pressure specified in § 179.401–1, and

(ii) meet the requirements of AAR Specifications for Tank Cars, Appendix A, A8.07(b).

(3) *Installation of safety vent and pressure relief valve.*

(i) *Inlet piping.*

(A) The opening through all piping and fittings between the inner tank and its pressure relief devices must have a cross-sectional area at least equal to that of the pressure relief device inlet, and the flow characteristics of this upstream system must be such that the pressure drop will not adversely affect the relieving capacity or the proper operation of the pressure relief device.

(B) When the required relief capacity is met by the use of multiple pressure relief device placed on one connection, the inlet internal cross-sectional area of this connection must be sufficient to provide the required flow capacity for the proper operation of the pressure relief device system.

(ii) *Outlet piping.*

(A) The opening through the discharge lines must have a cross-sectional area at least equal to that of the pressure relief device outlet and may not reduce the relieving capacity below that required to properly protect the inner tank.

(B) When the required relieving capacity is met by use of multiple pressure relief devices placed on a common discharge manifold, the manifold outlet internal cross-sectional area must be at least equal to the combined outlet areas of the pressure relief devices.

(iii) Duplicate pressure relief devices may be used when an approved 3-way selector valve is installed to provide for relief through either duplicate pressure relief device. The 3-way valve must be included in the mounting prescribed by AAR Specifications for Tank Cars, Appendix A, A6.02(g), when conducting the flow capacity test on the safety vent prescribed by AAR Specifications for Tank Cars, Appendix A, A6.01. Flow capacity tests must be performed with the 3-way valve at both of the extreme positions as well as at the mid-position and the flow capacity must be in accordance with AAR Specifications for Tank Cars, Appendix A, A8.07(a).

(iv) An alternate pressure relief valve, set as required in § 179.401–1, may be used in lieu of the safety vent, provided it meets the flow capacity prescribed in AAR Specifications for Tank Cars, Appendix A at a flow rating pressure of 110 percent of its start-to-discharge pressure. Installation must—

(A) Prevent moisture accumulation at the seat by providing drainage away from that area,

(B) Permit periodic drainage of the vent piping, and

(C) Prevent accumulation of foreign material in the vent system.

(4) *Evaporation control.* The routine release of vaporized lading may be controlled with a pressure controlling and mixing device, except that a pressure controlling and mixing device is required on each DOT–113A60W car. Any pressure controlling and mixing device must—

(i) Be set to start-to-discharge at a pressure not greater than that specified in § 179.401–1;.

(ii) Have sufficient capacity to limit the pressure within the inner tank to that pressure specified in § 179.401–1, when the discharge is equal to twice the normal venting rate during transportation, with normal vacuum and the outer shell at 130°F; and

(iii) Prevent the discharge of a gas mixture exceeding 50% of the lower flammability limit to the atmosphere under normal conditions of storage or transportation.

(5) *Safety interlock.* If a safety interlock is provided for the purpose of allowing transfer of lading at a pressure higher than the pressure control valve setting but less than the pressure relief valve setting, the design must be such that the safety interlock will not affect the discharge path of the pressure relief value or safety vent at any time. The safety interlock must automatically provide an unrestricted discharge path for the pressure control device at all times when the tank car is in transport service.

(d) *Outer jacket.* The outer jacket must be provided with a suitable system to prevent buildup of annular space pressure in excess of 16 psig or the external pressure for which the inner tank was designed, whichever is less. The total relief area provided by the system must be a minimum of 25 square inches, and means must be provided to prevent clogging of any system opening, as well as to ensure adequate communication to all areas of the insulation space. If a safety vent is a part of the system, it must be designed to prevent distortion of the frangible disc when the annular space is evacuated.

(e) *Piping system.* Where a piping circuit can be isolated by closing a valve, means for pressure relief must be provided.

§ 179.400–21 Test of pressure relief valves.

Each valve must be tested with air or gas for compliance with § 179.401–1 before being put into service.

§ 179.400–22 Protective housings.

Each valve, gage, closure and pressure relief device, with the exception of secondary relief valves for the protection of isolated piping, must be enclosed within a protective housing. The protective housing must be adequate to protect the enclosed components from direct solar radiation, mud, sand, adverse environmental exposure and mechanical damage

incident to normal operation of the tank car. It must be designed to provide reasonable access to the enclosed components for operation, inspection and maintenance and so that vapor concentrations cannot build up to a dangerous level inside the housing in the event of valve leakage or pressure relief valve operation. All equipment within the protective housing must be operable by personnel wearing heavy gloves and must incorporate provisions for locks or seals. A protective housing and its cover must be constructed of metal not less than 0.119 inch thick.

§ 179.400–23 Operating instructions.

All valves and gages must be clearly identified with corrosion-resistant nameplates. A plate of corrosion-resistant material bearing precautionary instructions for the safe operation of the equipment during storage and transfer operations must be securely mounted so as to be readily visible to an operator. The instruction plate must be mounted in each housing containing operating equipment and controls for product handling. These instructions must include a diagram of the tank and its piping system with the various gages, control valves and pressure relief devices clearly identified and located.

§ 179.400–24 Stamping.

(a) A tank that complies with all specification requirements must have the following information plainly and permanently stamped into the metal near the center of the head of the outer jacket at the "B" end of the car, in letters and figures at least ⅜-inch high, in the following order:

	Example of required stamping
Specification	DOT–113A60W.
Design service temperature	Minus 423° F.
Inner tank	Inner Tank.
Material	ASTM A240–304.
Shell thickness	Shell 9/16 inch.
Head thickness	Head 9/16 inch.
Inside diameter	ID 107 inch.
Inner tank builder's initials	ABC.
Date of original test (month and year) and initials of person conducting original test.	00–0000GHK.
Water capacity	00000 lbs.
Outer jacket	Outer jacket.
Material	ASTM A515–70.
Outer jacket builder's initials	DEF.
Car assembler's initials (if other than inner tank or outer jacket builder).	XYZ.

(b) Any stamping on the shell or heads of the inner tank is prohibited.

(c) In lieu of the stamping required by paragraph (a) of this section, the specified markings may be incorporated on a data plate of corrosion-resistant metal, fillet welded in place on the head of the outer jacket at the "B" end of the car.

§ 179.400–25 Stenciling.

Each tank car must be stenciled in compliance with the provisions of the AAR Specifications for Tank Cars, Appendix C. The stenciling must also include the following:

(a) The date on which the frangible disc was last replaced and the initials of the person making the replacement, on the outer jacket in letters and figures at least 1½ inches high.

(b) The design service temperature and maximum lading weight, in letters and figures at least 1½ inches high adjacent to the hazardous material stencil.

(c) The water capacity, in pounds net at 60°F., with the tank at its coldest operating temperature, after deduction for the volume above the inlet to the pressure relief device or pressure control valve, structural members, baffles, piping, and other appurtenances inside the tank, in letters and figures at least 1½ inches high.

(d) Both sides of the tank car, in letters at least 1½ inches high, with the statement "Do Not Hump or Cut Off While in Motion."

(e) The outer jacket, below the tank classification stencil, in letters at least 1½ inches high, with the statement, "vacuum jacketed."

§ 179.400–26 Certificate of construction.

See § 179.5.

52. Section 179.401 is revised and § 179.401–1 is added to read as follows:

§ 179.401 Individual specification requirements applicable to inner tanks for cryogenic liquid tank car tanks.

§ 179.401–1 Individual specification requirements.

In addition to § 179.400, the individual specification requirements for the inner tank and its appurtenances are as follows:

DOT specification	113A60W	113C120W
Design service temperature, °F.	−423	−260.
Material	§ 179.400–5	§ 179.400–5.
Impact test (weld and plate material).	§ 179.400–5(c)	§ 179.400–5(c).
Impact test values	§ 179.400–5(d)	§ 179.400–5(d).
Standard heat transfer rate. (Btu per day per lb. of water capacity, max.) (see § 179.400–4).	0.097	0.4121.
Bursting pressure, min. psi.	240	300.
Minimum plate thickness shell, inches (see § 179.400–7(a)).	9/16	9/16.
Minimum head thickness, inches (see § 179.400–7 (a), (b), and (c)).	9/16	9/16.
Test pressure, psi (see § 179.400–16).	60	125.
Safety vent bursting pressure, max. psi.	80	120.
Pressure relief valve start-to-discharge pressure, psi (± 3 psi).	30	75.
Pressure relief valve vapor tight pressure, min. psi.	24	60.
Pressure relief valve flow rating pressure, max. psi.	40	85.
Alternate pressure relief valve start to-discharge pressure, psi (± 3 psi).		90.
Alternate pressure relief valve vapor tight pressure, min. psi.		72.
Alternate pressure relief valve rating pressure, max. psi.		100.
Pressure control valve, psi.	17	Not required.
Start-to-vent, max. psi (see § 179.400–18(c)(4) Relief device discharge restrictions.	§ 179.400–18	§ 179.400–18.
Transfer line insulation	§ 179.400–15	Not required.

53. Paperwork Reduction Act: Information collection requirements contained in the following sections of this regulation have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Following the text of each section listed below, add parenthetically the specified OMB control number.

Section	*OMB Control No.*
173.11	2137–0541
177.816	2137–0540
177.818	2137–0539
177.836	2137–0541
177.840	2137–0542
178.338–2	2137–0017
178.338–4	2137–0017
178.338–19	2137–0017

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53 and App. A. to Part 1)

Note.—The Materials Transportation Bureau has determined that this document 1) will not result in a "major rule" under the terms of Executive Order 12291, 2) is not a significant regulation under DOT's regulatory policy and procedures (44 FR 11034), and 3) does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321 *et seq.*). Based on comments received in response to the NPRM, I certify that this amendment will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation and environmental assessment is available for review in the docket. Approval of reporting and recordkeeping requirements under the Paperwork Reduction Act of 1980 has been issued by the Office of Management and Budget.

Issued in Washington, D.C. on June 2, 1983.

L. D. Santman,

Director, Materials Transportation Bureau.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Last Listing June 9, 1983

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents. U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

H.J. Res. 201 / Pub. L. 98–39 Designating June 14, 1983, as "Baltic Freedom Day". (June 13, 1983; 97 Stat. 208) Price: $1.50
